UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

REGION THREE
SANTA FE, NEW MEXICO

February 6, 1947.

MEMORANDUM for the Assistant Regional Director.

There follows the narrative report for Naturalists of the Southwestern National Monuments for the months of December, 1946, and January, 1947.

General

The two months were occupied generally with field trips, which to personnel dealing with widely scattered areas are decidedly inspirational. An office man falls in love with the areas all over again and enthusiasm of the field men gives real emphasis to plans for future progress. Custodians and Rangers were found to be alert and optimistic, and new rangers and archeologists are breaking in nicely.

Naturalist King traveled with Regional Archeologist Reed to Chaco Canyon from December 3 to 5; with Archeologist Reed and Assistant Regional Director Davis to Gran Quivira, Abo and Quarai December 11 and 12; and with Archeologist Steen to Chaco Canyon and Casa Grande on December 23 and 24. From December 25 to January 17, King went unaccompanied to Saguaro, Chiricahua, Tumacacori (twice), Organ Pipe Cactus, Casa Grande again, Tonto, Montezuma Castle, Montezuma Well, Tusigoot, Walnut Canyon, and Petrified Forest.

Archeologist Charlie R. Steen was on ruins stabilization at Casa Grande until December 16, when he returned to headquarters. He went to Chaco Canyon on official business on December 23, and took annual leave from December 25 to December 29. He spent January 15 through 21st on relief duty at Tumacacori and left the Region Three Office again on January 29 for Chaco Canyon, Grand Canyon and Montezuma Castle.

Administration - Investigation of Boundary Changes

At Tumacacori, King interviewed local land owners in an attempt to make arrangements for the possible donation to the government or acquisition by the government of sufficient land north of the Monument to preserve the ancient lime kilns, which are now outside the boundary. The problem is complicated for the land owner has only one narrow access road to his property, the donation of part of which, including the lime kilns, would cramp him unnecessarily. If one of several plots farther along the highway could be acquired, perhaps access could be had through that land and a trade made for the lime kilns.

UNITED STATES

REGION THREE
SANTA FE, NEW MEXICO

February 8, 1947.

MEMORANDUM for the Assistant Regional Director.

There follows the narrative report for the Assistant Regional Director for the month of December, 1946, and January, 1947.

General

The two months were occupied generally with field trips, which to personnel dealing with widely scattered resources decidedly in-
efficient. An often man field in town with the work all over
again and again. The field man gives most emphasis to plans
for future progress. Inspections and reports were found to be most
and new reports and archaeological are looking in
nicely.

Inspection trip traveled with Regional Archaeologist and
Chaco Canyon from December 3 to 6 with archaeological work and
Assistant Regional Director visits to Chaco Canyon, Aztec and
December 11 and 12, and with archaeological work to Chaco Canyon
and Mesa Verde on December 22 and 23. From December 23 to January
17, King was accompanied by Lawrence, Chiriquito, Thompson (Chaco),
Chaco Canyon, Mesa Verde, Aztec, Santa Fe, Santa Fe, Santa Fe,
Santa Fe, Santa Fe, Santa Fe, Santa Fe, Santa Fe, Santa Fe, Santa Fe.

Archaeologist Charles A. Spurr was on mesa established at
Chaco Canyon until December 10, when he returned to headquarters.
He went to Chaco Canyon on official business on December 22, and
took annual leave from December 22 to December 23. He spent
January 10 through 12 on relief duty at Thompson and left
the region three days again on January 13 for Chaco Canyon, Grand
Canyon and Montezuma Castle.

Administrative - Inspection of Boundary Changes

At Thompson, King interviewed local land owners in an attempt
to make arrangements for the possible donation to the Government of
acquisition by the Government of sufficient land north of the boundary
to preserve the ancient line line, which are now outside the boundary.
The problem is complicated for the land owner has only one narrow
access road to his property, the donation of part of which, including
the line line, would strip him unnecessarily. If one of several plots
further along the highway could be acquired, perhaps access could be
had through that land and a trade made for the line line.

Administration - Personnel

Several letters were written to Naturalist Maurice Sullivan of Acadia National Park, who during January decided to accept a transfer from that area to the natural history naturalist position in Southwestern National Monuments. When Mr. Sullivan reports to duty about March 1, he will bring the staff again to full strength.

On January 16, Steen in the Archeologist position PMS-2 was re-allocated to PMS-6, while King, in the Naturalist PMS-5 position was reallocated to PMS-4.

Interpretation - Public Relations

Through the Southwestern Monuments Association a request was made to the Custodian, White Sands, to donate several pieces of colonite to the Corinth Free Library, Corinth, New York. These exhibits were asked for by Mrs. A. E. Miller and her son, who have visited almost all of the National Park areas in the West.

Interpretation - New or Unusual Activities

With the respective Custodians of Montezuma Castle and Walnut Canyon, guide leaflets for the Sycamore Trail at the Castle and the Island Trail at Walnut Canyon were planned for the coming season. A leaflet will also be prepared for Montezuma Well, if that property is added to Montezuma National Monument.

Both of the Montezuma leaflets will be mimeographed for this season but the Walnut Canyon one, which was tested last year, will be improved by the addition of photographs and line drawings and will be photolithographed by the Southwestern Monuments Association. When a series of several leaflets are thus handled, it is hoped that they can be used as exhibits to obtain sufficient funds from the Bureau of the Budget to handle the program.

Interpretation - Museum Acquisitions

In December a rancher near Puye brought into the office a remarkable collection of more than 160 shrine sticks found on his property. Arrangements are being made for the possible acquisition of the collection, for deposit at the Bandelier National Monument museum.

In January it was learned that the Palmer Collection at Mesa Verde may now be distributed through its various points of origin through permission by Mr. Palmer's son. This means that the money will be returned to Montezuma Castle, and Casa Grande and Chaco Canyon will receive their respective portions.

Introduction

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into two main parts: a theoretical analysis and an empirical study. The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

The study is organized as follows. Chapter 1 contains the introduction. Chapter 2 contains the theoretical analysis. Chapter 3 contains the empirical study. Chapter 4 contains the conclusions.

Chapter 1: Introduction

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into two main parts: a theoretical analysis and an empirical study. The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

Chapter 2: Theoretical Analysis

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into two main parts: a theoretical analysis and an empirical study. The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into two main parts: a theoretical analysis and an empirical study. The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

Chapter 3: Empirical Study

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into two main parts: a theoretical analysis and an empirical study. The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

The theoretical analysis is based on the principles of the system and the proposed changes. The empirical study is based on the results of the experiments conducted.

Interpretation - Information

Extensive revisions were made on two-fold leaflets for Grand Canyons, Canyon de Chelly, Navajo, Casa Grande, Tusigoot, Montezuma Castle, and Walnut Canyon. The manuscripts were forwarded to the Washington Liaison Office.

Photographs and literature were mailed out in response to 14 letter inquiries including three from publishers who are producing travel books of the Southwest.

A manuscript by Russell L. Mahan, of Arches National Monument was edited for inclusion in the National Park Service issue of Utah Magazine, this coming spring.

Research and Observation - Staff Projects

Continuing attempts to find suitable personnel for a proposed Survey Archeologist job was disallowed because the position had not been approved by the Bureau of the Budget.

King, on the long field trip, checked status of Observation and Part files in the various national monuments, making suggestions for improvement, and compiling lists of subject headings to be included in a master subject heading list which will be issued in February, it is hoped.

Arrangements were made with the Custodian, Montezuma Castle, to obtain photographs of skulls from the area for inclusion in a paper by Miss Katherine Bartlett of the Museum of Northern Arizona. This paper will appear in the forthcoming publication of the Southwestern Monuments Association on the Archeology and Textiles of Montezuma Castle and Montezuma Well.

Region Three Office Library

Several publications were obtained for field libraries, notably the Snake Town excavation reports for the Custodian at Tusigoot. Geological maps were ordered for the branch of Planning and a survey was made of binding needs for the library and an estimate forwarded to the Director.

Acquisitions were 7 books, 55 periodicals, 12 pamphlets and 3 reprints.

Southwestern Monuments Association

Collaborator A. C. Bunkenberg made a donation of \$1,000 to the Association. The sum is to be used exclusively for research and experimentation designed to improve the techniques of ruins stabilization.

The book "First Penthouse Dwellers of America" came off the press the middle of December and 700 copies were received by the Association. Most of these books have been distributed to the field by the end of January.

THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

Executive Secretary King addressed an inquiry to Librarian Malcolm G. Wyer, of the Denver Public Library concerning the possibility of the Association joining a cooperative book buying organization which enables non-profit and educational institutions having libraries to obtain publications at 1/3 discount. The Denver Library also maintains a Regional Bibliographical Center, membership in which may prove of much value to the Association.

Reports and Memoranda

The usual reports and 76 letters were written.

Photography and Visual Aids

Forty-three slides, archeological in nature, were sent to Dr. Carl Chapman, Director of American Archeology, University of Missouri, who plans to use them in his classes and lectures. Dr. Chapman is having the slides duplicated and will return the originals to our files.

Visitors

Custodians Wilson and Thomas, Ranger Eden, Archeologist Ed Stallings, Stanley Stubbs, and Dr. Herra, and Southwestern Monuments Association member Gilbert Maxwell of Farmington, New Mexico, who aided greatly in the acquisition of the Hubbard Mound north of Aztec Ruins National Monument.

Protection - Ruins Stabilization

The extremely valuable contribution of Mr. Buchenberg has been mentioned above. Also he submitted a detailed and excellently thought out plan for outlining reports of structural details of ruins stabilization needs. This report was read and commented upon, and is being held for partial or total inclusion in the forthcoming ruins stabilization manual.

A standard placard with removable letters was received for use in ruins stabilization record pictures but letters had only one flange, and were returned to exchange for letters with two flanges which would not be whipped off the board by the wind.

Archeologist Steen submitted a detailed report describing the necessary drainage program for the ruins on Casa Grande National Monument, and estimating cost.

Additional recordation sheets were ordered from the Government Printing Office. Steen wrote several letters to manufacturers of preservative materials to obtain information concerning their products. He also wrote for Regional Director Fillmore a memorandum summing up the present status of knowledge concerning preservative fluids which might be used on the crumbling stone carvings at San Jose Mission in San Antonio, Texas.

UNITED STATES
DEPARTMENT OF THE INTERIOR

In general the ruins stabilization activities in almost all of the monuments were hampered considerably by the lack of adequate wage ceilings. Work is going forward nicely at Chaco Canyon but no labor can be hired at monuments like Tusigoot, Montezuma Castle, and Tuzigoot until wage ceilings are raised. This is a dangerous situation for it postpones too much of the program into the spring months, and places us again in the position of having to guard against too much haste.

Projects for February

King will remain in the office during the month handling routine affairs.

Steen will place house jacks under the cracking cave ceilings at Montezuma Castle and will make such other trips as are necessary in the administration of ruins stabilization activities.

The Natural History Naturalist position possibly will remain unfilled until near the end of the month.

----- Arches ----- NATIONAL MONUMENT

Moab, Utah

January 25, 19 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of January, 1947:

GENERAL: The custodian was absent on annual leave at Salt Lake City, Utah from December 27th to January 1st, inc.

WEATHER: Snow fell on December 27th and the temperature dropped to 1 degree above zero. The balance of the month saw the nightly temperature range between 1 and 10 degrees above zero with very cold days.

TRAVEL: Travel was very slow this month due to extreme weather conditions with only 13 cars and 27 people visiting the area. All travel was from Utah and Colorado.

INTERPRETIVE SERVICES: No contacts were made in the Windows Section and only two people were contacted at headquarters. During a period of annual leave at Salt Lake City three illustrated lectures were given on Scenic Areas of Southeastern Utah.

ROADS: Very little maintenance was accomplished on the Windows road during the latter part of December due to the snowstorm of December 27th. The road is packing well but is developing rough spots. Not much can be done on improvement until our cold weather breaks.

SPECIAL ACTIVITIES: Two contacts were made with officials of the Utah State Department of Publicity and Industrial Development at Salt Lake City, Utah on December 28th and 30th. Estimates were furnished for improvement of present roads to points of interest in this section and also estimates on ultimate development of these areas. A series of color slides were shown to six members of this department.

EMPLOYMENT: Billy Walker, Laborer-Leadman on road maintenance was terminated on December 28th due to weather conditions.

MAINTENANCE AND CONSTRUCTION: Estimates were received from local concerns for construction of two latrines to be installed at the Windows parking area and for painting of headquarters area buildings.

----- NATIONAL MONUMENT

Aztec Ruins,

Aztec, New Mexico.

28 January 1947.

-----, 19-----

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for
January 1947.

WEATHER. Cold weather with a low of minus 9 and high temperatures ranging in the upper thirties seems to have discouraged visitation, and those who did brave the weather quite often found it too cold to join a trip thru the ruins, but contented themselves with the museum and a glimpse of the ruins from the museum building. During several successive days the maximum temperature has remained below freezing with trees and shrubs coated with ice thru day and night. A total of five inches of snow has been recorded for the month.

MAINTENANCE. The major portion of our effort this month has been centered upon the drainage ditch in an attempt to clean out the mud and sand that blocks a considerable portion of its length. We have tried with little success to ram a steel sewer rod thru the blocking material. The sewer rods are now being abandoned and we shall try to use a traveling nozzle which will force water under pressure into the lower end of the blocked pipe, washing away the material as it is encountered.

COOPERATING GOVERNMENTAL AGENCIES. The SCS at Farmington, N.M. has suggested the traveling nozzle in an attempt to clear the drainage ditch. With their help, of which they have given freely and often, help from the City of Farmington Water Dept., and that of the Aztec Water and Fire Dept. we hope to gather together enough machinery and materials to make some effect upon this stalemated situation.

Interpretive Services. There were 118 people conducted in 27 trips thru the ruins and 214 people in 46 trips were shown the museum.

INCREASE IN TRAVEL. A slight increase this month over a year ago is indicated in comparative travel figures; Jan 1947, 214 people in 62 cars from 15 states including 1 member of the armed forces; Jan 1946, 210 people in 58 cars from 15 states including 17 members of the armed forces.

PERSONNEL. Park Ranger Wm. G. Reed reported for duty 2 January 1947.

PROPOSED ACTIVITIES FOR FEBRUARY. Continue drainage ditch operations.

It is to be marked with the appropriate classification marking and the appropriate handling instructions.

There are three and a half miles in all along the coast.

1. The first step in the process of identifying a potential threat is to determine the nature of the threat. This can be done by reviewing the threat's history, its current status, and its potential impact on the community. Once the nature of the threat has been identified, the next step is to assess the threat's risk to the community. This can be done by evaluating the threat's potential to cause harm, its potential to spread, and its potential to be controlled. Once the risk has been assessed, the next step is to develop a plan to address the threat. This plan should include measures to prevent the threat from occurring, measures to control the threat if it does occur, and measures to recover from the threat if it does occur. Finally, the plan should be implemented and the threat should be monitored to ensure that it is being effectively addressed.

1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 26

NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

January 29, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of January, 1947.

Weather and Roads

Weather for the month was generally fair and cold with a few light snows mixed in. High for the month was 56° and low was minus 16°. .32 inches of moisture fell.

Roads have been in good condition most of the month. Only twice was it necessary to plow the snow off the approach road.

Maintenance

The project of treating and replacing exposed vigas on all the buildings is about 50% complete. The force account painting and decorating job is progressing rapidly.

Travel

248 visitors came to Bandelier during January, arriving at the area in 72 automobiles. 69 of these cars were original entries. The road to Bandelier has been in fair condition during the month. Nevertheless, it is believed that many bonafide tourists were probably skeptical about traveling this distance from town during this time of year because of fear of road conditions.

11 men in military uniform visited the area.

Interpretation

32 tours to the ruins were conducted with a total attendance of 119. The average duration of each tour was 1 hour and 5 minutes. The return trip from the ruins is being made by coming back through Tyuonyi because of snow on the trails on the floor of the canyon.

[illegible]

1. The first of these is the fact that the rate of interest is not a constant but varies with the rate of inflation. The rate of interest is the rate at which the price of money is rising. If the rate of inflation is 10% and the rate of interest is 5%, then the real rate of interest is -5%.

The utility of our museum was greatly diminished during the month because of lack of heat in those rooms. It was found that most all visitors were eager to see the museum, but it was too chilly for any of them to spend much time studying it. However, in spite of this, many nice compliments were received about the organization and nature of the museum.

There have been a considerable number of deer seen in the canyon during the month and these provide much enjoyment for the visitors.

Two programs, outside the monument, were presented during the month. Custodian Thomas spoke at a meeting of the Kiwanis Club at Santa Fe and Clerk Glen Bean presented an illustrated talk to Region Three personnel.

Visitors

Naturalist D. E. McHenry, formerly of the National Capitol Parks, visited Bandelier on January 1st. Naturalist McHenry and his family were enroute to Yosemite where he will take up his duties as Naturalist at that area.

State Game Warden T. J. Ramsey, of the State Department of Game and Fish, paid us a friendly visit on January 23. He informed us that his headquarters are in Espanola and he will have jurisdiction over most of the area which borders Bandelier on the north, and expressed his desire to cooperate closely with us on fish and game problems.

S. F. Fraistad, of the Treasury Department, visited the area on January 11.

Surplus Property

We have received considerable property from Surplus during the month. Three good pack mules came from Ogden, Utah. We also received a 25 KW diesel power plant from Ogden. Ranger Eden made a trip to Grand Canyon during the month to bring in a 10 KW power plant, a road

The ability of the women was greatly diminished during the month because of lack of rest in their homes. It was found that most all visitors were women. The women, but it was not really the way of them to spend time sleeping in. However, in spite of this, many who complained were treated about the organization and nature of the women.

There have been a number of women at this time in the region. During the month and these people were assigned to the visitors.

The visitors, outside the women, were assigned during the month. The visitors were assigned to the women and the women were assigned to the visitors. The visitors were assigned to the women and the women were assigned to the visitors.

Visitors

roller and a small oil heater. We will make more trips this month to haul other equipment being transferred to this area.

Personnel

The custodian returned from annual leave January 5. From January 13 to January 28 he was on special detail in the Region Three Office. This area reached another mile stone this month when a full time clerk was put on. Glen Bean of Alamosa, Colorado reported for duty January 2. He spent the most of the month on special detail for training purposes in the Region Three Office and reported for duty at Bandelier January 26.

..... NATIONAL MONUMENT
Canyon de Chelly

Chino, Arizona

January 25, 1947 19 47

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of January, 1947.

Weather Conditions

Temperatures have been about normal for this period with a minimum of -1 degrees and a maximum temperature of 52 degrees. Although the surrounding areas received quite a bit of moisture in the form of snow and the Spider Rock and Monument Canyon sections of the monument also received a considerable amount, the recorded amount at headquarters was only .15 inches.

Administration

The custodian took annual and sick leave beginning December 23, and returned to duty on January 14.

One trip was made to Gallup New Mexico to meet Rangers Steel and Chittum and help them get over the mountain with a trailer house purchased from the war surplus and to be used as temporary quarters for the permanent Ranger.

Maintenance

During the Custodian's absence, Ranger Benson spent most of the time making building and minor repairs over the area. The Navajo Service Graded the road as far as headquarters and we have dug them as far as White house. New water pump and other repair work was necessary on the Chevrolet Pickup NO. USI-13840. A general inventory of equipment was made after the custodians return, and much time has been spent in taking care of the office work that piled up during his absence.

General Publicity

LOOK magazine for January 21, 1947 featured an article on Miss Maaron Glenby entitled "Artist and Model" in which were several pictures taken at Canyon de Chelly during Miss Glenby's visit here last Summer. The red Sand dunes adjacent to the area were used as a background for the "Glamour" photos.

Interpretive Services

Three conducted tours and one headquarters talk were made during this month. Ranger Benson spent a total of 5 hours with 2 parties composed of 9 persons. Custodian Guillet spent 4 hours with 1 party of three.

Increase in travel

Although January is always the lightest travel month of the year there were still 21 hardy souls in seven cars which is an increase of 50% over January of 1946.

INTERVIEWING TECHNIQUES

These techniques should not be interpreted as rigid rules but as guidelines. Interviewers should adapt them to the needs of the situation and the personality of the interviewee. The techniques are designed to help the interviewer to obtain the maximum amount of information from the interviewee.

PREPARATION OF THE INTERVIEW

It is essential that the interviewer be thoroughly prepared before the interview. This preparation should include a study of the subject matter, the interviewee's background, and the objectives of the interview. The interviewer should also develop a list of questions to ask the interviewee.

INTERVIEWING TECHNIQUES

The following techniques are designed to help the interviewer to obtain the maximum amount of information from the interviewee. These techniques should be used in conjunction with the preparation of the interview.

1. Establish rapport with the interviewee. This can be done by using a friendly and conversational tone. The interviewer should also show interest in the interviewee's background and experiences.

2. Use open-ended questions. These questions allow the interviewee to provide a detailed response. Examples of open-ended questions include "What happened next?" and "How did you feel about that?"

3. Use closed-ended questions. These questions allow the interviewer to obtain specific information. Examples of closed-ended questions include "Did you see the suspect?" and "What time was that?"

4. Use the funnel technique. This technique involves starting with open-ended questions and then narrowing the focus with closed-ended questions. This helps the interviewer to obtain a detailed response and then confirm the details.

5. Use the LAR technique. This technique involves asking the interviewee to describe a situation (L), identify the people involved (A), and describe the actions taken (R). This helps the interviewer to obtain a detailed response and then confirm the details.

6. Use the PQRST technique. This technique involves asking the interviewee to describe a situation (P), identify the people involved (Q), describe the actions taken (R), and describe the consequences (S). This helps the interviewer to obtain a detailed response and then confirm the details.

7. Use the 5W1H technique. This technique involves asking the interviewee to describe a situation (What), identify the people involved (Who), describe the actions taken (When), describe the consequences (Where), and describe the reasons (Why). This helps the interviewer to obtain a detailed response and then confirm the details.

8. Use the 5C technique. This technique involves asking the interviewee to describe a situation (Context), identify the people involved (Characters), describe the actions taken (Conflict), describe the consequences (Climax), and describe the resolution (Conclusion). This helps the interviewer to obtain a detailed response and then confirm the details.

ADDRESS REPLY TO
THE SUPERINTENDENT

January 27 1947.

Memorandum for the Regional Director, Region Three.

There follows report of the activities in and around Capulin Mountain National Monument for the month of January 1947.

Estimated three hundred visitors, for this month, bringing total travel year to date to, 3960 and travel fiscal year to date to 19960.

Roads in the monument have been in only fair condition this month. The custodian requested the state highway patrol for a little lift during the fore part of the month and one circle was made with the large winchman, this did some of the basic and heavier work that I could not do but left the road with a rather unfinished appearance and is still slightly loose and rough. We hope to get rid of this trouble this week, and get it all nice and smooth again.

Weather

Has been about as usual for January with about six or seven night from 2 to 10 below zero and the days running up to around 45 above, two quarter inch snows throughout the month.

Wild life in the monument is doing nicely the big snow in November looked bad for them but it was soon gone and so far the winter has been no worse than ordinary.

During the month considerable attention was given the boundary fence and repairs were made where the snow in November rode down the wires in several places, some repair was done to the cattle guard and some of the culverts the culvert is going to be removed and replaced, the road is lowering constantly and the culverts need lowering also.

Very Respectfully,
Homer J. Barr,
Custodian.

Region Three.

There follows the narrative report for Casa Grande National Monument for January 1947.

General: As the cotton season finally starts to windup in the valley a check on production indicates that totals far surpass anything on record. Although the price dropped somewhat in the last part of the season for the cotton farmer, it was period of great financial profit.

Weather: For 15 days during the report period our minimum thermometer wasn't functioning properly. The first three weeks were cold with maximums averaging around 55. The last week the Arizona sun really blossomed out and the maximums ranged in the 70's. The maximum for the month was 76 recorded on the 22nd.

Inventory of Publications: Casa Grande Nat. Mon. (2 Fold Leaflet) - 1900 Casa Grande National Monument (Spanish Leaflet) - 3150: Southwestern National Monument Folders - 5050: National Park Location Map # 6 - 50. Because of being low on the two fold leaflets we are holding back on issuing them and pushing map of Southwestern National Monuments.

Visitors: January 1947 - 4556; January 1946 - 2708; January 1945 - 1000. Travel year to Date 1947 - 16, 680; 1946 - 8,724, 1945 - 3402; 1941 - 5538. The winter visitor season has really hit and travel totals are again going by the boards. Our travel season to date total is almost double anything we have had on record before. The visitor is of the type that is spending the winter season in the valley and will stay with you on a trip just as long as you will talk to them. All the states in the union are represented in our totals as well as visitors from Cuba, Hawaii, Brazil, Canada, and Alaska.

Interpretive Services: Of the 4556 visitors to the area, 3360 made the Ruins trip, in 231 trips spending an average of 50 minutes at the Ruin. 2558 made the museum trip averaging approximately 30 minutes per trip. Total contacts were 5918. 1196 people came into the area for a quick look but did not make the Ruin trip. 65 members of the armed forces are included in the contact totals.

Maintenance: With the great number of visitors maintenance was routine. Gradually the excess gravel from road resurfacing is being picked up.

Publicity: Howard Pyle, Arizona Highlights Commentator on KTAZ, Phoenix Radio Station, gave a brief talk over the air on the Monument.

Talks Given: A twenty minute talk on "The Early History of Casa Grande National Monument" was given for the local Lions Club on January 15, 1947.

Trips Taken: January 2 and 3, Mechanic Stonehocker made trips to Phoenix and Florence in connection with War Assets Surplus materials. January 18, Custodian Bicknell made a trip to Tucson to attend Wildlife Conference and returned Sunday bringing Assistant Regional Director Scoyen with him. On Sunday the 19th. he took Mr. Scoyen up to Phoenix .

Visitors of Note and NP3 Visitors: January 3 and 24, Custodian Thomas of Bendellier was in. On the 3rd he stopped in on his way back from visiting his family in California and the 24th. he was in on Monument business. January 9, Associate Naturalist King stopped in to go over East File and SWM business. January 16 to 20, Archeologist Steen spent a few days with us recuperating from flu. January 18 and 24, Regional Forester Carlson was in in connection with fire tools and War Assets surplus materials. January 19, Assistant Regional Director Scoyen was in to discuss Monument problems.

Leaves Taken: Mechanic Stonehocker returned to work from approximately a months leave on January 15.

Approach road.....1&2
Accomplishments for physical plant.....2
Plans for coming months.....2
Progress of ruins stabilization.....2
Pueblo Bonito.....3
Chetro Ketl.....3

Irving McNeil, Jr.
Custodian

The weather during the month of January was very dry and cold. The average temperature was 45 degrees Fahrenheit. There was no snow or ice. The wind was mostly from the north and west. The humidity was low. The precipitation was 0.1 inches. The total number of visitors was 1. The number of cold weather days was 1. The number of approach road days was 1 and 2. The number of accomplishments for physical plant was 2. The number of plans for coming months was 2. The number of progress of ruins stabilization was 2. The number of Pueblo Bonito was 3. The number of Chetro Ketl was 3.

During the cold weather, the heating fuel supplier had some of the fuel tanks full. The pipes froze and burst. We repaired them and put a new tank. They have not been used. The other pipes froze, but by building and hanging new lines they should avoid freezing.

In the middle of the month, the old stone in the greenhouse's greenhouse was removed. The greenhouse was changed so that it had more of a fine and a temporary structure put on it. The stone was cleaned and put in better shape from the way it was. No more bricks had been experienced with it.

Plans of the month's activities have been laid in and suggestions have been made. The new fuel supply road building equipment had not yet started the road work.

Chaco Canyon

NATIONAL MONUMENT

Bloomfield, New Mexico

January 26,

1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of January, 1947.

There were a total of 15 visitors to Chaco Canyon during this past month. They came in 5 automobiles from the states of Colorado - 2, New Mexico - 3. Of these, 9 forming three parties took a trip through the ruins, while six stopped for information only. Altogether, they spent a total of 235 minutes. Guide time - Custodian 85 minutes, Ranger 150 minutes. Seven tickets were sold, but no complimentary tickets issued. At the end of the month, there were approximately 10, 288 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

The coldest weather in several winters struck Chaco on the 16th of January when the mercury dropped to 24 degrees below zero. There were 10 days during the month of sub-zero weather. Almost every pipe in the Canyon froze -- none of them on the coldest night, and seldom more than one on the same day. The warmest was 51 degrees Fahrenheit on the 26th of the month. Besides the cold weather, we had fifteen hundredths of an inch of rain and thirteen inches of snow during the month.

During the cold weather, the Trading Post operator had some of the toughest luck. His pipes froze and burst. He repaired them, and just a week later, they froze and burst again! The other pipes froze, but by building and keeping hot fires they thawed without breaking.

In the coldest weather, the oil stove in the Custodian's residence refused to function. The chimney was changed so that it had more of a flue and a temporary extension put on it. The stove was cleaned and put in better shape from chimney to floor. No more trouble has been experienced with it.

Eleven of the month's thirteen inches snow fell in six consecutive days. Then, the San Juan County road grading equipment came out and cleared the road north,

the fact that County Road, leading southwest from the intersection of the road with the railroad, was not shown on the map.

which made it much easier to travel, so the north approach road has remained in fair shape.

The month has been a busy one with many small and especially inside jobs accomplished.

On the 29th of December, with a good day and a cooperative set of visitors, pictures were taken and sent to Headquarters as requested by the Naturalist's Division.

An inspection trip was made to Pueblo Alto, and the area cleaned of accumulated trash.

In the Office, the floors were cleaned and waxed as was the furniture. In the museum, the floors were cleaned and waxed, and the two chairs were sanded and waxed and they present a much neater appearance.

The paint shop was thoroughly cleaned and rearranged as was the plumbing shop.

In the tool room, it was cleaned and then a substantial rack was built so that the tools now in the boxes outside can be cleaned, oiled and racked. Then, much better care and account can be taken of them. Also, a lumber rack, for our small amount of good lumber was constructed.

Some of the material at the old CCC camp site was hauled down to Headquarters.

As the close of the month comes, we are hoping for an early melting of the snow and some warmer weather. We have lots to do here at Chaco and hate to be held up by having to thaw pipes, repair chimneys and the like. Projects for the ensuing months:- finish hauling the material from the old CCC camp site; clean, grease and sharpen tools; paint the office when the paint arrives; get the fence project started again; paint and letter signs; keep office and routine duties current and get our roads in shape for the summer travel.

There follows the report from Archaeologist Richard C. Vivian on the Ruins Stabilization progress.

GENERAL

Despite extremely cold nights the days have presented favorable working conditions, free of high winds or snow storms. Seven men are now employed and they have been able to work throughout the month with the exception of one half day. The

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

which made it well suited to travel, as the south approach road has been widened to
four miles.

The road has been a very good one with many small and especially inside the
roadway.

On the 20th of January, with a good day and a cooperative set of conditions,
the road was taken and went to the highway as indicated by the following:

In the morning the road was taken to the highway, and the road was taken to the highway
road.

In the morning, the road was taken and went to the highway, and the road was taken to the highway

road. The road was taken and went to the highway, and the road was taken to the highway
road. The road was taken and went to the highway, and the road was taken to the highway
road.

first part of January was spent on small jobs at Pueblo Bonito and the remainder of the period, after the advent of cold weather, at Chetro Ketl.

PUEBLO BONITO

Wall repairs were completed on Kivas W and U. Excavation was partly completed around the south quarter of Kiva L on the edge of the plaza to correct deep underground seepage from rooms above and to the east. This is now in abeyance pending materials. On the west side of the ruin, plating which threw surface drainage against the wall of room 122 was removed. One man day was spent clearing large brush from low rooms in the northwest.

CHETRO KETL

The most extensive job here has been correction of the drainage in the east plaza and removal of the old excavating railroad grade which cut this drainage. Surface runoff which formerly drained into the great kiva on one side and into a series of 8 rooms and kivas on the other has been collected and diverted out through a natural opening to the south of the ruin. One large hole probably dug in exploration for lower structures, and undercutting a portion of the front walls here, has been backfilled.

Also backfilled along the front of the ruin were four partially excavated series of rooms. No room had been excavated completely and these cuts had been made only for exploratory purposes.

In the north central section of the ruin, large trenches left by the excavators below the floor level and below the bench of Kiva I have been backfilled. Twenty yards of soil were wheeled in.

Rooms 30, 35, 37, and an unnumbered hole south of I had also been cut below the bases of existing walls in exploration for lower structures. These cuts which left considerable good wall unsupported were also backfilled. Where possible, drainage was provided to the outside. Approximately thirty yards of dirt were wheeled into these areas of difficult access.

Surface drainage has also been corrected in a series of four unnumbered rooms in the northeast section and three in the northwest. (Many of the room numbers are not discernable on the only map we have been able to obtain to date of Chetro Ketl).

In progress at present is removal of the low railroad grade between the east

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

and west plazas and the placing of surplus dirt in low areas in the west plaza, designed to throw the surface runoff that now collects there farther to the south and away from standing walls.

As a byproduct of backfilling and surface drainage a large supply of building stone has been obtained. Part of this has been hauled to Pueblo Bonito, some distributed handy to contemplated work in Chetro K'edl and the rest stockpiled.

Tests on materials, soil-bitumen, soil-cement and masonry mortar are being continued and the results tabulated for the basis of a report. Some time has also been spent examining and tabulating the results of previous stabilization methods and materials in the Monument.

In the coming month we intend to start major wall repair at Chetro K'edl, complete the materials tests and catch up with the photographic records.

SUMMARY OF THE JANUARY, 1947, MONTHLY NARRATIVE REPORT FOR
CHIRICAHUA NATIONAL MONUMENT

A snowfall and a week or so of cold weather causing extra road maintenance and time spent thawing water pipes, were the outstanding items in the January activities. Naturalist Dale King visited the Monument. Travel is about a fifth greater than this month last year. Portal-Cave Creek road closed due to snow, as usual this time of year.

MEMORANDUM for the Regional Director, Region Three:

Following is a report of activities at Chiricahua National Monument for January.

Weather Conditions. On the second and third of January about 4 inches of snow fell, accompanied by considerable wind and cold. Some of that snow and that of the following week still remains on the north slopes and on trails in sheltered places. Temperatures as low as 15 to 20 degrees above zero occurred regularly at night for the early part of the month at Headquarters. Trees around Massai Point and on the high part of the Monument were covered with frost crystals up to an inch long or more.

Newsworthy Visitors. Naturalist Dale S. King made a brief visit early in the month. Marion Webber, Forest Supervisor from Harney National Forest, Custer, South Dakota, visited Custodian Cooke a few days.

Approaches to Monument Area. Approach roads were in fairly good condition except for a few days during the first week of January when general snows caused muddy roads and slowed down the travel. The Portal - Cave Creek road over the mountains has been closed all month due to the usual winter snow, and probably will not be consistently passable before April.

Interpretive Services. One conducted horseback trip was made by the Custodian, and one group of bus passengers received interpretive service from the Ranger. 589 visitors in 116 parties were contacted at the museum. Several contacts were made by the Custodian and Ranger at Massai Point or on the road in the Monument.

Travel. Travel figures showed a decrease of about 120 visitors from the preceding month. The snow and cold weather undoubtedly caused a decrease in visitation from the normal travel for the month. An increase of almost 25 per cent over January last year was noted.

General. With about four or five inches of snow on January 2 & 3, and more a few days later, considerable time was required to keep the road open to Massai Point. For several days it was passable only to cars with chains, and visitors were advised not to go up without chains. Due to the continued cold we had a little trouble keeping the plumbing thawed out in the headquarters and campground rest rooms, and in the campground laundry. Exposed hydrants froze but there was no breakage. It was necessary to go to Bisbee for a few tanks of petroleum gas as there was a local scarcity probably caused by the cold weather.

the old ways.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Wildlife. Apparently most of the deer and other larger animals are in the lower canyons, as very few tracks were observed on a recent horse-back trip over most of the trails. Deer are seen occasionally near Headquarters.

MEMORANDUM for the Regional Director,
Region Three.

There follows thereport of activities in El Morro National Monument
for the month of January.

WEATHER: Although the minimum temperature dropped to 26 degrees below
zero on the 16th. we have had unusually warm and fair weather for
January. The maximum temperature reached 58 degrees. Eight inches of *snow*
were recorded in three light storms, accounting for .18 inches of
precipitation.

APPROACH ROADS: The three light snow storms which occurred during the
month made our roads quite rough, but both roads are passable.

TRAVEL: Fourteen visitors in four cars arrived at the monument during
this report period. The tour of the inscriptions was made by eleven
visitors in three trips and the total guide time amounted to 3 hours
and 45 minutes. Having visitors at this time of the year is unusual
for in a normal year the roads are blocked with snow most of the time.

MAINTENANCE: Two loads of coal were hauled from the Indian Service
mine. After two months delay in obtaining parts the overhaul job on
the battery charger was finally completed. Juniper posts for a new
directional sign on the main road were cut, hauled and peeled.

ADMINISTRATION: Two trips were made to Gallup for repairs on the
pickup and supplies. Most of the month has been spent working on the
files which has turned out to be a major project.

PUBLIC HEALTH: At 10:00PM on the 14th a call was received from the
CAA emergency airfield reporting a forest fire on a ridge 15 miles
east of the monument. A TWA pilot had seen a large fire and near it's
edge a light signalling. A forest fire seemed a little out of season,
so we concluded that a plane must have crashed and set out to see if
we could locate it. Our first stop was the sawmill where we woke Mr.
James who immediately dressed to join us in the search. While dressing

he related in detail how he had heard a plane go over and suddenly it's motors stopped. He even went outside to have a look, so sure he was that something had gone wrong. From the sawmill we went to Cso Ridge lookout, but found the mountains engulfed in a heavy fog. With ceiling zero we decided that nothing could be done until daylight.

Daylight brought little change in the weather except some more snow , but by noon the fog had lifted and the sky was clear. The only new report from the GAA was that the Army was sending search planes, so we decided to do what we could on foot. Mr. James went north from the sawmill with five of his Indians and the El Morro crew went in from the west. From noon until dark the two crews covered approximately five square miles of ridges and canyons without finding any sign of a plane. The morning of the 16th was clear and two C54s flew low over the mountains for two hours. Fresh ground crews were rounded up at El Morro and Mr. James was out again with his Indians. At 10:00 AM Mr. James reported that he had found a Navajo who had been camped in the mountains for three days and admitted building a big fire on the night of Janusry 14th to relieve a toothache. This ended the search. I have often wondered how the Navajo treats a toothache. I wonder if intense heat is also good for sore feet,

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

JANUARY 26, 1947

The following is a summary of activities for the month of January, 1947.

Visitors this month totaled 72
Travel year to date 390

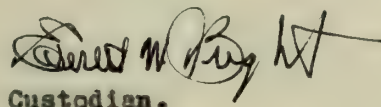

Weather. This has been a month of strong winds and some snow. Precipitation in the amount of .55 inches fell this month. High temperature was 54 and low 6 below zero.

Roads. Although road improvement was promised, after the first of the year, by the State Highway Department, none has materialized. All roads are very rough and visitors are again becoming discouraged from making the 52 mile round trip to the monument.

Travel. Visitation figures show a slight increase over the previous month of December. Instate visitors numbered 54 and outstate visitors 18. There were a total of 20 cars with instate numbering 15 and outstate 5. Most visitors are deeply interested in the mission and Indian ruins and plan to make a return trip this summer when they can stay longer.

Guide and Contact Service. A total of 72 visitors were conducted through the ruins on 20 guided tours. The average time spent by each party was 55 minutes. Total contact time of 18 hrs, 30 mins.

Maintenance and Administration. The old refrigerator was taken to Albuquerque for repairs. The repair shop personnel informed me that it would take some time to obtain the necessary parts but eventually, they promised, they would have it in good working order. Work continued on minor restoration jobs on the walls of the mission. New drainage pipes were installed in the kitchen sink to replace the old clogged-up one and it is now in perfect working condition.

Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Summary of the January, 1947,
Monthly Narrative Report for
Great Sand Dunes National Mon.

P-1 WEATHER: Very cold winter weather.

P-1 TRAVEL: 110 visitors, 32 cars.

P-1 INCREASE IN TRAVEL: For January 1946, 37 visitors, 14 cars.

P-1 ROADS: Dry and rough.

P-1 and 2 ACTIVITIES: Trying to thaw frozen water line. Replaced blown down flag pole. Make windows weather tight. Reconvert oil heater into furnace. Report on airfield sites. Post bids for gasoline.

STAFF, has limited the amount of day-trip permits issued this month during this report period. For this reason during the middle part of the month, camp work on this project has been stopped by lack of permits.

INCREASE IN TRAVEL. The records show that travel figures for January, 1947, are the highest for this year's figures, travel has greatly increased.

ROADS. Road conditions and approach roads are dry and rough. Little snow in the area this month.

ACTIVITIES. This report period has been most unpropitious - the "winter" season is now over. The new year brought a persistent cold which was bitterly cold - this caused the temperatures to drop very low and it stayed there for some days. The cold was broken nearly two weeks.

The cold wave froze up the water line leading to the waterline's entrance and when it is still frozen. Finally on our part, caused that the water line had been previously attached to. When the water stopped flowing, the water tank at the end was called, and it was discovered that the tank is the middle was damaged. The five feet long tank was filled with snow and ice. Several hours during the warmest part of the day was required to remove this tank from the tank of snow and ice in the tank. The water line was exposed in very close. Only 20 feet were exposed and then another was behind the pump.

Water has been obtained from some other in the area. The flow of water is getting low and the tank water will be almost gone. As we see, when the water line thaws, we will have water in town.

The water line was damaged when they were the flag pole and the tank was thrown the water (from) on the west side of the tank. The water line was damaged during this accident and investigation.

January 10, 1911
The Hon. Secretary of the
Department of the Interior

Dear Sir:

I have the honor to acknowledge the receipt of your letter of the 10th inst.

and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,

Very truly yours,
John D. Smith
Special Agent in Charge
Bureau of Land Management
Department of the Interior
Washington, D. C.

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

January 26, 1947

MEMORANDUM for the Director,
National Park Service.

There follows the report of activities in Great Sand Dunes National Monument for January, 1947.

WEATHER. The weather for this report period has been very cold. The new year greeted us with a cold snap that lasted nearly two weeks. During this time, the thermometer dipped way below zero at night, and during the day, the temperature didn't rise above 32 degrees.

TRAVEL. One hundred ten persons in thirty-two cars, visited this area during this report period. For nine days during the coldest part of the cold-wave, there were no visitors brave enough to face the cold northeast wind.

INCREASE IN TRAVEL. The records show that travel figures for January, 1946 to be: Cars, 14; Visitors, 37. Compared to this year's figures, travel has greatly increased.

ROADS. Both monument and approach roads are dry and rough. Little can be done with them until spring.

ACTIVITIES. This report period has been most aggravating - the "Singing Sands" struck a sour note. The new year brought a northeast wind which was bitterly cold - this caused the temperature to drop way below zero and it stayed there for nine days. The cold wave lasted nearly two weeks.

The cold-wave froze up the water line leading to the custodian's residence and todate it is still frozen. Stupidity on our part, assumed that the water line had been properly attended to. When the water stopped flowing, the 2800 feet of line was walked, and it was discovered that 1500 feet in the middle was uncovered. The five foot deep trench was filled with snow and ice. Several hours during the warmest part of the day was devoted to removing this four inch cake of snow and ice in the trench. The water line was exposed in many places. Only 300 feet were uncovered and then another snow ruined the project.

Water has been obtained from Mosca Spring in milk cans. The flow at Mosca Spring is getting low and the next resort will be Mosca Creek. At any rate, when the water line thaws, we will know Spring is here.

The before mentioned northeast wind blew down the flag pole and drifted snow thru the windows (frames) on the east side of the residence. The heating system during this cold-wave was inadequate.

UNITED STATES

Attention was turned from thawing the water pipe to trying to keep the house warm. Window frames were weather-stripped and puttied in. Consideration was given to converting the oil heater in the basement into a temporary furnace.

A metal hood was built in Alamosa and installed with two pipes leading to openings in the front hall and dining room. This temporary measure has given some greatly needed relief from the cold.

The flag pole was reset; desired information was obtained in regards to airfield sites in the San Luis Valley; and posted bids for gasoline in Mosca and Hooper as requested by Regional Office.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

SOUTHWESTERN NATIONAL MONUMENTS
Montezuma Castle National Monument
Camp Verde, Arizona

January 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of January, 1947.

Visitors this month - 642; travel year to date, 3,826.

Visitors January, 1941 - 336; travel year 1941, 1,584.

Weather On January 2 we received $2\frac{1}{2}$ inches of snow which lay on the ground for several days.

Administration This January has brought one and a half times as many visitors as we had a year ago. In addition to visitor contacts we attended to our annual equipment inventory and report of items recommended for survey. Considerable attention has been given to matters pertaining to Montezuma Well with a total of 14 trips having been made there for patrol or to acquaint members of the Regional Office with the area.

Maintenance Nine man-days were spent on work on the picnic grounds road, trails to the residences and the Castle trail.

Our new entrance intersection was outlined with rocks to eliminate traffic over the abandoned area.

A temporary support was constructed for the general information sign at our entrance. The old support was torn down when our entrance intersection was altered last month.

One trip was made to Prescott to have our water pump motor overhauled.

Interpretation Suggestions on revising our "Sycamore Trail" booklet were submitted. The dangerous condition of the cliff at the Lower Ruins has necessitated elimination of some of our nature trail.

Twenty five herbarium specimens were mounted on Bristol Board cards and the corresponding file cards were prepared.

A set of shelves were constructed in the basement of the museum building to provide additional space for pottery storage. A collection of 32 pottery vessels from the Osborn Caves down the Verde about ten miles from here has been accessioned and cataloged.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is a result of the fact that urban areas offer more opportunities for employment and education than rural areas. The process of urbanization has led to the growth of large cities and the decline of small towns. This has resulted in a concentration of the population in a few large urban areas. This concentration of the population has led to a number of problems, including overcrowding, pollution, and traffic congestion. These problems are a result of the fact that urban areas are more densely populated than rural areas. The concentration of the population in urban areas has also led to a number of social problems, including poverty and crime. These problems are a result of the fact that urban areas are more socially diverse than rural areas. The process of urbanization is a complex one, and it is difficult to predict its future course. However, it is clear that it is a process that is having a major impact on the United States and the world.

Montezuma Well On December 29 the tenant at Montezuma Well left the key to the residence with us and asked that we check the property occasionally to see that everything was in order until negotiations are complete for purchasing the property. Boundary lines have been checked and plans are being made for administering the area. Location of a proposed stock driveway for watering purposes has been checked with the Forest Service.

Natural Phenomena On January 7 about four tons of rock fell from the cliff onto the visitor trail through the Lower Ruin. Two sections of pre-Columbian wall were shattered but this included a total of only about five square yards of wall. We were not aware this section of the cliff was in danger of collapse as there was nothing to give warning of its weakness. However, there is another section nearby which forms a miniature "Threatening Rock" and to avoid this we plan to alter the trail.

Use of Monument Facilities by the Public This month brought 642 visitors to the monument in 195 cars. For admission to the Castle two hundred and fifty five tickets were sold; eighteen children paid tax only; eighteen younger children climbed free; and three members of the armed forces climbed free. One other man in uniform visited the area but did not climb the ladders.

Contact Time Total contact hours, 115.50. Hastings, 30.00; Leding, 40.25; Schroeder, 45.25. A total of 85 trips were made through the Castle with 297 visitors. There were 112 groups contacted in the museum including 441 people. Two parties of twelve used the picnic grounds and two people camped overnite.

National Park Service Visitors Naturalist Dale King on January 12 and 13. Regional Forester Carlson on January 14. Custodian Cotter.

ORGAN PIPE CACTUS NATIONAL MONUMENT

AJO, ARIZONA

January 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of January 1947.

WEATHER

Winter finally caught up with us here in the south and during the month several days were about as cold as we have ever experienced down here. High for the month was 75 and a low was reached on the 2nd at 29. One nice shower of .35 inches fell on Jan. 7th. We have had more than customary north wind which seemed to be blowing off of the snow areas this month.

TRAVEL

Travel though slow on some of our cold days has increased considerably with a total this month of 7632 making a total for the travel year of 24859. Camping has taken a big jump with 154 people this month with some stays over 20 days. Need for camping facilities is becoming urgent so that it may be controlled to a greater extent.

GENERAL

January seems to have been one of the busiest months we have ever had but little accomplishment shows. Visitors take up one man's entire time and patrols are being made as time allows. Several 14 and 16 hour days were put in to keep things current.

One trip was made to Phoenix on Jan. 3 in connection with surplus property. Another trip to Phoenix was made on Jan 15th to meet Associate Regional Director Scoyen to straighten out grazing matters. Two days were spent in Tucson on official business.

Another serious problem has come up this month with the outbreak of hoof and mouth disease in Mexico. 5000 head of cattle are being moved in along our unfenced border from the interior of Mexico so we can safely say that our grazing will increase by 4000 head soon and all subject to disease which can be spread into our wildlife.

Inspections of the area were made by Associate Regional Director Scoyen on the 16th and Regional Forester Carlson 21st to 24th.

THE UNIVERSITY OF CHICAGO PRESS

THESE RESULTS ARE IN ACCORD WITH THE CONCLUSIONS OF OTHER INVESTIGATORS THAT THE
REACTIVITY OF THE POLYMER IS INFLUENCED BY THE NATURE OF THE CATALYST USED.

...the
... ..
... ..
... ..
... ..

1. The first of these is the fact that the United States has a large and growing population of people who are of Mexican descent. This population is concentrated in the southwestern United States, particularly in California, Arizona, and New Mexico. It is estimated that there are over 10 million people of Mexican descent in the United States, and this number is expected to increase significantly in the future.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

2. Next, gather relevant data and information. This can be done through research, interviews, or direct observation. It is important to ensure that the data is accurate and reliable.

3. Once the data is collected, it needs to be analyzed. This involves looking for patterns, trends, and relationships within the data. Statistical methods can be used to help with this process.

4. After analysis, the results need to be interpreted. This means putting the findings into context and understanding what they mean for the problem at hand.

5. Finally, the results should be communicated. This can be done through a report, presentation, or other form of communication. It is important to make the results clear and easy to understand for the intended audience.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Some time was spent with Arthur Halloran, Refuge Manager and Ace Kempton, warden for the Fish and Wildlife Service on mutual problems on adjoining boundaries.

Accidents

Two wrecks occurred this month in which cows were killed on the main highway. One on December 26 and another on Dec. 30. It is not believed that anyone was hurt in the accidents.

On Jan 17 a car pulling a boat trailer hit one of the dips too fast and wrecked. This we have been expecting for a long time as the sand has never been cleared from this dip since the middle of September.

VISITORS

Visitors this month besides those officially mentioned were, mechanic Stonehooker and family who camped for several days and Harold Amussen and wife. Harold has been temporary naturalist at Yosemite several seasons. Custodian Thomas stopped in while on Annual leave for a short visit.

Projects for the Coming Month.

It is expected that SANC fencing projects will get started this coming month and much time will be needed to supervise and survey for this. The rest of the time will be spent on contact and office work with increased patrols in connection with trespass cattle.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Saguaro----- NATIONAL MONUMENT

-----Tucson, Arizona.-----

-----January 26-----, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report of activities at Saguaro National Monument for the month of January, 1947.

WEATHER. Except for a steady 14-hour downpour on December 26, the entire month has been dry, with cloudiness and dull days prevailing until January 16. Cold nights and days averaging in the forties were continuous until that date, but since the 20th we have had the winter weather people leave home in the east and north to enjoy; warm, sunny, clear, and with little wind.

SPECIAL ACTIVITIES. Park Ranger Fulton made one official trip, to Organ Pipe Cactus National Monument, on January 25, for the purpose of borrowing their cement mixer for use in construction of a cess-pool at Headquarters and a cattle-guard and water tank base at Madrona Canyon.

INSPECTIONS. Archeologist Dale King was in on December 27. Regional Forester Carlson stayed with us from the 18th to 21st, going over fire protection and forestry problems. Unofficial visits were made by Art Thomas, of Bandelier on the 4th and 25th, and by Custodian Cooke, of Chiricahua, on the 5th and 13th.

MAINTENANCE. Rock walls of the parking area at Headquarters were partially rebuilt and straightened, and a protective border of Ocotillo planted around the perimeter. Temporary landscaping and installation of a small arboratum to contain native cacti was again started in the area in front of the Headquarters building; this work has lapsed since July, 1942. Earth for the fills is being obtained by the excavation of a cess-pool in the rear of the building, which is now approximately 40% completed. Floors in the interior of the Headquarters have now been all painted and waxed.

Except for 16 man-days spent on the above work, the trail crew worked all month on Happy Valley Saddle trail; relocation and rebuilding of one-fourth mile to bypass the badly eroded stretch 2 miles above the foot of the trail is completed, and major reconstruction of the lower two miles is approximately 90% finished. The crew spent one day in making improvements in the Madrona Canyon water system and relocating the pump.

The report also contains a list of the persons who have been interested in the monument, and a list of the persons who have been interested in the monument, and a list of the persons who have been interested in the monument.

The report also contains a list of the persons who have been interested in the monument, and a list of the persons who have been interested in the monument, and a list of the persons who have been interested in the monument.

Very truly,
Your obedient servant,
John D. Smith

APPROACHES TO MONUMENT AREA. The Broadway approach road has been very rough all month, and has produced numerous complaints from visitors. The approach from Vail is fair, and only one party complained of this condition; about one-half the distance to Coe's Cave was maintained by the Pima County Highway Dept. early in January.

TRAVEL AND INTERPRETIVE SERVICES. Travel to this monument exactly doubled over that of December, with six visitors to spare. A total of 2256 persons entered the monument, arriving in 705 cars (and one party of six via horseback, from a Dude Ranch eight miles away). Visitors from 41 states, Alaska, Canada, and New Zealand were registered.

Interpretive service was rendered 711 persons, in 209 parties, who stopped at the Headquarters; forty-five and one-third hours was spent in contact work. Visitor contact was maintained on 30 of the 31 days; at times this record was due to voluntary help of the Custodian's wife, when she remained home to contact visitors, leaving the Ranger and Custodian free for other work.

The most frequent complaint of visitors this past month has been to the effect that they cannot find overnight accommodations in the city of Tucson. It is believed that our travel would have shown many more people if they had been able to remain in town, as past records from 1940 and 1941 show that our 2256 visitor count is below past January figures. The custodian, in attempting to obtain reservations for Mr. Carlson and Custodian Bicknell called at every hotel in town, and over 30 tourist courts, plus an hour spent on the telephone - and no reservations. Some of the hotels will not accept reservations before April, others late in February.

RANGER SERVICE. Considerable time has been spent in attempting to find a qualified local man for short-term employment as a Temporary Ranger. Due to the fact that funds are available for only a month and a half, only one man has been found who will accept the position, and he is not a veteran, although otherwise well-suited. It had been planned to space this employment from about February 10 or 15 until the funds were expended, in order to allow the Ranger and Custodian to work together on pre-fire-season projects, and to enable the Ranger to learn the monument areas before the fire season.

WILDLIFE ACTIVITIES. We seem to have a great increase of Javeline in the cactus area since this custodian left here in 1942. Several parties of visitors reported encountering herds of these pigs, and more have been seen by monument personnel than in the years before the war. Coyotes are noticeably less numerous than in November, and foxes are encountered almost daily.

On January 18 Ranger Fulton and Custodian Egormayer attended the annual meeting of the Arizona Wildlife Federation.

PUBLIC HEALTH. Our January 1 water samples from the Madrona Canyon supply came back "red" this month - potentially unsafe. The storage tanks have been chlorinated in accordance with instructions from the State Health Department. Until the creek dries up, in May or June, it will be impossible to complete the sump recommended by Engineer Lassiter, and we shall have to chlorinate heavily.

PUBLICATIONS ON HAND. In accordance with instructions of FO 497, there is submitted below a tabulation of informational literature in stock at this monument on January 25.

Free Publications.

Sales Publications, Supt. of Documents.

None.

PERSONNEL. Our packer, Mr. Frank Stansberry, was terminated January 13, in accordance with Civil Service regulations covering temporary employment.

NEW EQUIPMENT. Although it is doubtful if they can be classed as "equipment", we proudly report the acquisition by transfer from the War Department of eight mules, all gentle, for use as pack and saddle animals during the fire season. These are "self-loaders", who enter a truck or trailer willingly - a desirable attribute. We are now faced with the necessity of disposing, in one manner or another, of at least three of our older, and useless, mules - Annie, Baby, and Raten.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

COOLIDGE, ARIZONA

January 26, 1947

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for January, 1947.

Visitor Statistics: 2122 people arrived in 541 cars from 40 states, Washington D.C., Canada and Alaska. 532.5 hours of service were given these visitors by Custodian Gipe and Ranger Bull. Folks seemed unusually well pleased with their trips to the Ruins and Museum. One woman did suggest that the Museum could be improved, wonder where she got that idea?

Park Service Officials: Naturalist Dale King came in on January 10, staying until the next afternoon. We had not seen Dale for a long time and not only was Association business discussed at length but old friends and old times were brought to mind.

Regional Forester Carlson arrived January 16, leaving the next afternoon and we had a chance to get better acquainted as business details were gone over. Mr. Carlson had not been to Tonto since our first year here. Custodian Thomas, from Bandelier, at present in the Santa Fe office, came January 22 and stayed until the morning of January 24. It was fine, for us, to have someone from Headquarters stay long enough to listen to our troubles and we made the most of the opportunity. Don't know how well he stood it but imagine he may have tire trouble the next time he is up this way.

Weather: January has been very cold with several hard freezes, getting down to 26 degrees on one occasion. Had 2½ inches of snow one night and several flurries since. One long rain storm early in the month and one of short duration since. Sunny days most of the time.

General: The very cold weather this month has kept the wood-wagon on the go most of the time.

A number of trips were made to Globe. The float assembly in the flush tank gave out and a hurried trip was made for a new one.

The long lost drums of propane were finally located in Clarkdale, brought to Globe and two trips were made to haul them to Tonto. Propane was purchased locally while waiting for them and those were hauled in the Tonto pickup.

It was necessary to go to Coolidge to get metal roofing material for work on museum as this material could not be had in Globe.

Emergency tire repairs and a drum of gasoline accounted for one more trip.

Projects for the ensuing month: It is expected to start work on the small office and storage room.

Elmer C. Gipe,
Custodian.

TUMACACORI NATIONAL MONUMENT

~~Nogales, Arizona~~ Box 2225, Tucson, Arizona

January 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of January, 1947:

WEATHER CONDITIONS: Precipitation was .51. 12 days were cloudy, seven part cloudy, with considerable bitterly cold windy weather. Maximum temperature was 79 on December 25, minimum was 20 on December 5.

MAINTENANCE: Routine accomplished, including half day spent on repair and adjustment of phonograph for mass diorama.

INTERPRETIVE SERVICES: 1,778 visitors went on 243 guided trips through the mission grounds and the one third of the church which is safe to enter, receiving an average of 33.78 minutes per trip. 2,692 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 2,610 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: 2,792 visitors, in 771 cars, came to Tumacacori. This is by far the highest January travel in monument records, and is the third highest monthly travel record we have ever had.

Some interesting travel figures for comparison were obtained from the Border Patrol, which has a temporary station on the highway between Tumacacori and Nogales to check all north bound traffic. At this spot on the highway they figure north-bound traffic is approximately equal to south-bound traffic. Checking for eight hours daily, January 13 to January 17 inclusive, the Border Patrol counted 497 north-bound cars, with 1,297 persons. During the same period Tumacacori received 97 cars, with 327 visitors. If you double the Border Patrol figures, to get both north and south traffic, it still works out that Tumacacori gets about 12% of the highway travel as monument visitors, for the period indicated. So it can safely be assumed the old mission is a major attraction.

VISITORS: December 28 - Mr. and Mrs. A. W. Atwood, Jr. He worked formerly as a ranger in Sequoia, and his father is well known.

December 29 - ^{KNOX} W. West, former publisher of the Arizona Republic. On the same day came Dr. and Mrs. Grady Gammage, heading Arizona State Teachers College at Tempe.

December 30 - The Brandeis School for Boys, Tucson, brought a group of 45.

January 12 - 52 soldiers from Davis-Monthan Field, Tucson.

January 18 - The Potter School for Girls, Tucson, with 13.

Memorandum for the Regional Director,
Phoenix Office.

Re: The monthly activities report for December 1946.
Enclosed for the month of January, 1947.

ADMINISTRATIVE: Investigation was made of the area around the monument, with particular reference to the boundary line. A number of points were located and marked, and a map was prepared showing the location of the monument and the boundary line.

RESEARCH: A number of specimens were collected, including a few birds and mammals. A number of plants were also collected.

EDUCATIONAL: A number of visitors were seen at the monument, and a number of talks were given. A number of specimens were also collected.

GENERAL: A number of visitors were seen at the monument, and a number of talks were given. A number of specimens were also collected.

REMARKS: The monument is a very interesting place, and a number of interesting specimens were collected. A number of visitors were also seen at the monument, and a number of talks were given.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Visitors closer to home included: January 4 - Eugene V. Stonehocker and family, of Casa Grande National Monument.

January 5 - Custodian Clair V. Cooke, of Chiricahua National Monument, and daughter, Shirley.

INSPECTIONS: December 31 - Associate Naturalist Dale S. King arrived to apply the official stethoscope to the heart and lungs of our interpretive program. He left the following day, but was in again on January 6, and out again on the 8th.

NOTORIETY: The December 28 issue of the Saturday Evening Post carried Oren Arnold's article "I hunt Ghost Gold." Of course he mentioned twice the hidden treasures of Tumacacori, and many tourists have been anxious to learn all about them. The staff here, unfortunately, does not have as replete a fund of treasure knowledge as Mr. Arnold, and had to confess we did not know about the treasure's existence.

ACCIDENTS: On January 21 a middle-aged woman visitor, accompanying the custodian and some other visitors as they left the view-room and stepped into the arcade of the museum which faces the old church, had a fall. There is one very low step, and she did not see it. She fell flat on her face, and was pretty badly shaken up, but declared later she had sustained no real injury.

WILDLIFE: Twice during the month the dignified atmosphere of our old-style Spanish patio garden was richly embellished by the full blown essence of SKUNK odor. This character has been seen a couple of times also, always near the drain which he favors as a place of meditation. We have no doubt this is the renegade who so richly anointed the custodian and wife a few months ago in this same garden.

PERSONNEL: The first ten days of the year the custodian spent on the sick list. Assistant Archaeologist Steen was here to work with Ranger Brewer in running the monument and handling the heavy visitor load, working here from January 6 through January 14. Judy England, a neighbor who is enthusiastic about the mission, worked a few days as WAE guide.

-----Tuzigoot----- NATIONAL MONUMENT

-----Clarkdale, Arizona-----

-----Jan. 26-----, 1947-----

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for January, 1947.

Visitor Total: By coincidence, 187 cars--exactly the same number as last month--brought 32 people less than in December, but totalled a remarkably high 580, none the less. We are still beating the 1941 totals. Jan., 1941 brought 508 visitors.

Guide and Contact Service: Despite the digging of 1200 feet of ditch for the laying of the new pipeline section, the laying of the first 400 feet of line, and the clamping of several additional breaks in the old line (which froze up for two days), all of which took the efforts of all hands on many occasions, visitor contact work was maintained almost uninterrupted throughout January. Since the pipe line lies within sight of the Monument and the Monument approach road, the Custodian and Ranger would watch for automobiles and hustle out after them. After showing the visitors the place, we would hustle right back and start shoveling and picking again.

Personnel Time: Museum: 60 hours 20 min. Ruins: 51 hours 35 min. Total time for Ranger Richert: 48 hours ten minutes; total time for Custodian Cotter: 63 hours 45 minutes.

Special Visitors: Jan 13 brought a visit from Naturalist Dale S. King, Region Three. General Monument plans and prospects were discussed, and details for the establishment of a fact file on 5x7 cards were taken up. Fact file material is now included in the Tuzigoot general file. On Jan. 25, Custodian and Mrs. Townsend of Aztec National Monument and their two children visited Tuzigoot for the first time. We were delighted to make their acquaintance and have the chance to try selling them on the Verde Valley.

Stabilization and Maintenance: Ranger Richert and Stanley Jackson, laborer, found their hands full with a stabilization job that almost got out of hand in the top rooms of Unit III near the citidal. Deep undercutting of the walls of several rooms had rendered the masonry dangerous. When the wall supporting the ruins walk in Room 4 was tackled, the bottom section of some 10 cubic feet fell out and Jackson narrowly escaped injury when he was pelted by rocks. The wall interior turned out to be loose fill and (rather oddly) remnants of floor detritus still stratified. The ruins top path was immediately closed to visitors, and after two days of work, the path re-opened the 25th.

Jan., 1947 Monthly Report for Tuzigoot National Monument--2

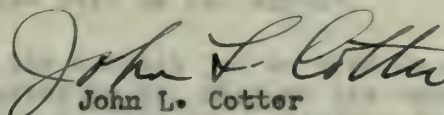

Preparatory to carrying out stabilization work in the rest of Unit III, the large number of metates and manos stored in these rooms was removed, leaving only a pair of mano-metate sets in each room. The rest, mostly manos, were stored at the museum after cleaning.

Adobe for wall pointing is now being mixed with a ratio of 4 to 1 of cement. Three ounces of red cement pigment is mixed with each wheel-barrow of adobe-cement, and the result has been a fairly close match to the original pointing (also a stabilized adobe) applied by the excavators extensively throughout the ruins. The only permanent, or semi-permanent stabilization must be effected with stabilized adobe pointing in this manner. It is now too late to attempt permeations and sprays of solidifying compounds in almost every case.

Maintenance other than stabilization included a return visit of "Mehetabel", the D.I. pickup to the Ford Garage at Cottonwood for a re-do on her wiring system and a replacement of a window which cracked due to causes unknown sometime during the past two years. No charge was made for the extensive wiring job, since the job was done last month by the same garage unsatisfactorily.

Due to an unanticipated drying-up of the contractor's supply source, only 400 feet of 2-inch galvanized steel pipe was delivered this month on the contract for 1200 feet. Meanwhile, we had worked like bats to uncover the 1200 feet of old line in order to get the job done as soon as the pipe was delivered. Result was, a cold snap froze the old pipe solid for two days (thereby stopping the leaks for the first time in six years), and water was hauled to the Monument. The 400 feet of pipe available was connected and laid by mid-month. Delivery of the balance of pipe is expected the middle of the next month or before, and the job will be finished as soon as it is on the ground. As the new line is cut in, a cleaning compound will be placed in the pipe, and an attempt will be made to flush out the whole line and so improve the quality of water reaching the Monument.

The thanks of all hands at Tuzigoot go to Region Three for the splendid cooperation we received during the emergency of the breaking of the pipeline, and the immediate aid that was rendered by wire and telephone in placing the contract and getting the materials on the spot where it was needed in the shortest possible time. It is really great for us in the "field" to know our friends in Region Three can go to bat for us so effectively on short notice when an emergency like this occurs.

John L. Cotter

Walnut Canyon NATIONAL MONUMENT

Flagstaff, Arizona

January 26, 1947 19.....

MEMORANDUM for the Regional Director, Region Three.

The following is a report of activities in Walnut Canyon National Monument for the month of January 1947:

Weather. Rather mild. Two light snow storms that melted rapidly and and two or three days of wind. The last snow though light, drifted enough to close our entrance road except to those with chains and a strong heart. The county snow plow opened our road two days following the storm.

Personnel. Custodian Paul L. Beaubien was called away on an emergency trip to Canon City on the 20th of the month. He is expected to return in about two weeks.

Activities. Two truck loads of coal were hauled during the month. We now have enough on hand to carry us until spring and we no longer worry about being snowed in.

One load of cinders was hauled and spread over the path leading from the parking area to the museum. The path still remains a mud hole due to the melting ice and snow.

Custodian Paul Beaubien made a trip to Grand Canyon to obtain two oil stoves for the office and the comfort station. He also conferred with Mr. Davis who was visiting there. Custodian Beaubien's trip back was without incident until eleven miles west of Flagstaff he struck an icy spot in the road. The pickup he was driving was quite thoroughly damaged as were the two stoves, but Beaubien suffered no injuries though the car turned over at least once.

Action has been taken to secure a substitute pickup. The two stoves have been straightened but only after turning the office into what sounded like a boiler factory. The stoves are not in use yet as the local tinner is on leave from Flagstaff and we need some reducers, elbows and other fittings that only he can supply.

The Monument library is the current job on hand. We are setting up a card index and file as suggested by Mr. King on his recent visit here. Finishing the library file and working on the 'Fact' file will occupy some time in the coming month.

Several times this month it has been necessary to repair the Monument telephone line. There is logging going on in the vicinity and it seems as though each tree they fell falls on our line.

The official boys were glad to see the boys' picture. Local officials were all visiting very frequently. The American representative is going around regarding the American air base. It seems now that it may be a wonder whether for a concentration of several fields. The great industrial of the East and also the in Europe likely being moved west. A number of boys that considerable activity is being planned in connection with the 1934-1935 season. There is a very high right in the middle of the American boys and they are not quite familiar with each other. It will be better than they are in other services.

It was our pleasure to have a happy week this month. Once Fort. and 1974, many of our friends and some friends. Tell you a happy week and we have before you how we have been over a happy week.

Dr. Craig of the University of New Mexico and International Affairs was to sign this Petition. He has been petitioned as a referee of lawyer Jacobson.

Little has been done in our regular routine this past month. Henry
Tosol had an unusual leave a larger portion of the month and David Johnson
has been giving considerable time to asbestos property brought from Alaska
for the various communities. We have not let it rest in all and more

1874

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
WHITE SANDS NATIONAL MONUMENT

Alamogordo, New Mexico

January 21, 1947

MEMORANDUM for the Regional Director:

JANUARY TRAVEL

<u>This Month</u>		<u>Year to Date</u>	
Cars	Visitors	Cars	Visitors
959	3,640	5,003	18,114

January, while one of our coldest months on record, gave us one of our best similar months in the history of the monument. A low of minus four was recorded on the fourth is the lowest recorded since the establishment of our weather station some seven years ago. The high travel figure of the month was in spite of several days when we were forced to close our Sands to the public due to the road conditions. We are experiencing trouble of nightly freezes bringing up sufficient moisture to make our clay road slick each morning after it starts warming up. Big chunks of road bed are also forced up in these freeze effects giving our roadman a great deal of grader work to be done. Heavy winds on several occasions has also been extremely hard on our sand roads.

No official trips were made to any distant points. Local affairs are all running very smoothly. Considerable speculation is going around regarding the Alamogordo Air Base. It seems now that it may be a center retained for a consolidation of several fields. The Press mentions one in Utah and also one in Kansas likely being moved here. It seems, too, that considerable activity is being planned in connection with the White Sands Proving Grounds; so we may again be right in the middle of intense Army and Navy men and their families may come in and we never know they are in either Service.

It was our pleasure to have a brief visit this month from Supt. and Mrs. Libbey of Carlsbad and some friends. This was a hurried trip and we hope before too long we may have them for a longer visit.

Dr. Ortega of the University of New Mexico and Inter-American affairs was in with his family. He too has promised us a return visit of longer duration.

Little has been done on our regular routine this past month. Ranger Steel was on annual leave a larger portion of the month and Harold Chittum has been giving considerable time to surplus property brought from Marfa for the various monuments. We have yet to go over it all and make

NATIONAL PARK SERVICE

on 20th March, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652,

January, while one of our military missions in France, we met our best friend, General de Gaulle, in the city of Paris. A few days later we returned to the United States, and we found that the situation in the United States was very different from what it was in France. The United States was now a free country, and we were free to travel and to work as we pleased. We were also free to express our opinions and to do as we saw fit. This was a great change from the situation in France, where we were often treated as enemies and where our opinions were often suppressed. We were now free to do as we pleased, and we were free to express our opinions. This was a great change, and it was a great relief. We were now free to do as we pleased, and we were free to express our opinions. This was a great change, and it was a great relief.

[illegible]

It was my pleasure to have a brief visit with you last night. I hope to see you again soon. I am very glad to hear from you and hope you are well.

Sincerely,
John F. Kennedy

10-10-68

For the various reasons, we have to be very careful to not let the situation develop to the point where we are forced to take drastic action. We have to be very careful to not let the situation develop to the point where we are forced to take drastic action.

Miller a record of what we have on hand. Both Harold and Paul are now enroute to PoChelly with a trailer house. We have another to go to Wupatki later. They were purchased from War Surplus and the day we were moving them out the Army decided they wanted them left and would bring in some two hundred more, but since we had already moved one and had the other in the process of moving they let them go. Reeves has been quite busy with a complete revising of our files and keeping current with his daily work. We wonder how we can possibly do all we must do before our heavy travel season, but I guess we will manage.

Museum visits are of much longer duration and seemingly much more appreciated now that we have heat. Perhaps it is not true, but it seems we have a much higher type visitor, more interest and appreciation shown than usual.

With all the adverse conditions that have confronted us this month and in spite of it all such heavy travel we wonder what we might expect as soon as the weather favors us. We have no fear of ever reaching a saturation point as far as the area is concerned but we can easily and may soon reach a saturation point as far as our ability to handle the crowds with our present forces is concerned. Long days immediately ahead bring with them a problem of longer use and split shifts, etc.

Any way it is all a part of a grand game we all enjoy playing and the harder our problems are the more we enjoy it.

A brief summary of visitors follows:

Texas led with 197 cars and 814 visitors.

New Mexico was second with 169 cars and 733 visitors.

California was third with 72 cars and 242 visitors.

We had visitors from all states except Delaware, Maine, New Hampshire and South Carolina.

We had 15 visitors from Mexico and 12 from Cuba.

DEPARTMENT OF THE INTERIOR

NATIONAL BUREAU OF VICE

Under a recent act of Congress, the National Bureau of Vice was established as a part of the Department of the Interior. Its purpose is to investigate and report upon the character and conduct of persons who are engaged in the traffic in vice, and to advise the Department of the Interior as to the measures which should be taken to suppress such traffic. The Bureau is organized into three divisions, each of which is headed by a Chief of Division. The first division is the Bureau of Investigation, which is charged with the duty of gathering information as to the character and conduct of persons who are engaged in the traffic in vice. The second division is the Bureau of Statistics, which is charged with the duty of collecting and compiling statistics as to the traffic in vice. The third division is the Bureau of Education, which is charged with the duty of disseminating information as to the character and conduct of persons who are engaged in the traffic in vice.

The Bureau is organized into three divisions, each of which is headed by a Chief of Division. The first division is the Bureau of Investigation, which is charged with the duty of gathering information as to the character and conduct of persons who are engaged in the traffic in vice. The second division is the Bureau of Statistics, which is charged with the duty of collecting and compiling statistics as to the traffic in vice. The third division is the Bureau of Education, which is charged with the duty of disseminating information as to the character and conduct of persons who are engaged in the traffic in vice.

and in order to do this, the Bureau is organized into three divisions, each of which is headed by a Chief of Division. The first division is the Bureau of Investigation, which is charged with the duty of gathering information as to the character and conduct of persons who are engaged in the traffic in vice. The second division is the Bureau of Statistics, which is charged with the duty of collecting and compiling statistics as to the traffic in vice. The third division is the Bureau of Education, which is charged with the duty of disseminating information as to the character and conduct of persons who are engaged in the traffic in vice.

The Bureau is organized into three divisions, each of which is headed by a Chief of Division. The first division is the Bureau of Investigation, which is charged with the duty of gathering information as to the character and conduct of persons who are engaged in the traffic in vice. The second division is the Bureau of Statistics, which is charged with the duty of collecting and compiling statistics as to the traffic in vice. The third division is the Bureau of Education, which is charged with the duty of disseminating information as to the character and conduct of persons who are engaged in the traffic in vice.

A brief summary of the Bureau's activities follows:

The Bureau has been organized into three divisions, each of which is headed by a Chief of Division. The first division is the Bureau of Investigation, which is charged with the duty of gathering information as to the character and conduct of persons who are engaged in the traffic in vice. The second division is the Bureau of Statistics, which is charged with the duty of collecting and compiling statistics as to the traffic in vice. The third division is the Bureau of Education, which is charged with the duty of disseminating information as to the character and conduct of persons who are engaged in the traffic in vice.

-----Wupatki----- NATIONAL MONUMENT

OFFICE OF THE CUSTODIAN

-----Flagstaff, Arizona-----

-----January 29-----

1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of January, 1947:

Visitors this month: 58, Travel Year to date: 548

Travel: While travel shows no increase over that of January, 1946, there has been a sharp decrease compared to last month. Most business men report this condition, remarking that there is a decided slump in travel for a week or so after each snow storm in the Flagstaff region.

Weather: Exceptionally clear and warm days prevailed during most of the month. Precipitation amounting to less than two tenths of an inch fell in the form of snow. With the precipitation below normal the prospects for cattlemen, farmers and those of us who drink water are not too bright.

Roads: The road maintenance job started early in November was terminated on December 31. One hesitates to say that any job of this nature is complete, since so much remains to be done. To those of us who drove the old road it is a highway. Additional rock removal on the Sunset-Wupatki road is a "must" before the coming travel season.

Approach Roads: Through the cooperation of the Arizona Highway Department the grading at the new entrance was completed on the 7th. This and the carved entrance sign furnished by the Don's Club make for a more attractive approach to the Monument on Highway 89.

Special Activities: An epidemic of "gold fever" seems to be in the making. During the past month two parties have asked for directions to old mining claims. James D. Beard, a local business man, has filed claim and plans to prospect the Lost Padre Mine on the southern slope of Doney Crater. His claim was investigated to make certain that it did not include any of the Monument. Actually the Lost Padre Mine has a history that ties in with Wupatki Ruin. The late Don Doney was looking for a Spanish mine in a red hill at the base of a blue mountain- he had a map. The presence of a fireplace in the present register room at Wupatki and the discovery of some burials near the ruin which he consider those of white men convinced

There follows a report of activities at the National Council during the month of January, 1967:

14-00000

There is a small amount of information available in the files of the FBI, New York, dated 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620,

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the Americas (CLA) in the United States. The Commission is therefore unable to determine whether the CLA is active in the United States or whether it is merely a propaganda organization.

is a "unit" before the word "unit" is used.

At the time of the investigation, the respondent was residing at the address above stated. The respondent was born on 10/10/1910 at the address above stated. The respondent was born at the address above stated. The respondent was born at the address above stated.

[illegible]

him that the Spanish priests had lived in the room. While he had quite a number of claims in this vicinity, he felt that the "blow-hole" in Doney Crater was the collapsed entrance to the mine. To date it has not been proven and no mineral value produced.

At the request of Dr. Colton I accompanied a party from the Museum of Northern Arizona to investigate a report of dinosaur tracks near Marble Lodge at Navajo Bridge. What Mr. Green considers to be tracks appear more like the impressions of "mud concretions" which occur in similar levels of the Moencopie formation at Wupatki. The discovery will be investigated by competent geologists from the Museum later this year.

The custodian made two trips to Grand Canyon to obtain surplus property, the most important items being two KEN generators.

Water Supply: Spring flow measurements reveal that Wupatki Spring has increased to 738 g.p.d., which is 200 gallons more than last month. Heiser, on the other hand, measures 2107 g.p.d. or 100 gallons less than last month. Heiser spring has been cleaned thoroughly and a more weatherproof covering installed, but to date there has been no increased flow.

Wildlife: Two factors affecting wildlife in the area surrounding the Monument have been observed: fencing of one of the few water holes and the continuation of the coyote poisoning program. As a result of difficulty between two permittees on the National Forest, Arrowhead Tank has been fenced. This is one of the very few reliable sources of water for wildlife along the southern boundary of the Monument. The loss of this water at present will not seriously affect the antelope. It is hoped that we can persuade Bert Babbitt to open the fence after the stock move off this spring. In the future this difficulty will probably not arise, since the Forest Service does not plan to continue Mr. Kirby's permit.

The coyote poisoning program is in full operation again. One seldom hears a coyote now. Actually the fellow who is doing the work is not in favor of the use of poison and feels that it is an indiscriminate way to kill, but he has to make a living.

NPS Visitors: The only official visitors we had during the month were Ranger and Mrs. Aubuchon of Walnut Canyon, accompanied by their daughter. Naturalist King was in Flagstaff where we discussed various problems with him. Incidentally, he did some very nice public relations work for the National Park Service with Mr. George Babbitt of Greater Arizona, Inc. and Mr. Melvin Hutchison, publicity director of Arizona State College. Later in the month we chanced upon Associate Regional Director Scoyen, Harvey Cornell, and Charley Carter in Flagstaff for a few minutes.

Personnel: Mr. A. E. Buchenberg received word of his appointment as a Collaborator.

Cooperating Agencies: A post season fire was reported to the Forest Service via radio to Walnut Canyon. Already this daily radio contact has proven invaluable. The only improvement we can suggest is a device so that one can call when the need arises rather than on scheduled hours only.

The carved thunderbird design now in use on information markers in the state does not appear to be satisfactory to the Markers Committee of Greater Arizona, Inc. They wish to have a design more characteristic of Arizona. In accordance with a request from Mr. George Babbitt we have submitted ideas.

Navajos: The old medicine man, Grandpost, was found guilty of stealing cattle from Joe Kellam and sentenced to 15 months in the State Prison. Grandpost not only took all the blame for himself, but he showed them a box of hoofs of cattle he had butchered during the past two years. It is possible that he will get an early parole because of his advanced age.

Publications on Hand: Portfolio Natl. Parks and Monuments: 5 copies
Sunset Crater Informational Leaflet: 1300 copies
Wupatki Informational Leaflet: 100 "

NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

March 12, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

There follows the narrative report for naturalists of the Southwestern National Monuments for the month of February 1947:

Staff Activities - General

Naturalist King was in the office the whole report period, as was Archeologist Steen except for the first eight days of the month. Considerable stenographic assistance was furnished to us and office overhead activities made much progress. We wish to thank the Forestry and Auditing Departments which furnished us the clerical help.

The Fish and Wildlife Service and the Regional Director, Region One, asked that Naturalist Maurice Sullivan be allowed to stay at Acadia National Park for the month of March to acquaint incoming Naturalist Doudna with the deer problem which Sullivan has been working on there.

Administration - Interpretation

Proposed copies for interpretive leaflets for the Sycamore Trail at Montezuma Castle and for Montezuma Well were received from the field and some correspondence ensued as to whether one or both leaflets might be photolithographed this year. However, it was decided to mimeograph both of them.

Short, key interpretative statements were prepared for the Chiricahua and White Sands two-fold leaflets. Enough text material was deleted so that paragraphs, relating the areas to others of the kind in the National Park System, could be included.

A full length interpretative statement was prepared for Walnut Canyon.

Interpretation - Public Relations

Archeologist Steen prepared a 1,000 word popular article on Natural Bridges for the forthcoming issue of the Utah Magazine.

A variety of material descriptive of Bandelier National Monument was sent to Mr. Wimar E. Suppiger of Webster Groves, Missouri. Mr. Suppiger is related to the late Adolph Bandelier after whom the area was named.

Very truly yours,

Interpretation - Progress of Exhibit Plans and Projects

An attempt was made to have a display map of Casa Grande drafted for use in the museum lobby there. However, it was found that the only accurate topographical map of the monument is in two sets of sheets with different scales, and the preparation of such a map constitutes a rather major drafting problem. Whenever sufficient drafting help is available, this project will be put into work.

Technical advice from the architects was requested on the proper type of fluorescent lighting fixtures to be purchased to replace the somewhat expensive lumiline bulbs now being used.

Research and Observations

The Montezuma Castle staff furnished excellent negatives of pre-historic skulls from the collection at the monument. These pictures were enlarged by photographer George Grant, and will be included in the forthcoming publication on Montezuma Castle by the Southwestern Monuments Association in an article on skeletal material by Katherine Bartlett of the Museum of Northern Arizona.

A follow-up letter was written to the Director to attempt to ascertain the progress of the project regarding the use of supersonic equipment to discourage bats from roosting in several southern Arizona monuments.

Due to several requests from the field, the Director was questioned as to the general policy of who should be appointed collaborators in the National Park Service, and what should be their duties, privileges, and responsibilities.

A request was forwarded from Arches to appoint Dr. L. Eldon Beck of Brigham Young University a Collaborator for Arches National Monument to accomplish a biological survey there.

Information concerning the banding of doves in the former bird banding project was furnished to a bander in Chattanooga, Tennessee.

Cooperative Activities

Dr. Ruth Underhill requested and received approximately 30 pictures of Navajo Indian activities for possible inclusion in her future book on the history of the Navajo tribe.

Several books needed by the naturalist at Boulder Dam Recreational Area were ordered through official and Southwestern Monuments Association channels.

Region Three Office Loan Library

Accessions for the month totaled 166: 13 books, 57 reprints and pamphlets, and 96 periodicals.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and development. It is a story of a people who have built a great nation out of a small colony. The story begins with the first settlers who came to the New World in search of a better life. They found a land of opportunity and a land of freedom. They built a nation that was based on the principles of liberty and justice for all.

The story of the United States is a story of a people who have built a great nation out of a small colony. It is a story of a people who have built a nation that is based on the principles of liberty and justice for all.

They built a nation that was based on the principles of liberty and justice for all.

Archaeologist Steen was able to spend a moderate amount of time cataloging and rearranging items in the library.

Because library assistance was inadequate during the war, the card catalog and the photograph file needed considerable checking and rearranging. Glen Haynes, through the courtesy of Photographer George Grant, went through the print card file of the library, adding minor subject heading cards, correcting misplaced cards, and bringing the file generally up to date and in first class condition.

Through the cooperation of Jesse Kashaum, Miss Blanche Story, in her spare time, started the difficult job of correcting and refining the subject heading list in the library, and cataloging incoming publications and photographs.

Miss Dolores Ortiz and Mr. Henry Tullar, loaned to us for about a week each from the Forestry and Auditing Departments respectively, checked and alphabetized approximately 11,000 catalog cards in the library. Many divider cards were added, making the index much easier to work with than previously.

Archaeologist Steen performed some bibliographical work, and estimated the library's binding needs, which consisted of 161 books and 106 periodicals, a total of more than \$800 of needed binding.

A list of monuments which have no bookcases at all, and others which need a few, was prepared and submitted so that bookcases received from war surplus can be apportioned fairly.

Southwestern Monuments Association

Editor George Fitzpatrick of New Mexico was interviewed and plans made for running a series of articles on National Parks and Monuments in New Mexico in the magazine. When the series is finished in approximately a year, the cuts and halftones, together with those of book files, will be used to illustrate a book on New Mexico similar to "Arizona's National Monuments".

King found a publisher who may be able to print the forthcoming Association book on Montezuma Castle, and spent about 8 hours editing the excavation report by Earl Jackson, and Nellie Brewer. At the end of the month, the manuscript was being retyped for submission to the printer for a bid.

A tracer letter to the Director was prepared to ascertain the present status of acquisition of the Hubbard House north of Artee Ruins.

Inquiry was made of the Government Printing Office concerning the possible sale of "Flowering Plants and Ferns of Arizona". It was found that the Association would have to purchase 100 or more copies for each in order to obtain a discount, which would be 25%. The project was deferred until next autumn when Association finances will be adequate to make the purchase.

will be shown clearly a degree of skill and good judgment.

and thousands of dollars, and the value of the property is estimated at \$100,000. The property is located in the city of New York, and is owned by the City of New York. The property is located in the city of New York, and is owned by the City of New York.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United Kingdom regarding the proposed changes to the law of the United Kingdom in relation to the treatment of the British Commonwealth countries.

Sandellier National Monument reported pronounced success in selling kodachrome duplicates. Sets of 12 on the canyon country of northern Arizona were purchased from Harry Goldwater, Phoenix, for Walnut Canyon, Montezuma Castle and Tuzigoot. Sets were put together for Casa Grande and Tonto, and an experimental quantity ordered for each monument.

The Master of the Oil Tanker "Chaco Canyon" wrote to the Custodian for literature descriptive of the monument. The Association forwarded to the Custodian two books concerning Chaco Canyon for donation to the archives of the ship.

Gratifying sales were reported of Arizona's National Monuments from dealers. Not only are dealers reordering to replenish their depleted stocks, but persons who bought the book unseen by mail are reordering the book for gifts to their friends.

Finally, and far from the least important happening of the month, was a donation by the Lions Club of Farmington, New Mexico, of \$100 toward the purchase of the Hubbard Mound north of Aztec Ruins. This sum, together with the \$50.00 donated previously by Mr. Gilbert Maxwell, a member of the club, constitutes half of the purchase price of the property. The organization is to be complimented on its public spirit and generosity.

Visitors

Mrs. Walter Taylor and Harry P. Marx of Santa Fe, Mr. Stanley Stubbs, Custodian Paul Beaubien of Walnut Canyon, and Ranger Eden of Sandellier.

Ruins Stabilization

Archaeologist Steen spent the first 8 days of the month on the field on ruins stabilization problems, chiefly at Montezuma Castle. At the Castle braces were placed under a cracked ledge on which a portion of the front wall of the cliff dwelling rests. The braces are not completely satisfactory and conspicuous, but there seems no other feasible means of giving support to the weakened ledge.

At Tuzigoot he looked over the stabilization work which Custodian Cotter is beginning there.

Estimates on the cost of materials for the proposed job at Casa Grande were obtained and a plan for the job will be prepared in March.

Various materials and equipment were ordered for ruins stabilization.

Due to the difficulty of mounting photographs permanently in records at Chaco Canyon, because there is no electric power available, directions were given that photographs be sent to this office for mounting with tissue.

Projects for next month

King will be in the office for the first two weeks on routine activities, chiefly in the preparation of the annual report for the

NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

February 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of February, 1947:

GENERAL: The advent of warmer weather during the latter part of the month caused an increase in travel. U. S. 160 is carrying much more traffic and if warm weather continues our visitors should show a substantial increase.

WEATHER: Rain fell on January 28th and February 17th with 2" of snow on January 30th and the same on February 9th and 10th. We had several days of heavy wind reminding us that our March weather is not far off. The latter part of the month warmed up considerably and there were several days when a coat was too warm.

TRAVEL: Travel was ahead of last month with a total of 16 cars and 60 people. This brings our travel for the year to 457 and for the fiscal year to 1432 people. Numerous requests for information were received and answered during the month.

INTERPRETIVE SERVICES: Three parties containing 8 people were contacted at headquarters during the month. No contacts were made in the Windows section. An illustrated talk on National Park Service Areas in the Southwest was given to a group of 90 children at the Grand County school on January 28th and covered one hour.

COOPERATING GOVERNMENTAL AGENCIES: Grand County has made a request to the Utah State Department of Publicity and Industrial Development for an appropriation of \$7,500.00 for improvement of roads within the boundaries of the monument. Grand County to furnish \$2,500.00 for a total of \$10,000.00 for expenditure on road improvement. Commissioner Taylor stated that he felt sure these funds would be appropriated. Commissioners Taylor and Patterson contacted Governor Maw regarding the condition of the 7½ miles of approach road, which is included in the state system, and were assured by him that considerable maintenance work would be performed on the road this spring.

NATIONAL MONUMENT

February 27, 1947

February 27, 1947

MEMORANDUM FOR THE REGIONAL DIRECTOR, REGION THREE

The following is a summary report for the month of February, 1947:

GENERAL: The advent of winter weather during the latter part of the month caused an increase in travel. U. S. 101 is carrying more traffic and it was noted that some visitors showed a marked increase.

WEATHER: Rain fell on January 13th and February 1st with 1" of snow on January 30th and the same on February 2nd and 10th. We had several days of heavy wind blowing us that our March weather is not too hot. The latter part of the month was up considerably and there were several days when a cold was the rule.

TRAVEL: Travel was about as last month with a total of 15 cars and 50 people. This brings our travel for the year to 247 and for the fiscal year to 1432 people. Summary reports for information were received and answered during the month.

INTERPRETIVE SERVICE: Three parties consisting of 8 people were conducted at headquarters during the month. No parties were made in the historic section. An illustrated talk on local and state service areas in the Southwest was given to a group of 30 children at the Grand County school on January 15th and covered one hour.

COOPERATIVE GOVERNMENTAL SERVICE: Grand County has made a request to the State Department of Industry and Industrial Development for an appropriation of \$7,500.00 for improvement of roads within the boundaries of the monument. Grand County is furnishing \$2,500.00 for a total of \$10,000.00 for expenditure on road improvement. Commissioner Taylor stated that he felt sure these funds would be appropriated. Commissioners Taylor and Patterson suggested Governor Newcomb for the consideration of the 1/2 mile of express road, which is included in the state system, and were assured by him that considerable maintenance work would be performed on the road this spring.

SPECIAL ACTIVITIES: An inspection was made of the road within the boundary in the Windows section with Commissioners Tayler and Parrett, Mayer Baldwin of Moab and Harry Reed to check on possible improvements should money be made available by the Department of Publicity and Industrial Development. One or two changes between Balanced Rock and the parking area can be accomplished without too much expenditure, which will eliminate several curves, and improve this section of the road to a great extent. Commissioner Tayler wants to spend a portion of these funds for construction of a road from Balanced Rock to the Turnbow cabin on Salt Wash to make Delicate Arch more accessible.

ROADS: Grand County recently completed construction of 5 miles of 16 foot roadway from the Colorado River road to Fisher Towers making this spectacular area readily accessible to visitors. An inspection trip was made over this road on January 30th, while under construction, with the county commissioners.

MAINTENANCE AND CONSTRUCTION: Painted ceilings of two bedrooms, hall, living room and kitchen of quarters. Rented paint spray gun in Moab and gave fence at quarters one coat of white paint. The old office building, warehouse and service yard fence were given two coats of olive drab paint to blend with the surrounding sandstone. Have been unable to obtain white paint in 5 gallon cans to complete painting of fence at quarters and trim of quarters itself. Still hoping for delivery on this from the procurement division, which will enable us to complete painting in headquarters area.

John W. Sullivan of Moab was entered on duty as a carpenter on February 12th and at this date has practically completed construction of two pit latrines for installation at the Windows parking area. They have been stained on the outside but completion and installation will have to wait until white paint is obtained.

Two 500 gallon water tanks have been ordered ^{from} ~~for~~ the War Assets Administration at Salt Lake City, Utah for use in installing a water system at the Windows section parking area.

GRAZING: ^{permit} A new ~~was~~ issued and signed by Emmett Elizondo for crossing monument lands in Cache Valley with his herd of sheep for access to water on his lands on Salt Wash.

Crossing permit for Henry Reveir for access to water at Fresh-water spring with his sheep was cancelled due to non-cooperation in regard to trespass on monument lands.

PUBLICATIONS: The following free publications are on hand:

Arches Mimeographed Leaflet	450
Natural Bridges Mimeographed Leaflet	475

It is a very small town, with a population of about 100. It is situated on the banks of the Colorado River, and is a very important point for the trade between the United States and Mexico. The town is very old, and has a long history. It was founded in 1776, and has since that time been a part of the United States. The town is very beautiful, and is a very interesting place to visit. It is a very important point for the trade between the United States and Mexico, and is a very important part of the country.

John W. Sullivan of New York City, who was
a member of the Board of Directors of the
National Association of Manufacturers, was
elected to the position of President of the
National Association of Manufacturers for the
year 1911. He was elected to the position
of President of the National Association of
Manufacturers for the year 1911.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT

AZTEC, NEW MEXICO

24 February 1947.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

WEATHER. February has been rather pleasant throughout, with a low temperature of minus 2 and a high of sixty three and a total precipitation of 0.28 inch resulting from one snowfall of 1 inch. Travel has been quite good which no doubt has been the result of the favorable weather.

MAINTENANCE. The south border of the ruins' plaza has been cleared of all brush which job was completed in preparation for continued stabilization work this Spring.

All tools and equipment have been gathered, borrowed, loaned and rented, that will be used in pumping water under pressure into the plugged drainage ditch, and just as soon as the frost recedes from the ditch from which we shall obtain water, we shall start operations. During the past week we have been chopping and digging an access ditch which will carry water to the drainage ditch alignment.

COOPERATING AGENCIES. The goodwill of the local municipalities has been quite well demonstrated by their loan of equipment for us to use in an attempt to free the drainage ditch pipe. Farmington has loaned us a traveling nozzle and Aztec Fire Department has loaned sufficient fire hose with suitable couplings to run from a rented high pressure pump to manholes in the drainage ditch. We are anticipating great results with this equipment and hope it will allow us to clear the pipe line.

INTERPRETIVE SERVICES. There were 305 people conducted in 76 trips thru the ruins, and 406 visitors in 104 trips were shown the museum.

INCREASE IN TRAVEL. This year we have had 406 people in 131 cars from 24 states and the Dominion of Canada, in February 1946 we had 286 people in 86 cars, which is about a 30% increase. There were no members of the armed forces, which is unusual.

PERSONNEL. The Custodian was on annual leave from January 27 to Feb 14, during which time we enjoyed a pleasant vacation on the West Coast and in visiting several of the National Monuments enroute.

PROPOSED ACTIVITIES FOR March. Continue drainage ditch operations.

Irving L. Townsend
Irving L. Townsend,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

February 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of February, 1947.

Weather and Roads

There has been exceptionally beautiful weather during the month. On most days the temperature hovered between 50 and 60 degrees. The highest temperature during February was 64 degrees and the lowest 10 degrees. There has been little moisture--only .08 inches until the 27th., when there was a snowfall of .30 inch precipitation.

Because of the dry weather, the road became somewhat dusty and rough. It was impossible to do much maintaining on the surface of the road because of this condition. However, today--the 28th.--after the nice snowfall yesterday, Foreman Wendland is on the road with the Ellis-Chalmers maintainer and it is believed will improve the road.

Maintenance

Foreman Edd Wendland and Laborer-Leadman Toribio finished the job of treating and replacing exposed vigas on all the buildings.

Augustine Pino continued his work on the force account painting and decorating job and is rapidly bringing this project to completion.

Travel

793 visitors came to Bandelier during February, coming in 215 automobiles. Of these 215 cars, only 15 were re-entries. It is pointed out that the total of 793 visitors is an increase of 50% over the figure for February 1946. The increase in the number of automobiles was approximately the same percentage. At the end of February 1946 the summary for the travel year stood at 3233. This year it was 3227. However, the summary for the Fiscal Year at the end of February 1946 was 7839 and this year it is 13395. These figures show that for the period July 1 to February 28 there is an increase of 70% so far this fiscal year.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDOLIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

January 25, 1944

Mr. J. H. ...

Dear Sir: ...

Very truly yours,

...

...

Sincerely,

...

...

Very truly yours,

...

The increase in travel is probably due somewhat to the beautiful weather prevailing here during February, but probably also is an indication of increased travel during the coming season. To be emphasized is the fact that all of the increase has taken place after July 1, 1946.

15 members of the Armed Forces visited the area during the month.

Interpretation

70 conducted tours were made to the ruins, with a total attendance of 499 people. The average duration of the trips was 1.15 hours. The ruins trails have been quite dusty because of the lack of snow or rain during the month. Consequently, nearly everyone needed a shoeshine (yea, if not a bath) after his trip.

There is very little time available for the Ranger on contact duty to conduct people to the Museum but 26.68 visitor participation hours were accumulated in this manner during the month.

Custodian Thomas talked at an assemblage of the Region III In-Service-Training Group during his tour of duty at the Regional Office. About 50 members were in attendance.

Much time is devoted by the Custodian, Rangers, and Clerk to interpretation work in connection with the Museum Lobby. This promises to take the full time of one person when travel becomes a little heavier.

Considerable progress has been made by Ranger Keefe on his project of cataloging the Museum and Library. All of the miscellaneous items in the Museum have been cataloged and arranged in storage. Plans are coordinately being formulated to take measures to treat various specimens with preservatives so as to insure their permanent preservation. Work on the Library continues to be mostly that of preparing the three main types of cards (author, subject, and title) for the card catalog. It is believed that the Library can be cataloged and arranged in time to be used effectively in the interpretative program this summer.

The collection of informational literature from other parks and monuments in the Southwest is now almost complete. A cabinet has been constructed to contain these booklets and is ready for use. The purpose of this project is to provide interested visitors with information regarding other areas. Last season there were numerous inquiries along that line.

Visitors

It was a pleasure to have the following National Park Service people from Region III visit the area during the month: Feb. 2, Henry B. Tuller and family; Feb. 12, "Slim" Ratcliff and his Father and Mother; Feb. 16, Alfonso Gonzales, with his family and friends; Feb. 23, Jack Miehle and

Dale King, together with their respective guests.

Other visitors during the month included Mr. W. Brown and his companion, both of the FBI, on Feb. 8; Professor Muzundar and his student group from Highlands University on Feb. 8; Mr. Joseph M. Grimshaw of the Forest Service on Feb. 11; and Mr. J. W. Hendron of the State Tourist Bureau on February 23.

Personnel

The Custodian has been on duty at the Regional Office during most of the month of February.

Ranger James Eden and Maintenance Man Tony Valencia were absent from the Monument between February 16 to February 23, during which time they were engaged in transporting two turret trainer trucks to Casa Grande and returning with an ambulance and other surplus materials from Luke Field, Phoenix, Arizona.

Ranger Eden and Clerk Glen Bean departed Feb. 25 to aid in the further distribution of surplus properties to and from Carlsbad Caverns.

Laborer-Leadman Crescentio Toribio was terminated at 5:00 P.M., Wednesday, February 26.

Lost Persons

Bandelier participated in an indirect way in the rescue of three persons lost and their car stalled in the Jemez Mountains. A young man, Mr. C.E. Nilsen, with his parents visited the Monument at noon, Feb. 19. Mr. Nilsen was heard to remark that he would like exceedingly well to have his parents see the Valle Grande. Knowing the condition of the road, Ranger Keefe cautioned against such a trip at this season. That evening received several calls from a frantic wife and was visited by the Los Alamos M.P. who were searching for the missing group. After a search by horseback from the Boyd ranch and several automobile attempts from this side, the party was finally located by airplane late the next day.

In general, conditions at monument are satisfactory, and all required reports submitted during the month. The major work now is getting the building to get supplies and materials for the larger quarters and repair of equipment. Reports have been made along the line of little progress at present and will be made again soon by the Inspector.

Major part of our time has been spent in working over the Trailer House for the purpose of getting it ready for the winter. This work has consisted in the re-modeling of the building, and the removal of the old furniture and the installation of new furniture. The new furniture is now in place and the building is now ready for the winter. The new furniture is now in place and the building is now ready for the winter. The new furniture is now in place and the building is now ready for the winter.

Work is being done on the building and the new furniture is now in place. The new furniture is now in place and the building is now ready for the winter. The new furniture is now in place and the building is now ready for the winter.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Canyon de Chelly

NATIONAL MONUMENT

Chino, Arizona

February 25, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of February, 1947.

Weather

The month of February has been exceptionally nice as far as weather conditions are concerned, days warm and springlike. The usual high winds and rain and snow did not make their appearance. However, this is not good for the country. Everything is very dry and the warm days have caused much of the snow and ice to melt in the higher country causing a much greater run-off than is normal for this period. We will need more moisture during the spring to avert a bad drought during the summer. Maximum temperatures were mostly above 50 degrees, the highest being 65. Minimum temperatures have been generally below freezing with a low of 15 degrees.

Administration

A general inventory of equipment was submitted, and all required reports called for by FO memorandums. Two trips were made to Gallup New Mexico to get supplies and materials for the Ranger Quarters and repair of equipment. Patrols have been made along the rims of both Canyons as heavy run-off has made canyon travel even by horse impracticable.

Maintenance

Agreater part of our time has been spent in working over the Trailer house for Permanent ranger Quarters. This unit was constructed for an office, and changing around was necessary. It was placed on a stone foundation, and connections to the water and sewer lines were installed. Electric connections were made, and cabinet work was built for the kitchen and a new Sink and Wickless Kerosene range purchased and installed. It has been repainted all over and is at present ready to move into. All equipment that came with the trailer had to be taken down and cleaned, this included the water closet and lavatory where connections were plugged and rusted out, and the oil heater with forced draft as well as a duotherm automatic oil hot water heater.

General cleanup, and rearrangement has also been necessary. A new sign was constructed, painted and installed at White House turn off.

Inspections

The report of an undiscovered ruin with a leather rope still dangling inspired the custodian to make an investigation. The Navajo boy who reported this was to meet me about half way between the Monument and Haslini. He had car trouble and didn't show up in time to point out any more than the general location of the Ruin. It may be three Turkey house or it may be an officially undiscovered ruin. He says it is in a side canyon below Three Turkey house. When time permits we will make a more thorough reconnaissance of the area.

During this trip I visited the many storied Frog shrine. For years stories have circulated about the "petrified Frog" of which the Navajos were superstitious and used to grind "Rain-making" medicine. This proved to be a sand stone concretion that greatly resembles a frog. A small mortar has been made in its back for grinding medicine. It is Navajo and not of pre-historic origin according to the Navajo Boy.

Public Health

An epidemic of a virulent type of Measles made its appearance in this area. The hospital at Chinle is overcrowded and Navajos have called on the custodian for help many times. If care is not taken, it seems to develop into Pneumonia. I buried one six month old baby boy for Stephen Charley, and to date have hauled in thirteen very sick children to the Hospital. Although this disease is not serious if adequate care is given, the Navajos do not understand how to take care of them and keep them warm and clean.

Travel

Although travel conditions have been ideal we have fallen below the figure for February 1946. We had 43 visitors as compared with 50 last year. Our travel year to date and Fiscal year figures continue to show a sizeable increase.

Interpretive Service

With the 33 attended visitors a total of 18 hours were spent in ruins trips and interpretive contacts.

Visitors

Gerard Curtis Delano, Artist, whose paintings of the Navajo country appear on most of the Santa Fe railway calendars. Mr. and Mrs. C. Guy Denny of the radio station at Gallup, New Mexico.

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

February 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for February, 1947.

General: Water, or the lack of it is the big subject of conversation in the valley. Very little snow and moisture of any kind has fallen on the watersheds back of the big dams and with the water table low allready, the agricultural out look is none to good.

Weather: "Wonderful", "grand", "exquisite", and "superb", have been adjectives given out by the visitors when describing local weather for the past month. Except for one day, Feb. 18th., when the maximum registered was 69 degrees, all other maximums were over 70. The high for the month was 86 registered on the 16th. Nights as a whole have been cool with 7 nights registering minimums of freezing or below. The low for the month was 28, recorded on the 3rd. and again on the 19th.

Inventory of Publications: C. G. 2 fold leaflet - 1600, C. G. Spanish 2 Fold leaflet - 3125, S. W. N. M. Map Folders - 3000, N. P. Location Map # 6 - 50.

Visitors: February 1947 - 5517; February 1946 - 3637; February 1941 - 2889. Travel year to date 1947 - 17,889, Travel year to date 1946 - 12,361. According to figures released by the Bureau of Plant Industry checking stations in the state of Arizona, the state had a drop of 10% in visitor cars checked in. This is not reflected in our visitor totals as we had an increase of over 50% over February 1946 figures. The visitor seems to have plenty of money to spend as 34M association book sales have hit over \$250.00 for the past two months.

Interpretive Services: Of the 5517 visitors to the area, 4105 made the Ruins trip in 241 parties averaging 53 minutes per trip. 222 museum trips were taken with 3206 people averaging 31 minutes per trip. 1412 people came into the area but did not make the Ruins trip. A recap of interpretive service to the Ruins from Feb. 24, 1946 to Feb 1947, shows 2156 trips with 21,880 people, with an average of 52 minutes per trip. A breakdown showing personnel taking groups is as follows: Custodian Bicknell, 667 trips, 5988 people, 571 hours spent; Ranger Schuft, 991 trips, 9744 people, 862

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Interpretive Services Continued: hours spent: Archeologist Schumacher, Ranger Fowler, Ranger Sharpe, Ranger Vivian: 598 trips, 6148 people, 467 hrs. All of which indicates that the past 12 months have been busy ones at Casa Grande National Monument.

Maintenance: With the great influx of visitors and extra work connected with surplus materials from War Assets Administration, maintenance has been mostly routine. The floors in Quarters # 1 were given a coat of varnish and the kitchen walls two coats of semi gloss paint. This was done on the Ranger's own time.

Trips Taken: Feb. 10 - 12, Mechanic Stonehocker made a trip to Gallup to pick up surplus trucks. Feb. 19, Custodian Bicknell, made a trip to Phoenix in connection with surplus goods. This trip was made on his own time. Feb. 24, Mechanic Stonehocker to Williams Field to pick up surplus products, and also on the 20.

N. P. S. Visitors & Visitors of Note: Sunday, January 26, Dons Club of Phoenix made their second trek to the area with approximately 250 visitors. Feb. 5, Insel Adams, MPS Collaborator stopped in to look over the area. Feb. 5 & 6, Ranger Sharpe & wife, and Grader Operator Marble brought in a truck for Walnut Canyon and picked up some surplus materials for Chiricahua. February 8 & 9, and briefly on Feb. 12, Assistant Regional Director Davis and Architect Saunders were in to go over some of our problems with us. Feb. 18 - 22, Ranger Eden and Tony Valencia of Bandelier brought in some surplus trucks from Mesa Verde and Phoenix vicinity and while here helped repair an ambulance to take up to Bandelier. Feb. 8 and again on 23, Ranger Aubuchon and wife were in to visit on their way to and from temporary duty at Tumacacori National Monument.

Leaves Taken: Feb. 17-19, Mechanic Stonehocker took sick leave. January 29, Ranger Schumacher took sick leave.

A. T. Bicknell,
Custodian.

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

February 28, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of February, 1947.

There were a total of twenty-seven visitors to Chaco Canyon during this past month. They came in seven automobiles from the states of Colorado - 2 cars, 8 visitors; Kansas - 1 car, 2 visitors; and New Mexico - 4 cars and 17 visitors. Of these visitors, 27 took a trip through the ruins. There were seven parties. In all they spent 500 minutes. Twenty-six tickets were sold and one complimentary ticket issued. At the end of the month, there were approximately 10,300 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

Five written requests were answered.

The coldest during the month was 0 degrees on the 30th of January and the warmest was 65 degrees Fahrenheit on the 16th of February. There was 1.30 inches snow on the 29th of January and together with the rain on the 10th of February, formed a total precipitation of .42 of an inch. The severe cold weather of last month made a last gasp and froze a branch line of the water system, thus making it complete -- every pipe in the canyon, except the main line, froze some time during the winter.

After last month's delays, caused by sub-zero weather, heavy snows, freezing pipes, inadequate chimneys, non-functioning stoves, and the like, this month has seen a great amount of good accomplished.

The rack has been built for the fire box, and the fire tool box and contents placed on the rack. Now, the box can be pulled onto a truck with almost any height body in practically nothing flat....not that a forest fire is expected, but we are getting ready for any emergency.

The loading dock has been nearly completed. Now, the barrels, drums for

Document ID: A60897

There was a total of twenty-two victims in these cases during this past year. They came in from various parts of the State of Michigan - 2 from Detroit; 2 from Ann Arbor; 1 from Flint; 1 from Jackson; 1 from Kalamazoo; 1 from Lansing; 1 from Marquette; 1 from Saginaw; 1 from St. Ignace; 1 from Warren; 1 from Westland; 1 from Ypsilanti; 1 from Zeeland; 1 from a city through the State. There were other victims in all other parts of the State. Twenty-two victims were also and approximately 1,000 of the people, there were approximately 1,000 of the people. This number is high, and an entire population of the Government. (1911).

...the afternoon of the 20th.

The following is a list of the names of the persons who were present at the meeting of the Board of Directors of the United States Steel Corporation, held on the 10th day of January, 1907, at the City of New York, New York.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States.

The first two days of the trip were spent in the mountains, and the last two days in the valley. The trip was very interesting and the scenery was very beautiful. The trip was very successful and the trip was very enjoyable.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED

butane, and others, sit up on it and it is very much easier to load and unload them; and the place is generally cleaner for the containers are no more down in the dirt and mud, but placed neatly on the rack.

The tool rack for the shovels, picks and like tools, in the tool store room has been painted as has the lumber rack. In the work room, the first rack for tools has been enlarged, another even larger built, and both of them and the work benches painted.

The roads were graded and the rocks taken out of the road. An effort is being made to give the road a better crown. Each time the road is graded, the crown is just a little higher. It is hoped that, because of the drainage then afforded, by next winter the road will not be so nearly hub deep as it was this past (we hope) winter.

An interesting letter was received by the Custodian from the Master of the good ship, "Chaco Canyon". It came through the war still afloat and is now operating for the American Pacific Steam Ship Company. A long time the ship was being built, this Custodian made an effort to locate it in order that some literature concerning the Canyon might be presented to the men of the vessel, but he was unable to locate the ship before he went to war. Now, the Master writes in requesting literature. The ship is 525 feet long and 69 feet wide, is a tanker, and has a capacity of 141,118 barrels. How many other Monuments, or Parks for that matter, have a namesake traveling the seven seas advertising them?

The Trading Post Operator reports that he has taken in more Navajo rugs in the last two weeks than he had in the preceding month and a half or two months. The sale of merchandise has also picked up, a mere corollary, of course.

In preparation for the large tourist season that is anticipated, he has most of his souvenirs already ordered, is stacking up on soda pop, and is in the process of painting the cabins.

The Trader reports, among others, one amusing yet pathetic incident. One Navajo, having spent all his money and with no immediate prospect for more, came into the store and wanted to pawn his pocket book!!

The only National Park Service visitors in the Canyon during this past month was Charlie Steen, who was in twice, thus making him visitors instead of visitor!

There follows the report of Archaeologist R.C. and Gordon Vivian.

General

Good progress is being made at Chetro Ketl. Though there are 10 men on the

The local news from the University, which was held at the University of California, San Diego, was also included in the report. The report also mentioned the fact that the University had been selected as one of the top ten universities in the world.

-3-

The results were gratifying and the project indeed one of the best. An effort is being made to turn the road a better way. Some time ago the road is closed, the owner is just a little higher. It is hoped that, because of the highway, some attention, by some other way will be an early day as it was this

The finding that a person's attitude toward a group is more strongly related to the person's attitude toward the group's members than to the person's attitude toward the group's leaders is consistent with the social identity theory of group behavior. This theory suggests that a person's attitude toward a group is based on their perception of the group's identity, which is shaped by the group's members and leaders. The finding that a person's attitude toward a group is more strongly related to the person's attitude toward the group's members than to the person's attitude toward the group's leaders is consistent with the social identity theory of group behavior.

It is important to the large number of people who are interested in the work of the Commission that the Commission should be able to provide information to the public in a clear and concise manner. The Commission is committed to this goal and will continue to work to improve its communication with the public.

THE UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WASHINGTON, D. C. 20250

The only national newspaper in the United States is the New York Times, which is published daily except on Sundays and public holidays. It is the largest newspaper in the world, with a circulation of over 1 million copies daily. The Times is known for its comprehensive coverage of national and international news, as well as its editorial content. It is also one of the most influential newspapers in the world, with a long history of reporting on major events and shaping public opinion.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE

payroll now, sickness, family trouble and the usual Navajo ailments have sometimes cut the crew to four. In spite of this, Al. Lancaster manages to keep the work well organized and he has turned out a great deal of work this period.

One small find was made in cleaning up a fallen wall.

Recording of the work is behind since the first films sent in for processing have been returned only today. We still feel the need of the exposure meter ordered from the manufacturer nearly two months ago and not yet received. Either this or one on loan.

Writing up of materials tests has been postponed while we work on the Chetro Ketl ground plans.

The original and apparently only usable ground plan of Chetro Ketl has been borrowed from Paul Reiter of the University of New Mexico. It is in large scale, roughly five and a half feet by three feet in size and it does not show the last season's excavation. Room numbers have been assigned in the area where we are now working and as the plan is being traced it is also being corrected and brought up to date. (If Matt Dodge wants a picture of a man in difficulties he should see our drafting room, a splintered piece of plywood 4 x 8 resting between the piles of cement sacks and the blacksmith's bench).

PUBLICO MONITO

An additional man day was spent trying to find the source of considerable subsurface moisture entering the plaza kiva, L. Deepening of the trench disclosed four stone steps of a stairway ascending around the outside of the ventilator shaft. They appear to be the center section of a stairway that started down somewhere around bench level and came up to the surface curving around the shaft.

CHETRO KETL

Backfilling of low areas, removal of the second railroad grade and drainage of the west plaza have been completed. A lot of stone has been salvaged from these operations. Thanks to the cooperation of the custodian we were able to have the soil hauled in for backfilling leveled off with his grader. This saved us a lot of labor.

In removing the railroad grade it was found that it had been built over a very small room left above the cut down plaza level. That is, the excavators back in 1921 had removed a large area of the latest plaza level to a depth of two feet. This small room, 5 x 7, was on the edge of the cut; a part of the east wall had been removed but the room never cleaned out. Subsequently the railroad was built over it and then at a later time the plaza on the other side of it was cut down some two feet also.

It is a curious structure for the last plaza level of Chetro Ketl. Built in part of vertical slabs and for the rest of horizontal, single course masonry, it was unfaced on the exterior and had been to all indications an entirely subterranean room.

The stone and plaster show extensive burning. The floor was covered to a depth of a foot with charcoal but no ash was present. The charcoal was badly broken; it did not come from the roof of the structure and has the appearance of having been burned elsewhere and then thrown into the room. No other material was found with the charcoal.

Selected specimens have been obtained for dating. Photographs and further data will be submitted at an early date.

I might be of interest here to note that in "Art and Archaeology" for 1921, where data on the early excavations was obtained, reference is made to "Navajo corn roasting pits" in the plaza of Chetro Ketl.

Wall repairs have been completed on the first and second story walls of room 65, east, west and south sides. Extensive work was done on the three foot thick south wall. Work on the third story west wall is completed and is in progress on the remaining walls. This work takes a lot of scaffolding.

Repairs and capping have been completed on 87, west and north; the north wall of 86 has been repaired to tie in the corner of 86-104. Also completed were wall repairs in the lower level of 104, north and south. Some concrete work was set here to preserve extensive prehistoric remodeling of doorways. In progress on these rooms is repair and capping of 104 south, upper level, and rebuilding of the corner of 104-70.

Also in progress is repair of a full story break in 101, east wall and a partial break in 103.

Complete repairs were made to the south wall, lower level of 94. Two other walls here require extensive work and this is being held until the work on 103 which adjoins it can be brought up and tied in.

This room, 94, had been excavated down about two levels on the west and left full of debris on the east. The excavated half of the south wall was in bad condition and had not been cleaned off by the excavators. A broken niche was found here and on the floor of it portions of what is likely a medicine man's outfit. This includes: (1) a triangular shaped wand of sticks, the center of the triangle filled with yucca fibre quilted and sewn to sticks with cording, (2) several sections of reed in good condition, (3) a wrapped feather from a prayer stick, (4) a large fragment of chert,

with your 2 line signature. I will be happy to help you with this.

1. In the case of the "Lithuanian" and "Latvian" groups, the results of the analysis of the "Lithuanian" group are shown in Table 1 and the results of the analysis of the "Latvian" group are shown in Table 2. The results of the analysis of the "Lithuanian" group are shown in Table 1 and the results of the analysis of the "Latvian" group are shown in Table 2.

[illegible][illegible]

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1950. At the same time, the population of rural areas has decreased from about 100 million in 1900 to about 50 million in 1950. This has led to a concentration of the population in urban areas, which has had a profound effect on the social and economic life of the country.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The next step is the collection of data. This is done by the investigator who is responsible for the study. The next step is the analysis of the data. This is done by the investigator who is responsible for the study. The next step is the interpretation of the results. This is done by the investigator who is responsible for the study. The next step is the presentation of the results. This is done by the investigator who is responsible for the study. The next step is the conclusion. This is done by the investigator who is responsible for the study.

THE NEW YORK PUBLIC LIBRARY, ASTOR LENOX TILDEN FOUNDATION, 410 FIFTH AVENUE, NEW YORK 17, N.Y.

(5) a nodule of azurite, (6) a "problematical" object of unbaked clay that looks as if it might be a jar stopper or a spindle whorl without the hole, (7) a few strands of cotton cord.

These objects will be described more fully, photographed and deposited with the custodian as time allows.

*

*

*

The artifacts mentioned in Gordon's report have just been presented to the Monument, but have not yet been catalogued.

Projects for the ensuing months:- buy paint and paint and letter the signs; paint the Office when that paint arrives; get the stream erosion control project started; get the fence control project started, keep office and routine duties current.

REPORTED for the National Director, Region Three.

Following is a report of activities at Chiricahua National Monument for February:

Weather Conditions. The month of February has been quite dry, with no precipitation recorded here, and has been warmer than usual. On only a few nights has the temperature dropped to freezing, and daily temperatures usually have been between 50 and 60 degrees. Not much cloudiness occurred during the month. Some snow remains on the north slopes on the monument and considerable snow is visible on the Chiricahua south of Bassi Point. The whole area is the driest it has been in 25 years, with prospects of a water shortage limiting campground use unless it rains a lot.

Special Activities. The outstanding event of the month was, on February 27, the wedding of Custodian Clair V. Cooke and Miss Elinor Northampton of Illinois, at Bisbee. Mr. & Mrs. Cooke left on a trip which will take them to Grand Canyon and northern Arizona. They plan to return about March 15. Among more prosaic activities, Ranger Sharp and Operator Marble made a trip to Casa Grande National Monument to deliver the Ford pick-up which was transferred to Walnut Canyon, and to bring back bookcases and other supplies. Custodian Cooke gave an illustrated talk at the Gadsden Hotel in Douglas on the night of February 17.

Inspections. Assistant Regional Director Davis and Architect Saunders visited Chiricahua on February 18, and inspected the area with the Custodian. We were glad to see Mr. Davis again and to welcome Mr. Saunders on his first visit to Chiricahua.

General Publicity. A news item is carried each month on travel and events of interest at the monument, by the Douglas and Bisbee papers.

Approaches to Monument Area. The approach roads from Douglas, Bisbee, and Wilcox are in good enough condition, though rough due to dry weather. In the past week, several cars have come through the mountain road from Portal over Onion Saddle. Natives report the road not bad, but some drivers not accustomed to mountains say it is a bit rough. Unless we receive another snowfall, that road will remain open all summer.

...the ... of ...

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Interpretive Service. Most contacts were made at Headquarters, though the Ranger spent several hours on patrol each Sunday, most of it in talking with visitors at Massai Point. With the increase in travel, much of the service is in giving information as the cars are checked in. One trip was made with a visiting charter car party, including a hike into Echo Canyon. Considerable time is spent with interested visitors in the museum and the forested area near Headquarters, answering questions on the vegetation and wildlife.

Travel. Travel this month showed an increase of two and a half times last month's registrations, and two times the number for the same month last year, with 240 visitors coming in on the Sunday after Washington's birthday. If that trend continues, this summer will show a strain on facilities and personnel on peak days. The dusty Monument road is already a hazard around Headquarters, with the small size of the parking area contributing to traffic difficulties at times. Campground use shows the expected increase as spring nears, and we get many inquiries about camping here next summer.

Visitors. Ansel Adams, camera artist and Park Collaborator, looked in for a day, on February 24, to scout out the possibilities of the Monument.

General. Custodian Cooke spent considerable time working out the Forest Protection Plan requested by the Regional Forester's office. POP sheets are being prepared for a fence project and an enlarged parking area at Headquarters. We have started to prepare for the Fire Control Conference to be held here early in April. The Custodian painted one room in his house. A regular radio schedule with Organ Pipe Cactus and Laguna Monuments has been started for the season, with broadcasts at 8:00 a.m. Sunday mornings for the present.

February 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for the month of February.

WEATHER: The badly needed February snows did not fall and this section of the country is as dry as it has ever been. Only $2\frac{1}{2}$ inches of snow were recorded during the month when a normal fall of one or two feet can be expected. There was just a trace of precipitation as high winds caused very rapid evaporation. Temperatures were above normal, rising to a maximum of 58 degrees and dropping to only 1 degree below zero for a minimum.

TRAVEL: The abnormally dry weather brought us a record visitor count for February, 84 visitors in 31 cars. A total of 68 made the tour of the inscriptions in 24 trips and the guide time amounted to 29 hours and 10 minutes. Sixteen visitors came for information only.

MAINTENANCE: During the custodian's absence on annual leave Mabon Barnes did an excellent job of waxing floors and painting walls and woodwork in livingroom, diningroom and kitchen. With the unexpected high travel count I was amazed to find this job so complete and was also pleased to find a note from one party complimenting Mabon on his courtesy. Mr. DeRuiter spent a full day on the files which are now beginning to show some semblance of order.

APPROACH ROADS: Dry, still rough, but passable. With other representatives from El Morro, Ramah, Grants and Gallup the custodian attended a conference with Burton Dwyre, State Highway Engineer, on February 3, at which time a request for the improvement of State Highway 53 (Grants to junction of 33 & 32) by proper grading, drainage and surfacing, was presented and considered feasible by Mr. Dwyre. On February 7 with representatives from Gallup and Grants, another trip was made to Santa Fe to attend a conference with the State Highway Commission. At this conference Mr. Dwyre presented our request and recommended a standard of \$5000 to \$8000 per mile. Our request was approved 100% by the Commission. We haven't seen any center line stakes yet, but feel certain that we will eventually have a loop road from Grants to Gallup over which a person can travel without an extensive knowledge of navigation, rigging, etc. It was also learned that Highway 32 from Gallup to Fence Lake was on the approved list.

GRAN QUIVIRA, NEW MEXICO.

FEBRUARY 25, 1947.

The following is a summary of activities for the month of February, 1947.

Visitors this month totaled	162
Travel year to date	552

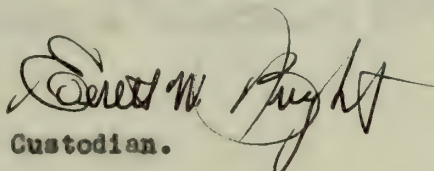

Weather. This has been a month of clear, cloudless, dry days. There was no precipitation of any nature. High temperature was 67 and low 13.

Roads. The State Highway Department has been unusually active during the past two weeks and as a result both approach roads are in good condition. The entrance road to the monument was also smoothed by the highway crew and is now in good shape.

Travel. If visitor travel to this monument is any indication of general travel throughout the country, all signs point to heavy visitation this coming spring and summer. Travel to the monument more than doubled that of the previous month of January. Instate visitors numbered 122 and outstate visitors 40. There were a total of 45 cars with instate numbering 33 and outstate 12.

Guide and Contact Service. A total of 162 visitors were conducted through the ruins on 45 guided tours. The average time spent by each party was 57 minutes. Total contact time of 43 hrs, 05 mins.

Maintenance and Administration. Outside of the 43 hours and 05 minutes given to interpretive service the entire remainder of time during the month was spent restoring the walls of the mission and convento.

Custodian.

SUMMARY of the FEBRUARY, 1947,
MONTHLY NARRATIVE REPORT for
GREAT SAND DUNES NATIONAL MON.

P-1 GENERAL: Three days annual leave.

P-1 WEATHER: Usual winter weather with one week almost spring-like.

P-1 TRAVEL: 235 visitors, 72 cars.

P-1 INCREASE IN TRAVEL: For February 1946, 72 visitors, 32 cars.

P-1 ROADS: Dry and rough.

P-1 PUBLICATIONS: 169 leaflets.

P-2 ACTIVITIES: Attempt to produce man-made thaw on frozen water line;
weather-stripped windows on southwest side of custodian's
residence; customary hauling of water and wood; obtained
repaired dump truck and left pickup for repairs.

Ann. N.Y. Acad. Sci. 1969, vol. 162, no. 1, pp. 341-349.

MOSCA, COLORADO

February 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for February, 1947.

GENERAL. Three days annual leave were taken.

WEATHER. The weather during this report period has been both warm and cold. One week of spring weather was immediately followed by winter.

TRAVEL. Two hundred thirty-five visitors in seventy-two cars, visited this area during this report period. Fifteen people took advantage of nice weather to picnic in the campground. One written request was answered.

INCREASE IN TRAVEL. For February, 1946, the records show 31 cars and 72 visitors.

N.P.S. VISITORS. Glen T. Bean of Bandelier National Monument and Henry B. Tullar of Region Three Office on February 8. Sorry to have missed you fellows.

ROADS. Both monument and approach roads are dry and rough. The county will blade them whenever enough moisture falls to enable starting this work.

PUBLICATIONS. There are on hand, one hundred sixty-nine mimeographed informational leaflets.

PRIVATE LAND. Mr. John Williams has been cutting and hauling a considerable amount of timber from his land. He has also paid his fee for driving cattle through the monument.

STATUS OF WATER RIGHTS. Another trip was made to the county court house in Alamosa for additional information regarding Mosca and Morris Gulch Springs.

WILDLIFE. Ten mule deer were observed browsing at Mosca Spring. A bear and cub were reported by men cutting timber on the William's land.

ACTIVITIES. The "Singing Sands" are still moaning low. The water line remains frozen - Mosca Spring ceased flowing and water is now obtained by the bucket-full from Mosca Creek. It is hoped this water is pure, as to our knowledge there are no cattle at present around the northeastern boundaries of the monument.

An Aeroil Burner was borrowed from a friend in Denver in an attempt to produce a man-made thaw on the water line. All remaining ice and snow was removed from the trench. The burner was put into action and it did thaw the ground enough to allow digging and probing for the pipe.

One hundred feet of pipe was uncovered - it was buried under from 2 to 6 inches of frozen dirt. The burner was applied and water ran in the house for at least 15 minutes. However, this only went to prove that the line is frozen above this point (2,000 ft) and the heat only melted the ice in this 100 foot section.

Winter weather set in again and this project will continue when weather permits. It is quite surprising how handy the HCWP has become with a short handled shovel.

Mr. Heide kindly loaned this area a new 55 gallon drum and fittings which was installed in basement as a storage fuel tank for the oil stove. This has saved some wear and tear on the custodian, as he now only has to fill it once a week. A copper tube leads to the stove from the tank and a constant flow of oil results. During the installation, the basement received a cleaning-up job.

On February 3, the repaired dump truck was taken from the Heide Garage in Mosca and the monument pickup was left for repairs. The luckiest thing to have happened to me was the fact that the pickup kept running. When the clutch was removed, it was found that the plate was paper thin - its a wonder that it held together as long as it did. The pickup should be repaired by the first of March.

A barrel of gasoline was obtained under the new contract issued; also kerosene for the Aeroil Burner and fuel oil for the stove.

The windows on the southwest side of the Custodian's residence were weather-stripped.

The following items were also received: one tire, two sets of tire chains, electric light bulbs, paint brushes and fire extinguisher.

Ted C. Sowers,
Custodian.

Montezuma Castle..... NATIONAL MONUMENT

.....Camp Verde, Arizona.....

.....February 24, 1947....., 19.....

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of February, 1947.

Visitors this month - 1417; travel year to date, 5243.

Visitors February, 1941 - 318; travel year, 1941, 1902.

Weather Our weather has remained ideal for travel with no moisture throughout the month. Dry leaves in the creek bottom are already presenting a fire hazard.

General Six hundred and thirty-three visitors were guided through the Castle in February. This was almost twice the total travel for February, 1941 when 318 visitors were counted and 134 entered the Castle.

Administration This has been a busy month with a record-breaking number of visitors for February and several minor projects to occupy our attention. Thirteen trips were made to Montezuma Well to patrol the area and secure data desired by the Regional Office. Although we have no accurate count, it is evident numerous visitors are stopping there, thirteen car loads having been counted one Sunday afternoon. No vandalism has been noted but there has been some trespass by stock and several stray animals have been driven out. A campaign has been started to clear the area of trash and junk as we have the opportunity.

Ranger Schroeder completed the rough draft of a booklet that we propose to use in connection with a self-guiding trail at Montezuma Well.

An extension to provide more display space was made for the back of our publications case. Our three post card views and the following pamphlets have been made available to the public on a "serve yourself and make your change" basis; Arizona Highways Magazine for July, 1946, Prehistoric Man in the Southwest, The Archaeologist at Work, Oak Creek Canyon, A Visit to Montezuma Castle, and Montezuma's Castle. The first day the plan was in operation we checked out thirty-five cents short and the second day a youngster who had failed to pay was

There is a small, dark, rectangular object, possibly a piece of wood or metal, lying on the ground. It is oriented horizontally and appears to be a component of a larger structure, possibly a door or a window frame. The object is dark in color, possibly black or dark brown, and has a rough, textured surface. It is positioned in the lower right corner of the frame, near the edge of the ground. The background is a light, sandy or dusty surface, possibly a beach or a dry, open area. The overall scene is somewhat desolate and appears to be a close-up shot of a small, isolated object in a natural setting.

apprehended with about a dollar's worth of publications. In three and one-half days the plan has been in operation there was a turn-over of \$16.35 worth of publications. We collected \$13.77 and are \$2.58 short.

Pictures that are made annually to show the effectiveness of our fence were taken and sent to the photographic contractor.

National Park Service Visitors Custodian Townsend and family were here January 26. Assistant Regional Director John M. Davis and Architect Kenneth M. Saunders visited this monument and Montezuma Well. While here Mr. Davis took a boat ride across Beaver Creek to study a water-gap problem. Ranger Kennedy and family from Grand Canyon.

Outside Contacts On January 31 Custodian Hastings demonstrated the operation of soda and acid fire extinguishers to the science class of Camp Verde High School.

Maintenance All soda and acid fire extinguishers were discharged and refilled. We sanded the pick-up and gave it a coat of black enamel. It was rather difficult to sandwich this project in between other jobs for which the truck must be used.

The kitchen at Residence No. 2 has been redecorated and the project started for the bathroom.

Ruins Stabilization Archaeologist Steen arrived February 4 to install three house jacks and complete the stabilization project on the cliff under the Castle. The jacks he had received from Surplus Property were the 25 ton size - far too large for our purpose. Iron pipes were substituted for the jacks and these have been concealed with masonry. The project was completed February 19.

Attention was then turned to providing a hard surfaced trail from the register stand to the foot of the Castle ladders. This trail traverses part of the refuse dump and under heavy traffic, dust would become more than an inch deep. At the suggestion of Archaeologist Steen stabilized soil was used for surfacing material. The trail is quite steep and it was intentionally left very rough with diagonal grooves made to provide better traction.

Montezuma Well On patrol trips to the area an effort is made to advance minor maintenance items. The lock to the museum door has been repaired and the roof cleared of leaves. An irrigation ditch supplying the lawn and yard has been cleaned of leaves and the lawn watered. Three pick-up loads of dirt have been used on the worst part of the approach road near the museum.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Use of Monument Facilities by the Public On February 1 we had 21 Boy Scouts from Flagstaff who camped overnight.

This month brought 1417 visitors to the monument in 422 cars. For admission to the Castle 503 tickets were sold, 62 children paid tax only, 65 children climbed free, and 3 members of the armed forces climbed free.

Contact Time Total contact hours, 180.80. Hastings, 55.50; Leding, 50.15; Schroeder, 65.20. A total of 139 trips were made through the Castle with 633 visitors. There were 176 groups contacted in the museum including 799 people. Ten parties of 94 people used the picnic grounds and 5 parties of 27 people camped overnight.

NATIONAL PARK SERVICE

NAVAJO NATIONAL MONUMENT

TONALEA, ARIZONA

February 24 1947

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for February 1947.

WEATHER: Generally the weather has been moderate and the snow is melting rapidly. Only the shaded areas remain covered.

ROADS: The entrance road is no longer covered with snow or ice but is deeply rutted and rough.

VISITORS: Only one party of visitors reached this area this month. This party of 3 was guided to Betatakin and brought out on the prehistoric hand-and-foot trail.

MAINTENANCE AND CONSTRUCTION: Additional work was performed in reconditioning tools and equipment. One man day was spent cleaning and removing soot from all reachable parts of the furnace. One and one half man days was spent on the automatic controls of the water heater, which is now functioning perfectly. Large juniper posts were hauled in to be used in extending our roadside directional signs to Kayenta and the Betatakin-Rainbow Bridge road junction. Some of these timbers are to be used in the construction of the proposed wayside exhibits, when the approved plans are received.

PROJECTS FOR MARCH: Pour a concrete foundation for the propane tanks. Repair a broken foot-trail sign on the Betatakin trail. Start work on additional roadside directional signs. Inspection at Inscription House. Pump water. (?) Scrape the ruts out of the entrance road--This item will be handled coincidental to trips for and with mail.

Yellowstone National Monument

February 24

Report for the Director, Region Three

There follows a report of activities in this area for
February 1947.

REMARKS: Generally the weather has been moderate and the
snow is melting rapidly. Only the shaded areas remain
covered.

ROADS: The entrance road is no longer covered with snow or
ice but is deeply rutted and rough.

VISITORS: Only one party of visitors reached this area this
month. This party of 3 was guided to the trail and camped out
on the plateau's high-level trail.

MAINTENANCE AND CONSTRUCTION: Additional work was performed in
restoring the trail and buildings. One man lay and spent cleaning
and removing snow from all accessible parts of the house. One and
one half man days were spent on the extensive cleaning of the water
basin, which is now functioning properly.
Large fuel oil tanks were located in the area and are being
relocated (possibly) along to the house and the water-basin. The
road junction. One of these tanks are to be used in the construction
of the proposed water system, when the approved plans are
received.

REMARKS FOR ROAD: From a concrete foundation for the proposed tanks.
Rebuilt a broken foot-trail sign on the plateau trail.
Start work on additional roadside directional signs.
Inpection of inspection house.
Group water. (?)
Leave the rest out of the entrance road--this item will be
handled separately to work for and with well.

ORGAN PIPE CACTUS NATIONAL MONUMENT

AJO, ARIZONA

February 25,

47.

19.....

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of February, 1947.

WEATHER:

February has been dry with no rain falling during the entire month. What looked like another splendid flower year has now become doubtful as the vegetation is badly in need of moisture to produce the blooms. High for the month was 85 on the 15th while a low of 30 was reached on the 20th.

TRAVEL:

February has been our largest travel month, with visitors showing much more interest as a whole than previously encountered. A great many of those contacted hiked along our makeshift nature trail while Alamo Canyon received its share of campers, picnickers, and hikers. Cars representing 22 states were contacted at headquarters. Week ends have required the time of both custodian and ranger on contact alone.

GENERAL:

While most time was spent on contact, Ranger Ringenback has been able to repair and paint most signs and place a few needed new ones.

It was expected that during the month our S.&M.C. fencing would be started but due to delays in materials and the International Line fencing problems, work has been temporarily held up.

The hoof and mouth disease outbreak in Mexico is now our greatest problem here. Latest reports show constant increase of the disease in Mexico with it expected to reach near the Border within the next few weeks.

The Arizona State Board of Sanitary Inspectors has informed us that they expect to put patrols on the Border to prevent cattle crossing. Permission has been granted them for patrol on the monument and our assistance has been offered them in this project.

One official trip was made to Phoenix where some much needed equipment was located for the area.

Assistant Regional Director Davis and Architect Saunders spent two days at the area on inspection.

NATIONAL PARK SERVICE

OTHER AGENCIES:

We have been informed that the U. S. Immigration station, which has been located just north of our entrance, will return to offices at the International Line during March. This will be an improvement as there was much confusion in the mind of the visitor being stopped to find where he was born before entering a national monument.

Development on the Luke Scenic easement strip is progressing rapidly with construction about 75% completed.

ACCIDENTS:

While no serious accidents occurred this month several minor ones have, due mostly to road conditions.

PUBLICATIONS:

Informational 4-fold pamphlets on hand, English version 21,300
Spanish version 3,450

PROJECTS FOR THE COMING MONTH:

We hope to get the S. & M. C. project started this month and to receive and place in use some of our equipment acquired from surplus.

William R. Superbaugh,
Custodian.

~~SAGUARO~~

NATIONAL MONUMENT

~~TUCSON, ARIZONA.~~

~~February 26~~

1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly narrative report of activities at Saguaro National Monument for the month of February, 1947.

WEATHER. Another month of warm to hot days, almost completely cloudless skies, and windless days; it has now been two months since the last rain. Temperatures have been mostly in the low eighties, with the nights seldom being cool enough to need a coat. Water runoff in the Sabino Canyon area has been gauged at $2\frac{1}{8}\%$ of normal for this time of the year. With the total absence of the normally expected winter rains, it is probable that wildflowers will be few this spring.

SPECIAL ACTIVITIES. One official trip was made during the month by the Custodian and the two Barney Brothers, when surplus War Department equipment obtained at Consolidated-Vulcan Field was taken to Coolidge. On this trip the Saguaro stake truck burned out a bearing, and had to be towed the last thirty miles; then, when starting the motor for Mechanic Stonechecker to estimate damage, the connecting rod came through the block - finishing an already almost useless vehicle. The Barneys also accompanied Mr. Stonechecker to Gallup on February 10, to return two Chevrolet trucks to Coolidge.

INSPECTIONS. Assistant Regional Director Davis and Architect Saunders arrived at Saguaro on the 14th, remaining until the 17th. Ranger and Mrs. Aubuchon, of Walnut Canyon, were in for two hours on the 21st.

MAINTENANCE. After five months of futile attempts to rent road equipment, the Coronado National Forest came to our rescue, providing not only a patrol grader, but the operator and a two-man crew. They began work on the Loop road February 13, and completed the work on the 24th, grading not only the Loop, but the road in to Madrona Canyon on the south side of the monument. Our own two-man trail crew worked with them, cleaning culverts and opening ditches, and in addition cutting out brush which has grown into the right-of-way. During the same period the Pima County Highway grader worked over the greater part of the Broadway approach road, so far once we are really enjoying complaint-free contacts with visitors.

Work of excavating the cess-pool at the headquarters was completed, and we started the rock walls, but on the second batch the cement mixer borrowed from Organ Pipe broke down, and this work is now held up pending receipt of a new drive sprocket.

Recommendation for the National Monument
Bureau of Land Management

These findings are hereby submitted to the Secretary of the Interior for his consideration and approval.

The National Monument is situated in the State of Nevada, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north. The monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north.

The National Monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north. The monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north.

The monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north.

The National Monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north. The monument is situated in the Nevada-Arizona boundary area, and is bounded by the Nevada-Arizona boundary on the south, the Nevada-California boundary on the west, and the Nevada-Utah boundary on the north.

Other maintenance included repainting of the floors at Madrona Ranger Station, part of the Headquarters kitchen walls painted, and a new coat of tar applied to the barn roof at Madrona Canyon. Several man-days were spent grading the front yard at Headquarters for a temporary arboratum, but this work is only about 75% complete at present. In preparation for the arrival of the new 3 KW light plants, a temporary power line from the Ranger Station to the Madrona bunkhouse was erected, and in the near future the bunkhouse will be wired. One ton of grain, and six tons of hay were purchased and hauled from Tucson to the Madrona Canyon barn.

Seven man-days were spent in making the old tin-roofed shack in the cactus area habitable; this work will continue, as only the barest possible facilities, including a cooking and a heating stove are usable at present.

TRAVEL AND INTERPRETIVE SERVICES. Travel increased by almost six hundred persons over that of January, with a total of 2852 visitors arriving in 959 cars, two motorcycles, two busses, and nine others on horseback. People from 38 states, Canada, India, France, England, Newfoundland, and Venezuela registered at the Headquarters.

Of the above total, 888 visitors, in 264 parties, were contacted at the Monument Headquarters; an even 50 hours was spent on visitor contact work. Service to visitors was maintained on all but one days during the month.

Visitors continue to remark that overnight accommodations in the city of Tucson are almost unobtainable. The already strained resources of the hotels and tourist courts were stretched even more by the annual stockmen's convention, followed by the mid-winter Rodeo held from the 21st to 23rd.

RANGER SERVICE. Mr. William L. Howenstine was appointed to the Temporary Ranger position, and entered on duty February 9. Bill recently graduated from the University of Arizona, where he majored in Social Science, with a minor in Botanical Sciences. In addition to making it possible to maintain full time visitor service, the addition of Mr. Howenstine to our small staff should provide the custodian with a chance to brush up on local taxonomy and botany.

PUBLIC HEALTH. The February 1 water samples from the creek in Madrona Canyon continue to be reported as potentially unsafe. With the lack of rain, and the present low flow of the stream, this condition will prevail until the creek dries up - which will not be long delayed if rainfall does not occur in the near future. Present indications are that we may have to haul water for stock and personnel at Madrona Canyon within the coming month.

Other witnesses testified that the River of Nations
Harbor Station, part of the Washington Harbor will be
a new coast of the station in the year of 1900. The
new harbor will be built on the River of Nations
a temporary harbor, but this will be only a
temporary harbor. In preparation for the arrival of the new
a temporary harbor from the River of Nations
a new harbor will be built, and in the year of 1900 the harbor will be
the new harbor, and six years of the harbor will be built
the new harbor.

Several witnesses were asked to explain the all-
in the new harbor; this was explained, and only the
new harbor, including a harbor and a harbor
the new harbor.

THE NEW HARBOR. The new harbor will be built on
the new harbor, with a harbor of the new harbor
the new harbor, the new harbor, and the new harbor
the new harbor. The new harbor will be built on
the new harbor, and the new harbor will be built on
the new harbor.

Of the new harbor, the new harbor, the new harbor
the new harbor; on the new harbor, the new harbor
the new harbor. The new harbor will be built on
the new harbor.

Witnesses testified that the new harbor will be built
the new harbor. The new harbor will be built on
the new harbor, and the new harbor will be built on
the new harbor. The new harbor will be built on
the new harbor.

THE NEW HARBOR. The new harbor will be built on
the new harbor, and the new harbor will be built on
the new harbor. The new harbor will be built on
the new harbor. The new harbor will be built on
the new harbor. The new harbor will be built on

PUBLICATIONS ON HAND. In accordance with instructions contained in FO 497, the following tabulation of informational literature on hand as of February 25 is submitted:

Free Publications.

Saguare "two-fold" informational leaflets -----	5200
Saguare "two-fold" leaflets (Spanish) -----	1150
Location map No.6, Southwestern States -----	600
Southwestern National Monuments leaflets (obsolete) -----	2000

Sales Publications, Supt. of Documents.

None.

FOREST FIRE PROTECTION. On February 11, a telephoned report from the Sabine Ranger Station of the Coronado National Forest advised that a smoke had been seen just below Spud Rock, on the north side of Mica Mountain. As this smoke was reported to be heavy, black, and enduring for only a few minutes, we concluded that it might be another plane crashed in the area. After investigation at nearby "Dude Ranches" to be certain that none of them had any parties in that vicinity, the custodian and Ranger Fulton rented a plane and flew over the area. No signs of either a fire or a recently wrecked aircraft were found, so we are at a loss to explain the origin of the smoke, which was seen by three of the Forest Service employees, all experienced in fire control work. Incidentally, only two days afterward the Coronado Forest had their first fire of the year, which confirms our belief that conditions for burning are apt to become serious early in the spring if we do not receive rain in the near future. At this time of year, the snow on top the Rincens should be from 3 to 4 feet in depth, but only scattered small patches were seen while flying over the area.

Don W. Egernayer
Custodian.

On January 11, a letter was received from the
Director of the Canadian National Railways stating that
a letter had been sent to the Director of the
Department of the Interior, Ottawa, on the 10th of
January, 1914, in which it was stated that the
only way to obtain the land was by purchase.
The investigation is being conducted in
the same manner as in the case of the
other lands, and it is expected that it will be
completed in the near future.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

OFFICE OF THE CUSTODIAN

28 February 1949

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of February, 1949:

Visitors this month: 268 Travel Year to date: 2975

General: Two brief inspections were made during the month. It is noted that Sunset Crater does not show the increase reflected at Mupatki. This is due to weather conditions and to the fact that quite a number of the visitors to Mupatki were advised against taking the road to Sunset because of the snow at the base of the crater.

Logging activities have begun east of Sunset Crater and it will be necessary to block off the "back road to Mupatki" very soon. It is felt that the heavy logging trucks create a hazard which might well be avoided by our visitors.

The "Thunderbird" mileage marker at the entrance on Hiway 89 has disappeared. It is difficult to understand why anyone would take it as a souvenir.

A revised informational leaflet is being prepared for Sunset Crater and will be submitted next month.

David J. Jones
In Charge

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Tonto NATIONAL MONUMENT

-----Roosevelt, Arizona-----

-----February 25, 1947-----

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
February, 1947.

Visitor Statistics: 983 cars brought 3964 people to this area during the month of February and 806 hours were spent with them by Custodian Gipe and Ranger Bull. Groups to the Ruins numbered 690 and to the Museum, 890. This is, I believe, the largest number of persons ever to visit this Monument in any one month.

New cars are seen in increasing numbers and the people using them showing much interest in the areas they are visiting.

The Dons Club finally ventured to bring up a small tour of 45 cars, with 225 people and by parking the cars along the side of the road to well below the bridge, all went well.

At the same time two large busses with 20 members of the Armed Forces each, reached the Monument. The boys piled out and helped with the parking problem and had a swell time doing it.

Park Service Officials: Assistant Regional Director John M. Davis and Architect Kenneth Saunders were here on February 11. They spent the day here and Monument Problems were thoroughly gone over.

General: Several trips were made to Globe to get material for the temporary storage and office room and one to Coolidge for the same reason.

Several trips have been made also in the endeavor to find machinery to level off a place for Ranger Bull's trailer, with no success.

Gravel was hauled for the piers for the office room.

A number of inquiries for informational literature have been answered and the ever increasing paper work attended to as rapidly as possible.

Projects for the ensuing month: With the number of visitors we are now having very little can be done on anything but as much as possible will be done on the addition and trailer space.

Weather: Cold most of the month, considerable cloudiness and no moisture.

Elmer C. Gipe
Elmer C. Gipe,

TUMACACORI NATIONAL MONUMENT

Nogales, ~~BOHOZTESO~~ ARIZONA

February 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of February, 1947:

:FLASH: Tumacacori travel records show that this monument is no longer in the bush league class. 3,481 visitors came to the area this month. This exceeds by far any previous travel month in the history of the monument, with the exception of April, 1939, which was the month our museum was dedicated, and was not a normal travel period. Gross revenue also reached a new high this month, with income from ticket sales and taxes of \$532.00.

WEATHER CONDITIONS: Severe drouth conditions prevailed all month, with precipitation of .02. There were four cloudy days. Maximum temperature of 81 occurred on February 5th. Minimum temperature of 19 occurred on January 30.

MAINTENANCE: In addition to routine maintenance and janitor work several acres of dead weeds were raked, burned, and hauled away. Poor soil in the patio garden was hauled away and replaced with rich sandy loam from the river bottom. Considerably more of this remains to be done. A new hot water tank was installed in the custodian's residence. An unsightly old pump jack was pulled from an old well, and the well is in process of being filled up. (It is not a historic well). Two varieties of flowering plant seedlings have been planted in the patio garden to bolster the coming spring display. Several plants have been dug up from crowded areas and replanted. Extensive pruning has been done on oleanders in the patio garden.

INTERPRETIVE SERVICES: 1,964 visitors, went on 273 guided trips through the mission grounds and the one-third of the church which is safe to enter, receiving an average of 37.61 minutes per trip. 3,350 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 3,271 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: See "Flash!" above.

VISITORS: February 1 - Tucson Indian Training School, with 10 pupils.
February 8 - Boy Scouts of Troop 27, Nogales, with 15 boys.
February 10 - Mr. and Mrs. Joe Joffe. He is Assistant to the Superintendent, Yellowstone.
February 20 - Custodian and Mrs. Bates E. Wilson, El Morro.

TUMACACI NATIONAL MONUMENT
Mesa, PIMA COUNTY, ARIZONA

February 22, 1947

Memorandum for the Regional Director,
National Park Service

Re: The monthly narrative report for Tumacacqui National Monument for the month of February, 1947.

GENERAL INFORMATION: Tumacacqui National Monument is an historic site in the Pima County area. It is a well known landmark and is the site of the ruins of a Spanish mission. The ruins are situated on a hill overlooking the San Pedro River. The ruins are in good condition and are well maintained. The monument is a popular tourist attraction and is visited by many people each year. The monument is a well known landmark and is the site of the ruins of a Spanish mission. The ruins are situated on a hill overlooking the San Pedro River. The ruins are in good condition and are well maintained. The monument is a popular tourist attraction and is visited by many people each year.

ADMINISTRATIVE: The monument is managed by the National Park Service. The monument is a well known landmark and is the site of the ruins of a Spanish mission. The ruins are situated on a hill overlooking the San Pedro River. The ruins are in good condition and are well maintained. The monument is a popular tourist attraction and is visited by many people each year.

REMARKS: In addition to the general information and administrative remarks, the following remarks were made during the visit to the monument. The monument is a well known landmark and is the site of the ruins of a Spanish mission. The ruins are situated on a hill overlooking the San Pedro River. The ruins are in good condition and are well maintained. The monument is a popular tourist attraction and is visited by many people each year.

UNITED STATES
DEPARTMENT OF THE INTERIOR

GENERAL PUBLICITY: February 14 - Harold Mackin and Jeremy Fedor, Albuquerque photographers, took pix for a popular book on Arizona and New Mexico missions.

February 22 - Max Kegley, Arizona photographer of considerable fame, took more mission pix.

INSPECTIONS: January 28 - Chief Clerk Castellum was in for a brief early morning visit, to ask if we had any special problems in his line that needed quick answers.

February 17 - Assistant Regional Director Davis and Architect Kenneth Saunders spent half a day here going over a variety of problems.

DONATIONS: Through the generosity of William Neil Smith, II, of Tucson, Arizona, our museum now has an excellent small collection of Seri Indian ethnological material.

TUMACACORI TREASURE FOUND: On February 6 the custodian, acting on a telephonic tip from the worried owner, found a diamond ring which the lady had lost in the trash container of the womens' rest room.

DAMAGE TO RUINS: Another portion of an irreplaceable old canale has fallen from the north wall of the mission church. There is certainly a crying need for this building to have an over-all surface treatment with something which apparently hasn't yet been invented, to stabilize and waterproof earthen walls without being conspicuous.

PERSONNEL: Judy England worked a day and a half as a per diem guide. Ramon Orozco worked most of the month doing maintenance labor and grounds cleanup.

Ranger John Aubuchon, of Walnut Canyon National Monument, helped us for ten working days during this extremely busy month. The brief stay of the Aubuchons was much appreciated and enjoyed.

INVENTORY OF FREE AND SALES PUBLICATIONS ON HAND:

Sales publications: - - - - -	none.
Gov't publications in hands of SWM Association - - - - -	none.
Free publications:	
2 fold information leaflet - - - - -	500
" " " " in Spanish - - - - -	3,060
16 page booklet - - - - -	215
S.W. National Monuments Maps - - - - -	232
Location Map No. 5 - - - - -	13

GENERAL: Visitors have received a high standard of service throughout the month. Need for a full-time maintenance laborer and a six months' winter seasonal ranger have by now become clearly evident. For the first time since this custodian has been in the Service there has been such a press of other duties that the ponderous mass of paper work has gotten behind.

Earl Jackson,
Custodian.

Two, took more mission pic.
February 28 - L. Kelly, Wilson photographer of conchistidia
and two heads mission.
February 28 - Wilson, took pic for a regular book on Wilson
February 28 - Wilson and Larry Weber

January 25 - Chief Clerk's Office - 42 years old - 1941
only worked 1 year, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 26

President Kennedy's remarks were well received over a variety of problems.

Tusigoot NATIONAL MONUMENT

Clarkdale, Arizona

Feb. 26 1947

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tusigoot National Monument for February, 1947.

Visitor Total: This month brought the amazing total of 1139 visitors as compared with 492 for February of 1941 and 638 for February of last year. Every party arriving during visiting hours (and quite a few who did not) received guide service, thanks to the additional services of Ranger Richert. It is now possible to give full contact service every day of the week.

Guide and Contact Service: Although all visitors during visiting hours were contacted, the greatly increased demands of contact work show that at this rate, we shall have all we can possibly handle just to meet all comers when the summer rush arrives. We are still hoping to complete all necessary maintenance and repair jobs, including ruins stabilization, water line to Clarkdale and re-roofing before the main visitor impact.

Personnel Time: Museum: 102 hours 10 minutes. Ruins: 91 hours.
Total time for Ranger Richert: 89 hours 10 minutes. For Custodian Cotter: 104 hours.

Special Visitors: Tusigoot welcomed Assistant Regional Director John M. Davis and Architect Kenneth M. Saunders on Feb. 7. Archeologist Charlie Steen from Region Three and District Ranger W. J. Kennedy from Grand Canyon and his family were visitors later in the month. Mr. Leslie N. Gooding, well-known botanist, was in Jan. 26. We were glad that the Monument herbarium received his blessing and promise to aid us whenever we might be stumped.

Stabilization: Ranger Richert spent all his time which was not devoted to contact work in helping Felix Macias sling adobe in the stabilization work at the ruins. Excellent results are now being obtained with a mixture for pointing the walls consisting of 1 part cement in four. The adobe thus made (plastic cement instead of ordinary portland is used) is tinted with venetian red cement pigment so as to approximate the original adobe, and exactly match the adobe-plaster employed by the excavators in the original pointing after the excavation. On the adobe still representing the original pueblo work that still stands we hope to try some of the solidifying mixture recently proposed by Charlie Steen, if a supply can be obtained. A photographic record is being made of all stabilization.

DEPARTMENT OF THE INTERIOR
TUZIGOOT FEBRUARY 1947 MONTHLY REPORT--2

Maintenance: Unforeseen difficulty with suppliers has prevented the Verde Hardware Co., contractors for 1200 feet of 2 inch galvanized steel pipe for the water line to town, from delivering more than 500 feet, so far. The pipe which has been delivered was coupled and laid in the ditch now opened above the old pipe to be replaced. We have had assurance that the balance of the order will be delivered early in March. Meanwhile, the repair of the old line goes on apace, and we are barely able to keep ahead of the leaks and maintain the water supply to the Monument.

The Custodian and Ranger have put in several hours during the slack part of the morning clearing rubble from the rooms of Unit IV where the reconstruction was demolished several years ago. Since the mass of this debris is too great to be hauled away by the men on duty without alighting the visitor contact program, we are throwing the rubble from the rooms in the rear of Unit IV, out of visitor sight, where it can be hauled away later.

Additional work on the truck, mainly upon the wiring system had to be done during the month, at a local garage. Because of the exorbitant charges of local garages, it has been determined to move the truck down to Casa Grande for any future extensive repairs.

Plans have been completed for the re-surfacing of all trails with a bitumuls-gravel mix, and three barrels of bitumuls have been obtained. It now remains to wheedle a supply of gravel from the State Highway Dept.

Work is progressing on the fact file, "Final Opinions" file and slide descriptions.

Free Literature Supplies. All supplies of all types of free literature are completely exhausted at this Monument.

February 27 147

MEMORANDUM for the Regional Director, Region Three.

Weather. Very mild for a February in this vicinity. The roads remained in good condition most of the period as is attested by having six times as many visitors this year as the average for the preceding twelve years.

Personnel. Ranger Aubuchon returned from Tumacacori the 24th, the same day that Beaubien returned from taking annual leave. Wupatki's Ranger Upton was in charge while Aubuchon and Beaubien were gone.

Activities. With only one man on duty, little was accomplished beyond the usual chores and some cleanup of picnic area.

Aubuchon took the wrecked pickup to Casa Grande and returned with a loan pickup. Today he left for Big Bend Nat'l Park to get a Dodge pickup from surplus.

Accidents. At least two people fell on the porch steps of Administration Building. We learned of one accident through a local doctor who treated the injury.

Donations. Sixteen copies of Mesa Verde Nat'l Park's "Mesa Verde Notes" were received for the library. Don Watson donated a copy of his "Cliff Palace, The Story of an Ancient City".

H.P.S. Visitors. Assistant Regional Director Davis and Architect Saunders were here on an inspection trip. Custodian Townsend and Naturalist Steen visited this area in passing.

Publications. 2,200 2-fold leaflets are on hand. No government sales publications are carried.

WHITE SANDS

Alamogordo, New Mexico

February 21, 47.

VISITATION,

	This Month	Travel Yr. To Date	Fiscal Yr. To Date
Total Visitors	5,591	23,705	57,221

This is the largest February travel since accurate records have been maintained. February has forced itself into one of our heavy travel months; and in spite of several cold spells which always tend to slow traffic. There were 10 days of the month when the thermometer registered a low of 15 deg. The warmest day of the month was on the 16th with a high of 69 deg. We were favored by visits of two special groups, one from the Teachers Association of Juarez, Mexico and the other being the Highway 54 Association with representatives from towns along Highway 54. These groups entered in chartered buses and seemed highly pleased and impressed with the area. We were also favored by a visit from the Assistant Regional Director, accompanied by a representative of the Landscape Division, checking on our repair and rehabilitation program and conditions in general. It was our pleasure to be able to put on a demonstration of rocket firing for their special benefit and which we understand from press notices was highly successful in the accomplishment of the purposes desired. It was our pleasure to list among our visitors Hap Arnold formerly of the A.A.F., along with many noted officials visiting the rocket experiment station at the White Sands Proving Grounds, including one British Empire official. Several outstanding photographers have been in for pictures, and probably one of the most enthused was Ansell Adams who was in on a special assignment.

COOPERATING GOVERNMENT AGENCIES: An official trip was made to the White Sands Proving Grounds in connection with firing schedules as submitted by that unit. Relief was given from the tight schedules and we feel very much repaid for the trip. We also investigated rumors of a launching platform being erected on our area as well as reports that numerous rockets have landed within our boundaries. We find that no construction other than authorized has been done within our boundaries, nor is any contemplated; and only two, and possibly fragments of two more, rocket heads have landed within the boundaries of the monument proper.

PLANS, MAPS AND SURVEYS: We were very much pleased to have received the Master Plan for the White Sands National Monument, and were certainly proud of the technicians' finished product.

UNITED STATES

4. **GENERAL PUBLICITY:** Our publicity has been, and is, somewhat greater than usual in that our increased visitation demands some attention, and, too, the annual Play Day as sponsored by the local Chamber of Commerce and held at the White Sands has already been planned and press releases issued regarding the 1947 Play Day which is to be April 12.
5. **COMPLAINTS:** There have been no complaints received from any source to the knowledge of this office, although several suggestions have been given regarding minor conditions both within and without our monument area.
6. **MAINTENANCE:** Maintenance on buildings has been neglected over a considerable period of time and is reaching a state which necessitates our inaugurating some action. This was planned, however, and bids are being circulated to cover many of our repair needs. Early seasonal winds with exceptional cold spells has made our road maintenance problem almost beyond our power to overcome. We still have hopes of early relief through the War Assets Administration in obtaining more efficient equipment.
7. **CONCESSIONS:** The White Sands Service Company has experienced one of its best comparable months in its history. The present location has several times this month proven inadequate, and measures are being considered for relief on heavy days or on special occasions.
8. **MUSEUM:** The heavy visitation has, of course, increased the number of museum visitors; and with the museum heated we have received many fine compliments on this phase of our activity.
9. **RANGER SERVICE:** Ranger service is already stretched to the breaking point and it will soon be necessary to split shifts to accommodate the longer hours of visitation. The handling of surplus materials in cooperation with other areas has strained our ranger activity with its additional burdens connected therewith. Plans are under consideration for Ranger Steele to attend the fire training program of Region Three, although just where has not yet been determined.
10. **INVENTORY OF GOVERNMENT PUBLICATIONS:**

4. GENERAL PRINCIPLES: The policy of the Government is to maintain a high level of security and to ensure that the information it collects is accurate and reliable. This is achieved by a combination of physical and technical measures, and by the use of trained personnel.

5. SECURITY MEASURES: There have been no significant changes in the security measures since the last report. The physical security of the premises remains high, and the technical security is also maintained at a high level.

6. PERSONNEL: The personnel of the Government are well trained and experienced. They are all subject to a rigorous selection process, and they are all subject to a strict code of conduct. The personnel are all well motivated and they are all committed to the service of the Government.

7. FINANCIAL: The financial position of the Government is sound. The Government has a good record of financial management, and it has a good record of maintaining its financial resources.

8. CONCLUSION: The Government is well equipped to meet the challenges of the future. It has a strong commitment to security, and it has a strong commitment to the service of the people.

9. RECOMMENDATIONS: The Government should continue to maintain its high level of security, and it should continue to invest in its personnel and its financial resources. It should also continue to improve its methods of collecting and analyzing information.

Hupatki

NATIONAL MONUMENT

Flagstaff, Arizona

OFFICE OF THE CUSTODIAN

20 February 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Hupatki National Monument during the month of February, 1947:

Visitors this month: 233 Travel Year to date: 781

Travel: Visitor use for the past month increased almost 100% over that of any previous February, a trend which is consistent with reports from other sources in Arizona. Business men are planning on very heavy traffic this coming summer.

Weather: The weather during the past month has been entirely too clear and too dry for the good of the country. The winter has been one of the driest on record, but there is still time for us to get some badly needed moisture.

Roads: None of the visitors to date have had any difficulty on the roads, but we can expect it in the not too far future. The sinder is drying out rapidly, the new entrance road is badly "washboarded" and contains dust holes about which very little can be done until we have some moisture.

General: The work routine for the month was somewhat upset by the temporary assignment of Ran or Upton to Walnut Canyon for more than two weeks in the absence of both Custodian Beaubien and Ranger Aubuchon. Immediately following this assignment it was necessary for him to leave for Big Bend National Park to obtain surplus property. Custodian Jones took both Upton and Aubuchon to Saguaro National Monument to join the group leaving for Big Bend. Pickup 13820 was exchanged at Casa Grande for the reconditioned Hupatki pickup. At Casa Grande a rear wheel came off of 13820. Had this happened enroute a serious accident might have resulted.

A set of four kodachromes of paintings made at Hupatki was received on loan from Artist E. M. Craven. These kodachromes are being forwarded to the Regional Office to illustrate the possibilities of working up a lecture on this aspect of the inspirational values in our parks and monuments. These values are intangible, but make an important contribution to the enjoyment of our visitors. Artists express this inspiration in a concrete form whereas most of our visitors do not.

Activities of Cooperating Governmental Agencies: A field party from the Bureau of Reclamation group investigating Coconino Dam site has been working on the Little Colorado in the vicinity of Black Falls. The completed study

should be finished in the near future. It is now the opinion that while water may eventually back up to Black Falls it will not form a lake upon which we would have to consider a recreational development.

Grazing: The use of grazing land under permit by the S O Bar Company has increased considerably this year. Our counts indicate between 300 and 400 head including calves. This use has been made possible partly by the installation of a water tank just outside the boundary on North Mesa. Water is hauled from the Deep Well Tank, a distance of approximately three miles. This is the first concrete evidence that the permittee intends to more fully utilize his permit. Local cattlemen say that they can afford to haul water about three miles in normal times, but that they can now haul up to ten miles.

Observations: One of the local Navajos, Emmett Lee, constructed a new hogan in Wupatki Basin. In the Moencopi slabs which he used for the base are some very well preserved tracks which are quite different than those previously observed. The quarry has been located and will be brought to the attention of the University of California paleontologist who will be here this summer.

Water Supply: Flow of the springs remains at low record. Heiser Spring is particularly disconcerting in that it should be on the increase rather than decreasing. Wupatki Spring remained the same as for last month, 738 gallons per day, while Heiser has dropped to 2003 g. d. or 100 gallons less than in January. The cement storage tank at Heiser was cleaned thoroughly and the roofing weatherproofed.

NPS Visitors: Archeologist Steen paid us a brief visit on the 1st, enroute to Grand Canyon for supplies. Assistant Regional Director Davis and Architect Ken Saunders accompanied by Custodian Brewer visited the area on the 5th. Regional Archeologist Reed was contacted in Flagstaff on the same day.

Publications on Hand: Due to the shortage of Wupatki leaflets none are being distributed to visitors, as they are more urgently needed to answer requests for information.

Informational Leaflet- Wupatki-----	75	copies
" " Sunset Crater-----	1200	"
Portfolio of Nat'l Parks and Monuments---	5	"

Activities of SNW Stabilization Laboratory: Collaborator Buchenberg has been concentrating his activity this past month upon developing techniques for making "cinder block" drainage tile. At the same time he has been experimenting with the manufacture of cinder blocks and soil cement bricks as a possible material for building construction.

Signs: Through the cooperation of Professor Bjerg of Arizona State College cut-out letters are being made for new signs at both Wupatki and Sunset Crater. Lack of materials is causing delay.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

April 11, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

There follows the narrative report for Naturalists from the South-western National Monuments for the month of March, 1947:

Staff Activities - General

Naturalist King was in the office the first two weeks of the month, and took the latter two weeks on annual leave.

Archeologist Steen was in the office the whole month.

Naturalist Sullivan, it was learned, probably will not be able to report for duty until sometime in May.

Administration - Interpretation

Requests for information and photographs have increased to the point where staffmen cannot handle them, and clerical assistance must be asked from other branches. Considerable assistance was rendered during the month by Clerk Tullar, loaned from the office of the Auditors.

Efficiency ratings were accomplished for Mobile Unit personnel.

Interpretations - Overhead

The usual reports and 34 letters were written.

The mimeographed leaflet for interpretation of the Sycamore Trail at Montezuma Castle was re-issued for use at the monument this summer season.

Progress on Exhibit Plans and Projects

The Custodian at Tusigoot furnished label copy for 54 museum labels which was forwarded to the Museum Laboratory in Washington for printing.

Accessions, other than library

In response to an inquiry from the Custodian of Tonto National Monument, it was determined that only one bird study skin was prepared before the war for the collections of that monument. Casa Grande, Saguaro, and Organ Pipe Cactus National Monument collections were circularized but no Tonto skins were discovered and the records of Preparator Philp show definitely that no collections other than the one mentioned were made there.

Memorandum for Assistant Regional Director, Santa Fe, New Mexico

Re: Santa Fe National Monument, Santa Fe, New Mexico. The National Monument, Santa Fe, New Mexico, was established by Executive Order, March 11, 1907.

History of the Monument

The Santa Fe National Monument was established by Executive Order, March 11, 1907, and was the first of a series of monuments established in the State of New Mexico.

The monument was established to preserve the historic ruins of the Santa Fe Indian Pueblo.

The monument was established to preserve the historic ruins of the Santa Fe Indian Pueblo, and to provide for the enjoyment of the people of the United States.

Location of the Monument

The monument is located in the Santa Fe Indian Pueblo, Santa Fe, New Mexico. The monument is situated on the east side of the Santa Fe River, and is bounded by the Santa Fe River to the north and the Santa Fe River to the south.

The monument is situated on the east side of the Santa Fe River, and is bounded by the Santa Fe River to the north and the Santa Fe River to the south.

Area of the Monument

The area of the monument is approximately 100 acres.

The monument is situated on the east side of the Santa Fe River, and is bounded by the Santa Fe River to the north and the Santa Fe River to the south.

History of the Monument

The monument was established by Executive Order, March 11, 1907, and was the first of a series of monuments established in the State of New Mexico.

Location of the Monument

The monument is located in the Santa Fe Indian Pueblo, Santa Fe, New Mexico. The monument is situated on the east side of the Santa Fe River, and is bounded by the Santa Fe River to the north and the Santa Fe River to the south.

Research and Observations

Continuing attempts were made to obtain an Archeologist and funds for the initiating of archeological surveys in various monuments. At the end of the month the project still had not materialized.

Letters were written to obtain historical library material for Montezuma Castle National Monument.

Cooperative Activities

Correspondence was carried on with the object of obtaining collaborator status for Dr. D. Eldon Beck, Brigham Young University, for biological work at Arches National Monument.

Various Indian tribal names for calendar months were compiled for possible use by Editor Raymond Carlson of Arizona Highways Magazine, in response to a request from him.

Current policy concerning collection of vertebrate mammals in National Parks and Monuments was furnished to Mesa Verde National Park for use in answering a request for the collecting of shipwrecks on Colorado National Monument.

Region Three Office Loan Library

Accessions for the month were 12 books, 4 reports, 16 pamphlets, 71 periodicals, and 29 file letters and memoranda. The total was 132.

Southwestern Monuments Association

The long overdue annual report for the period July 1, 1945 through June 30, 1946, was issued and distributed to Custodians and Board Members by Executive Secretary King. It, in general, showed healthy growth, listing gross sales at more than \$3,200, net earnings at about \$900, donations at \$200, and inventory of sales publications at \$5,800.

Arrangements were made with a local auditor in Santa Fe to perform an audit on the books for the same period. It will be accomplished sometime in April.

Turn-ins for the current fiscal year indicate extremely heavy sales in the monuments, and this fiscal year should show a gratifying increase in activity and gain.

Ruins Stabilization

Continuing justifications were prepared in the attempt to complete the equipment needed for the mobile unit at Chaco Canyon, as well as by crews operating in other monuments.

A sample experimental drainage tile made from cement and cinders was received from Collaborator A. E. Buchengerg at Wupatki National Monument. The sample appears very practical and may prove an answer to our difficult-

General and Statistical

Extensive changes were made in the statistical tables for the year 1911. The statistical tables for the year 1911 are published in the Statistical Abstract for the year 1911.

ties in obtaining file for the proposed drainage improvement at Casa Grande and possibly at Tusasacori National Monuments.

Archeologist Steen completely revised the P.C.P. program for Ruins Stabilization in Southwestern National Monuments, and submitted it to the Regional Landscape Architect.

The project for repairing the room on the Great Kiva at Aztec Ruins National Monument was reopened, and technical advice was given to the Custodian at Montezuma Castle concerning the laying of asphalt floors in Montezuma Castle.

Technical Aid in Administration

Further correspondence occurred concerning the monument boundary line near Kin Biniola Ruin on Chaco Canyon National Monument, and also concerning the proposed boundary change at Aztec Ruins National Monument.

Projects for next month

King will be in the office by himself during the entire month, handling routine affairs.

Steen will go to Tonto the first of the month to relieve the Custodian there who is retiring.

Because of the short-handed condition of the staff, no projects of any magnitude can be attempted.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

March 26, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of March, 1947:

WEATHER: Rain fell on February 27th with both snow and rain in evidence on March 23rd. Heavy wind blew on three occasions during the month but the continuous March wind did not materialize this year. The days were exceptionally warm and the trees at headquarters have started to leaf out.

SPECIAL ACTIVITIES: The custodian was absent from the monument from March 2nd to 11th on an official trip to Big Bend National Park to take delivery on army surplus equipment. Stops were also made at Carlsbad Caverns National Park and White Sands National Monument for surplus property for various areas.

TRAVEL: Travel took a decided jump this month with a total of 44 cars and 176 people visiting the area. This is a large increase over 60 people for February, 1947 and 90 people for March, 1946. Most of the travel was from Utah and Colorado but Washington, Idaho, North Dakota, California, Michigan, District of Columbia, Nebraska, Oregon and Wisconsin, were also represented.

INTERPRETIVE SERVICES: No trips were made with parties into the outlying sections and no contacts were made at the Windows. Forty four people were contacted at headquarters and 176 people visited the Windows section unattended. Numerous requests for information were received and answered during the month.

Numerous complaints were received from visitors last year concerning the lack of knowledge of Arches National Monument displayed by local business houses on requests for information. With the cooperation of Mr. L. L. Taylor, Editor of the Moab Times-Independent and Mayor Baldwin of Moab educational trips are to be taken to various points of interest, with parties made up of local business men and women, so that they will be prepared to furnish visitors with accurate information. The first trip is to be made to the Windows section on the afternoon of March 30th. If we can develop enough interest additional trips will be taken to the Devil's Garden and Delicate Arch and also Dinosaur Point and Fisher Towers.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

Arches

Arches, Utah

March 25, 1937

MEMORANDUM FOR THE REGIONAL DIRECTOR, Region Three:

The following is a summary report for Arches National Monument for the month of March, 1937:

Weather: This fell on February 27th with both snow and rain in various amounts. Heavy and blue on these occasions during the month and the continuous rain with the wet weather during this year. The days were exceptionally warm and the snow at high altitudes have started to melt.

General Activities: The observation was made from the monument from March 1st to 15th on an official trip to the Grand National Park to take delivery on new surveying equipment. There were also a few local people, mostly from the Park and White Sands National Monument for various reasons.

Travel: Travel took a double loop this month with a total of 44 days and 176 people visiting the area. This is a large increase over the month of February, 1937, and 10 people in March, 1936. Most of the travel was from Utah and Colorado but some from Idaho, Nevada, Arizona, California, Washington, District of Columbia, Nebraska, Oregon and Wisconsin, were also mentioned.

Interpretive Activities: No trips were made with parties into the existing section and no camps were made at the Window. Forty four people were contacted at headquarters and 176 people visited the Window section in-attended. Numerous requests for information were received and answered during the month.

Known as a guide were received from visitors last year concerning the lack of knowledge of Arches National Monument displayed by local business houses on requests for information. With the cooperation of Mr. J. L. Taylor, Director of the most famous-Independent and other business of Arch educational trip was to be taken to various points of interest, with parties made up of local business men and women, so that they will be prepared to furnish visitors with accurate information. The first trip is to be made to the Window section on the afternoon of March 30th. If we can develop enough interest additional trips will be taken to the Devil's Garden and Delicate Arch and also Horseshoe Bend and Fisher Towers.

COOPERATING GOVERNMENTAL AGENCIES: I was recently advised by Grand County's senator and representative, who have recently returned from the 1947 legislative session, that the budget approved for the Department of Publicity and Industrial Development contained a \$10,000 item for road improvement in Arches National Monument. They were assured by the commissioners of this department that the money would be appropriated during the summer. Grand County Commissioner Taylor has written this department requesting an agreement to be completed in the near future so that work can be started before the heavy travel starts.

ROADS: The entrance road into the monument is in excellent condition and many compliments have been received regarding same. The State power grader has recently been repaired and it is hoped that with our first spring rains that we can get it graded and in shape for the summer travel. There are several stretches that will require a shale surface during the dry weather to eliminate heavy sand.

MAINTENANCE AND CONSTRUCTION: Installation of the two pit latrines in the Windows section was completed on March 25th.

White paint was finally received and the painting of the outside trim at quarters and the fence is now complete. At this writing weather-stripping is being applied to all windows to try to eliminate the sifting sand. Renovation of the office is about 75% complete.

Our water project at the Windows has struck a snag. Two 500 gallon water tanks were supposedly shipped from Salt Lake City on February 28th but have not arrived yet and I have been unable to locate them. Hope to get delivery on them during the coming month and complete this much needed project.

The new 10 KW, AC power unit was installed during the month. On one occasion, during my absence at Big Bend National Park, it developed an oil leak and the oil pressure dropped below normal but the automatic features contained in the set-up cut off the plant before it was damaged. On March 21st it again ceased to function and I have not had a chance to check the trouble but believe it is a clogged gas line.

RESEARCH AND OBSERVATION: Dr. D. Eldon Beck and party of Brigham Young University have signified their intention of carrying out the first stage of their survey of plant and animal life at Arches from April 24th to 27th inc. Application has been received from Dr. Beck for appointment as Collaborator for the Service.

ACQUISITIONS: Delivery was received on a $\frac{1}{2}$ ton Dodge 4 x 4 Army pickup at Big Bend National Park on March 6th for assignment to Natural Bridges National Monument. This truck was in good shape and the trip from Big Bend to Arches was made without trouble. Various smaller items of equipment were also received during the month.

Aztec Ruins NATIONAL MONUMENT

Aztec, New Mexico,

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

25 March 1947

19

There follows the report of activities in Aztec Ruins for March 1947.

Weather. The usual erratic March weather characterized with sunshine and clear, warm days, then high winds and cold days has apparently discouraged travel, for it has failed to keep up with that of last month. We enjoyed one 2 inch snow storm and 2 very light showers which totaled 0.28 inch precipitation.

MAINTENANCE. Of first importance to us is the cleaning of the blocked drainage ditch by use of a stream of water under high pressure. The ditch is now clear of any obstruction and we shall make every effort to keep it so. The completion of two new manholes, which we found necessary to construct in clearing out the pipe line, are all that remain in placing the drainage ditch in proper condition.

We have experienced considerable trouble with our domestic water line which was broken, in the water pump which needs an overhauling, and in the water softener which had to be removed and disassembled for cleaning and overhauling.

SPECIAL ACTIVITIES. The custodian presented colored slides and a short talk on Aztec Ruins to the local Lion's Club, March 17. A similar talk was made to the students of Rio Vista School on the 25th. On March 10, we listened in on the talk Dr. Nusbaum made before the Farmington Lions Club.

INTERPRETIVE SERVICES. There were 245 visitors conducted in 63 trips thru the ruins and 409 people in 114 trips were shown the museum.

INCREASE IN TRAVEL. Our total visitation of 430 people, comparing to 429 a year ago, arrived in 124 cars from 26 states. There was 1 member of the armed forces.

PROPOSED ACTIVITIES FOR APRIL. Complete our repair work on the drainage ditch and upon the domestic water system.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

March 30, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of March, 1947.

Weather and Roads

Weather for the month was generally fair and warm with several light snows and light rain showers. High temperature for the month was 75° and low was 8° above zero. 0.49 inches of moisture fell.

Roads have been in good condition most of the month. Foreman Wendland bladed the road from headquarters area to the Otowi Section during the first week of the month following the light snows which fell at that time.

Maintenance

The force account painting and decorating job has continued throughout the month and is almost completed. A temporary partition is now being constructed in the office to provide additional room for the new clerk. Roads and trails work is scheduled to increase April 1. Two new location signs were constructed and placed at strategic points at the junction of the approach road with the Los Alamos highway and three mileage markers were put along the entrance road.

Travel

Travel to Bandelier was somewhat discouraged during the first part of the month by inclement weather. However, during the remainder of the month the weather was nice and the monthly total was equivalent to that of the same period of last year. 847 people visited the area in 192 cars. One fellow rode in horseback. 20 of the automobiles were re-entries. Visitors are primarily of the bonafide tourist type as evidenced by the small number of re-entry permits issued.

Interpretation

51 conducted tours were made to the ruins with a total attendance

of 289. The average duration of each tour was 1.2 hours. Many people hiked on beyond the regular tour to the Ceremonial Cave. Evidence of travel on the road to Tsankawi and the Fire Lookout indicates that there is continued visitation to those points of interest.

Visitors

Dr. Marie Wormington, Curator of Anthropology of the Colorado Museum of Natural History and Dr. Edward M. Hall, Department of Anthropology of the University of Denver accompanied a group of University students on a field trip to Bandelier during spring vacation at the University. A group of Adams State Teachers College students were brought to the monument on March 3 by Professor Ernest Lyckman.

Charlie Steen of the Region Three Office visited Bandelier on the weekend of March 22 and 23.

Free Publications on Hand as of March 30, 1947.

Personnel

The Custodian has spent most of the month on special detail in the Region Three Office. Ranger James M. Eden has been promoted to the position of Junior Administrative Officer at Grand Canyon National Park. "Jim" married Margaret M. Cass of the Region Three Office on March 5 and made the transfer to Grand Canyon on March 23. Thomas B. Onstott, formerly of the BNM, is scheduled to fill the vacant ranger position.

Surplus Property

Bandelier personnel have spent most of the month on the road hauling surplus equipment for the Southwestern National Monuments. Trips made during the month were Ranger Eden and Clerk Bean to Carlsbad and White Sands; Ranger "Safe" to Big Bend; Ranger Eden, Maintenance-man Valencia, and Laborer-leadman Pino to Zion; and Clerk Bean to Grand Canyon.

Lodge

Preparations are now underway to open the lodge on May 1. Surplus property secured for use in the lodge include a reach-in refrigerator, food-chopper, dishwasher, and drying tumbler.

CHESTER A. THOMAS
Chester A. Thomas,
Custodian.

It is noted that the above information was obtained from a confidential source who has provided reliable information in the past.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is a result of the fact that urban areas offer more opportunities for employment and higher wages than rural areas. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the economy and society as a whole. The majority of the population now lives in urban areas, which are more densely populated and have more infrastructure than rural areas. This has led to the development of new technologies and industries that are based in urban areas. The process of urbanization has also led to the development of new social and cultural norms that are based in urban areas. The majority of the population now lives in urban areas, which are more densely populated and have more infrastructure than rural areas. This has led to the development of new technologies and industries that are based in urban areas. The process of urbanization has also led to the development of new social and cultural norms that are based in urban areas.

Small amount of the above was used in the
analysis of the above sample.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This movement is caused by a number of factors, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns and villages. This has had a significant impact on the economy and society as a whole. The majority of the population now lives in urban areas, which are characterized by high population density, a high level of economic activity, and a high level of social organization. This has led to the development of a new type of society, which is based on the city. The city is now the center of economic and social life in the United States. The majority of the population now lives in urban areas, which are characterized by high population density, a high level of economic activity, and a high level of social organization. This has led to the development of a new type of society, which is based on the city. The city is now the center of economic and social life in the United States.

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of March, 1947.

Weather Conditions

The usual high winds and dust storms have been absent during March and the weather has been much warmer and dryer than years previous. In fact, the weather has been ideal for visitors but much too dry to suit the needs of the country. There has been a steady flow of water in the canyons but as yet not enough to fill the reservoirs at many Farms or Rock point. Even the stock tanks, usually full at this time, are dry. Unless spring rains bring much needed moisture then the Navajo Indians face a season of drouth and many fields will not be cultivated this year. A heavy spring run-off in the canyons is unlikely. One light storm brought a total of .17 inches of moisture. Maximum temperatures were mostly above 60 degrees, the high being 72 degrees. Minimum temperatures ranged mostly between 25 and 30 degrees dropping to a low of 13 on only one night.

Administration

The Custodian was absent from the area for eleven days while making a trip to Big Bend National Park for surplus equipment. Carlsbad Caverns National Park, and White Sands National Monument were also visited and Surplus Items picked up.

Maintenance

Considerable time has been spent during the month making repairs on equipment and generally straightening up the area. On my return from Big Bend, I found that The Transmission Housing had been broken on the Chevrolet Pick-up. This was removed but the transmission was so worn that it would not be worth repair. New packing was installed in the Water Pump. All cleanable parts were removed from the Dodge Pickup obtained from War surplus and it is functioning well at the present time. The Office has been cleaned and redecorated with work of redecorating the Residence well under way. Changes and improvements are being made on the visitors Rest Room. The outside painting of all buildings has been completed.

NATIONAL MONUMENT

Country of Italy

Italy, Sicily

Italy, Sicily

Italy, Sicily, National Monument, Sicily, Italy

The following is a report of activities at Sicily National Monument during the month of March, 1937.

Weather Conditions

The weather in Sicily National Monument during the month of March was generally fair and pleasant. The temperature ranged from 60 to 80 degrees Fahrenheit. There was a fair amount of rain during the month, but it was not excessive. The wind was generally light and variable. The humidity was moderate. The overall weather conditions were favorable for visitors.

Visitation

The visitor center was open from 9:00 a.m. to 5:00 p.m. during the month of March. There were 1,234 visitors during the month. The most popular times for visiting were on weekends and during the middle of the month.

Interpretation

Interpretation of the monument's history and geology was provided by the staff. The staff also provided information on the local flora and fauna. The interpretation was well received by the visitors. The staff also provided information on the monument's management and future plans. The interpretation was well received by the visitors.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Soil and Moisture

During the rebuilding of the revetment at antelope house last Fall , another channel was opened up on the far side of the wash to divert the water and facilitate the work on the structure. This channel has served its purpose well and has continued to carry the water thru several fairly heavy run offs and at present very little water is getting over to the protected area. This should give our plantings a better chance to take hold.

Public Health

The Measles continue in this area as well as Influenza and Pneumonia. 17 Navajo Children have been brought in to the Hospital. One small child of three years died a short distance from headquarters. The custodian prepared it for burial, obtained lumber from the Indian service and after building a burial box, helped dig the grave and conducted burial service as the child was of Catholic parents but had not been baptized, the Franciscan Fathers would not conduct the burial.

Travel

There were 63 people in twenty cars visited the area during the month. The greater part of these visitors were bona fide tourists and is quite an increase over the 39 visitors who came last year. Or travel year to date is still above last years figure, 688 to 617, but our Fiscal year shows nearly a hundred percent increase, figures being 1947-1,289, 1946- 688.

A total of 21 hours in guide and contact time was spent with visitors.

Visitors

J.N. McGibbeny, well known for his color photography and work with the Salt Lake City Chamber of Commerce, Brought his brother D.A. McGibbeny and son, to see the beauties of Canyon de Chelly(Navajo and Scenic). Mr. McGibbeny has been in Gallup working on material for the Indian issue of Arizona Highways Magazine which will be out in July.

SOUTHWESTERN NATIONAL MONUMENTS
COOLIDGE, ARIZONA

March 25, 1947,

ADDRESS REPLY TO
THE SUPERINTENDENT

Memorandum for the Regional Director,
Region Three,

There follows a report of the activities in and around
Capulin Mountain National Monument for the month of March 1947.

Visitors are estimated to be about three hundred
bringing total visitors travel year to date four thousand two
hundred sixty, and fiscal year to date nineteen thousand two hundred
sixty,

The Custodian was on leave up to the 1st of the month,
having spent his vacation in South Texas, did not enjoy that down
there as much as one might think. He was saying he stayed just
about like we do here at home otherwise he would have come home nice
trip, South Texas having had the coldest February in the history of the
weather bureau,

Roads in the monument are again in fair condition, the Custodian
found them in a state of bad repair upon his return but got
right after them and they are again in good order,

Weather has been rather bad most of this month here and has been
extra cold up until the 10th then much warmer with considerable wind,

Around or near.

The monument on the east side has local
people in conjunction with some parties from Pueblo Colo are
taking some cladders for making blocks for building,
about one or two cars per day are moving out, being loaded at
Folsom and shipped from there to various, Their workings are
on state land just east of the monument and is quite a nice
little enterprise,

Some damage has been done this winter by the porcupines
but the writer has been unable to locate any of them this month,

Very Respectfully,

Homer J. Orr
Custodian,

UNITED STATES

SUMMARY OF CASA GRANDE NATIONAL MONUMENT MONTHLY NARRATIVE REPORT.

March - 1947

General: Lack of water in watersheds becoming dangerous.

Weather: Summer just around the corner as 93 degree temp. "registered."

Visitors: 38.6% increase over March 1946.

Interpretive Services: 2985 people in 227 Parties make Ruins trip.

Trips Taken: Six trips made from area to pickup surplus materials.

Nature Notes: Desert just starting to burst into bloom.

There is very noticeable evidence in 1947 that the watersheds of the monument are becoming drier and that the water in the streams is becoming more scarce. This year there have been several very heavy rain storms with very little water behind the dams. The water in the streams is becoming more scarce and the amount of water in the streams is becoming more scarce.

Summary: All factors of this year's weather during the first part of the report period and the second part of the report period. The first part of the report period was the first part of the year and the second part of the report period was the second part of the year. The first part of the report period was the first part of the year and the second part of the report period was the second part of the year.

Summary of Observations - 1947

1. The first part of the year was the first part of the year.
2. The second part of the year was the second part of the year.
3. The third part of the year was the third part of the year.
4. The fourth part of the year was the fourth part of the year.

Summary of Observations - 1947

1. The first part of the year was the first part of the year.
2. The second part of the year was the second part of the year.
3. The third part of the year was the third part of the year.
4. The fourth part of the year was the fourth part of the year.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

March 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for March, 1947.

General: Spring finds the farmers and ranchers in the valley with a very pessimistic outlook. In 1946 most of the farmers had to take in their belts and get along with a minimum of water and they thought that was the worst it could get. This year finds them starting their planting season with even less water behind Coolidge Dam and prospects for enough water to finish out the season are none to good.

Weather: .48 inches of rain were recorded during the first part of the report period and one severe dust storm was experienced. Outside of that the balance of the month was clear and warm. A touch of summer was felt on the 31, when a maximum of 93 degrees was recorded. No temperature below freezing was registered. A minimum of 34 degrees was registered twice on the 1 and 14.

Inventory of Publications: Free.

		Sold during " " "	-	296
		On Hand March 24, 1947	-	730

Visitors: March 1947 - 4193; March 1946 - 3025; March 1941 - 2739. Travel year to date, 1947 - 22,082; 1946 - 15,386; 1941 - 11,221. The increase over March 1946, which was the highest number of visitors recorded for that period before, is 38.6%. This is a decrease from Feb. 1947 but is seasonal and is to be expected, with the visitor who is spending the winter here, already gone or leaving the area. The type

21. 1. 1. 1.

There follows the narrative report for each of the 100 cases.

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which has been recognized by the government and the people of the United States for many years. It is a fact which has been recognized by the government and the people of the United States for many years.

Visitors: Continued : of visitor now is the transient who is just going through and wishes to just take a swift look as they have to make El Paso or Yuma, in time to get a place to stay at Night. Also the type that is here to see the cacti in bloom has made it's appearance.

Interpretive Services: Of the 4193 visitors to the area 2985 made the Ruins trip in 227 parties averaging 47.8 Minutes per trip. 2369 made the museum trip in 202 parties staying an average of 25.1 minutes. 1208 came into the area for a quick look, to picnic, or to bring other people but did not go over to see the Ruins. 89 members of the armed forces in uniform are included in the above totals. Ticket sales to date this year have been 15,245, bringing in revenue amounting to \$4573.80.

Maintenance: A new weather station was obtained, put together, and setup with the old one being removed. Woodwork and doors in quarters #1 were touched up with paint and new canvass placed on shutters and screen replaced in Quarters # 6. What maintenance there was, was done on the Custodian's and Rangers own time. Archeologist Schumacher has revised the museum library and has it up to date.

Trips Taken: February 26 to March 5, Mechanic Stonehocker was absent on a trip to Marathon, Texas, and Big Bend National Park to pick up War Assets Surplus materials. Five trips were made to Luke Field and the Goodyear plant near Phoenix, by Ollie Barney of Saguaro to pick up Materials. He was accompanied on two of these trips by Mechanic Stonehocker.

NPS Visitors & Visitors of Note: Feb. 26, R. Boren of the Los Angeles Weather Bureau Office, was in to check over our weather observation station. Feb. 28, Ranger Bull of Tonto National Monument, and a party of friends was in to visit the area. Feb. 28, Custodian Jones of Wupatki was in to get his pickup. Feb. 28 & March 5, Rangers Aubuchon and Fulton were in on their way to and from Big Bend National Park to pickup surplus materials. March 5, Regional Naturalist Dodge and Custodian Supernaugh were in on Monument business. March 17, Custodian Supernaugh was in on business in connection with surplus products. March 18 and 24, Ranger Steele of White Sands brought in War Surplus materials. March 19, Ranger Rickonbach of Organ Pipe Cactus National Monument was in to pickup the Auto Tractor to go to Grand Canyon, and Zion National Parks to get War Surplus materials.

Leaves Taken: From March 12 Through March 19, Mechanic Stonehocker took sick leave to get over an attack of flue.

Nature Notes: Bat activity in the Ruin was noted on March 5 with the first flight observed on March 17. The no. of bats in the flight was small. Feb. 28, along the East boundary of the Monument in Mesquite trees 3 mourning dove nests with 2 eggs in each were observed.

Witness: I am not sure if the witness was in the room at the time of the shooting. I am not sure if the witness was in the room at the time of the shooting. I am not sure if the witness was in the room at the time of the shooting.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Nature Notes Continued : In NW corner of Monument along the washes many coyote tracks were seen and in the thickets there were many chicken feathers indicating that coyotes had been doing their feeding there. They are heard howling almost every night but to date none have actually been seen, on the monument. Feb. 26, there was a large barn owl in the Ruins shelter and he has been seen up there several times since.

Feb. 28, Apricot Mallow, Primrose, Bladderpod, and Creosote bushes all were in bloom.

March 17, Scottillo on South end of administration building bloomed.

March 5, First horny toad of season picked up on Monument.

March 23, Hedgehog cactus, and Staghorn Choya buds almost ready to break into bloom.

March 23, Prickly Pear Cactus buds are just starting to form.

A. T. Bicknell,
Custodian.

Trilling Smith, Jr.
Superintendent

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is true of the United States, Canada, and the United Kingdom. The second is the fact that the majority of the population of the United States is of European descent. This is true of the United States, Canada, and the United Kingdom. NATIONAL PARK SERVICE

Chaco Canyon

NATIONAL MONUMENT

Bloomfield, New Mexico

March 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of March, 1947.

There were a total of 71 visitors to the Canyon this past month. The number of persons visiting the canyon this month more than quadruples the number of visitors in January and nearly trebles the number for February. It is hoped that this rate in increase will continue. They came in 19 automobiles from the states of Colorado - 5 cars, 19 visitors; Connecticut - 1 car, one visitor; Minnesota - 1 car, one visitor; New Mexico - 7 cars, 33 visitors; New York - 1 car, 2 visitors; Oklahoma - 2 cars, 8 visitors; Tennessee - 1 car, 2 visitors; and Wisconsin - 1 car, 5 visitors. 65 persons took the trip through the ruins, and formed a total of 14 parties. 71 persons visited the museum and formed a total of 14 parties. 58 tickets were sold, but no complimentary tickets issued. A total of 20 hours and 5 minutes were spent with the visitors.....Custodian - 6 hours, Ranger 14 hours and 5 minutes. At the end of the month, there were approximately 10,100 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

Two written requests were answered.

The coldest during the month was 16 degrees on the 13th and 25th of the month, while the warmest was 71 degrees Fahrenheit on March 21. There was a trace only of rain on the 27th of February, the 1st, 2nd and 24th of March, and .07 of an inch on the 28th of February, and .20 of an inch on the 3th of March, forming a total of .27 of an inch of moisture. The wind blew with enough violence to blow the top off the wire storage room on Sunday, 23rd of March.

In last month's report, it was mentioned that the master of the ship, "Chaco Canyon", had been contacted. In the mail today, much information has been received concerning the ship. One part of the information is an itinerary of every trip the ship has made, except one which has been lost; another part is extra copies of the master's voyage reports and extra copies of the vessel's port logs. The master has promised us a picture of the ship to hang in the museum.

The Custodian took annual leave from March 5 through March 9, and married Miss Sylvia Sanford of Shawnee, Oklahoma. A trip was made to Atee on March 15, to pick up surplus property, and two trips in one was made to Gallup, New Mexico and Albuquerque to pick up surplus property and lumber. A trip was made to Grand Canyon

There follows the report of a visit to the
Government for the year 1947.

[illegible]

.LAWSON AND SONS LTD LONDON

The following is a list of the names of the persons who have been appointed to the various committees of the Board of Directors of the American Telephone and Telegraph Company, for the year ending December 31, 1911.

in last month's report, it was mentioned that the master of the ship, "Lafayette", had been contacted. In the next report, which I mention has been received concerning the ship. The part of the information is as follows: It was in the ship last week, which has been lost; another part is being copied to the master's report. The master has reported that the ship is being in the area.

The first of these is the fact that the book is not a history of the United States, but a history of the United States as seen through the eyes of a foreigner. The second is the fact that the book is not a history of the United States as seen through the eyes of a foreigner, but a history of the United States as seen through the eyes of a foreigner.

National Park to pick up surplus property. Next month, there will be more trips:- one to Grand Canyon, one to Aztec, one to Albuquerque and four or five trips to Gallup, to pick up surplus property, material bought by contract, etc.

The men on the fence job are again working hard and fast, after a shut-down period during the cold weather. They are very proud of their work. Today, the Custodian was out near the fence, and the Navajos insisted that he go over and take a look at a new section just finished. Roy Newton, the foreman, went along and proudly asked the Custodian to sight down the fence. It was just like sighting down a gun barrel! The foreman said, "We put it up straight, not crooked like white boys". (He had reference to the men who put in the original fence -- not NPA men). The Navajos have three fifths of the west side of section 26 taken down and some concrete blasted from the brace posts. Two thirds of the east side of section 26 has been taken down and concrete blasted from one half of the strain posts. Two fifths of the south side of section 25 has been fenced completely and one fifth of the same section line has the posts placed.

The stream control crew is out planting willows now, and are working well. Each day, lately, we have been taking them several miles up the canyon, heeling in plants enroute. Then, they work back towards headquarters all day.

Considerable trouble has been experienced with the water pump and engine. They were ordered, delivered and installed during the war when there were few permanent residents in the canyon and few visitors. Now, with the permanent residents increased 400 per cent, 15 Navajos working 5 days a week and a large increase in visitors, the small pump and engine are fast wearing out. It is getting so that it is necessary to overhaul the engine and/or pump nearly every time water is pumped. However, a new one has been ordered.

The Trader reports that Navajo rugs are still coming in at a better than average rate, and of course, his sale of merchandise is up.

As the tourist season is nearing, he has finished painting all the cabins, part of the front of the store building and the gas pump. Just this week, a large stock of jewelry has been brought in, and is now on display. He has arranged with the local Navajos for them to make small items of interest to the tourist such as ash trays and cradle boards, and has had a few of each already delivered. The sale of the last mentioned items, so far, is good. Other souvenirs have been ordered and delivery expected soon.

...the fact that the ...

The man on the canoe job was again worried about the boat, which was a small boat, period during the cold weather. They are very good at their work. Today, the boatman was out with the canoe, and the boatman insisted that he go out with the boat at a low level in the water. The boatman, who was young and probably named the boatman to go with the boat. It was just like a little boat, a gun barrel. The boatman said, "We got it up tonight, and we got it up tonight" (he had reference to the way we got in the boatman's boat -- not the boat). The boatman had three friends of the way and of course he took them and some more people along from the canoe boat. Two kinds of the boat and of course he had some taken down and some people along from the boat. The boatman said, "The boatman said of course he had taken down and some people along from the boat and the boatman said, 'The boatman said of course he had taken down and some people along from the boat'."

The stream which flows in our garden is called "The
Little Stream". It is very small, but it is very
beautiful. The water is clear and pure, and the
rocks are smooth and polished.

[illegible]

The above information was furnished to the FBI on 10/10/68 by the FBI New York Office, New York, New York, and is being furnished to the FBI San Francisco Office, San Francisco, California, for its information.

[illegible]

here follows the monthly report of Archaeologist Richard Gordon Vivian.

The entire month has been spent on major wall repairs at Chetro Kell. Most of the work has been concentrated on the repair of large breaks at floor level in the north three tiers of rooms. This is an area of two and three storey rooms where a patch in time save ten to twenty feet of wall above it.

Capping and smaller repairs are being made at the major breaks are completed.

Correction and tracing of the Chetro Kell ground plan is now complete. Prints of the first two sheets have been received and are much appreciated, being used for reference and the keeping of completion records.

Al Lancaster has been absent on annual and sick leave for 11 days.

MAJOR REPAIRS

47- North, south and west walls at base of two storeys, one doorway filled, beam levels repaired and the south wall strengthened and capped to hold back adjacent fill.

52- Unsupported base of one storey wall rebuilt, repair of one lower doorway and beam level.

55- Filling in of large hole at base of two and a half storey wall, repair of beam levels at one storey and strengthening and capping of south wall at fill line.

48- Repair of two large breaks at base of one and a half storeys.

43A- Patching of large hole in north wall, small break in west wall, both down one and a half storeys.

42- Filling in of large break completely through the wall at base of two storeys.

41- J, Exterior- Repair of broken doorway and slumped area, base of one storey.

MINOR REPAIRS

66-67- Capping and patching.

have followed the meeting report of the Geological and Natural History.

The entire month has been spent on making well reports at various points. The work has been carried out on the basis of large areas of land. The work has been carried out on the basis of large areas of land. The work has been carried out on the basis of large areas of land.

Logging and similar reports are being made at the various points. The work has been carried out on the basis of large areas of land. The work has been carried out on the basis of large areas of land. The work has been carried out on the basis of large areas of land.

60- West and south walls patched and capped. Patching of north wall in progress.

64- South, patching and capping in progress.

102- East and south walls capped.

58- Capping in progress.

Work which was in progress last report and now finished: rooms 94, 101, 103, 104.

MISCELLANEOUS

Timbers in one room where they will not be seen by visitors have been treated with the wood preservative recently received. The color is an objectionable green. Further tests will be made using other dilutents for the preservative.

Several roofing mats were encountered in room 65. They are of a small, quick growing woody plant, possibly willow. The rods average $\frac{1}{2}$ inch in diameter and 40 inches in length. They are held together by splitting and sewing through with cord. None of this cord shows on the surface.

Some of the mats are made entirely of peeled rods and others of alternate bands, 9 to 12 rods wide, of peeled and unpeeled sections. Portions of eight mats have been recovered. They are being cleaned and fastened to a temporary backing as time allows. Mac will need a new museum if he shows all of these.

FOR NEXT MONTH

Wall around the extremely deep excavation underneath Kiva G will be taken care of next. A slight amount of settling is taking place here. The east wall of room 35 has cracked badly and a small area fallen within the past month. A large blister is forming in room 27 and Kiva G itself shows cracking around the north wall.

Projects for the ensuing months:- paint office and out buildings when the paint arrives; paint signs; finish hauling material into headquarters; install light plant; get roads ready for summer travel; continue stream control and fence projects and keep office and routine duties current.

Irving McNeil, Jr.
Custodian

There is no reason why they will not be seen by visitors as well as by the wood preservative treatment. The wood is in a dry state.

On the southeast of the island, there is a small bay, the water of which is very shallow, and the bottom is composed of coral and shells. The bay is very beautiful, and the water is very clear. The bay is very beautiful, and the water is very clear. The bay is very beautiful, and the water is very clear.

There is a large number of people who are interested in the study of the history of the United States and who are also interested in the study of the history of the world. This is a very important subject and one which should be studied by all people who are interested in the history of the United States and the world.

Dos Cabezas, Arizona

March 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

Following is a report of activities at Chiricahua National Monument for March.

Weather Conditions. March has continued dry in the Chiricahua and Sulphur Springs Valley area, with .33 inches rain at the monument weather station, and slightly more in the valley. A few patches of snow are still visible on the higher mountains south of the Monument. Night temperatures average about 40 degrees, days run up to 75 degrees. Considerable strong winds prevailed during the month. An early fire season is indicated so far.

Special Activities. Considerable letter writing in connection with surplus property acquisitions, and in preparation for the fire school here in April, has occupied both the Custodian and Ranger. Operator Marble and Ranger Sharp made a trip to Fort Huachuca to inspect a motor grader there. Operator Marble made a trip to Benson for dynamite for road work. Gravel was hauled for the base of the new power plants when they get here. Regional Naturalist Dodge and Ranger Sharp attended the Chamber of Commerce school at Bisbee. Mr Dodge showed Park Service movie reels. He also ran the reels at the Silver Spur guest ranch. Custodian Cooke returned from annual leave, taken in Northern Arizona, March 11.

Inspections. Ward Webber, Chief, General Engineering Division and J. R. Lassiter, Regional Engineer, were here Saturday, March 23 and discussed various problems and projects with Custodian Cooke.

General Publicity. In addition to the usual new items in the local papers, two staff members of Holiday Magazine, which recently lifted its face and raised its sights, spent a day of their Arizona survey at Chiricahua. Mr. De Lardi, photographer, made an all-day horseback trip to the Heart of Rocks with Custodian Cooke, and Mrs. Dolores Taylor Scott, writer, gathered material for the article.

Approaches to Monument Area. Local roads continue good, but dusty. Many cars now come over the Portal-Union Saddle route, and the road is open clear to Rustlers Park. Cars started coming over this road in February, which is about two months ahead of the usual time. The very light amount of snow in the mountains made this possible.

Interpretive. Most of the interpretive service is given at Headquarters, with some contacts on patrol Sundays and holidays. Interpretation here is on a hit and run basis, with the visitors eager to head for the campground, or for Massai Point to see all they can and still get to Los Angeles before night. Considerable time is spent with the relatively few who are really interested.

Travel. Travel this month was slightly less than that of February but was twice the travel of March last year. Local travel will no doubt increase greatly as summer weather approaches and the natives seek the coolness of the mountains.

Visitors. Beside the already mentioned Mr. De Lardi and Mrs. Scott of Holiday and Engineers Netter and Leasiter, Mr. and Mrs. Weldon Weald, former director of the Sierra Club, were in for a while, arranging for the later visit of 100 members of the Sierra Club. Rangers Fulton and Hownstine of Saguaro brought some Venetian blinds over, and made a good hike over Chiricahua's trails. Also two gentlemen from Stockholm, Sweden, spent several hours in the Wonderland of Rocks.

General. Much time is used in talking with visitors at Headquarters and the usual struggle to stay ahead of office work takes several days each week. Surplus property correspondence and fire school preparation have helped keep us busy. The radio schedule with Saguaro and Organ Pipe remains on a once-a-week basis as yet. More inquiries are coming in about the use of the campground for large and small groups later on in the season. The water supply still holds out, but we are a bit apprehensive for the situation as summer travel increases.

Ramah, New Mexico

March 26, 1947

MEMORANDUM FOR the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of March.

WEATHER: Seventy one days have now passed without a measurable precipitation and thirty days of dry, high winds have increased this very dry condition. Maximum temperature reached 64 degrees on the 25th and the minimum was 12 degrees above zero on the 7th.

TRAVEL: March travel increased 222 per cent over 1946 and is mostly due to the dry condition of the approach roads. The Monument was visited by 129 people arriving in 41 cars. A total of 117 made the tour of the Inscriptions in 28 trips and the guide time amounted to 29 hours, 25 minutes. Twelve people arrived requesting information on the following subjects; roads, land for sale, where to seine minnows, and the shortest route to Highway #66.

APPROACH ROADS: Dry and rough, but passable. The last information received on March 22, from Mr. Burton Dwyre, State Highway Engineer, concerning the improvement of Highway #53 was that the project had been set up and that work should start in the very near future. Survey work on the nine mile detour, State Highway #32, south from Gallup, has been completed and we hope to see earth-moving equipment on the job soon. A new sign at the turnoff to the Monument on Highway #53 was erected and we hope this will help the confused traveller to distinguish between the town of El Morro and the Monument. An interesting report on the use of volcanic cinder as road material was received from N. M. State Highway Department Bureau of Materials. The report stated that the cinders meet all their highway construction requirements for ballast, leveling course and oil processing after an addition of 15 to 20 % of sandy filler. As cinders are the only surfacing material found in any quantity near this area, the results of the laboratory test are very encouraging.

SPECIAL VISITORS: On March 12th five men representing The United Artists Motion Company visited the Monument on a location trip. The contemplate using the Rock as a background for a picture based on the novel Paso Por Aqui. Their return is expected the end of this month for a more detail study of the area.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

MARCH 26, 1947.

The following is a summary of activities for the month of March, 1947.

Visitors this month totaled 182
Travel this year to date 734

Weather. Occasional snow flurries during the first part of the month. Strong winds accompanied by much dust prevailed throughout the latter part of the month. High temperature was 68 and low 13.

Roads. Both approach roads from Carrizozo and Mountainair are now in fair condition since considerable rock moving and grading has been done by the State Highway Department. A recent allotment of roads and trails funds has been used on the three-quarter mile entrance road to the monument. This was a much needed job because it has been several years since any major work has been done on this road. Work consisted of widening, making new drainage ditches, opening up of drop inlets, clearing out weeds and brush growth, removal of rocks and slide material, straightening and smoothing.

Travel. Visitation still continues to show an increase. 11 per cent over the previous month of February and 227 per cent over the corresponding month of March 1946. Instate visitors numbered 159 and outstate visitors 23. There were a total of 61 cars with instate numbering 50 and outstate 11. 11 people walked out to the monument.

Guide and Contact Service. A total of 182 visitors were conducted through the ruins on 61 guided tours. The average time spent by each party was 59 minutes. Total contact time of 59 hrs, 55 mins.

Free and for-sale Government Publications. No publications are on hand at this area. However, a supply has been ordered for distribution.

MAINTENANCE AND ADMINISTRATION. Continued work on restoration of walls of the new mission and adjacent convento. Repainted kitchen of residence with interior white enamel. Considerable work has been done on the water sump pump unit and air compressor at deep well. Worked on trail leading to ruins. Tied down roof of tool shed to keep wind from blowing it away. Gave monument area a general cleanup and repaired boundary fence in several places.

Custodian.

SUMMARY of the MARCH, 1947,
MONTHLY NARRATIVE REPORT for
GREAT SAND DUNES NAT. MON.

- P-1 SPECIAL: Frozen water line appears to be thawed.
- P-1 WEATHER: Blustery March weather-much wind; many snow flurries.
- P-1 TRAVEL: 256 visitors, 82 cars.
- P-1 INCREASE IN TRAVEL: March, 1946, 98 visitors, 42 cars.
- P-1 ROADS: Rough.
- P-1 PUBLICATIONS: 119 leaflets.
- P-1 WILDLIFE: Deer, bluebirds, pinon jays, magpies and one lone chipmunk.
- P-1 SPECIAL ACTIVITIES: Trip to Texas and New Mexico for surplus government equipment.
- P-2 ACTIVITIES: Work on water line; customary hauling of wood and water; obtained repaired pickup; two tires for dump truck; barrel of Zone roofing material; and completed stabilization report for Pueblo Bonito.
- WILDLIFE: Deer are frequently seen around Shoshone Spring. Snow geese are common on the upper end of a lake adjacent to the lake road. Fox is not seen here, since he moved up about 25, the top of the Grand Canyon. The canyon, very steep and very small headwaters and the small stream of water and sand just west of the headwaters.
- SPECIAL ACTIVITIES: From March 1 to 12, the weather was on a field trip to Texas and New Mexico for surplus government equipment. Participants were and Miller and Miller were in the party making trip. They will continue work on equipment and in the vicinity of the lake from the lake along to the lake, to the lake. They will continue work on equipment and in the vicinity of the lake from the lake along to the lake, to the lake. They will continue work on equipment and in the vicinity of the lake from the lake along to the lake, to the lake.

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

March 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for March, 1947.

SPECIAL. At 3:30 P.M., on March 25, the water line opened and we now have water in the custodian's residence!

WEATHER. It was a typical March month with a great deal of wind and many snow flurries. Approximately eight days during this report period could be classed as ideal spring days. The uncertain weather kept many visitors away from the sand dunes

TRAVEL. Two hundred fifty-xis visitors in eighty-two cars visited the area during this report period. Twenty-five people took advantage of the picnic grounds and of these, three brave souls from Iowa camped over-night. Two written requests were answered.

INCREASE IN TRAVEL. For March 1946, the records show 42 cars and 98 visitors.

ROADS. Both approach and monument roads are in rough and dry condition. It is hoped that some moisture falls enabling the county to begin grading the roads.

PUBLICATIONS. There are on hand, one hundred nineteen mimeographed informational leaflets.

WILDLIFE. Deer are frequently seen around Mosca Spring. First sign of spring was the appearance of a lone chipmunk in the back yard. He is our good luck sign, since he showed up March 25, the day the frozen water line thawed. Many bluebirds are seen around headquarters and the usual flock of magpies and pinon jays hang around for handouts.

SPECIAL ACTIVITIES. From March 2 to 12, the custodian was on a field trip to Texas and New Mexico for surplus government equipment. Custodians Mahan and Guillet and Ranger Keefe were included in party making trip. Many difficulties were encountered and it was finally necessary to take wheels from the pickup going to this area, to enable Custodians Mahan and Guillet to return to their areas with spare wheel and tire. The Sand Dune pickup is now in Albuquerque, New Mexico waiting for the ordered wheels and tires.

[illegible] is [illegible] on [illegible] [illegible] [illegible]

[illegible] It was a [illegible] [illegible] [illegible] [illegible]

[illegible] The [illegible] [illegible] [illegible] [illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

[illegible] [illegible] [illegible] [illegible] [illegible]

ACTIVITIES. Upon return from trip and weather depending, the majority of time has been spent again on the water line. Sections were dug up exposing pipe and then the Aeroil Burner was applied. Snow was removed from the 1500 foot trench by same method. On several occasions, sufficient ice was melted and it was possible to save what water entered the pipes in the residence.

However, on March 25, at 3:30 P.M., the water line coughed up mud and sand and for several minutes it was touch and go. Enough water came to fully wash away the dirty deposit and we hope its safe to say the Singlar Sands are in tune again and will continue their sweet song.

An enormous amount of work remains to put the water line in good functioning condition again. This means checking the entire line for leaks and then covering the 1500 foot trench. This should take the entire summer and put the line in excellent shape for the following winter.

It is also hoped that something can be done with the present pipes to ensure a proper pressure for house and the rest-rooms for visitors. From exposing the pipes entering the residence, it appears that some children laid the line and were having one heck of a good time in playing around with angles, plugs, nipples and assorted sizes of pipe which ruin the pressure.

The repaired pickup was obtained from the Heide Garage prior to taking the trip and thus enabling the NCWP to haul water during my absence.

Fuel oil and gasoline were also hauled prior to trip.

A trip was made to Hooper to pick up two tires, badly needed for the dump truck.

The wheels and tires were removed from the dump truck and remounted. All tires were changed around so as to give the best results. The wheels and tires were also changed on the pickup.

A barrel of Zone roofing material was picked up in Mosca.

The photographs were received from Region Three office, enabling me to complete the stabilization report for Pueblo Bonito for last June, 1946. These reports were mailed to the proper offices.

Little seems to have been completed or accomplished this month, but evidently efforts were not wasted on the water line. If luck continues with this line, many things can be accomplished next month that have been put off for a long time.

Ted C. Sowers,
Custodian.

NATIONAL PARK SERVICE

Montezuma Castle NATIONAL MONUMENT

Camp Verde, Arizona

March 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of March, 1947.

Visitors this month - 1194; travel year to date, 6437.
Visitors March, 1941 - 600; travel year, 1941 - 2602.

Weather This month has been satisfactory for travel. The maximum temperature was 80° with most days registering in the 70's. The minimum was 22° and the total precipitation .22 of an inch. According to reports released by the Weather Bureau, Arizona has received only about one-fourth its normal moisture for the year.

General Travel figures continue to climb with 275 more visitors than the 921 counted in March last year. Our travel year to date is 1900 visitors or 41.9 per cent ahead of last year and 157 per cent ahead of March, 1941.

Administration Copies have been made of correspondence pertaining to Montezuma Well and files established for that area. Nature observation files and a Fact File are also being established for that area.

Archaeologist Schroeder has spent considerable time between visitor contacts in combing through all copies of the Monthly Report on file for information that might be of interest. Our bound volumes of reports begin with May, 1932 and many interesting items on the history, administration, and personnel changes at this monument have been brought to light. This information has all been recorded in our Fact File.

A collection of sherds from Montezuma Well was sent to The Museum of Northern Arizona for identification and comment.

Inquiries were posted in the local and neighboring post offices to learn who might be interested in our temporary ranger position for the coming summer. A deadline date was set at March 22 and only one application was received.

Four special trips were made to Camp Verde to find Indian laborers who had been working when our new wage scales became effective. They had to be signed off the old rate of 60¢ per hour and signed on the new rate of \$1.00 per hour.

...

...

Several items secured from Surplus Property were delivered by truck on March 20.

Publications sales in the museum have climbed sharply since our "Serve Yourself" plan was initiated. It was learned that visitors often overlooked our small price tags so more conspicuous tags were made. However we are still losing about 10 per cent on the literature removed. Only non-Federal publications are offered on this plan.

Montezuma Well Patrol trips were made to Montezuma Well on February 26 and March 2, 5, 8, 10, 16, 19, and 23. Stray stock was driven from the area on nearly every trip. The yard and lawn was irrigated and efforts are being continued to clear the area of trash. Negotiations to purchase the property are still not complete.

Maintenance and Construction The project to gravel trails around the residences was terminated February 25 when we ran out of funds. About 50 feet more surfacing is needed to bring the trail to the parking area.

A new tool rack was completed in the garage.

Mud mortar was used to camouflage the masonry buttress constructed by Archaeologist Steen to support the cliff under the Castle.

One-half day was spent repairing our water pump.

The bathroom at Residence No. 1 was redecorated.

National Park Service Visitors Custodian and Mrs. Clair V. Cook were here on February 24 from Chiricahua.

Custodian and Mrs. James Cole of Joshua Tree National Monument were here on February 26.

Ranger Paul Steel of White Sands was here to deliver a load of surplus property.

Newsworthy Visitors The Hiking Club from Arizona State Teacher's College at Flagstaff was here March 8.

Mr. L. M. Gooding, well-known southwestern botanist, was here March 9.

Use of Monument Facilities by The Public We had 1194 visitors who came in 373 cars and trucks. Tickets sold, 415; tax but no ticket, 18, children who climbed free, 44; armed force visitors who climbed, 1. There have been several times this month when we could not accommodate all visitors who wanted to climb into the Castle.

Contact Time Total contact hours, 155.50. Hastings, 50.50; Leding, 48.25; Schroeder, 56.75. Trips through the Castle, 118 for 478 visitors; museum groups, 205 for 754 visitors. Information service outside the ruins or museum was rendered to 141 visitors. There were 17 picnic parties including 85 people known to have used the area and signs of several parties not

There is no doubt that the above information is correct and that the same is being furnished to the proper authorities for their consideration.

With reference to the above, the following information is being furnished for your information:

Homer F. Hastings,
Custodian.

Source: The following information was obtained from a copy of the letterhead memorandum dated January 10, 1967, from the Dallas Office to the New York Office.

1. The first thing I noticed when I stepped out of the plane was the cold air. It was a sharp contrast to the warm, humid air of the tropics. I had heard that the weather in the north was harsh, but I didn't realize how cold it would be. The wind was biting, and the sun was a pale, distant orb in the sky. I wrapped my coat around myself and shivered. I had never experienced such a cold before. It felt like I had been thrown into a different world. The people around me were bundled up in heavy coats and hats, and I could see their breath in the air. I felt like an outsider, a stranger in a strange land. I had come here for a job, but I didn't feel like I belonged. I was alone, and I was scared. I had never been so far from home before, and I didn't know what to expect. The only person I knew here was the man who had hired me, and he was a stranger to me. I was alone, and I was scared. I had never been so far from home before, and I didn't know what to expect. The only person I knew here was the man who had hired me, and he was a stranger to me.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been solved. If the problem has not been solved, the process may need to be repeated.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Navajo National Monument
Tonalca, Arizona
March 28, 1947

Memorandum for the Director, Region Three.

There follows a report of activities in this area for the month of March.

Weather Generally fair with no traces of snow at this time. High winds have been on the increase for the past five days.

Roads Three man-days were spent shovelling and dragging the entrance road. We are happy to report the road as rut-free and better than average.

Visitors Only three parties of visitors reached this area and all were bound for Betatakin only, also, all were contacted.

Maintenance and Construction The pressure relief valve was installed in the hot water line above the new heater unit.

The service porch floor was given a coat of varnish.

The Betatakin foot trail directional sign was repaired.

Bathroom walls were washed of the winters accumulation of soot.

We got some ticks in on the Master Plan and the PCP.

Additional work was accomplished in reorganizing the filing system.

Patrol Routine inspection was made at Inscription House on the 24th. Every thing there was found in good order.

Inventory of Government Publications Two-fold leaflets, Navajo National Monument 1276, Sunset Crater National Monument 179, Walnut Canyon National Monument 47, other, National Park Location Map #6 26, The National Park System 26, (June 30, 1946).

Projects for the Coming Month A thoro-going spring cleaning inside and out is expected to require most of our time this month. Keeping the road open across the wind-blown sand dunes is a routine April chore. Upon arrival of the pump parts now on order we will overhaul the sorry pump.

About Spuds The fame of our wild potatoes has reached the sovereign state of California. Dr. H. L. Mason, Professor of Botany, Director of the Herbarium, University of California requested a pressed specimen. Having an extra specimen on hand we were happy to forward it (*Solanum Jamesii* Terrey) to Dr. Mason. Can you imagine giving potatoes away in these times of inflation? Our careful consideration will weigh any further requests for our spuds to separate the scientific from the epicurean. Let it be known that these acorn-size potatoes are definitely not inflated.

~~ORGAN PIPE CACTUS~~ NATIONAL MONUMENT

~~AGU, ARIZONA~~

March 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of March 1947.

WATER.

This month has been warm the whole period with a high of 62 on several days during the month. A low of 32 was reached on the 7th though for such a short time that no ice was noticed. Only one small shower amounting to .05 fell on the 17th.

TRAVEL.

Travel continued to be heavy with a great many out of state visitors coming to see the flower displays which this year is disappointing. Due to the very dry winter flowers have not come out only in a few moist places. This has been one of our heaviest camping months with our make shift camp-ground running over most of the time. Before another travel year some better camping facilities will have to be arranged.

370 persons were given interpretative service at the headquarters and as they arrive one car at a time it keeps one man confined to this work so that it is hard to keep up with patrol and outside work. Each contact requires from one half to one and one half hours.

GENERAL.

One trip was made to Grand Canyon by the Custodian to get the SAMC pick-up to be used on the fence job here. The two light plants were obtained at the same time, which were transferred from surplus.

We were able to find time to get one plant installed and put into operation last night and while not as handy as the old plant a great improvement was noted in power and light.

Ranger Ringenbach is now making pickup and delivery of surplus materials from the northern areas.

Regional Naturalist Dodge spent two days on the monument checking future interpretative needs and securing many needed photographs.

Little has been heard of the foot and mouth disease in Mexico this month, though in checking we find it still spreading and the needs still great for the border fence.

~~SAGUARO~~ NATIONAL MONUMENT

~~Tucson, Arizona.~~

March 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly narrative report of activities at Saguaro National Monument for the month of March, 1947.

WEATHER. Most of the month continued warm, even hot, with very little of the wind we usually expect in March. The drought of the past three months was temporarily broken on March 17, when .50 inch of rain marked the first precipitation since December 26. Since that date, we have had two light showers with only a trace recorded. The Forest Service, throughout Arizona, is anticipating an early and severe fire season, and radio warnings are already being broadcast to forest travelers to use midsummer caution with fires. The Rincon Mountains, within the monument, are very dry, and Rincon Creek, two miles south of Madrona Canyon Ranger Station is already dry - over a month ahead of normal.

SPECIAL ACTIVITIES. March 1 to 6 the custodian, Ollie Barney, and Richard Barney made a trip to Marathon, Texas, and Big Bend, to assist in returning five transferred ex-Army vehicles and other equipment to several Arizona monuments. Ollie Barney also spent March 10 and 11, and the week of March 17, on five trips between Coolidge and Phoenix, transferring War Surplus property to Casa Grande National Monument.

INSPECTIONS. Regional Naturalist Dodge was in on March 2, and discussed various monument problems with Ranger Fulton.

MAINTENANCE. Due to travel in connection with transfer of surplus property, no work on the trails was attempted during the month. The Loop road in the cactus section was dragged once, and continues to remain in good condition after the grading of last month. An inside toilet, lavatory, and shower-bath were installed in the Headquarters building, and a new jet type pressure pump and 50-gallon storage tank obtained from surplus were installed in place of the old reciprocating pump system. Sewer lines to the cess-pool were laid, and the cess-pool completed except for pouring the top. This last project was delayed by two breakdowns of the cement mixer borrowed from Organ Pipe. Only four man-days of work was expended on the arboretum to be temporarily planted in the front of the Headquarters building, and approximately six more truck loads of dirt will finish this grading; the cacti will be transplanted after the blooming season.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
SAGUARO NATIONAL MONUMENT
PAGO PAGO, ARIZONA
APPROACHES TO MONUMENT AREA. The past week the Pima County Highway crew graded the Broadway approach road, but the soil was so dry that two days travel again resulted in the wash-board surface which has prevailed all winter. The road to Colossal Cave was also maintained, but the stretch from the Cave to Vail and Highway 80 remains very rough.

ACCESSIONS. New equipment received during the month included a 1½ ton, stake-body, Ford 6-cylinder truck, 1943 model; a steel desk, atracing cabinet, a 3/4-ton two-wheel trailer, a two-drawer steel filing cabinet, 12 "Blitz" cans, 12 steel folding chairs, 8 wooden bunk beds, springs, and mattresses, 1 set of steel furniture for a first-aid room, and numerous smaller items. One twenty-man fire tool box, complete with tools, was transferred from Casa Grande warehouse.

TRAVEL AND INTERPRETIVE SERVICES. Travel decreased almost six hundred persons from the February high. A total of 2279 visitors, arriving in 737 cars, one motorcycle, one bicycle, and 18 horseback riders, made up the travel, and registered from 37 states, D.C., Canada, Switzerland, Sweden, Hawaii, and England.

Inspite of the decreased travel, the number of visitors contacted at monument Headquarters increased, with informational service being rendered 905 persons, in 270 parties. Forty-nine and one-half hours was spent on contact work, mostly by Seasonal Ranger Howenstine.

POLICE PROTECTION. While on routine boundary patrols during the javeline season, Ranger Fulton encountered two instances of violation of the mining regulations. One prospector, who had been camped near the base of Rincon Peak, was removed from the monument area. The other party had opened a shaft in the Tanque Verde Mountains, near the south boundary; they were advised that they were operating in vioation of regulations, and would be required to fill in the shaft, clean up the surface workings, and vacate the property. This has been done.

WILDLIFE PROTECTION. Week-end patrols have been maintained through the month, which is open season for javeline. No instances of violation have been encountered, but several parties hunting near the south and west boundaries of the monument have been warned.

PUBLICATIONS ON HAND. In accordance with instructions of FO497, the following tabulation of informational literature on hand March 25 is submitted:

Free Publications ----- N.P.S.

Saguaro tw-fold informational leaflets -----	4500
Saguaro two-fold leaflets (Spanish) -----	1150
Location Map No. 6, Southwestern States -----	600
Southwestern National Monument leaflets -----	1450

Sales Publications -- Supt. of Documents.

None.

Don W. Egermayer
Custodian.

A circular stamp with a clock face border. The text "RECEIVED" is prominently displayed in the center. Below it, the date "MAR 28 1947" is stamped. The clock face has numbers 1 through 12, with the hands pointing to approximately 10:10. The stamp is slightly faded and has a textured background.

1. The first group of people who were arrested in the early 1950s were those who were active in the Communist Party of the United States (CPUSA). They were arrested because they were considered to be a threat to the national security.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....Sunset Crater..... NATIONAL MONUMENT

.....Flagstaff, Arizona.....

.....29 March....., 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of March, 1947:

Visitors this month: 402 Travel Year to date: 3377

Travel: Visitation has shown a decided increase over last month. This no doubt is due to the fact that the entrance road has been open during the entire month and is in general good condition.

Roads: The entrance road from Highway 89 is in good condition. The Saginaw Manistee Lumber Company has been hauling logs to their mill in Flagstaff over the entrance road. Constant maintenance has kept it in general good condition. On the other hand the presence of large logging trucks on a narrow road results in a certain amount of hazard to passenger cars. Visitors have been warned against attempting the road to Wupatki because of the very narrow road through the deep cinder. Signs have been erected and notices have been placed in the local newspaper. At such time as logging operation are discontinued it is hoped that this road may be used by the visitor again.

General: Six inspection trips were made during the month. On the 12th Regional Naturalist Dodge, accompanied by Ranger Upton, made a photographic trip to Sunset Crater. Points of interest included the 'Squeeze-ups' and the crater rim. The day was a success in spite of the high wind that threatened to blow them from the summit.

Publications on hand: Sunset Crater 2-fold Informational Leaflets on hand - - - 1000 copies.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Tonto----- NATIONAL MONUMENT

-----Roosevelt, Arizona-----

-----March 25-----, 1947-----

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for
March, 1947.

Visitor Statistics: 2496 people came to this Monument in 657 cars. 633.1 hours of service were given by Custodian Gipe and Ranger Bull. States represented, 41, also Canada and South Africa. The visitor count dropped rapidly this month due to, we have been told, many people returning home earlier than usual. Rumors that this and that was going to happen made it seem wise that they be at home if or when it happened.

Park Service Officials: Regional Engineer James R. Kassiter called for a few minutes, March 23 and that same day, Naturalist Dale S. King and several members of his family picnicked here and visited for a short time. Also on the 23rd. Mr. P. B. Evans of the Bureau of Federal Supply, San Francisco, looked us over briefly and spoke very highly of our area. Stan Davis of the Lollesgard Specialty Company, Tucson, was in to take a few more pictures, March 14.

Weather: Had a fine rain the night of February 27 and snow flurries during the day. There were also light showers, March 6 and 17. The whole month has been cold and considerable wind. A heavy frost the night of March 1. A quick change took place March 23 and summer seems to be here.

General: A little more than usual has been accomplished this month. The temporary office and storage room completed March 21 and is now in use. The site for Ranger Bull's trailer house was leveled off by hand and the trailer can now be moved there when it arrives. The work is not entirely finished as the exact width cannot be determined until the trailer is on the spot. The remaining work can be done as time permits. A number of trips were made to Globe. Material had to be hauled for the tent house for laborer Bean and some old lumber taken in to be sawed for rafters. The tent house was put up, made livable and the Beans moved in. They are very comfortable and well pleased with the accommodations. Went to Coolidge and drove back the army truck assigned to this Monument. The Ford broke down and had to be left there. I have since taken the truck to Globe for a grease job and new bolts for the battery cable.

-----March 25-----, 1947-----

Glass was obtained for protection of the textiles and has been installed in three of the drawers.

Flora: Many flowers are in bloom but unless more rain comes soon the season will be short. Some of the shallow rooted plants are withering.

Have seen a few Hedgehog Cactus in bloom and buds on most of the others.

The Lupines and Brittlebush make a blue and yellow combination very lovely to look at.

Wild life: The air is full of bird songs and some are already nest building. The Quail have begun to dust atop the wall by the front door, a sure sign of spring. A Gila Monster was seen on the parking area and rattlesnakes are reported every day.

Javalinas travel around the house at night and a Ringtailed Cat walks all over Ranger Bull's shiny new car almost every night.

The prize sight was a full grown Mountain Lion walking boldly up a small canyon north of the museum, with the trail full of people going up and down. I was standing in the museum door and could see him plainly but he was too low down for the people on the trail to get a look at him. A lion hunter came up the next day and told us he probably was run out across the lake as they were hunting them over there with hounds.

Projects for the ensuing month: The road and trails will probably take up most of the time for April.

Free Government Publications on hand.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT

Nogales ~~Box 2225, Tucson~~ ARIZONA

March 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of March, 1947:

WEATHER CONDITIONS: Precipitation was slightly below the average for the past eight years, with .36 of an inch. Maximum temperature was 80, minimum was 27.

MAINTENANCE: The lobby of the museum was given a floor treatment of two coats of Horn Duocrax, to settle dust and preserve bricks. The soil in the west end of the patio garden was turned, and sand and bat manure added. Calendulas, verbenas, and peopies have been planted, some from seedlings, and the verbenas are now blooming.

A giant Maguey was dug up from an abandoned farm (with permission) and hauled in a borrowed trailer and planted in the space between the parking area and the museum building. This plant probably weighed 800 pounds, and it required all the musculature of our laborer and two good friends of the monument who donated their aid, to get the thing moved and in place. It is a strikingly attractive addition to the monument.

One section of the patio garden has always been a cactus garden. It was flat ground, and not attractive, and the plants didn't do too well in it. We now have built a hill in its stead, using a covering of rich hillside soil and rocks. The cactus plants and a nice ocotillo are now planted in this well aerated soil, and the cactus garden is now as pretty as it should be, and, we think, very natural in appearance.

INTERPRETIVE SERVICES: 1382 visitors went on 201 guided trips through the mission church and grounds, receiving an average of 36.79 minutes per trip. 2469 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 2427 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: Our total of 2,571 visitors was by far the highest March travel on record, seconded by March 1937, with 2188 visitors.

VISITORS: March 2 - A. T. Mercier, President, Southern Pacific R.R.

March 3 - Regional Naturalist Dodge, for a few minutes, but the custodian did not get to see him (Mr. Dodge was leaving some publicity material for us).

March 22 - Ranger and Mrs. Charles C. Sharpe and Grader Operator and Mrs. Jess Marble, of Chiricahua.

February 26 - The Soporì School, with a group of 25.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
YUWACACON NATIONAL MONUMENT
BOX 1000, TUCSON, ARIZONA

March 28, 1947.

Memorandum for the National Museum,
Region Three.

Follows the monthly narrative report for Yuwacaccon National
Monument for the month of March, 1947:

WEATHER SUMMARY: Precipitation was slightly below the average
for the month of March, with .55 of an inch. Maximum temperature
was 87, minimum was 34.

VISITATION: The lobby of the museum was given a floor treatment of
two coats of latex mastic, to seal the dust and grime that had
soiled the floor and of the patio garden was turned, and new and
but some added. Calceolarias, verbenas, and bougainvillea have been planted,
some from seedlings, and the verbenas are now flowering.

A plant nursery was set up from an abandoned farm (with permission)
and planted in a corner of the lobby and placed in the space between the
parking area and the museum building. This plant nursery weighed
500 pounds, and it received all the maintenance of our laborer and two
good friends of the monument who donated their aid, to get the thing
moved and in place. It is a strikingly attractive addition to the
monument.

The section of the patio garden has always been a scarce garden.
It was first ground, and not attractive, and the plants didn't do too
well in it. We now have built a hill in the yard, and a concrete
of rich alluvial soil and rocks. The concrete plants and a side walk
are now planted in this well sorted soil, and the concrete garden is now
as pretty as it could be, and, we think, very natural in appearance.

INTERPRETIVE SERVICE: 1288 visitors went on 201 guided tours through
the museum and grounds, receiving an average of 24.7 minutes per
tour. 2489 visitors received combined information and interpretation
service in the museum lobby, garden, and view room. 2489 persons
visited the museum.

INCREASE IN VISITORS: The total of 2,571 visitors was by far
the highest since travel resumed, exceeded by March 1937, at 2188 visitors.

VISITORS: March 2 - A. T. Weller, President, Southern Railway Co.
March 8 - Colonel Robert H. Hays, for a few minutes, but
the carriages did not get to see him Mr. Hays was leaving some publicity
material for us.
March 22 - Porter and Mrs. Charles A. Porter and Walter Porter
and Mrs. Jean Porter, of Phoenix.
February 25 - The Robert Schmitt, with a group of 25.

UNITED STATES
DEPARTMENT OF THE INTERIOR

GENERAL PUBLICITY: On March 6, a photographer for "Holiday" magazine took pictures to submit for the 40-page article on Arizona, planned for their October issue.

During the month, Arizona photographers Chuck Abbott and Jack Breed each made trips to Tumacacori for pictures; Jack Breed was after a recent photograph requested by "National Geographic".

DONATIONS: Mrs. Edith Hipple, of Tucson, gave us some welcome additions to the fish pond in the patio garden, consisting of giant snails and five varieties of water plants.

TREASURE HUNTERS: On two occasions in the last three weeks people have told us they know just where the "pot of gold" is buried in the mission, and requested permission to dig it up. Permission was not granted, inasmuch as they lacked proper credentials. Anticipating possibility that some over-zealous treasure hunter might invade the grounds for surreptitious nocturnal removal of the "treasure," an occasional night prowling has been instituted through the church and grounds.

GENERAL: Southern Arizona cities are becoming very cognizant of value of best possible relations with Sonora, and various civic groups have gone into Sonora cities on good will visits recently. Nogales Sonora will have a tourist boom when the paved highway is finished through to Guaymas. Nogales Arizona is becoming more industrialized with the recent completion of a large tomato packaging and processing plant.

Continued drouth is causing concern among cattlemen and ranchers. Cattlemen are finding many water holes drying up. The water table continues to drop rapidly in this county. In 1945 Santa Cruz County pumped water out of the ground at one and a half times the rate it comes in. National publicity has turned a spotlight on Arizona's serious need for more water and better water conservation practices.

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for March, 1947.

Summary

Visitor total for March, 1947 breaks all records for previous years
- Page 1

Plans to increase motor travel through the Verde Valley indicate unprecedented demands on Monument personnel this summer.
- Page 1

The most keenly appreciative visitor to Tuzigoot--and the most observing--was an elderly lady who was blind.
- Page 1

Tuzigoot Museum and ruins were inspected by Ward P. Webber, Chief, General Engineering Division, Chicago in company with James R. Lassiter, Regional Engineer, Region Three.
- Page 2

Over half the immediate stabilization requirements of the ruins have been met.
- Page 2

Supplier failure leaves 700 feet of pipe still to be delivered before water supply to Monument can be assured.
- Page 2

Removal of 36 tons of rubble from Unit IV of ruins completed
-Page 2

New interpretive exhibit of Tuzigoot excavation photos completed
- Page 2

MARCH, 1947 MONTHLY NARRATIVE REPORT FOR TUZIGOOT NATIONAL MONUMENT

Visitor Total: 1055 visitors broke the record for March travel at Tuzigoot. Past highs of 854 for 1941 and 269 for 1946 were completely outclassed. All visitors arriving at the Monument within duty hours were contacted, and many more were oriented or conducted at noon and after closing time.

Guide and Contact Service: Maximum service was given to the visiting public--an average of 19.5 minutes each for 226 ruins parties and 20.1 minutes each for 273 museum groups--with paper work, filing, fact file and nature observation notes, cleaning, grounds maintenance, pipe line repair, rubble removal at Unit IV all filling in the "spare time" that remained. We find that with two men working steadily, there is remarkably little spare time. If present plans to draw even more visitors into the Verde Valley by a campaign to publicize Alternate U.S. 89 and the projected "Black Canyon" highway from Phoenix follows through, Tuzigoot will soon have greater visitor demands made upon it in the peak season than two men can handle. We are thinking that a summer ranger could be very profitably employed even this coming summer.

Personnel Time: Museum: 91 hours 5 minutes. Ruins: 73 hours 25 minutes. Total time for Custodian, 84 hours 30 minutes; for Ranger Richert: 80 hours.

Special Visitors: There was one visitor Tuzigoot was particularly honored to entertain this past month. She examined the metates and monos, the shapes of the pottery, the delicate features of tiny obsidian points, the polish of ancient turquoise jewelry. Despite her advanced years, she accepted our aid and visited the ruins, observing closely the texture of the adobe, the sizes and shapes of the rocks. Her comments upon our description of the valley, the many other companion pueblos and the pueblo of Tuzigoot were keenly intelligent. When she left, thanking us warmly for showing the Monument to her, we knew Tuzigoot had found one of its most meticulous and appreciative visitors. She was blind.

On March 5 a group of 25 youngsters representing the 3rd, 4th, 5th and 8th grades of Jerome Public Schools visited the Monument with their sponsoring teacher. In a detailed program worked out for the group by Ranger Richert, the story of The Verde Valley and its ancient inhabitants was presented so that each child could take back the story to present to his or her class room. This program was the fulfillment of several conferences with Superintendent Mullen and various teachers at the Jerome schools, and we believe the result was worth the effort, since the visit to Tuzigoot gave the children considerably more than a routine "sightseeing" round of the museum and ruins. Later in the month, we were pleasantly surprised by an unscheduled visit of 20 Jerome school children who had contrived to get down to Tuzigoot "on their own" (many walked or found rides) on a Sunday afternoon to meet a teacher who had agreed to supply all comers with crayons and paper for drawing museum objects. The kids had such a fine time that we were delighted they came--even though we contacted 112 visitors that afternoon.

On March 15, eight Eagle Scouts and their Scoutmaster of Troop 38, Phoenix

THE LIFE OF JOHN EDGAR HOOVER

John Edgar Hoover was born on January 22, 1895, in Washington, D. C. He was the son of John Edgar Hoover, a prominent lawyer and politician, and Mary Elizabeth Hoover, a prominent social worker. He was educated at the University of Virginia and the University of Michigan, where he earned his law degree. He then served in the United States Army during World War I, where he was decorated with the Distinguished Service Cross.

After the war, Hoover joined the Federal Bureau of Investigation (FBI) in 1917, where he worked under J. Edgar Hoover, the first director of the FBI. He was promoted to the rank of Special Agent in Charge in 1921 and to the rank of Assistant Director in 1924. He was then promoted to the rank of Director in 1927, a position he held until 1935. During his tenure as Director, he was instrumental in the development of the FBI as a modern law enforcement agency. He was also instrumental in the creation of the Federal Bureau of Prisons and the Federal Bureau of Investigation's Laboratory.

Hoover was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals.

Hoover was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals. He was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals. He was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals.

Hoover was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals. He was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals. He was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals.

Hoover was a member of the United States Senate and the United States House of Representatives. He was also a member of the United States Supreme Court and the United States Court of Appeals.

were given a special tour and talk at the Monument. This was as fine a group of men as we ever expect to have visit Tusigoot.

Visiting Park Service Personnel included James E. Lassiter, Regional Engineer in company with Ward P. Webber, Chief, General Engineering Division, Chicago, Ranger Paul Steel, who brought a load of Army surplus in the White Sands truck for us to cull, and the Paul Beaubiens from Walnut Canyon.

Stabilization operations at the ruins progressed rapidly and efficiently with no time lost because of weather. Felix Macias, laborer on the job, well earned an increase in wage status to \$1.20 an hour, since he is now fully trained and expert in the work, and his ingenuity can be relied upon to meet the exacting requirements of the job. Over half the immediate stabilization requirements of the ruins have now been met. A complete before-and-after photographic record of the work on each room wall is being kept.

Maintenance: The Verde Hardware Co. of Cottonwood is still unable to fill the remaining 700 feet due on our order of 2-inch galvanized steel water pipe because of failure of suppliers. Assurances have been given by two of the firm's suppliers of ultimate delivery. To Ranger Richert goes principal honors for the completion of removal of an estimated 36 tons of rubble debris from the interiors of Rooms 3, 5 and 7 of Unit IV, representing the demolition of the restoration on the original walls. The fruit of this back-breaking work is a clean and trim prospect of the Unit from the visitor approach, with all rubble we have not been able to haul away now concealed in places where the fill represents stabilization for interior walls. Plans are now complete for the construction of bitumule-gravel paths and path repairs at the ruins next month.

Museum Exhibits: A new exhibit of photographs showing phases of the excavation of Tusigoot in 1933-34 by The University of Arizona project was constructed and installed to facilitate the graphic interpretation at the museum.

Free Literature Supplies: All supplies completely exhausted at Tusigoot.

Walnut Canyon NATIONAL MONUMENT

Flagstaff, Arizona

March 27, 1947, 19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of March, 1947:

Weather. Unusually mild and dry. The USFS have had a few fires, and the Lookout which overlooks Walnut Canyon was manned last week.

Inspections. Engineers Ward Webber and J. R. Lassiter spent a day on Walnut's engineering problems. They were principally concerned with the water system and the proposed electric system.

NPB Visitors. Rangers Ringenback and Steel were in with surplus equipment. Evan Byrd and H. Nelson of Mesa Verde, Custodian and Mrs. Cotter of Tuzigoot, Custodian and Mrs. Jones of Wupatki, Custodian Brewer of Navajo, Naturalist Dodge of the Regional Office, Ranger and Mrs. Upton of Wupatki, Ranger and Mrs. Richert of Tuzigoot, Glen Bean of Bandelier, NPS Custodian and Mrs. McNeil of Chaco Canyon, and Custodian and Mrs. Cooke of Chiricahua were contacted either at Walnut or along the nearby roads.

Acquisitions from Surplus. A Dodge truck, a book case, an office desk, an office table, a hospital bed with mattress, pipe stock and dies for pipe over one inch, and a few minor items of equipment were received during month.

Activities. Except for receiving and storing surplus equipment, the month was mostly spent on routine duties. At this season, we only have about ten parties of visitors a day, but their time of arrival is so spaced that we generally have one party at the Observation Point at any given time. One man on duty to contact visitors has little time for any other duty. 1

About five man-days were spent making temporary repairs to telephone line.

Government Publications On Hand. 1,800 2-fold leaflets, 500 Location Maps #6, 300 NPS Briefs Maps and 14 Glimpses of the Nat'l Parks.

Paul L. Beaubien

WHITE SANDS

Alamogordo, New Mexico

March 20, 1947.

MEMORANDUM for the Regional Director,
Region Three:

Following is our monthly narrative report for the Month of March:

VISITATION:

	This Month	Travel Tr.	Fiscal Yr.
		To date	to date
Total visitors 1947	5,361	28,966	62,482
1946	4,814	26,323	

Visitors for the month are again far in excess of previous years, for the same period. With the exception of last year, we have almost doubled any like period in the history of the area. This has worked considerable hardship on the checking ranger in that during the month our ranger staff has been used for several trips on surplus property, leaving us sorely undermanned.

COOPERATING GOV'T. AGENCIES:

We have been very fortunate in our relations with the Bureau of Reclamation regarding the possibility of electric power for the unit. It is a pleasure to experience the cooperation offered by their regional office at Amarillo.

PLANS, MAPS & SURVEYS:

No inspections were made by me during the past month, although Joe Shepperd with the Regional Engineer made an inspection of the Dog Canyon water.

WEATHER CONDITIONS:

The weather for the month has been generally favorable with a slight tendency toward cold snaps. The road was impassible on a couple of occasions, but the moisture was of considerable worth from other angles.

PUBLICITY:

General publicity has run almost wild with the added publicity always given to Play Day. The New York Times gave us a story on Sunday, March 9 which was reprinted in the El Paso Times which, in itself, gave us considerable publicity.

REPORT OF THE DIRECTOR OF THE BUREAU OF THE ALASKA DEPARTMENT OF NATURAL RESOURCES

WITH
ALASKA

Alaska, or to, New Mexico

March 30, 1947

MEMORANDUM for the Regional Director,
Region Three:

Following is our monthly narrative report for the month of March:

VISITATION:

Total visitors 1947	Total visitors 1946	This month	Travel Tr.	Local Tr.
5,801	4,314	5,801	5,801	5,801
1946		5,801	5,801	5,801

Visitors for the month are again far in excess of previous years, for the same period. With the exception of last year, we have almost doubled our like period in the history of the area. This has meant considerable work-ship on the operating number in that during the month our regular staff has been used for several trips on various projects, leaving us severely understaffed.

COMMITTEE REPORT:

We have been very fortunate in our relations with the Bureau of Reclamation regarding the possibility of electric power for the area. It is a pleasure to experience the cooperation offered by these regional offices at Anchorage.

PLANNING AND DEVELOPMENT:

No discussions were held by us during the past month, although the report from the Regional Engineer was in possession of the Regional Engineer.

WEATHER CONDITIONS:

The weather for the month has been generally favorable with a slight tendency toward cold snaps. The road was impassable on a scale of occasional, and the moisture was of considerable value from other angles.

INFLUENCE:

General publicity has run almost with the usual publicity always given to this day. The New York Times gave us a story on Sunday, March 2 which was repeated in the St. Louis Times which, in itself, gave us considerable publicity.

A movie set is scheduled for next month and some of the advance agents were in on preliminary work as well as routine in obtaining a permit.

COMPLAINTS: No complaints have been received on either the Service or the Concession to the knowledge of this office.

ROADS & TRAILS: Road maintenance has been rather heavy and continuous and is still a major problem as always at this season of the year. We still have hopes of obtaining a larger grader which will ease this situation materially.

MAINTENANCE: Bids are to be opened today for some of our rehabilitation work and we surely hope that we can secure some service through these channels.

CONCESSION: While I have not received any direct report from the concession, I am sure that his business is equal or exceeds similar periods in the past.

RANGER SERVICE: Ranger Steel is out on a surplus property trip which will require about ten days time. Ranger Chittum has just completed a fire training course with the U.S. Forest Service held in Rudess. We appreciate their allowing this area to join them in this training, and know that Ranger Chittum will profit from his experiences.

SPECIAL ACTIVITIES: Our Clerk has spent several days in digging out material from the files and the preparation of an Index to communications often used. In one instance your office has seen fit to have this information mimeographed and distributed to the field; which, of course, makes us feel very happy.

ACCIDENTS: One first-aid trip was made to the scene of a wreck about ten miles from the headquarters in which a tourist from Michigan was hurried to the hospital in Alamogordo, but died enroute. He seemingly suffered a heart attack, and we were unable to revive him on the spot. The wife was not hurt seriously although the car turned over on the highway.

VISITORS: Mr. Ward Webber, Chief, General Engineering Division, accompanied by his wife, and Mr. J.R. Lassiter, Regional Engineer, were in for a short visit, and we attempted to show our problems as best we could.

With Play Day in the offing, and Easter sunrise services proposed, our immediate future is beset with many problems, as both of these affairs require considerable preparation. We still have hopes of repairs to picnic tables, shades, etc. in time to take care of our normal increase in travel which follows this season.

John Will Faris,
Custodian.

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

29 March 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of March, 1947:

Visitors this month: 170 Travel Year to date: 951

Travel: Visitation for the past month shows a slight decline from that recorded for March of last year. No doubt the condition of the entrance road has had a definite influence on the visitor use. Business men of Flagstaff and vicinity report that travel continues to increase along Highway 68 and 89.

Weather: Winds and only traces of precipitation have again been the order for the past month. One of the most serious droughts of recent years now threatens. It is still hoped that some moisture will come before the summer arrives.

Roads: The absence of moisture continues to work havoc with the entrance road. Travel is rapidly grinding it into powder which in turn is blown away by the wind, causing chuck holes in the road. Some of the contacted visitors have complained of the roughness and high centers. Reports from a number of sources in Flagstaff have also relayed complaints of visitors who have started into Wupatki and turned back because of the dust and road condition. We pray that the rain gods may look upon us with favor so that we may soon start some repair and maintenance.

General: The transporting of the recently acquired surplus property has occupied a great deal of the time for the month. Ranger Upton returned from Marathon, Texas with a Ford $1\frac{1}{2}$ ton stake truck and a Dodge pickup on the 8th. Some small equipment arrived from White Sands and Casa Grande a few days later. Custodian Jones made a trip to Grand Canyon on the 28th to obtain generators and miscellaneous equipment for monuments in this vicinity. There still remains another load at Grand Canyon and some items at Zion.

A number of beautiful mounted enlargements of points of particular interest at Wupatki as well as those of the local Navajos were received from Photographer Rex Fleming. Mr. and Mrs. Fleming had visited at Wupatki for several days during the early part of January. They were much enthused with Wupatki and promised to return in the early summer for another short vacation. The enlargements received were the fruit of that first trip.

The monument was visited by 172,700 persons during the year 1917. The number of persons who visited the monument during the year 1917 was 172,700. The number of persons who visited the monument during the year 1917 was 172,700. The number of persons who visited the monument during the year 1917 was 172,700.

The monument was visited by 172,700 persons during the year 1917. The number of persons who visited the monument during the year 1917 was 172,700. The number of persons who visited the monument during the year 1917 was 172,700. The number of persons who visited the monument during the year 1917 was 172,700.

Special Activities: Plans have been completed by Superintendent H. C. Bryant for the Natural Resources Course at the Arizona State College. Custodians of both Walnut Canyon and Wupatki will participate.

The Custodian attended a conference at Grand Canyon on March 3rd where Wage Board matters were considered.

Further investigation was made during the last week of March on the status of lands within the monument in an effort to clear the title.

Grazing: Grazing counts taken during the month indicate that the C O Bar Company are holding their grazing to 300 to 400 head including calves. Kirby who during the winter has grazed 90 head on the Forest south of the monument is moving back to the summer range. He found the cinder to be so dry the cattle developed sore feet. This resulted in improper ranging and the stock suffered as a result. This bears out the observation repeatedly made, that the deep cinder country is of little use to the cattleman even when he can afford to haul water.

Water Supply: Both springs indicate the influence of the lack of rainfall for the past year. Both remain at low record. However Wupatki Spring did show an increase of about 100 gallons over last month, with 822 g.p.d. for March. On the other hand Heiser Spring with 1878 g.p.d. for March continues to drop. It showed a decrease of 131 gallons from that recorded for February.

NPS Visitors: Regional Naturalist Dodge stayed with us at Wupatki for four days early in March. For once the weather favored the plans for the day and Matt was able to have nice clouds and good lighting for the pictures he took of several of the larger ruins, including Crack-in-the-rock. Sunset Crater was the chief subject for the last day of the visit. Regional Highway Road Maintenance Engineer Paul M. Miller, Mrs. Miller and son Paul M. Jr. stopped enroute to Grand Canyon. Surplus Equipment problems were discussed. We shall all miss Paul, but we wish him luck in his new job. On the 20th Ranger Paul Steele of White Sands National Monument visited at Wupatki for a few hours before going on to Grand Canyon. Engineer Ward P. Webber of the Branch of Development, Director's Office, Mrs. Webber and Regional Engineer J. R. Lassiter visited the area on the 26th in their tour of the monuments in northern Arizona.

Signs: Letters for three of the cut-out type signs have been completed. The balance of the letters are being held up because of lack of materials.

Activities of SNM Stabilization Laboratory: The laboratory was moved about the middle of the month to the Heiser Spring area. The old mess hall foundation and floor are now being put to good use as the site of the workshop. Parts of a couple of the remaining buildings are also in use. Experiments with cinder block tile, soil block, and cinder block are continuing, following the suggestion of Region Three personnel. Collaborator Buchenberg has erected sample walls of both the cinder block and soil block. On the 28th a trip was made to Grand Canyon to obtain samples of soil so that experimental

Special Agent in Charge, New York Office, is requested to advise the Bureau of the results of his investigation of the above-captioned matter.

The Bureau is requested to advise the New York Office of the results of its investigation of the above-captioned matter.

Very truly yours,
Special Agent in Charge

Enclosed for the New York Office are two copies of a letterhead memorandum dated and captioned as above. The memorandum contains information received from a confidential source who has provided reliable information in the past.

The information was obtained from a confidential source who has provided reliable information in the past. The information was obtained from a confidential source who has provided reliable information in the past.

stabilization mixtures can be made for that area. Without doubt one of the high points in the history of Wupatki residents is the arrival of the 'Jeep' Station Wagon that arrived on the 22nd to take the place of the gray Chrysler. Buchy is proud of it and he has a right to be envied. It certainly will be put to good use and will serve him well.

Publications on Hand: Because of the shortage of informational leaflets on Wupatki, none are being distributed to the visitor. The few that remain are being used as literature for informational requests.

SANTA FE, NEW MEXICO

May 15, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of April, 1947.

Staff Activities -- General.

Naturalist Dale King was in the office during the whole month on routine activities.

Archeologist Charlie Steen left Santa Fe on April 1 for relief duty at Tonto National Monument.

The Natural History Naturalist position remained unfilled, although word was received that Naturalist Maurice Sullivan will report for duty from Acadia National Park on May 14.

Administration -- Interpretation.

Two new desks obtained from War Surplus were moved into the office to care for expanded activities.

Materials were assembled, and some work was done on a rough draft for a proposed Employees Manual for Region Three.

The usual reports and fifty letters were written.

A map for the White Sands twofold leaflet, corrected by the Custodian, was forwarded to the Washington Liaison Office.

Applications for seasonal ranger positions were answered and forwarded to the field where indicated.

Public Relations and Extension Services.

A set of photographs of prehistoric and historic Indian pottery of the southwest was furnished to a graduate student.

1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 26

Exhibits Plans and Projects.

The field was circularized to obtain information of needed improvements in museum lighting at Tumacacori, Montezuma Castle, Tuzigoot, White Sands, and Bandelier. It is hoped that some funds will be available in June to purchase modern fluorescent lighting to replace obsolete and ineffective lighting at these locations.

Research and Observation.

Printing of herbarium forms was requested of the Director. Several monuments need genus folders, and an unsuccessful attempt was made to purchase them from a scientific company. Other companies will be tried.

Cooperative Activities.

National Parks Magazine is planning an issue on national monuments for July, 1947. Articles on Casa Grande, Aztec, and Montezuma Castle, were revised by custodians, and additional editing and photographs were added in this office.

Further correspondence ensued with a scientist who is proposed as a collaborator for Regions Three and Four.

The rough draft of a manuscript by Mrs. Marie Wornington Volk on the archeology of the southwest, treated popularly, was reviewed and corrected. The booklet will be printed by the Colorado Museum of Natural History of Denver, Colorado.

Region Three Office Loan Library.

Accessions for the month totaled 107: Sixteen books, nine reports, forty-seven pamphlets, and thirty-five periodicals. Miss Blanche Story of Dr. Musbaum's office was able to spend a short time correcting classification numbers.

Southwestern Monuments Association.

The major advance during the month was the appointment of Alan C. Vedder as part-time recording secretary. He started work on April 21, and spent most of his time alphabetizing and arranging in proper chronology the Association correspondence files, the letters "A" to "M." Many new folders were created, and the files expanded. He also learned the procedure for making out purchase orders and the operation of the addressing machine.

Mailing list cards were alphabetized and assorted according to their source area.

SECTION THREE - THE TRIAL

The trial was conducted in the courtroom of the United States District Court for the District of Columbia. The trial was held in the courtroom of the United States District Court for the District of Columbia. The trial was held in the courtroom of the United States District Court for the District of Columbia.

SECTION FOUR - THE VERDICT

The jury returned its verdict in the case of the United States District Court for the District of Columbia. The jury returned its verdict in the case of the United States District Court for the District of Columbia. The jury returned its verdict in the case of the United States District Court for the District of Columbia.

SECTION FIVE - THE JURY

The jury was composed of twelve members. The jury was composed of twelve members. The jury was composed of twelve members. The jury was composed of twelve members. The jury was composed of twelve members.

Receipt of new photographs from a commercial concern will make possible the improvement of miniature sets for Wupatki, Tusigoot, Sunset Crater, Walnut Canyon, Montezuma Castle, and Tonto National Monuments. All future miniature sets to be sold by this Association will include a caption card on which it will be possible to include considerably more interpretive material than was possible when captions were printed on the face of each picture.

Several books were donated to field libraries, and herbarium labels were donated to Walnut Canyon. We will be able to make an increase in number of donations from now on, because under terms of the Western Joint Purchase Agreement we are able to get books for members from the A. C. Medling Company at a discount.

At the end of the month, the audit for the two previous fiscal years was well under way.

Photography and Visual Aids.

Proof prints were received of a series of excellent photographs taken by Mr. Stanley Davis of Tucson, Arizona, on the following national monuments: Tusigoot, Montezuma Castle, Montezuma Well, Walnut Canyon, Wupatki, and Sunset Crater. These pictures are available for the use of the National Park Service, and form a valuable addition to our files.

Visitors:

Custodians Sowers, Thomas, Parr, M. Guillet, and McNeill. We also had the pleasure of a visit from Bill and Sallie Lippincott, proprietors of Wide Ruins Trading Post, Arizona.

Ruins Stabilization.

Permission was received from the Director to purchase from stabilization funds some much needed equipment which will place the Mobile Unit at Chaco Canyon pretty well on its feet. Already ordered are a 1½-ton dump truck and a half-ton pick-up. A small cement mixer, of the only type available, is being purchased in Santa Fe.

An additional allotment of \$325.00 was authorized to Tusigoot National Monument to complete stabilization for the year there.

An excellent stabilization report in triplicate on work done from May 1 to November 3, 1946, was received from the Custodian, Astec Ruins. When pages are numbered consecutively from the numbers used in the last report, these three copies will be sent off to be bound by a commercial bindery, the binding being donated by the Southwestern Monuments Association.

[illegible]

Exploration of the literature was limited to the 1980-1990 period. The search was not exhaustive because of the time and space constraints.

The above information was obtained from the files of the FBI at New York City.

Correspondence ensued concerning the attempt to obtain steel portable scaffolding for the use of the Mobile Unit at Chaco Canyon and at other places. It appears that this cannot be purchased, but can be rented.

NATIONAL PARK SERVICE

Correspondence also was carried on in a continuing attempt to obtain ultra-sound equipment for discouraging of roosting bats which are damaging prehistoric structures. Discouraging news has been received from the Navy, which apparently cannot use any existing equipment, and although we have been referred to a commercial concern, we are afraid that the cost will be beyond our means.

Several purchases were made by the Custodian, Wupatki, and Mr. A. E. Buchenberg as deductions from Mr. Buchenberg's donation fund to the Southwestern Monuments Association. Mr. Buchenberg and the staff at Wupatki are doing an excellent job in research for better techniques in ruins stabilization.

Projects for ensuing Month.

King probably will remain in the office for the entire month on routine affairs, although the arrival of Naturalist Sullivan will necessitate considerable orientation and training activities during the latter part.

If Steen is able to leave Tomb during the month, he probably will make a swing through monuments accomplishing ruins stabilizations to insure that funds will be expended as planned during the last quarter of the fiscal year.

Dale S. King.

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of April, 1947:

GENERAL: Application has been made by the Colorado River Scenic Tours for a franchise to operate scheduled bus trips from Salt Lake City, Utah on a circle tour through Capitol Reef, Natural Bridges and Arches National Monuments. Hearing was held on April 15th at Salt Lake City but no decision was handed down due to exceptions presented by the Denver and Rio Grande Railroad and another company interested in concessions development in this section.

TRAVEL: Our travel for this month was beyond all expectations with 139 cars and 569 people visiting the area. One hundred and thirty two people signed the register at the Windows on Easter Sunday and at one time I counted 28 cars in the area. We had representation from 24 states and the District of Columbia.

INTERPRETIVE SERVICES: A total of 49 parties and 177 people were contacted at headquarters and 16 parties of 75 people were contacted in the Windows section of Easter. Two trips were taken into the area with 14 people and one illustrated talk was given to the 8 members of the Brigham Young University party. Eight requests for information were received and answered.

Our community educational trip to the Windows on March 30th received very poor response, only 14 people availing themselves of the opportunity. Trouble with the truck enroute to the area caused inconvenience but all who attended seemed to enjoy the trip. Mayer Baldwin of Moab assisted in making arrangements and furnished his car to transport a portion of the party. Since this trip I have had several requests for a repeat performance so we are going to try it again on April 27th.

STATUS OF PRIVATE LANDS: Word has been received from the State of Utah that a request has been filed for an exchange of school lands included in the monument and is now pending approval in Washington, D. C.

ROADS: On April 10th the State maintenance crew performed work on the approach road and road within the monument. The entire length of the road

was graded and 10 loads of shale were hauled to sandy spots. This road is now in the best shape it has ever been but doubt whether it will stand such heavy traffic as was experienced on Easter Sunday.

WEATHER: Rain fell on April 8th and 9th and at this writing it is again threatening. Heavy winds have been the rule throughout the month in contrast to the excellent weather experienced during March. The cacti are starting to bloom as well as the paintbrush, phlox, penstemon, primrose and verbena.

MAINTENANCE AND CONSTRUCTION: Maintenance work on buildings at headquarters was suspended on March 28th so that available funds could be transferred to the headquarters equipment account to help carry the burden of cost of war surplus equipment acquisition and distribution.

The water pumping system was given a thorough overhaul during the month and it is hoped that it will carry us through the heavy summer use period with a minimum of trouble.

The 2 - 500 gallon water tanks for the Windows section water installation were finally received on April 18th. One tank has been prepared for underground installation and will be placed after May 1st, when the temporary ranger enters on duty. This will be a welcome addition for the convenience of visitors who enter the area during the hot summer months.

RANGER SERVICE: No luck yet on the filling of the permanent ranger position for Arches and Natural Bridges National Monuments. Will enter temporary ranger on duty at Arches May 1st.

SPECIAL ACTIVITIES: An investigation was made on April 12th of unauthorized excavation of dinosaur remains in the vicinity of Dalton Wells, 15 miles from Moab. It was found that Mr. Cole Godsey, owner of a small private museum at Idaho Springs, Colorado, had hired local boys and was collecting some very good specimens on public domain. After learning that he did not have the necessary permit I advised him that he could not rightfully remove the collection until he had received permission from the Bureau of Land Management, who control the land. The specimens were unloaded and he returned to Moab to contact representatives of the Bureau. This deposit should have protection to prevent recurrence of this type of premises collecting as it will eventually make an interesting exhibit.

RESEARCH AND OBSERVATION: A party of Brigham Young University professors and students, 8 in all, are making a three day survey of plant and animal life in the monument. They left headquarters on May 25th, with a string of 19 horses, for the base camp site at Freshwater Spring. They intend to return late on the evening of April 27th. Check lists will be made up and submitted to the Service at an early date.

was graded and 10 loads of shales were hauled to sandy spots. This road is now in the best shape it has ever been in and some shales will be shipped such heavy traffic as was experienced on Easter Sunday.

WEATHER: Rain fell on April 8th and 9th and at this writing it is again threatening. Heavy winds have been the rule throughout the month in connection with the excellent weather experienced during March. The crew was standing by as well as the paintbrush, plow, pump, and various other things.

MAINTENANCE AND REPAIRS: Maintenance work on buildings at headquarters was suspended on April 8th as that available funds could be transferred to the headquarters equipment account to help carry the burden of cost of war surplus equipment acquisition and distribution.

The water pumping system was given a thorough overhaul during the month and it is hoped that it will carry on through the heavy season now being with a minimum of trouble.

The 8 - 500 gallon water tank for the building section was installed on April 1st. The tank has been prepared for water supply and will be placed after the 1st. The company every major order on ship. This will be a welcome addition for the convenience of visitors who enter the area during the hot summer months.

MAILS DELIVERED: No mail yet on the filling of the permanent record section for Arches and (Arches) Bridge National Monument. Will start temporary record on May 1st at Arches May 1st.

GENERAL ACTIVITIES: An investigation was made on April 15th of unauthorized excavation of dinosaur remains in the vicinity of Arches. It was found that Mr. John G. Gentry, owner of a small private museum at Arches, Colorado, had hired local boys and was collecting some very good specimens of fossils. After learning that he was doing this, the necessary permit was issued and he was not rightly informed the collection until he had received permission from the Bureau of Land Management. The specimens were unloaded and he returned to his to contact representatives of the Bureau. This deposit should have protection to prevent removal of this type of specimens collected as it is even- tually made an interesting exhibit.

RESEARCH AND LITERATURE: A copy of the Young University professors and students, 8 in all, are making a survey of plant and animal life in the monument. They have been working on May 1st, with a view of 15 hours. The data will be of considerable value. They intend to return late on the evening of April 20th. Check lists will be made up and submitted to the Service at an early date.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....Aztec Ruins..... NATIONAL MONUMENT

.....Aztec, New Mexico.....

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

24 April 1947, 19.....

There follows the report of activities in Aztec Ruins for April 1947.

WEATHER. Generally warm and pleasant weather has been rudely interrupted by an occasional day of high winds and sand storms which however, have not adversely affected travel. Precipitation resulting from 2 light storms totals 0.19 inch.

MAINTENANCE. Continued effort has been expended upon the drainage ditch, in trying to clean out settled mud in the pipe line and in building a surface ditch along the up side of the ditch backfill in an effort to prevent additional water from running into the fill, which might result in blocking of the pipe line.

The pump, motor and pipes in the domestic well were removed, disassembled, worn out parts replaced, cleaned and reassembled and replaced.

SPECIAL ACTIVITIES. An inspection of the drainage ditch project was made with Ray Decker, Regional Engineer, SCS on the 10 April. Mr. Decker and others of the SCS have shown much interest in the drainage ditch and have frequently visited Aztec in this connection.

On the 19 and 20 April the Custodian and Mrs. Townsend visited Monument Valley, Natural Bridges and Hovenweep National Monuments. Because of the general inaccessibility of these areas little evidence of travel was encountered. All roads were quite easily negotiated except for that which runs from Shiprock via Mexican Water to Kayenta where the road could only be recommended for light cars with short wheel base or pickups.

DONATIONS AND ACCESSIONS. The area comprising Hubbard's Mound has been cleared by the owner of fruit trees in preparation for acquisition by the National Park Service.

INTERPRETIVE SERVICES. There were 501 visitors conducted in 124 trips thru the ruins and 624 visitors in 252 trips were shown the museum.

INCREASE IN TRAVEL. There were 624 people in 167 cars from 31 states and Washington, D.C. including 7 members of the armed forces. This is an increase of 77% over a year ago.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

April 29, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of April, 1947.

Weather and Roads

Normal spring weather prevailed for the month, although cool Sundays somewhat hampered weekend travel. The maximum temperature for April was 83° and the minimum was 16°. Precipitation occurred on only two days to total 0.10 inch for the month, and high spring winds soon dissipated that small amount.

The approach road between the Otowi Section and Frijoles Canyon has become progressively rougher and dustier as a result of the dry weather, but little improvement can be made until the advent of more moisture. Repair work by per diem labor on the oiled section leading into Frijoles Canyon is now underway preparatory to the application of a seal coat later in the spring. Contract work on the surfacing of the road from Pojuaque to Otowi has begun.

Travel

2003 visitors came to Bandelier in 489 vehicles during the month. Two visitors came on foot, and two came on horseback. Weekday visitors are predominantly tourists, although Sunday travel consists to a large extent of local people, particularly from Los Alamos. Only 16% of the April entries were re-entries.

Interpretation

126 conducted tours through the ruins were attended by 1082 people. The average duration of the trips was out to 68.5 minutes so that the ranger on duty could return promptly to headquarters for the trip the following hour. However, a great many people continued on unattended beyond the regular tour to Ceremonial Cave.

• 1994 • 2001 • 2004 •

There follows a report of the activities of the group during the year 1947.

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which has been recognized by the government and the people alike. It is a fact which has been recognized by the government and the people alike. It is a fact which has been recognized by the government and the people alike.

[illegible]

1997

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been resolved.

1. The following information was obtained from the records of the Federal Bureau of Investigation, Bureau of Prisons, and the United States Department of Justice, regarding the activities of the following individuals:

Forest Fire Protection

The dry weather and spring winds throughout April resulted in moderate to high fire danger throughout the whole month. The fire weather station was placed in daily operation April 12, and the entire staff has been "fire conscious". Fire suppression equipment has been thoroughly checked and prepared, and telephone lines repaired.

Personnel

Thomas B. Onstott entered on duty April 4 to fill the vacancy created by the transfer of James M. Eden to Grand Canyon. "Tommy" then left on April 9 for White Sands National Monument to assist in conducting the annual "Playday" and returned via Casa Grande National Monument in order to haul surplus equipment.

Cresencio Toribio reentered on duty and Romolo Cordero entered on duty March 30 as per diem laborers.

The Custodian has again spent considerable time on special detail in the Region Three Office.

Inspections

Engineers Monteith and Webber of the Director's Office visited Bandelier on April 2 with Regional Engineer Lassiter on problems related to the installation of a new power house and electrical equipment and inspection of the water system. Architect Lyle Bennett of the Region Three Office visited the Monument April 8 with special regard to the kitchen facilities in the Lounge.

Visitors

The Koshare Club of Texas Tech, Lubbock, Texas made their annual pilgrimage to Bandelier on April 3. The party consisted of Dr. W. C. Holden and a group of 48 girls in 2 chartered buses. Region Three visitors of the month were Dr. Musbaum, who escorted Mrs. La Fell Dickinson (National President American Association of Federated Women's Clubs), Mrs. E. T. Scoyen, and Mrs. Lee Wang on a tour of the ruins, Paul Balch and family, Miss Alvina Zimmerman with Mrs. Lucille Lovelady and Mrs. Lovelady's mother. Custodian Theodore C. Sowers of the Great Sand Dunes National Monument visited us on April 13 to 15 on business concerning surplus equipment.

Lodge

Mrs. Evelyn C. Frey has Frijoles Canyon Lodge in readiness for opening May 1. Work is now underway constructing a walk-in refrigerator for use with the Lodge.

Maintenance

The water storage tanks were thoroughly cleaned during the month and the chlorinating system overhauled and put into operation. The picnic

THE FIRST PART

The first section of the report is devoted to a description of the work done during the first part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the first part of the year, and the second to a description of the work done during the second part of the year.

THE SECOND PART

The second section of the report is devoted to a description of the work done during the second part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the second part of the year, and the second to a description of the work done during the third part of the year.

The third section of the report is devoted to a description of the work done during the third part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the third part of the year, and the second to a description of the work done during the fourth part of the year.

The fourth section of the report is devoted to a description of the work done during the fourth part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the fourth part of the year, and the second to a description of the work done during the fifth part of the year.

THE FIFTH PART

The fifth section of the report is devoted to a description of the work done during the fifth part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the fifth part of the year, and the second to a description of the work done during the sixth part of the year.

THE SIXTH PART

The sixth section of the report is devoted to a description of the work done during the sixth part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the sixth part of the year, and the second to a description of the work done during the seventh part of the year.

THE SEVENTH PART

The seventh section of the report is devoted to a description of the work done during the seventh part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the seventh part of the year, and the second to a description of the work done during the eighth part of the year.

THE EIGHTH PART

The eighth section of the report is devoted to a description of the work done during the eighth part of the year. It is divided into two main parts, the first of which is devoted to a description of the work done during the eighth part of the year, and the second to a description of the work done during the ninth part of the year.

The following is a report on activities at Canyon de Chelly National Monument during the month of April, 1947.

Monthly Summary

While visits and work were being done at this park during this period and without the realization that exactly the same thing was being done at this place for many years. There are visiting and a little regular work done. Only one Indian of whom the name is a Native American of 18 ancestry and a relative of my father.

Chester A. Thomas

Chester A. Thomas,
Custodian.

Weather

A total was made by calling. The weather was sunny and bright equipment, and the trip was made by the custodian to the National Office on April 21-22-23.

Construction

Work on the repair and rehabilitation of the road improvement was continued during the month. One of the major high places was finished. Work was extended and considerable work was necessary to the two major main places. Some work on the road and trails was accomplished. The Indian Service was a little more work than the other two-off in the month.

Visitors

Several visitors to the monument in April and May. The work was done and mostly small and some of the work. They were not very busy and mostly responsible as some have been in the past.

Interest in the Monument

Several National Monuments, National Landmarks, National Forests, and National Parks were visited during the month of April. The work was done and mostly small and some of the work. They were not very busy and mostly responsible as some have been in the past.

which have resulted in the completion of the work in the
department and the work in the department is now in progress.

NATIONAL MONUMENT

Chino, Arizona

April 26,

1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of April, 1947.

Weather Conditions

High winds and dust storms long overdue arrived during this period but without the moisture that usually accompanies them. The drouth continues and the streams in the canyons are lower than they have been at this time for many years. Trees are leafing out a little earlier than usual. Only .03 inches of rain this month with a Maximum temperature of 80 degrees and a minimum of 23 degrees.

Administration

2 trips were made to Gallup, New Mexico for supplies and surplus equipment, and one trip was made by the custodian to the Regional office on April 21-22-23.

Maintenance

Work on the repair and rehabilitation of physical improvements has continued during the month. One of the surplus light plants was installed. Signs were retouched and considerable work was necessary on the War surplus Dodge pickup. Some work on the roads and trails was accomplished. The Indian Service ran a blade over our road from Whitehouse turn-off to Sawmill.

Visitors

Travel continues to show an increase in travel and Fiscal years to date although our monthly travel fell below April of 1946. Windy weather and Dust were partly responsible as roads have been in fair condition.

Inspections by N.P.S. Officials

Assistant Regional Director Davis, Regional Landscape Architect Cornell, Archeologist Reeg and Architect Bennett were in the area April 2 to 4 going over the master plan and Concession layout.

Chino, Arizona

1947

April 22, 1947

Memorandum for the Regional Director, Tucson Office.

The following is a report on activities at Canyon de Chelly National Monument during the month of April, 1947.

Weather Conditions

April winds and that storms from overcast during this period but about the middle of the month a period of rain. The growth continues and the storms in the canyon are less than they have been at this time for many years. There are feeling out a little earlier than usual. Only a few inches of rain this month with a maximum temperature of 75 degrees and a minimum of 33 degrees.

Archaeological

Excavations were made to clarify the extent for supplies and equipment, and one trip was made by the caretaker to the National office on April 21-22-23.

Infrastructure

Work on the repair and replacement of electrical equipment has continued during the month. One of the electrical light plants has been repaired. The other were repaired and considerable work was necessary on the other electrical plants. Some work on the roads and trails was accomplished. The Indian Service has a plan over our road from the monument to the south.

Visitors

Travel continues to show an increase in travel and picnic areas in the area. Although our monthly travel fell below that of 1946. Weather and that were partly responsible as roads have been in fair condition.

Investigation by U.S. Geologists

Assistant Regional Director, Tucson Office, Regional Geologist contacted Cornell, Archaeologist and Assistant Geologist were in the area April 2 to 4 going over the master plan and concession layout.

COOLIDGE, ARIZONA

Capulin N. M.

April 24 1947

ADDRESS REPLY TO
THE SUPERINTENDENT

Memorandum for the Region Director
Region Three, National Park Service,
Santa Fe, New Mexico,

There follows a report of the activities in and around
Capulin Mountain National Monument for April 1947,

Visitors are estimated to be about twelve hundred for the
month, bringing total travel, travel year to date five thousand
four hundred sixty and total travel fiscal year to date
twenty thousand four hundred sixty,

Weather has not been at all good this month, and at least
eight snow storms during the month and ten cloudy days and
six partly cloudy ones, approximately two inches of
precipitation, as a whole the month has been cooler than
common, probably account of the moisture,

We now have fourteen thousand informational pamphlets
describing this monument,

A Mr and Mrs Cook from London were visitors on the
21, of the month with a (I say old Choppy I Jolly well like
your monument and we could Jolly well use some of your sunshine
in dear old London, Cheerio). Great folks, those fog bound
Londoners, I get a great kick out of them.

Roads on the monument are again in good condition
and visitors seem to enjoy the smoother road,
Attempt is being made this spring to widen the road at
some places and it is expected that this will be complete
by the end of the fiscal year,

The Custodian made a very enjoyable visit
to the regional headquarters on the seventeenth, renewing
his memory with the good old gang at Santa Fe,
I get down Santa Fe say about every five years and I
surely do enjoy calling upon the folk down there,
I wish Santa Fe had some of our set,

Very Respectfully,

Donner J. Farr,
Custodian,

AT 5.

NATIONAL PARK SERVICE

April 25, 1947

MEMORANDUM for the Regional Director
Region Three.

There follows the narrative report for Casa Grande National Monument for April, 1947.

General: The Custodian attended a Fire-Weather Meeting called by the Weather Bureau in Phoenix. In attendance were representatives of the Weather Bureau; Indian, Forest, Reclamation, and Park Services. All agreed that we are facing the worst fire season in many years, and should the season start with dry lightning storms, there will be a rugged season ahead. That along with holding the Fire School at Chiricahua this month makes fires and the dangers of them the predominant subject of conversation.

Weather: The first 100 degree temperature of the season was recorded with an indication that there were plenty more to come. Compared to other years the month was about average with the low minimum of 37 being recorded on the 10th. With the exception of one week, running from the 14 to 21, all the maximums were under 90.

<u>Inventory of Publications:</u>	CG 2 fold leaflet	1200
	CG 2 fold leaflet (Spanish)	3100
	SNNM Map Folders	2200
	NP Location Map # 6	50
	Gov't. 16 page Booklet (Sales)	637.

Visitors: April 1947 - 3703; April 1946 - 2846; April 1945 - 1453; April 1941 - 2421. 1947 travel year to date - 25, 785. 1946 travel year to date - 18, 232. Totals continue to break all records. A check on how many of our visitors were in a hurry when they first came into the area was made. 40 % of them would state before we had a chance to ask that they were in a hurry. When asked how much time they wanted to spend 30% replied about 10 minutes, 50 % between 15 and 30 minutes, 10% between 30 and 45 minutes, and 10 % set no time limit. The average trip length for the day was 45 minutes and only 5 % left the trips before they were over. All of which proves, we think, that Casa Grande National Monument is an interesting place. High temperatures have caused somewhat of a let up in travel but cool days still find them pouring in.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL BUREAU OF SURVEY

Interpretive Services: Of the 3703 visitors to the area 2331 made the Ruins trip in 198 parties averaging 49 minutes per trip. 1577 made the Museum trip in 182 parties staying an average of 26.1 Min. 1372 people came into the area for a quick look, to picnic, or to bring other people over to see the Ruin, but did not make the trip themselves. 14 members of the armed forces are included in the above totals.

Maintenance: Archeologist Schumacher fixed up and repainted the botanical labels and the Desert Trail Signs. Plans, specifications, and bid forms were distributed for the repair of roofs in the utility area.

Trips Taken: March 31 - April 4, Mechanic Stonehocker to Grand Canyon to pick up trailer and fencing, then to Organ Pipe Cactus and return. April 8 - 13, Mechanic Stonehocker to Saguaro, White Sands and return with surplus materials. April 15 - 17, Mechanic Stonehocker to Tonto with the trailer house. April 17, Custodian Bicknell to Phoenix to attend Fire-Weather Conference. April 7 - 11, Ranger Schuft to Chiricahua National Monument to attend Fire School. April 21, Ranger Schuft to Phoenix in connection with bids for reflashing of utility area buildings. Archeologist Schumacher on his own time attended the Yaqui ceremonial dances in Tucson.

NPS. Visitors & Visitors of Note: April; 2, Mr. Pratt & Reed of WAA Los Angeles office were into check over some materials that they are handling disposal off. Apr. 2, Ranger Naturalist Lee Maines and family of Yosemite were into visit the area. April 2, Tech. Asst. and Mrs. James B. Rasbach of Jefferson National Expansion Memorial, St. Louis made the Ruins trip. Apr. 2, Ranger Ringenbach of Organ Pipe was into pick up surplus materials. April 12, Ranger Richert and his wife were in for a brief visit on their way back from the Fire School. April 14, Forester James of Region Three office and Walker of the Chicago office stopped to renew acquaintances and look over the area. April 13, Ranger Onstott of Bandelier was into pick up surplus materials.

Nature Notes: First Banded Gecko, Girdiron Tailed Lizard, Gila Monster, Gopher Snake, and Red and Black Phase racers, of the season were noted, during the period. First flowers of the season were noted on Alfalfa, Mesquite, Staghorn Choya, and Prickly Pear. Saguaro cactus has big buds on it but not yet in bloom.

A. T. Bicknell,
Custodian.

Chaco Canyon..... NATIONAL MONUMENT

Bloomfield, New Mexico

April 26,

1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of April, 1947.

There were a total of 171 visitors to the Canyon this past month. The number of visitors more than double the number for last month, and more than sextuple the number for February. The visitor registration is growing by leaps and bounds. It is hoped that next month will show an even greater increase. The people came in 49 automobiles and one airplane. The cars were from the states of:- California - 7 cars, 20 visitors; Colorado - 7 cars, 16 visitors; Iowa - 1 car, 2 visitors; Massachusetts - 1 car, 2 visitors; Michigan - 2 cars, 3 visitors; Minnesota - 1 car, 2 visitors; Missouri - 1 car, 3 visitors; Montana - 1 car, 3 visitors; New Mexico - 19 cars, 93 visitors; New York - 1 car, 3 visitors; Ohio - 1 car, 2 visitors; Pennsylvania - 1 car, 2 visitors; Texas - 2 cars, 5 visitors; Washington - 2 cars, 7 visitors; West Virginia - 1 car, 2 visitors and Utah - 1 car, 3 visitors. The airplane was from New Mexico and contained three visitors.

Of these visitors, all 171 took a trip through the ruins and formed a total of 40 trips. One hundred and fifty-four persons listened to the museum lecture and formed a total of thirty-six parties. Total time 57 hours and 20 minutes: Custodian - 26 hours and 45 minutes; Ranger - 30 hours and 35 minutes. One hundred and twenty full admissions were sold and forty-one tax only tickets issued, most of the latter went to a party of 36 Amerinds.

At the end of the month, there was on hand:-

Free two-fold leaflets on Chaco.....	9900
Southwestern Monuments folders.....	275
National Park Location Maps.....	650

There are no publications from the Government Printing Office for sale.

Five written requests were answered.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

Chaco Canyon

Albuquerque, New Mexico

April 18, 1947

National Park Service,
Albuquerque, New Mexico

There follows a report of activities in Chaco Canyon National
Monument for the month of April, 1947.

There were a total of 171 visitors to the Canyon this past month. The
number of visitors were taken during the month of April, and were taken
during the month of April. The visitor registration is growing by leaps
and bounds. It is noted that many more cars and even greater numbers. The
people who in an organized and one car. The cars were from the states of:
California - 7 cars, 23 visitors; Colorado - 7 cars, 23 visitors; New
Mexico - 2 visitors; Massachusetts - 1 car, 3 visitors; Michigan - 2 cars, 7 visitors;
Minnesota - 1 car, 3 visitors; Missouri - 1 car, 3 visitors; Montana - 1 car,
3 visitors; New Mexico - 13 cars, 23 visitors; New York - 1 car, 3 visitors; Ohio -
1 car, 3 visitors; Pennsylvania - 1 car, 3 visitors; Texas - 3 cars, 3 visitors;
Washington - 2 cars, 3 visitors; West Virginia - 1 car, 3 visitors and Utah -
1 car, 3 visitors. The airplane was from the United States and contained three visitors.

Of these visitors, all but took a trip through the ruins and turned a total of
the ruins. The number and fifty-four persons visited on the museum lecture and
I find a total of thirty-six parties. Total time 37 hours and 33 minutes; 33 minutes
- 13 hours and 33 minutes; Sunday - 13 hours and 33 minutes. The number and
twenty-five parties were held and fifty-one car only 3 cars passed, most of the
latter were in a party of 25 persons.

At the end of the month, there was on hand:-

Three two-fold facilities on Chaco..... 3000
Southwestern Museum..... 100
National Park Service..... 200

There are no illustrations from the Government Printing Office for sale.

The written reports were submitted.

The coldest was 17 degrees on the thirteenth of the month and the warmest was 78 degrees Fahrenheit on the twentieth of the month. The precipitation consisted of a trace on the third and .05 of an inch on the ninth of the month. The wind blew almost every day of the month.

Several official trips were made. One to Albuquerque, several to Gallup to pick up cement, one to Aztec to pick up hay, one to Zion National Park to pick up surplus property and one to Santa Fe to the Regional Office. Also, several trips were made to Bloomfield for sand and gravel.

National Park Service visitors included Paul Balch, Regional Soil Conservationist, Bill Reed, Ranger, Aztec Ruins National Monument and Ora M. Clark, former seasonal ranger at several Monuments.

Trouble is still being experienced with the water pump, but another has been ordered; it is hoped that the old one will last until the new one arrives.

The fence crew has continued to work well and now have all but a few feet on the mesa completed for the south side of section 25. The west side of the same section is almost closed. They have completed the north fence of section 23. All the fence in the canyon on the east and west side of section 26 has been taken down and the posts blasted, and the same for a good part of the north of the same section.

The stream control crew have finished planting the willows which were bought at the Soil Conservation Service Nursery at Bernalillo, and have planted some willow cuttings.

The Trader has finished painting the front of the Store. He reports that Navajo rugs are coming in at a reasonable rate. Wool season is rapidly approaching and he expects the number of rugs to increase after the season is over.

The mocking birds are back in the canyon, and are serenading us daily with their beautiful songs. The antelope squirrels are seen often, and, the snakes are out, too, for the first one was seen, a bull snake, on the 19th of the month.

Dr. Paul Reiter and a crew of students were here on Easter week-end, and started getting things in shape at the University of New Mexico Field School for the summer session. They spent most of their time cleaning the well. They were a fine group, and we are looking forward to seeing them again next summer.

The wind view almost every day of the month.

1. The first of these is the fact that the

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is therefore unable to determine whether the CLPS is a genuine organization or a front organization for the Government of the United States.

The T-28 was the first aircraft to be built in the United States and was the first to be built in the United States.

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which is well known to all who are familiar with the country. It is a fact which is well known to all who are familiar with the country. It is a fact which is well known to all who are familiar with the country.

Projects for the ensuing months:- continue to work hard with the fence crew and try to finish by June 30, get the roads in better shape, paint the signs, paint the office and out buildings, install the light plant, install the water pump, etc., and keep office and routine duties current.

There is attached, the report of Archaeologist Richard Gordon Vivian of the Mobile Unit.

Irving McNeil, Jr.

Irving McNeil, Jr.
Custodian

The first photographs of completed work have been taken and the condition of the ground works will be made available to the public by the 15th and photographs for a series of the construction work have been completed.

CHACO CANYON

Repairs to foundations have been made in the tower on the west side, these are particularly damaged areas.

The preliminary work, including clearing, grading and setting of stone has been done for a major repair job on the back wall. This is right next to the fallen arch and a large hole developed there this winter. The wall was 18 feet high in badly needed a horizontal clearance of 18 feet.

CHACO CANYON

The major portion of the work here has consisted around the four foundations in Area B and the reconstructed Area C.

There is the job of this step hole the walls of stone on and on some reinforcement and strengthening with reinforced concrete some steel bars some walls. A bridge was removed and the wall rebuilt. At present and extensive patching work is in.

Area W, west end area was cleared up and a foundation installed where the foundation had been destroyed. Chaco Canyon Nat'l. Mon.

Work on the tower of Area B now filled with concrete and steel

REPORT OF STABILIZATION UNIT FOR THE MONTH OF APRIL, 1947

GENERAL:

Working conditions have been fair except for days when the wind blew the stone out of the men's hands before they could get them laid in the wall.

Some spare time has been put in on the Chetro Keti ceiling mats. One has been prepared and is on display in the museum. Two others have been cleaned, patched and are stored.

An additional set of timbers have been treated with the pentachlorophenol wood preservative. The color while not as objectionable as that first obtained is still too dark.

The first photographs of completed work have been returned and compilation of the record sheets will take considerable time from now on. Data and photographs for a section of the stabilization manual have been assembled.

PUEBLO BONITO:

Repairs to foundations have been made in five rooms on the west side. These are previously unrepaired rooms.

The preliminary work, hauling gravel, trenching and setting of forms has been done for a major repair job on the back wall. This is right next to the fallen Rock and a large bulge developed there this winter. The wall some 16 feet high is badly cracked a horizontal distance of 15 feet.

CHETRO KETL:

The major portion of the work here has centered around the deep excavation in Kiva H and its superimposed Kiva G.

Here on the rim of this deep hole the walls of rooms 35 and 23 were straightened and strengthened with reinforced concrete cores tied into cross walls. A bulge was removed and the wall rebuilt in room 28 and extensive patching done in 27.

Room 17, west and south was shored up and a foundation installed where the excavation had left them unsupported.

Niches at the base of Kiva H were filled with concrete and faced

REPORT OF INVESTIGATION OF THE NATIONAL BUREAU OF FIRE PROTECTION, 1947

General:

Working conditions have been fairly steady for days since the rain blew the smoke out of the men's lungs before they could get down into the well.

Some spare time has been put in on the State Well drilling work. One has been prepared and is on display in the museum. Two others have been cleaned, packed and are stored.

An additional set of timbers have been placed with the pump and dynamite work. The color white is not as objectionable as that first obtained is still too dark.

The three photographs of completed work have been retained and completion of the work sheets will take considerable time. The men on the job and photographs for a section of the investigation were taken from the well.

Working conditions:

Relative to conditions have been made in five rooms on the west side. These are generally satisfactory.

The prevailing work, handling material, traveling and drilling of tubes has been done for a major portion of the work. This is right next to the main room and a large hole has been made there. The well some 10 feet high is daily cleaned and maintained. The well of 10 feet.

Working conditions:

The major portion of the work has been done around the deep excavation in five H and its surrounding area.

None on the rim of this deep hole the walls of room 28 and 29 were strengthened and strengthened with reinforced concrete under the late cross walls. A hole was removed and the well rebuilt in room 28 and extensive patching done in 27.

Room 17, west and south was shored up and a foundation installed where the excavation had left them unsupported.

Excavation at the base of five H were filled with concrete and floor

UNITED STATES
DEPARTMENT OF THE INTERIOR

with masonry in the hopes of stopping further settling. Work will be continued here on the walls, bench and top of kiva G.

Kiva J received complete repairs: capping, patching of wall surface, repairs and capping of bench, repair of ventilator shaft and floor features.

In progress is complete repair of the entire north wall of the site at the former balcony level. From one to three feet of facing have fallen at the balcony line a horizontal distance of some 250 feet. Repairs are completed through rooms 63, 65, 93, 95, 94, 101.

Capping, repair of wall breaks, repair of sockets and beam levels has been completed further eastward in the three story rooms 47W, 64S, 54N, 61S.

In the coming month we intend to do the big job on Bonito, complete the work around Kivas H and G, straighten the leaning wall in room 70, completely repair Kiva I and follow this with capping. If possible we may get to some of the worst walls in Pueblo Del Arroyo.

with masonry in the hopes of securing further settling. Work will be continued here on the walls, bench and top of rise 2.

Five 2 treated complete repairs: ceiling, plaster of wall surface, repairs and ceiling of bench, repairs of ventilator walls and floor.

In progress is complete repairs of the entire west wall of the site at the former battery level. There are no signs of falling here. The site at the battery line a horizontal distance of some 100 feet. Repairs are completed through rooms 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Repairing, repairs of wall openings, repairs of concrete and beam levels has been completed further assessed in the three story rooms 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

In the coming month we intend to do the big job on the site, the work around rises B and C, strengthen the existing wall in room 12, completely repair rises I and J and fill with concrete. It possible we may not be done of the work until the end of the year.

CHIRICAHUA NATIONAL MONUMENT

Doa Cabezas, Arizona

April 27 197

MEMORANDUM for the Regional Director,
Region Three.

Following is a report of activities at Chiricahua National Monument for April.

Weather Conditions. Weather has remained very dry and windy. One rain of .40 inches fell on April 4.

Special Activities. The The fire school was the outstanding activity of the month. In addition to the Chiricahua force there were 11 visiting custodians, rangers and fire control aides and 5 Santa Fe and Chicago officials.

The custodian made a trip to the prison camp near Tucson for lumber for a new roof on the oil house and for various other repairs. About 1500 feet of lumber was secured and an overnight stop was made in Tucson to have 1000 feet of this lumber tongue and grooved and surfaced. A stake truck was borrowed from Saguaro for this trip and Ranger Sharp returned the truck and secured some repairs for our panel truck in Tucson.

Inspections. Architects Loveledy, Saunders and Alleman spent part of April 22 and 23 on the monument, going over master plans along the roads and around headquarters and the camp ground, with the custodian.

Plans, Maps and Surveys. In connection with the above inspection plans were made for some slight changes in the Administrative Building parking area. A site was also agreed upon for the proposed camp fire circle.

General Publicity. The Natural History Magazine, published by the American Museum of Natural History in New York, contained a seven page article on Chiricahua in the April issue. Story was by William Carr and pictures by George Geyer.

Maintenance. Our water system dropped to a low of 6 cu. ft. per^{hour} and several days were spent by Operator Marble and Ranger Sharp investigating the same. A somewhat larger flow was secured by by-passing the regular intake, but the condition still is so critical that we have written the Sunday School groups that were planning on using the campground in June informing them that there would not be sufficient water for their use.

We hope that maintenance of light plants has eased up for some time as we secured two new ones from Army surplus. A new cement floor was

poured in the power house and the plants installed. We feel much more closely connected with civilization now that we have electric lights every night.

Approaches to Monument Area. Approach roads are getting very rough and dusty as a result of the prolonged dry spell.

Interpretive Service. With the visit of the Sierra Club on April 2, we did a fair business in interpretation. Ranger Sharp took 57 members of the Club on a 2 hour hike on the Echo Canyon trail, and Custodian Cooke took 24 on a 5 hour trip around the Heart of Rocks and up Echo Canyon. The following day Ranger Sharp took 8 of the group on a photographic trip around the Heart of Rocks. Custodian Cooke made a campfire talk to the Club in the evening. They seemed like a group who were very willing and able to absorb interpretation. The usual contacts were made in the museum and on Sunday road patrol to Meausi Point.

Increase in Travel. Travel of 1947 makes this month about the same as the last two months, with about a 50% increase over April of 1946. Our lead over last year's travel is now 63 for the travel year and 82 for the fiscal year.

Visitors. Mr. Seldon Heald, former director of the Sierra Club, paid us two visits. One of these was with a group of 81 Sierra Clubbers. Mr. Heald is a very good friend of the Park Service and has written various articles on conservation. He recently purchased the Flying H ranch near Biabee where he is developing an arboretum in an attempt to grow all of the conifers. He has collected several hundred species to date.

Forest Fire Protection. Forest conditions are much drier than usual this year both on the Monument and on the adjoining National Forest.

NATIONAL PARK SERVICE

El Morro

NATIONAL MONUMENT

Ramah, New Mexico

April 28, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of April.

WEATHER: Three very light snow storms occurred on the 5th, 9th and 12th, but by sundown all traces of moisture had gone with the wind. This makes a total of 102 days without a measurable precipitation. Maximum temperature reached 72 degrees on the 20th and the minimum was down to 18 degrees on the 25th.

TRAVEL: The continued increase in travel shows April 75 percent over 1946. The monument was visited by 184 people in 67 cars and one airplane. A total of 171 made the tour of the inscriptions and 12 of this total went on top. The guide time amounted to 52 hours and 25 minutes. Thirteen people arrived for information only. The one visitor via air landed in a nearby field and was transported to the monument by the very obliging land owner who supplied sand bags and all the necessary tackle for anchoring the plane.

APPROACH ROADS: The road from Gallup to the airport, four miles west of the Monument, was bladed on April 15th by the McKinley County maintainer. The work was done mainly for the benefit of the motion picture company who will be driving back and forth while making their film here at the Monument. The constant high winds have made the road to Grants almost impassable for a passenger car which has little clearance. All loose soil has been blown away from the lava rocks, making a great many high centers. It was learned last week that the improvement of State Highway #53 will not be included in the State Highway Department's 1947 program. This is discouraging but we are not giving up hope or the battle.

NPS VISITORS: We enjoyed very much meeting Mr. and Mrs. Ward P. Webber who visited the Monument with Mr. J.R. Lassiter on March 28th. Our unsatisfactory water supply was inspected and an underground storage tank was recommended as a solution. Paul L. Balch arrived early the morning of the 19th. and a complete inspection of the 1942 soil erosion work was made.

SPECIAL VISITORS: The five men representing Harry Sherman Pictures, Inc. returned on April 3rd. to make definite location plans. Four hours were spent with them in working out in detail the use of the area. They plan to return on May 10th and will complete their filming about May 14th.

Special Agent in Charge, National Monument, Carson City, Nevada

Re: Report of activities in the National Monument for the month of April.

There were very light snow storms reported on the 25th, 26th and 27th. The amount of snow was very light and did not cause any problems. The temperature was in the 40's and 50's. The wind was light and did not cause any problems. The weather was very pleasant.

The continued increase in travel of the 25th and 26th was noted. The amount of snow was very light and did not cause any problems. The temperature was in the 40's and 50's. The wind was light and did not cause any problems. The weather was very pleasant.

The road from the monument to the airport was closed on the 25th and 26th. The amount of snow was very light and did not cause any problems. The temperature was in the 40's and 50's. The wind was light and did not cause any problems. The weather was very pleasant.

The amount of snow was very light and did not cause any problems. The temperature was in the 40's and 50's. The wind was light and did not cause any problems. The weather was very pleasant.

The five men representing the National Monument, Carson City, Nevada, were interviewed on the 25th and 26th. The amount of snow was very light and did not cause any problems. The temperature was in the 40's and 50's. The wind was light and did not cause any problems. The weather was very pleasant.

GENERAL: Two trips to Gallup were made during the month for supplies and Surplus Property and one trip to attend a meeting called by the Forest Service for the purpose of working out local cooperative agreements on forest fire suppression. Representatives from the Indian Service (Navajo & Zuni), the County Agent Office, and the Forest Service were present. Mr. Stanley Wallace of the Forest Service Regional Office was present and I discussed with him the moving of the telephone line north of the Rock. He was very much in sympathy with our problem and said there was no reason why the line could not be moved. It was suggested that we wait until we were sure exactly where the new road line would be. On April 15 Mr. Fred W. Townsend, Sanitarian, Health District #11, visited the Monument, taking two samples of the water for bacteriological examination. One sample was taken at the Pool and one at the doping tanks.

Weather. Strong winds prevailed throughout the month with frequent heavy dust storms. On April 9 high hard winds almost reached hurricane proportions and visibility was reduced to absolute zero in some areas. No precipitation except one light snow on April 4, otherwise the entire month has been very dry. High temperature was 77 and low 18.

Roads. The road to Mountainair is in fair condition. However, the road to Carrizozo has been blocked to traffic for at least half of the month due to drifted sand. One silt bed was about four feet deep and extended for a distance of about five miles.

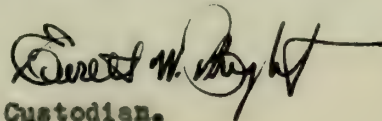

Travel. Visitor travel still continues to show an increase, 18 per cent over the previous month of March and 31 per cent over the corresponding month of April 1946. Instate visitors numbered 185 and outstate visitors 35. There were a total of 69 cars with instate numbering 51 and outstate 18. 3 people walked out to the monument.

Guide and Contact Service. A total of 220 visitors were conducted through the ruins on 69 guided tours. The average time spent by each party was 72 minutes. Total contact time of 82 hrs, 40 mins.

Free and for-sale Government Publications. No publications of this nature are on hand at this monument.

N.P.S. Visitors. Messrs. Carlson, Walker and James visited the monument on April 4.

Maintenance and Administration. Received new refrigerator to replace the old one that was sent to Albuquerque for repairs. Spent considerable time working on gas engine of deep well pump. This pumping unit has seen many years of service and requires constant attention and repairs to keep it in operation. April 9, 10, 11, 12 and 13 was spent going to and from and assisting custodian Paris in the annual Play Day activities. Continued work on trail leading to mission.

Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND HILLS NATIONAL MONUMENT
MEXIA, COLORADO

April 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Hills National Monument for April, 1947.

WEATHER. Fifteen snow flurries have occurred since the last report period. Three of these were of almost blizzard proportions. The infamous water line froze again on April 12, but was thawed by blow-torch. The rain of April 18 turned into snow before morning. Days have been spring-like between snows and the warmest day was around 60 degrees. The Sangre de Cristo range is heavily covered with snow, and although the San Luis valley proper is very dry, the winter's accumulation of snow on this range should produce enough water for the irrigation canals.

TRAVEL. Three hundred eighty visitors in one hundred six cars visited the area during this report period, and two visitors came by motorcycle. Four states and Alaska were represented. Sixty-nine people took advantage of the picnic grounds and of these, two boys camped there for two nights. One written request was answered.

INCREASE IN TRAVEL. For April, 1946, the record shows 35 cars and 222 visitors.

ROADS. The county graded about 15 miles of the approach road into this area, but the road was too dry to do a proper grading job and there is no improvement to report. The monument road is very dry and rough. A surplus drag located at Chaco Canyon National Monument has been requested, in order that the monument road may be worked on when weather conditions permit.

COMPLAINTS. With the increase in visitation, there have been received many verbal complaints concerning the unfinished rest-rooms facilities at the headquarter area. Visitors are directed to rest-rooms located two miles from the headquarter area, in the camp-grounds. This condition has been called to the attention of Region Three Office.

ARCHAEOLOGY. An article in the Rocky Mountain News, dated April 4, states that permission has been granted the Alamosa State College to excavate for traces of prehistoric man on the Linger Ranch. It is understood that Professor Norman and students will soon start on this project and this office will make a special effort to keep up with the results of their excavations.

NATIONAL PARK SERVICE

April 27, 1917

Washington, D. C.

Dear Sir:

Very truly yours,

Enclosed for the National Park Service are two copies of a report on the progress of the work of the National Park Service during the year 1916. The report is in two parts, one dealing with the general work of the Service and the other with the work of the various National Parks. The report is in the form of a narrative and is intended to give a general idea of the work of the Service during the year 1916.

Very truly yours,

Very truly yours,

LAND STATES. This office received a copy of the Proclamation signed March 12, 1946, by President Truman, "Redefining the Area of Great Sand Dunes National Monument, Colorado". The proclamation gives the total acreage as 44,310 acres and does not include the 240 acres purchased from the Liner Brothers. The Director's office has been written to determine if this area has 44,310 acres or 45,050 acres.

SPECIAL ACTIVITIES. From April 12 to 16, the custodian made a trip to Bandelier National Monument, Santa Fe and Albuquerque, New Mexico, to obtain the Dodge 4x4 pickup which had been left at the Forest Service Garage for a month. Wheels, tires and a battery were finally obtained, thus enabling the final delivery of this surplus piece of equipment to this area. Other surplus equipment was also hauled to Sand Dunes in the pickup. This included the much needed new light plant and two oil stoves as well as smaller pieces of equipment.

ACTIVITIES. Again the water line took up most of my time this report period. Several days after the line thawed, a bad leak was discovered in the line. The entire section of pipe was uncovered, and a twelve inch split was found. Rubber tubing, cement and clamps were tried, without success, to stop the leak. A new twenty-one foot section of pipe was then installed. Having only an eighteen inch pipe wrench, it was quite a job getting the union tight enough to eliminate leaking. However, a hammer and a center punch will do the job. Another small leak was discovered, and this was easily repaired by rubber tube and clamps.

While the storage tank was drained by the major leak, it was then possible to thoroughly clean the tank. The horrible discovery was made that the tank is much smaller than is shown on the blue prints. The storage system is shown to be a 5,000 gallon reservoir: height, 6 feet; width, 11 feet and length, 11 feet. While cleaning the tank, measurements were taken and they are: height 5 feet, 2 inches; width, 9 feet, 6 inches and length, 9 feet, 9 inches. According to my mathematics this tank would only hold approximately 1600 gallons.

During the three months when the line was frozen, 47 trips were made to Mosca Creek. This amounted to 94 miles and on each trip 35 gallons of water were hauled. A total of 1645 gallons were hauled and used during the three months.

Photographs were taken of the water line for the fact file.

Usual routine of hauling wood, fuel oil, gasoline and garbage was accomplished during this report period.

It was also necessary to help visitors dig their cars out of the sand in the picnic area. A great deal of work must be done here, in order that this area be safe for cars to drive in and out.

After returning with the surplus equipment, much time has been spent setting up the light plant and oil stoves.

It was a major project to unload and transfer the 450 pound, 3KW, 110 volt plant to the light plant room. This meant pulling and dragging it thru the garage by means of planks and rollers. It is functioning in fine condition and waffles and toasted sandwiches are now a treat. This plant arrived in the

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

April 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of April, 1947.

Visitors this month - 2003; travel year to date - 8440.

Visitors April, 1941 - 929; travel year - 1941 - 3431.

Weather Extremely dry weather has prevailed throughout the month. Promising clouds sometimes rise in the sky but still we get no rain. The maximum temperature was 91° on April 15 and 17 and the minimum was 30° on April 23. There was a trace of moisture on April 9.

General Travel figures continue their upward trend with this travel year to date fifty-nine per cent ahead of the same period in 1941. This month we guided more visitors through the Castle than the total travel counted in April, 1941.

Approach Roads A large and conspicuous sign advertising attractions in the Verde Valley has been erected by the Verde Valley Chamber of Commerce at the edge of Flagstaff where Alternate Highway 89 leaves Highway 66. Co-operation is being sought from Prescott and Flagstaff citizens in routing visitors through the Verde Valley. The Chamber of Commerce has also petitioned the County Board of Supervisors to oil the road from the Coconino county line through Big Park to the Beaver Creek road and thence by Montezuma Well to the Cornville-Camp Verde road. Coconino County now has an improved road from Flagstaff to the county line.

A contract has been let for the fourth section of the Black Canyon Highway from Phoenix to Prescott and the Verde Valley. Work is now under way on about thirty-five miles of this highway from Phoenix to Rock Springs.

Administration Considerable time has been devoted to matters pertaining to Montezuma Well.

Custodian Hastings and Ranger Leding attended the Fire Control Training Conference at Chiricahua April 8-11. During their absence Jack McCracken of Camp Verde was hired as a WAE guide.

Difficulty has been encountered in locating a qualified veteran candidate for our temporary ranger position.

Staff conferences for the personnel of this monument were initiated March 17. We plan to hold a short conference each Sunday morning to discuss administrative problems of general interest.

[illegible]

Travel figures available for the period 1961-1962 are as follows:

[illegible]

My second thirty-five miles of this highway from Phoenix to San Felipe, Arizona to Yuma and the Yuma Valley. This is the same highway that has been let for the better section of the State Highway.

Administrative Long-termism has been a major factor in the development of the U.S. economy.

(The following information was obtained from the Central Intelligence Agency and is being furnished to you for your information.)

...the fact that the ...

Staff conference for the personnel of this command were initiated March 17. We plan to hold a staff conference soon which would be a general discussion of the personnel of the command.

Montezuma Well Patrol trips were made to this area on March 25 and 30 and on April 1, 4, 5, 15, and 20.

It has been learned that the Montezuma Well property passed into Federal ownership on April 4 and that full responsibility for administration, protection, and maintenance now rests with the National Park Service. Plans are underway to drill a well, and to renovate and modernize the quarters. April 1 was a busy day at Montezuma Well with Assistant Regional Director Davis considering administrative problems, Archaeologist Reid interpretive matters, and Landscape Architects Cornell and Bennett giving attention to development plans.

Many visitors to Montezuma Well were not finding the feature because they did not expect to climb a hill to find a spring of water. We have placed a sign at the bottom of the foot trail which reads, "Up Hill to Well".

On April 4 Custodian Cotter phoned to say that some visitors had been charged a fee at Montezuma Well by an unauthorized person. An immediate check-up with a follow-up the next day failed to reveal who was making the charge.

Protection On two occasions stray cattle were driven off the monument. The extremely dry weather has so reduced forage outside the area that we anticipate increasing difficulty in keeping cattle from trespassing.

The fence was repaired near the picnic ground and also near our south cattleguard.

Two new carbondioxide fire extinguishers were received from the War Assets Administration.

Service To The Public A lady who grew faint and pale had to be given special help in getting down our ladders on March 30. For awhile it looked as though we might have occasion to use our basket stretcher.

Also on March 30 we had one visitor, Mrs. C. G. Mahaffey, whom we tried to discourage from climbing our ladders. She stated she had been to Tusigoot and Wupatki and would be disappointed if she could not examine the Castle. Her daughter assured us that Mother could go anywhere and even though blind since birth, she made the entire trip and expressed keen interest in her visit. She is collecting information for an article she plans to send to a publication for the blind.

We had 2003 visitors who came in 597 cars, trucks, and busses. Tickets sold, 731, tax but no ticket, 97, children who climbed free, 100, members of the armed forces who climbed, 3.

Contact Time Total contact hours, 219.25. Hastings, 61.50; Leding, 62.25; Schroeder, 73.00; McCracken, 22.50. Trips 169 for 951 visitors who went through the Castle; museum parties, 316 for 1245 visitors. Information service outside the ruins or museum was rendered to 263 people. There were 11 picnic parties including 58 people and 3 parties including 6 people who camped over night.

NATIONAL MONUMENT

Fauna The first rattlesnake reported on the monument this season was found and killed by a party of visitors on April 20. It was a 50 inch northern black-tailed specimen.

National Park Service Visitors Engineers Webber and Lassiter were here March 24.

Dale King and his father were here for a short visit on March 29.

Messrs. Davis, Reid, Cornell, and Bennett were here on April 1 to study problems pertaining to Monteruma Well.

Mr. and Mrs. J. B. Rasbach of the Jefferson National Expansion Memorial were here on April 6.

On April 2 Ranger and Mrs. L. Brainerd from Muir Woods National Monument were here.

Newsworthy Visitors Alfred A. Jordi, photographer, was here on March 24 to get pictures for Holiday Magazine.

A bus load of Boy Scouts from the Pasadena-San Gabriel Valley Council were here on April 3.

Mr. Stan Davis and Mr. H. Lollesguard of the Lollesguard Studios, Tucson were here to take pictures for use on picture post cards or picture packets.

Accessions Mr. Thompson, hybrid corn grower from Cottonwood, donated a booklet "Corn Before Columbus" to our library.

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of April, 1947:

GENERAL: It is hoped that a temporary ranger can be entered on duty at this area on May 1st, as visitors are making the trip over the Elk Ridge despite the snow and mud encountered on the approach road.

ROADS: The State of Utah has maintenance equipment working on the road from Blanding to the monument and it should be in good shape by May 1st, or shortly thereafter.

TRAVEL: John Wiley Rodd of Blanding reports that several cars of visitors have contacted him regarding the road to the monument and have made the trip to visit the area. It is estimated that 6 cars and 28 people made this trip during the month.

----- April 24 ----- 19 47

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of April.

WEATHER: Very dry and windy weather has prevailed all month. A sparse cover of Russian Thistle on the sand dunes is, in some places, keeping the dunes from moving onto the road.

VISITORS: Nine parties of visitors reached this area--totaling 27. Five parties made the trip to Betatakin, four parties used Sandal Trail and one party of two horseloaded to Keet Seel.

Visitors, Official: Ranger and Mrs. Aubuchon of Walnut Canyon National Monument visited this area using their days off to help us haul a load of WAA equipment. Aubie also went to the tunnel and helped us install new parts in the pump. In addition to our appreciation for the help rendered we enjoyed having these folks here.

MAINTENANCE AND NEW CONSTRUCTION: New parts were put into the water pump and no improvement is noticed.

A 1½ Kw. Kohler light plant was set in operation for residence #1. The plant is installed inside the tool house.

Wrenches were forged and fitted to all sub-level water drain valves. The kitchen walls were washed.

WAA stock bins were erected in the tool house and all of our hardware, pipe-fittings, etc., were sorted and stored in the bins.

52 man hours were spent in road repair and dragging.

Three days were spent on the water pumping plant.

GENERAL: After a healing ceremony held for Mattie Austin in the hogan near the camp-ground we were able to obtain some of the sand-painting equipment. For the ceremony the pulverized sands, white, yellow, red and blue were carried in and out of the hogan on trays made of Piñon bark. We added four of these trays, each with its colored sand, to the museum display case. Also two, red and yellow specimens of the sand stone from which the sand is ground.

April 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of April, 1947.

WEATHER:

No precipitation recorded. High winds occurred on the 12th, 13th, and 21st; maximum temperature of 97 degrees reached on the 17th and minimum of 38 degrees on the 6th. Clear sunny days prevailed throughout the month with two days noted as partly cloudy and one day as cloudy.

TRAVEL:

260 persons received interpretive service during the month, and general travel trend indicated little decline in spite of the mounting temperature. Special patrol trips were made with four individual parties.

SPECIAL ACTIVITY:

The Region Three Annual Fire Training Conference at Chiricahua National Monument was attended by Ranger Ringenbach and the Custodian from April 8 to 11 inclusive.

INSPECTION:

Mr. George Walker, Forester, Chicago, and Mr. Bill James, Forester, Region Three, spent April 14 to 16 inspecting and outlining forestry problems of O.P.C.

GENERAL:

The State of Arizona established 4 border inspectors on the International Line, one camp at Quitobaquito and one at the Sonoyta Custom House for the express purpose of preventing Mexican drift stock from entering the U.S. This is part of the State program for control of the foot and mouth disease.

The Soil and Moisture program got underway this month with a six-man crew beginning construction on the west boundary fence project.

Dr. A.L. Melander and Mr. and Mrs. John L. Sperry, of Riverside, California, collected and made moth and fly studies for monument records and collection.

SAGUARO NATIONAL MONUMENT

TUCSON, ARIZONA.

APRIL 27, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT (1ml) of activities at Saguaro National Monument for the month of April, 1947.

WEATHER. Except for two cold days April 24 and 25, the entire period was warm to hot, with a maximum of 94 degrees. Precipitation, in the form of 8 inches of snow, occurred at Manning Camp Ranger Station on the night of April 2; at the same time a trace of rain fell at Headquarters, and other lower portions of the monument. Official Weather Bureau records show this to be the driest winter since establishment of the Weather Station in Tucson, 33 years ago. Although we usually expect winds and sandstorms in March, this year they came a month late, with almost daily high winds, which, in the city, usually obscure vision with accompanying dust and sand storms.

SPECIAL ACTIVITIES. On April 2 and 3, the Custodian and Ranger Fulton rode to Manning Camp, Mica Mountain Tower, and the three secondary look-out points. It was our first (and highly discouraging) trip through the area burned in the 1943 fire; many of the trees killed are now down, with trails blocked, and telephone line down for much of its length in the plateau area north of Man-Head. The Custodian, Ranger Fulton, Laborer-Leadman Ollie O. Barney, and Laborer Richard Barney attended the sub-Regional Fire-Training Conference at Chiricahua from April 8 to 11, inclusive.

Forest Walker, of the Director's Office, and Forester James, of Region Three, were here on field investigation April 17 and 18. Also, Architects Alleman and Lovelady, of Region Three, were in on the 24 and 25, in connection with studies for initiating a Master Plan for the area.

MAINTENANCE. The Loop Road in the cactus area was dragged, and remains in very good condition. Approach road to the Madrona Canyon area should also have been dragged, but the Ford Dump-truck used for this work broke down again, and is still unusable. Ranger Fulton and Leadman Barney spent a total of five-man-days on the telephone line between Madrona Ranger Station and Manning Camp, but much work remains to be done on top of Mica Mountain before we can expect to use the mountain section of the line. The cess-pool was completed, and our inside plumbing put into operation; apparently we need a professional plumber's services, since the new toilet refuses to work.

NATIONAL MONUMENT

100-443887-100

1. The first of these is the fact that the Government has been unable to secure the necessary funds to carry out its policy of non-interference in the internal affairs of the Republic of China. This has been due to a variety of reasons, including the fact that the Government has been unable to secure the necessary funds to carry out its policy of non-interference in the internal affairs of the Republic of China.

10. The Commission has also received information from the Government of the United States that the United States has been providing information to the Government of the United Kingdom regarding the activities of the United States in the United Kingdom.

[illegible]

MAINTENANCE - (continued).

The radio antenna masts were moved, and a new antenna installed on the 19th; radio communication between Headquarters and Organ Pipe Cactus and Chiricahua National Monuments was reestablished on the 20th, for the first time since last fall - while the Headquarters set was out of service, Ranger Fulton kept up the weekly contacts from the installation at Madrona Canyon.

NEW CONSTRUCTION. An overhead power line was constructed at Madrona Canyon between the barn and the bunkhouse, the old line from the barn to the Ranger Station replaced, and the two new 5-KV generator units installed and tested.

TRAVEL AND INTERPRETIVE SERVICES. Travel decreased, as is usual at this season, approximately 15 % from last month, with a total of 1782 persons arriving in 576 cars, 1 motorcycle, 2 busses, and two horseback parties totaling 7. These visitors came from 34 states, the District of Columbia, Canada, Hawaii, England, Cuba, and Argentina.

Visitors receiving informational services at Monument Headquarters numbered 743, making up 221 parties. Contact time totaled 44 hours, mostly by Ranger Howenstine. It is noticed that our past winters visitors seem to be more generally in a hurry than before 1941; spend less time in the monument, ask fewer questions, and appear to be less interested. It is harder to gain, and keep, their interest, and most of them seem content merely to receive road information. Part of this is due to location of headquarters, but there does seem to be a difference in visitors.

VISITORS. Dr. Lake S. Gill, of the Bureau of Plant Industry, on April 3, and Dr. Hartley, of the same agency, on April 20. Custodian Hastings, Mrs. Hastings, and Ranger Leding, of Montezuma Castle, and Ranger Richert and Mrs. Richert, of Tuzigoot, stopped in for a cactus tour on their way home from the Fire School. We also enjoyed an afternoon visit with Mr. and Mrs. Gene Santschi, of the Nordberg Diesel Corporation, Milwaukee; Mr. Santschi is a Swiss, and an early associate and private secretary to Rudolph Diesel, coming to this country with the first Diesel engine designs in 1914.

WILDLIFE. The famous (or infamous) javeline sub-adults were removed from the vicinity of Madrona Ranger Station on April 1, the day after the end of the open season on this species, and were released two miles northeast of Monument Headquarters. They found the "old" Cactus Ranger Station in less than a week, and moved in on Ranger Howenstine, until forcibly discouraged. On the 25th they failed to appear, and evidence pointing to kidnapping was found, and we believe that the parties removing them are known. Our problem is to decide whether or not it is worth while to make an issue of this, resulting in the return of the pigs, and continuing to suffer their presence in one or another of the residential areas on the Monument.

REPORT ON THE PROGRESS OF THE WORK DURING THE YEAR 1900

1900 - (continued)

The following table shows the results of the work done during the year 1900, and is arranged in the order in which the work was done. The first column shows the name of the person or persons who did the work, and the second column shows the nature of the work. The third column shows the date when the work was done, and the fourth column shows the result of the work.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL FIRE PROTECTION

FOREST FIRE PROTECTION. Considerable time has been spent during the month by the Custodian and Ranger Fulton in preparing for the fire season, which officially begins May 1. Almost a week was spent in attempting to locate a qualified packer, but no applications have been received except from young boys, or totally inexperienced college students. A portion of the supplies needed are on order, but as we lack information as to allotments for equipment, purchases of needed items has not been made. Bids for hay and grain were circulated, and will opened April 28; we understand that hay has taken a decided price drop locally. Part of the desired cooperators outside the monument have been interviewed, and expressed willingness to act in emergencies, but do not wish to bother with formal appointments, and the inevitable "papers". Mules were brought in from pasture on April 23, and will be shed before the first, but there is a probable delay of one or two days in taking the first Fire Control Aid up the mountain, as we wish to make another effort to obtain a packer.

The Coronado National Forest has had their lookouts and patrols on duty for the past three weeks, anticipating one of the worst fire seasons in recent years, due to drought, and increasing recreational travel in the mountains of this part of Arizona.

-----Sunset Crater----- NATIONAL MONUMENT

-----Flagstaff, Arizona-----

-----28 April-----, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of April, 1947:

Visitors this month: 815

Travel Year to date: 3192

Travel: The total number of visitors for the month, although slightly below that recorded for April of 1946, shows a 100% increase over last month. Thus it appears visitation is following closely the parallel of travel reported from points on Highway 66 and 89 which is consistently on the increase. Observation of only a couple days this month indicate that the present method of estimating the non-registrants, using the 30% figure is very conservative. No change in the ratio to be used will be made until study can be given over a much longer period.

Roads: The Saginaw Manistee Lumber Company discontinued the use of the entrance road about the middle of the month. This removed the hazard to the visitor of having to meet the large logging trucks on the narrow cinder road. The company's road crew bladed the road from Highway 89 through the monument and past the east boundary continuing some distance down on the Wupatki back road. This left the entrance road in fair shape. However in the deep cinder the road is very soft with a number of deep chuck holes. Due to the disturbance of the road bed the Sunset - Wupatki connecting road is now impassable to the average visitor. They will be discouraged in attempting the back route until such time as work and weather permit some type of maintenance that will pack the bed and remove the soft cinder shoulders thrown up by the blade. At the present time it is almost impossible for a car to turn out of the single track. This continued closing of the inter-connecting road, without doubt is having a definite influence on both the Sunset and Wupatki travel.

General: Plans for temporary housing are progressing slowly. Work will be completed on the tent houses as soon as materials and the tents are available. A tentative location for the housing has been chosen.

During the latter part of the month Ranger Upton has been driving from Wupatki to Sunset on week ends giving interpretative information to the visitor.

Work on the letters for the Sunset cut-out-type signs will begin as soon as material can be obtained.

UNITED STATES

One mile Thunderbird markers have been re-erected on Highway 89. Stabilization of the entrance marker foundation will be required where water has washed away part of the supporting road shoulder as soon as the job of getting settled at Sunset permits.

Interpretative Services: Pending establishment of living quarters, interpretative services were offered on the last two week ends of the month. Bob and Bee drove up to Sunset on the 20th and 27th, remaining for the day. From one to six cars were in the area almost all of the time. Of this number of visitors only a small percent registered. The ice cave came in for as great a share of interest as did the crater itself. This is possibly due to the long established type of advertising and of the local interest in the cave. At such time as trails leading to other features can be developed, considerable more interest will be aroused and greater appreciation of the monument will develop. A number of parties climbed to the summit in spite of the high wind and disagreeable weather.

Publications on Hand: Sunset Crater 2-fold leaflets on hand - - - 900 Copies.

-----Tonto----- NATIONAL MONUMENT

-----Roosevelt, Arizona-----

25 April 1947

19-----

Memorandum for the Regional Director.

Following is the monthly narrative report for Tonto National Monument for the month of April, 1947.

TRAVEL - 1912 persons visited the monument during the month; of these 1097 visited the Lower ruin and 10 the Upper ruin. 38 states were represented, two Canadian provinces plus Sweden, Belgium, England and France.

PERSONNEL - Custodian E. C. Gipe was forced to resign, because of illness, on 5 April. Charlie Steen arrived at the monument to relieve him on 2 April.

N.P.S. officials. - Assistant Chief Forester Walker and Assistant Regional Forester James were here on 13 April to look over the proposed fence change. Mechanic Stonehocker arrived with the long awaited fancy trailer on the 15th. He took two days to unload the trailer and get it into position. At one point in the game, when both trailer, tractor and the trailer house were teetering on the well known brink, none of us would have given more than four bits for the whole works but we finally got the job done.

OTHER GOVERNMENT OFFICIALS - H. K. Townes, Entomologist for the Department of Agriculture; Miss Peg Inness and E. L. Perry, U. S. Forest Service; District Ranger Pomeroy of the Tonto National Forest.

WEATHER - Temperatures have been fairly low for this time of year and most days have been windy. Traces of rain fell on the 3rd and 4th; not enough to settle the dust. Roosevelt Reservoir is very low and is being drained. The level of the reservoir is falling about eight inches a day. Apache and Canyon lakes are being kept near the capacity mark at the expense of Roosevelt for the former are deeper and narrower and less water is lost by evaporation. There is talk of rationing both water and power in the Salt River Valley this summer.

GENERAL - Ranger Bull attended the Chiricahua Fire School and was gone from the monument from the 7th to 12th inclusive. The exhibit room has been pointed and painted; a small shelter built for the 3 Kw generator; the fire wall of the exhibit building painted with Aquella; some hand work done on the entrance road; and we have started to work on the trailer house.

WILDLIFE - The birds, bugs and beasts are about to crowd us out of the canyon. The hills are swarming with all sorts of pleasant and unpleasant wildlife. Two javelinas were seen by Joe Bean last week and a rattlesnake and several Gila monsters have been seen on the trail to the ruins. A coral snake was caught on the steps in front of the exhibit building on the 23rd. Within the past few days two batches of young quail have been seen - about fifteen in one and ten in the other. There are young phoebes, canyon wrens and swifts in the cliff over the lower Ruin.

ACT OF GOD - One hot afternoon the grease soaked canvas cover tied over the gasoline powered washing machine decided that it had had enough and started to burn. Before the fire was discovered and put out the rubber rollers had become a total loss. Otherwise I believe the machine is not much damaged. The machine has been out of commission for several months.

PROJECTS FOR NEXT MONTH - We shall put the house trailer in habitable condition and connect power plant to dwellings. The house trailer is in excellent condition and needs little more than some tightening and painting.

UNNECESSARY COMMENTS BY THE ACTING ON TODAY - This was my first station when I entered the Park Service some thirteen years ago. I arrived at Tonto with an official inventory which included only one Coleman stove, one Coleman lamp, a hammer and a saw. In addition to that there were a few picks and shovels left here by the U. S. P. which the Service knew nothing about. Travel in those days was about one sixth the present travel and I seem to recall many a pleasant afternoon when there was nothing to do but twiddle my fingers and look at the beautiful view. Now, I find, those days have departed - down the drain no doubt. That with all the modern improvements (one is constantly out of order) there is enough to keep three of us busy. This is not the good old days and I am tired of a custodian's life. There is much too much to do.

Charlie R. Steen,
Acting Custodian

TUMACACORI NATIONAL MONUMENT

Box 2225, Tucson, Arizona

Tumacacori, Arizona

April 27, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of April, 1947:

WEATHER CONDITIONS: Precipitation was .20. Maximum temperature of 92 occurred on the 16th and 17th. Minimum of 30 occurred on the 23rd. Weather has been unusually dry, quite windy, and colder than usual. The late freeze on the 23rd was distinctly unseasonal.

MAINTENANCE: The floor of the north arcade of the museum building was hornited. Young Arizona Cypress and Eucalyptus trees were planted in the residence area. A sotol was planted west of the museum. An old tool cache was altered and made into a very acceptable paint shed, so that combustibles are now out of the museum in this shed. The patio garden fish pond was given its thorough annual cleaning. A screen was built between the door of the men's comfort station and the residence driveway.

INTERPRETIVE SERVICE: 1130 visitors went on 212 guided trips through the mission church and grounds, receiving an average of 36.67 minutes per trip. 1993 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1907 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: April travel of 2080 visitors was much higher than in recent years, but has been twice exceeded, by the 2571 for April 1938, and 4,850 for April, 1939 (the month the museum was dedicated).

VISITORS: March 31 - Professor Glenn H. Nelson, of the University of Arizona history department.

April 3 - Sahuarita School, with 36 pupils and teachers.

April 4 - 13 members of the famed Sierra Club.

GENERAL PUBLICITY: On April 15 Mr. and Mrs. Herbert Ullman, of River Forest, Illinois, were in taking colored movies for Coronet Instructional Films. They will have sound added, will be part of the movie "Spanish Influences in the U. S.," and will be released to U. S. primary and secondary schools.

Considerable publicity came out in Southern Arizona papers regarding the new post office at Tumacacori.

the following:

The floor of the main hall of the house was built of stone blocks and was covered with a carpet of red and white tiles. The walls were covered with a pattern of red and white tiles. The ceiling was made of wood and was painted white. The house was built in the style of the old Chinese houses and was very beautiful.

the new post office at Lawrenceville.
The following is a list of the names of the persons who were out in Lawrenceville during the night of the 1st of January, 1900.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL ANTHROPOLOGICAL ARCHIVES

Letters to the editor were written to the editors of the two Nogales papers, asking for donations of old dated prints of Tumacacori, to help complete our photographic record of Tumacacori. The publication of these letters has to date resulted in receipt of two old photographs, with promise of some others.

INSPECTIONS: On April 23 and 24 Architect Kenneth M. Saunders was in to go over development problems, and specifically to confer with the contractor who is to rebuild the roof over the nave of the church.

GENERAL: After only 257 years of European culture in southern Arizona, Tumacacori now has a post office. We are on the map! The post office opened on the 16th of the month, in the Mission Store, a couple of hundred yards from the mission, and its existence is due largely to the enterprise of the energetic store proprietor, Raoul Valenzuela.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Tuzigoot----- NATIONAL MONUMENT

-----Clarkdale, Arizona-----

-----April 28-----, 1947

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for April, 1947.

Visitor Total: 1296 visitors hit Tuzigoot hard enough this month to break both previous April highs--896 in 1946 and 890 in 1941. The museum was open to the public 9 hours each day, and contacts were made of every party which visited the museum, and every party seeing the ruins during visiting hours.

Guide and Contact Service: An average of 19 minutes each for 284 ruins parties and 21 minutes each for 341 museum parties kept all hands busy. During the week of Fire School at Chiricahua attended by Ranger Richert, Custodian Cotter contributed two days to keep the service at the museum uninterrupted the whole seven days.

Personnel Time: Museum: 118 hours 55 minutes. Ruins: 83 hours 40 minutes. Total time for Custodian, 123 hours; for Ranger Richert: 82 hours 20 minutes.

Park Service Visitors: Park Service personnel and friends of the Park Service included Technical Assistant James E. Rasbach of Jefferson National Expansion Memorial, St. Louis, Missouri (from whom it was learned John M. Weidman, 1946 Summer Ranger at Tuzigoot has just received an appointment as Historian at the Jefferson National Expansion Memorial), Naturalist D.S. King of Region Three who introduced us to his father, W.R. King, and Mr. A.E. Buchenburg, whose further suggestions and advice regarding our stabilization problems at the ruins were greatly appreciated. Tuzigoot was also visited by the mother of the U.S. Ambassador to Great Britain. Mrs. Douglas, who has long been a friend of Tuzigoot and the Verde Valley, recalled that on her previous visit in 1943, the Custodian was concerned over the imminent arrival of his first offspring, and was amused to discover her next visit found him equally concerned--over the second.

Stabilization: Tuzigoot faces the loss next month of the services of our expert repair man and adobe sepcialist, Felix Macias, who is leaving for California. His place will be taken by a Yavapai Indian who worked on the original excavation and "stabilization" in 1933-34. Stabilization progress meanwhile has been excellent, with the 4-1 adobe-cement mix, plus gravel temper and venetian red tinting to kill the cement color, working the best yet. Photographs of progress are being kept current.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is therefore unable to determine whether the CLPS is a genuine organization or a front organization for the United States government.

1. The first step is to identify the key components of the system. This includes understanding the hardware, software, and data involved.

1. The first part of the document is a letter from the President of the United States to the Congress, dated March 1, 1861. It is a very important document, as it contains the President's views on the secession of the Southern States. The President states that he has received the secessionist declaration from the State of South Carolina, and that he has taken the oath of office as President of the United States. He then discusses the constitutional question of secession, and concludes that he believes the Union is perpetual and that the Southern States have no right to secede. He also states that he will maintain the Union by force if necessary.

Tuzigoot April, 1947 Monthly Report, page 2

Maintenance: Tuzigoot is still up against the failure of the contractor to furnish the remaining 700 feet of 2-inch pipe needed to complete replacement of the worst section of the water line to the Monument. Luckily, with the end of the frosts, the line has suffered fewer breaks, and we have managed to keep it in operation.

Work has begun on the development of the trails system at the ruins in keeping with the Master Plan, and bitumuls mixtures and crushed rock surfacing is being laid. A dangerous slope on the west side has been eliminated and a retaining wall for the new grade constructed at the edge of the hill. By next month, it is hoped that all but wheel-chair invalids can make their way around the ruins and even see Tuzi, the 700-year-old baby.

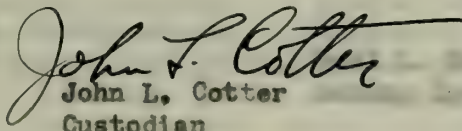

We are pleased to report the additional receipt of Army surplus, including a large office desk, file cabinet, "jerrycans" and a pair of 8-foot hooks. With our new equipment in place, we have observed that it is now possible to cross our combined furnace room-and-office without touching the floor.

Last week, with the aid of a hot tip from a youngster whom we slipped four bits, we located the purloined directional sign missing now two months. It had been used as a surf board by some imaginative kids and had ended up stranded on a rock dam half a mile down the Verde from the bridge. By painstaking unwarping and repainting by Ranger Richert, the sign is now remounted at its old stand.

Project Completed: Just as she had completed the Herbarium the day before the first Miss Cotter was due, the HONP has again won a thrilling race-- this time to complete a new slide talk on The Indians of Arizona for Region Three before the arrival of our second infant. More darned excitement.

Project to be Promoted: The Custodian has used the prospects presented by the fine new Master Plan for Tuzigoot, just completed by Region Three, to arouse a mighty desire on the part of the Verde Valley Chamber of Commerce and Yavapai County leaders including State Senator Sam Rood, Ersel Garrison and V.V.C.C. Secretary Thomas R. Jones to see the new road projected for access to Tuzigoot from Highway 89 completed. If no way can be found to use Federal funds for this road, it is hoped that the chief land owner, who is already interested, will be persuaded to give a right-of-way to the County for the construction of the road over his property.

Free Literature Supplies: All supplies of this material are now completely exhausted at Tuzigoot.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of April, 1947:

Weather: Dry and windy. Fire danger is higher this year than any of the 53 years the Weather Bureau has been operating in Arizona. The average winter snowfall for Flagstaff is nine feet, but we have only had 1.74 inches of precipitation this year.

Visitors. 1,099 of the 1,658 visitors were contacted at the Observation Point and sixty botany students from the Arizona State Teachers College were conducted on the ruins trip. About 909 visitors made the ruins trip unattended, and 161 picnickers, in 33 parties, used the picnic area.

Noteworthy Visitors. Jack Cotter; A. E. Buchenburg; David Jones; Bob Upton; Jimmy Brewer; Don Erskine; H. Lellesgard and his photographer, Stan Davis; Hunter Stratton, former employee at Chiricahua, and Mrs. Stratton; Bill and Katherine Wilson of Rainbow Lodge; and, Homer Hastings.

Activities. A light plant was installed and temporary light fixtures are in service at both residences; a telephone was installed at the ranger's residence; the custodian spent two days, and the ranger spent one, at the USFS fire school; the boundary fences were inspected and some repairs made; the ranger spent four days helping Custodian Brewer move and set-up some surplus equipment at Navajo; considerable spring cleanup of grounds and picnic area was accomplished; the custodian spent several days acquiring information concerning the proposed physical improvement program of rehabilitating the roofs of comfort station and administration building, rehabilitating the water line, rehabilitating the telephone line, installing an electrical distribution system, and improving the picnic area.

Government Publications On Hand. 1,500 2-fold leaflets, 450 Location Maps No. 6, 275 NPS Briefs Maps and 10 Glimpses of the Nat'l Parks.

Paul L. Beaubien
Acting Custodian

[illegible]

1. Investment - The amount of money that is put into a business or project.

2000 2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021 2022 2023 2024 2025 2026 2027 2028 2029 2030 2031 2032 2033 2034 2035 2036 2037 2038 2039 2040 2041 2042 2043 2044 2045 2046 2047 2048 2049 2050 2051 2052 2053 2054 2055 2056 2057 2058 2059 2060 2061 2062 2063 2064 2065 2066 2067 2068 2069 2070 2071 2072 2073 2074 2075 2076 2077 2078 2079 2080 2081 2082 2083 2084 2085 2086 2087 2088 2089 2090 2091 2092 2093 2094 2095 2096 2097 2098 2099 2100 2101 2102 2103 2104 2105 2106 2107 2108 2109 2110 2111 2112 2113 2114 2115 2116 2117 2118 2119 2120 2121 2122 2123 2124 2125 2126 2127 2128 2129 2130 2131 2132 2133 2134 2135 2136 2137 2138 2139 2140 2141 2142 2143 2144 2145 2146 2147 2148 2149 2150 2151 2152 2153 2154 2155 2156 2157 2158 2159 2160 2161 2162 2163 2164 2165 2166 2167 2168 2169 2170 2171 2172 2173 2174 2175 2176 2177 2178 2179 2180 2181 2182 2183 2184 2185 2186 2187 2188 2189 2190 2191 2192 2193 2194 2195 2196 2197 2198 2199 2200 2201 2202 2203 2204 2205 2206 2207 2208 2209 2210 2211 2212 2213 2214 2215 2216 2217 2218 2219 2220 2221 2222 2223 2224 2225 2226 2227 2228 2229 2230 2231 2232 2233 2234 2235 2236 2237 2238 2239 2240 2241 2242 2243 2244 2245 2246 2247 2248 2249 2250 2251 2252 2253 2254 2255 2256 2257 2258 2259 2260 2261 2262 2263 2264 2265 2266 2267 2268 2269 2270 2271 2272 2273 2274 2275 2276 2277 2278 2279 2280 2281 2282 2283 2284 2285 2286 2287 2288 2289 2290 2291 2292 2293 2294 2295 2296 2297 2298 2299 2300 2301 2302 2303 2304 2305 2306 2307 2308 2309 2310 2311 2312 2313 2314 2315 2316 2317 2318 2319 2320 2321 2322 2323 2324 2325 2326 2327 2328 2329 2330 2331 2332 2333 2334 2335 2336 2337 2338 2339 2340 2341 2342 2343 2344 2345 2346 2347 2348 2349 2350 2351 2352 2353 2354 2355 2356 2357 2358 2359 2360 2361 2362 2363 2364 2365 2366 2367 2368 2369 2370 2371 2372 2373 2374 2375 2376 2377 2378 2379 2380 2381 2382 2383 2384 2385 2386 2387 2388 2389 2390 2391 2392 2393 2394 2395 2396 2397 2398 2399 2400 2401 2402 2403 2404 2405 2406 2407 2408 2409 2410 2411 2412 2413 2414 2415 2416 2417 2418 2419 2420 2421 2422 2423 2424 2425 2426 2427 2428 2429 2430 2431 2432 2433 2434 2435 2436 2437 2438 2439 2440 2441 2442 2443 2444 2445 2446 2447 2448 2449 2450 2451 2452 2453 2454 2455 2456 2457 2458 2459 2460 2461 2462 2463 2464 2465 2466 2467 2468 2469 2470 2471 2472 2473 2474 2475 2476 2477 2478 2479 2480 2481 2482 2483 2484 2485 2486 2487 2488 2489 2490 2491 2492 2493 2494 2495 2496 2497 2498 2499 2500 2501 2502 2503 2504 2505 2506 2507 2508 2509 2510 2511 2512 2513 2514 2515 2516 2517 2518 2519 2520 2521 2522 2523 2524 2525 2526 2527 2528 2529 2530 2531 2532 2533 2534 2535 2536 2537 2538 2539 2540 2541 2542 2543 2544 2545 2546 2547 2548 2549 2550 2551 2552 2553 2554 2555 2556 2557 2558 2559 2560 2561 2562 2563 2564 2565 2566 2567 2568 2569 2570 2571 2572 2573 2574 2575 2576 2577 2578 2579 2580 2581 2582 2583 2584 2585 2586 2587 2588 2589 2590 2591 2592 2593 2594 2595 2596 2597 2598 2599 2600 2601 2602 2603 2604 2605 2606 2607 2608 2609 2610 2611 2612 2613 2614 2615 2616 2617 2618 2619 2620 2621 2622 2623 2624 2625 2626 2627 2628 2629 2630 2631 2632 2633 2634 2635 2636 2637 2638 2639 2640 2641 2642 2643 2644 2645 2646 2647 2648 2649 2650 2651 2652 2653 2654 2655 2656 2657 2658 2659 2660 2661 2662 2663 2664 2665 2666 2667 2668 2669 2670 2671 2672 2673 2674 2675 2676 2677 2678 2679 2680 2681 2682 2683 2684 2685 2686 2687 2688 2689 2690 2691 2692 2693 2694 2695 2696 2697 2698 2699 2700 2701 2702 2703 2704 2705 2706 2707 2708 2709 2710 2711 2712 2713 2714 2715 2716 2717 2718 2719 2720 2721 2722 2723 2724 2725 2726 2727 2728 2729 2730 2731 2732 2733 2734 2735 2736 2737 2738 2739 2740 2741 2742 2743 2744 2745 2746 2747 2748 2749 2750 2751 2752 2753 2754 2755 2756 2757 2758 2759 2760 2761 2762 2763 2764 2765 2766 2767 2768 2769 2770 2771 2772 2773 2774 2775 2776 2777 2778 2779 2780 2781 2782 2783 2784 2785 2786 2787 2788 2789 2790 2791 2792 2793 2794 2795 2796 2797 2798 2799 2800 2801 2802 2803 2804 2805 2806 2807 2808 2809 2810 2811 2812 2813 2814 2815 2816 2817 2818

REMARKS: General publicity for the event has been beyond all reasonable expectations, and Play Day and Easter Services being featured in newspapers throughout the entire Southwest.

WHITE SANDS

EXPLANATION: No explanation, unless mention of detail, has been received as to the fact that Alamogordo, New Mexico

WIND AND TRAIL: The heavy winds previously mentioned on April 21, 47 were by dry weather, and in some cases rain. There has been only a trace

MEMORANDUM for the Regional Director,
Region Three;

Following is our monthly narrative report for the month of April.

VISITATION:	This month	Travel Yr.	Fiscal Yr.
	To date	To date	To date
Total Visitors	11,961	40,927	74,443

April has been outstanding from the standpoint of the number of visitors, the total exceeding all records in the history of the monument for a like period. This has been in spite of unusually heavy winds which always cut in on our attendance. The figures of course include our Easter sunrise services and Play Day activities. Play Day attendance, we feel, was cut at least in half by adverse weather conditions. Assistance from other agencies and from the City of Alamogordo made possible our Play Day without any delay, which seemed inevitable with blocked roads but two days before. The event was again staged without any major accident or injury. We were favored with visits by Hon. Thos. J. Mabry, governor of the State and Mrs. Mabry; also the State Supt. of Public Instruction, Mr. Rhodes, and Associate Regional Director E. T. Scoyen. The assignment of additional service personnel from adjoining areas assisted materially, and to their help is due much of the success of the event.

We were favored with a visit by Foresters George Walker, Stew Carlson, and Bill James, which we enjoyed; and we sent these boys merrily on their way in one of our pick-ups, the Regional car being left in the garage here for repairs. The car is now again in the hands of the Foresters and enroute to Big Bend.

Several visits were made by army personnel on inspection trips, and various government and state officials passing through. One visit from the Army resulted in a request for permission to bivouac two regiments from Fort Bliss the latter part of the month. Permission was, of course, granted and we expect these visitors the next few days.

PLANS, MAPS & SURVEYS: We are attempting a general clean-up with a view to disposing of all remaining surplus property and getting the material which we have obtained from surplus up in top shape. We have only minor items now left, and it is hoped distribution may be made of this in the near future.

repaired. The car is now again in the hands of the Foresters and awaits to
be one of our pick-ups, the National car being left in the garage here for
and Bill James, which we enjoyed; and we soon drove back mostly on a dirt road
We were favored with a visit by Foresters George Walker, Tom Walker,

It is a well known fact that the distribution of the surplus is a matter of great importance to the workers. We are attempting a general clearing up of the surplus, and we are distributing it in such a way as to give the workers a share in the surplus. We have only about 100,000 shares now left, and it is a well known fact that the distribution of the surplus is a matter of great importance to the workers.

PUBLICITY: General publicity for the area has been beyond all reasonable expectation, with Play Day and Easter services being featured in newspapers throughout the entire Southwest.

COMPLAINTS: No complaints, either written or verbal, have been received on either the Park Service or the White Sands Concession.

ROADS AND TRAILS: The heavy winds previously mentioned have, with the extremely dry weather, given us considerable road trouble. There has been only a trace of moisture which increases our road maintenance problems materially. On several instances we have had to close off portions of the loop because of drifting sand. The City of Alamogordo, Prestridge Lumber Company, and the Army Air Base all came to our rescue with road patrols and operators for a two-day period. We estimate that the work done in those two days by all of this donated equipment would equal a minimum of two weeks work with our own equipment. The antique Weir in its lack of efficiency is certainly dramatized when working right along beside the modern road machines. One can scarcely realize the difference without actually seeing the results.

CONCESSION: The White Sands Service Company has experienced a month almost parallel to that of our own experience; and in spite of the cold and wind on Play Day all of the booths made a nice profit for their efforts.

RANGER SERVICE: Ranger service has been held to a minimum from the standpoint of contacts, with all of the outside work necessary to carry on. Fire training was given Ranger Chittum in connection with the Lincoln National Forest school at Ruidoso, and Ranger Steel is enroute to the Big Bend fire school. Museum contacts have been merely as we could snatch a few moments; and certainly has not been consistent with the service desired.

It is very probable that with the increased visitation we shall have to design split-shifts to take care of the increasing number of visitors who come after closing time. It is hoped that the Temporary Ranger will relieve the strain on the regular ranger force.

UTILITIES: It is very probable that with the very dry condition existing throughout the entire region our water problem in Alamogordo may become drastic. A check on the Dog Canyon springs indicates a flow much less than has been observed in the several years over which we have watched it. It is, however, no less in proportion, if as much, as other springs supplying the supply of Alamogordo. With this minimum flow Dog Canyon will supply an excess of water for White Sands for many years to come. We have been questioned several times of late by Army personnel regarding this flow, and I suspect they may again be considering the possibility of using this water to supplement the dwindling amounts obtained from the City. We shall keep in close touch with this water situation and advise your office in case of any new developments.

TRIVIA: It was necessary for Carroll Reeves, our clerk, to resign due to the heavy winds and dust conditions, leaving us without a clerk once more. Carroll hopes to seek a location where there is less dust and more moisture than has been experienced during his five-months here. He will probably never know the thrill of living in the Southwest once one gets by the first 40 or 50 years.

Memorandum for the National Director, Bureau of Land Management

There follows a report of activities during the month of April, 1947:

Visitors and public use

Travel and other matters

Travel The level of visitors for the month had shown a slight increase over April of last year. In spite of the poor condition of the extreme road, the interest and the most appreciative comments to come. That is, despite all handicaps a considerable increase in visitor travel and it was due to be a travel year of record.

Weather Wind and dust storms caused us that the early months were hard. Only traces of precipitation are recorded. But as they have not brought the promised change toward of a more moderate of heat, dry and clear.

Roads With the absence of rain the surface will continue to grow worse. That is, complete of the rough and dusty road. However after the attention is supplied nearly all have in a much more agreeable way than their usual. Despite still some that fragments of road are left after starting in a short way have turned that because of the road condition. Because of the roughness of the road and the dryness of the more winter it was felt suitable to keep the road open from about to about closed. In a month or travel had come in from that way, except for the occasional drive and that came from in spite of the road signs.

Electricity Electricity was at the maximum's condition completing with. Weather did not have any effect on electricity in shape. That is, the had turned a new of gas and oil have to give and electricity has been to

Plans for the next year have been made for the next year. This work will be completed as a necessary measure can be obtained and the work to be.

Employees effort to be a staff a temporary change. General of the Bureau of Land Management had approved and interest. However because of the uncertainty of money was still better pay at the necessity of maintaining value during the lower season, no application has been received.

John M. Paris,
Custodian.

-----Wupatki----- NATIONAL MONUMENT

-----Flagstaff, Arizona-----

-----28 April-----, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of April, 1947:

Visitors this month: 395 Travel Year to date: 1347

Travel: The total of visitors for the month has shown a slight increase over April of last year. In spite of the poor condition of the entrance road, the interested and the most appreciative continue to come. Vicinity reports all indicate a consistent increase in visitor travel and it bids fair to be a travel year of record.

Weather: Winds and dust storms remind us that the windy months are here. Only traces of precipitation are recorded. How we wish April had brought its proverbial showers instead of this super-abundance of 'warm, dry and clear.'

Roads: With the absence of rain the entrance road continues to grow worse. Visitors complain of the rough and dusty road. However after the situation is explained nearly all leave in a much more agreeable mood than upon their arrival. Reports still come from Flagstaff of visitors who after starting in a short way have turned back because of the road condition. Because of the roughness of the road and the dryness of the deep cinder it was felt advisable to keep the back road from Sunset to Wupatki closed. As a result no travel has come in from that way, except for the occasional brave soul that comes down in spite of the road signs.

General: Electricians worked one day at the Custodian's residence completing wiring, tracing old lines and getting the installation in shape. Thus Wupatki has entered a new era, for the day of gas and oil lamps is past and electricity has taken their place.

Plans for the construction of temporary housing for Sunset is taking shape. This work will be completed as soon as necessary materials can be obtained and the tents arrive.

Considerable effort has been made to find a Temporary Ranger. Several students at Arizona State College, Flagstaff had expressed some interest. However because of the opportunity of summer work with better pay or the necessity of continuing school during the summer session, no applications have been received.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT

REPORT OF THE REGIONAL DIRECTOR, REGION THREE

There follows a report on activities of the National Monument during the month of April, 1937.

Activities during month: 1937

Travel: The staff of the National Monument has made a trip to the south end of the park. The trip was made in order to see the monument and the surrounding area. The trip was made in order to see the monument and the surrounding area. The trip was made in order to see the monument and the surrounding area.

Work: The staff of the National Monument has been working on the monument. The work has been done in order to see the monument and the surrounding area. The work has been done in order to see the monument and the surrounding area. The work has been done in order to see the monument and the surrounding area.

Look: The staff of the National Monument has been looking at the monument. The look has been done in order to see the monument and the surrounding area. The look has been done in order to see the monument and the surrounding area. The look has been done in order to see the monument and the surrounding area.

Check: The staff of the National Monument has been checking the monument. The check has been done in order to see the monument and the surrounding area. The check has been done in order to see the monument and the surrounding area. The check has been done in order to see the monument and the surrounding area.

Plan: The staff of the National Monument has been planning the monument. The plan has been done in order to see the monument and the surrounding area. The plan has been done in order to see the monument and the surrounding area. The plan has been done in order to see the monument and the surrounding area.

Investigate: The staff of the National Monument has been investigating the monument. The investigation has been done in order to see the monument and the surrounding area. The investigation has been done in order to see the monument and the surrounding area. The investigation has been done in order to see the monument and the surrounding area.

One mile Thunderbird markers were erected at the entrance of the monument on Highway 89. This completes the erection of highway entrance signs.

Publication service cards provided by the Southwest Monuments Association have been made available to the visitor. These have been placed in an appropriate location near the registry desks.

Mr. and Mrs. Rex Fleming, Photographers from Santa Barbara, California made a return visit to Wupatki the latter part of the month. Winds and overcast skies contrived to make this visit most discouraging. The Flemings last visit was in early January of this year. At that time they were able to get some excellent photographs of points of interest, both in color and in black and white.

Grazing: The C O Bar Company are moving their cattle out early this year. A count taken about the middle of the month showed a reduction from last month's 400 head to about 200 including calves. They advise that due to lack of rain and the resultant dry grass it has become necessary to move the stock to the summer range earlier than they had previously planned.

Water Supply: Both springs continue to show a decline in their flow. Heiser Spring fell from 1878 g.p.d. for March to 1763 g.p.d. for the current month, a drop of 115 gallons. Wupatki Spring, which has been showing a consistent monthly increase since January, has suddenly dropped from 822 g.p.d. for March to 467 g.p.d., a decrease of 355 gallons from that recorded for the previous period. It is evident the drouth is taking its toll of our springs.

N.P.S. Visitors: Ranger and Mrs. Aubuchon stopped for a short time at Wupatki on their return from Navajo to Walnut Canyon.

The Custodian meet with Assistant Regional Director Davis, Regional Landscape Architect Cornell, Regional Architect Bennett and Regional Archeologist Reed on March 31 at Flagstaff for a short conference.

Signs: Letters for the remainder of Wupatki cut-out type signs are in the last stages of completion.

Activities of S.W.N.M. Stabilization Laboratory: Additional work has been done toward the installation of running water at the new laboratory site in the Heiser Spring area. On the 11th Collaborator Buchenberg went to Grand Canyon to make further preliminary examination of the Tusayan Ruin, preparatory to recommendations for its stabilization. Mr. Buchenberg has given generously of his time in assisting with the electrical installation at Wupatki.

Publicity: At the request of Editor Platt Cline of the Arizona Daily Sun, Mrs. Jones is submitting local news items for publication in Flagstaff's daily paper.

Richard VanValkenburg in a recent issue of Desert, gave a description of a curing ceremony of some of the local Navajos. This took place during the CWA excavation at Wupatki in 1933-1934.

and also transmitted herewith for review of the Secretary of the
Department on August 22. This completes the review of the report
submitted.

Additional copies of the report are being furnished to the
various departments of the Government. These have been placed in the
appropriate files in the policy section.

Very truly yours,
The Secretary of the Department.

SANTA FE, NEW MEXICO

June 11, 1947.

MEMORANDUM for ~~Regional Director, Santa Fe, New Mexico~~

Following is the narrative report for naturalists of the Southwestern National Monuments for the month of May, 1947.

Staff Activities - General

Naturalist Dale S. King was in the office during the whole month.

Archeologist Charlie Steen returned from relief duty at Tonto National Monument on May 13 and spent the remainder of the month on various jobs concerning ruins stabilization, together with some work on the excavation report for Tonto.

Naturalist Maurice Sullivan reported for duty May 14. He spent considerable time getting acquainted with regional office personnel, the library and photographic files, and general organizational routine. He made a one day trip to Sandelier on personal time, and visited Capulin Mountain May 22 through May 25. He left Santa Fe May 30 for a three week trip to include Organ Pipe Cactus, Muncacori, Chiricahua, and White Sands.

Administration - Interpretation

The usual reports were compiled and written, and 56 letters were written.

Steen partially re-wrote and had mimeographed a guide leaflet for Montezuma Well.

Sullivan sorted over the old files of former Regional Biologist McDougall, saving wildlife reports, special reports, reprints, and material of permanent value. He revised the mimeographed leaflet for Arches, mailed supplies to custodians, answered letters, and wrote various companies for scientific catalogs. He requested several scientific reprints for the library, and prepared a partial list of books and equipment needed so that purchases can be made if sums are available at the end of the fiscal year.

Public Relations and Extension Services

Steen sent information concerning Tonto National Monument to the editor of the National Parks Magazine for the proposed July issue on national monuments. He also corresponded with the superintendent of

Summary of the Year 1916

The National Park Service has been very busy during the year 1916. The National Park Service has been very busy during the year 1916. The National Park Service has been very busy during the year 1916. The National Park Service has been very busy during the year 1916.

the Fort Apache Indian Agency, Whiteriver, Arizona, who asked for advice from the National Park Service on the proposed stabilization work at Kinichba ruin on the reservation.

King handled publicity for a Boy Scout Jamboree which was held in the Santa Fe Plaza on May 17. Organizational arrangements and committee work was donated by Region Three Office personnel to the Boy Scout Committee, headed by Chairman M. T. Seoyen, and Honorary Chairman M. R. Tillotson.

A letter was written attempting to coordinate preparation of radio scripts from the National Park Service areas around Flagstaff to be used in a proposed series of broadcasts this summer by the local station.

Further correspondence ensued with a scientist who is proposed as a collaborator in Regions Three and Four.

Accessions - Other than Library

A quantity of excellently printed herbarium labels was received from Eastern Museum Laboratories.

Research and Observations

Steen accomplished further work on the report of excavations at Tonto National Monument before the war. He mailed several textiles to Mrs. Kent at the University of Arizona, including one specimen, of very fine weave, which was possibly of modern origin. Inspection of the fiber and thread manufacture showed it to be prehistoric.

Sullivan had correspondence with a scientist who applied to collect vertebrate mammals at White Sands this summer. He also furnished for the Custodian at Montezuma Castle information concerning requirements for Christmas check lists of birds.

Region Three Office Loan Library

Accessions for the months totalled 85, included 15 books, 36 pamphlets and 34 periodicals.

There was received from the Custodian of Casa Grande a copy of a pamphlet written by the first Custodian of that Monument. This pamphlet forms a valuable addition to the history of the monument, and the Casa Grande staff is to be complimented for their alertness in obtaining it.

Further correspondence was had with the Director's office concerning an attempt to obtain historical library material for Montezuma Castle.

Southwestern Monuments Association

The warranty deed and abstract of title for the Hubbard Mound property near Astec Ruins were received from the Custodian, Astec. These papers were reviewed by the lands division of the Region Three Office.

For more information regarding this or other staff positions, call 800-368-7263 or visit our website at www.irs.gov.

11. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, and the Bureau of Reclamation, and is being furnished to you for your information:

A further and serious difficulty is mentioned in the text of the book, but it is not clear from the text whether it is a problem of the book or of the subject.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.

(Faint, illegible text at the bottom of the page)

It is a well-known fact that the United States has a large and growing population of Negroes. This population is not only growing in number but also in its influence on the life of the country. The Negro population is becoming more and more a part of the American people, and its influence is becoming more and more felt in all the branches of American life. The Negro population is becoming more and more a part of the American people, and its influence is becoming more and more felt in all the branches of American life.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the root cause of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and monitoring the progress of the plan. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any lessons learned from the process.

and were forwarded by Executive Secretary King to the Director for review. Thus changes and corrections can be made and the documents put into acceptable shape before the Association actually completes purchase of the property for eventual donation to the United States Government for addition to the Monument.

Recording Secretary Allan Vedder worked three days per week throughout the month handling all Association work, and considerably relieved the burden formerly carried by Executive Secretary King.

The final draft of the manuscript, the cropped illustrations, and the dummy of "Poisonous Dwellers of the Desert" by Matt H. Dodge were prepared by King and forwarded to a printer on May 29, for a quotation price to publish. An attempt will be made to obtain two other quotations. It is hoped the booklet may be issued within a very few weeks.

Unusual Activities - Conferences

Members of the Archeological and Natural History interpretive staffs of Southwestern National Monuments and Region Three Office met with administrators in a conference concerning the suggested closing of Montezuma Castle to visitors, due to progressive deterioration of the ruins and danger to visitors. Definite decision was to limit visitors in the ruin at one time to ten people. The decision to close the ruin was deferred pending further study and comment from the field and from the Director's Office.

Planning

Conferences were held with members of the Landscape Architect Division on Master Plans for Saguaro, Chiricahua, Tonto, Sunset Crater, and Wupatki.

Visitors

Custodian Bright, Ranger Onstott, Ethnologist Alice Marriott, Former Regional Geologist Gould, and Mr. and Mrs. Horace M. Albright.

Ruins Stabilization

Steen spent May 15 through 30 mostly on stabilization affairs, including the preparation of records of Aztec Ruins for binding.

A letter of instruction regarding stabilization recordation was prepared to the Custodian, Tuzigoot. A suggestion was made to the Custodian, Wupatki, that the objectionable restoration at Malakihu be removed, if possible, during this fiscal year. Arrangements were made to send Archeologist Aide Lancaster to Tumacacori for the month of July to supervise stabilization work there and to provide relief guide duty during the custodian's absence.

An additional \$400 of stabilization funds were allotted to Tuzigoot.

Steen took delivery on a small cement mixer purchased locally, and will deliver it to Chaco Canyon the first week in June.

and were furnished by the same person. The following are the names of the persons who were furnished with the same information: [illegible]

Projects for Insuing Month

King will remain in the office handling reports due at the end of the fiscal year and other routine.

Steen will leave the office during the first week of the month on a week trip to Chaco Canyon, Nupatki, and the Fort Apache Indian Reservation.

Sullivan will spend the first two weeks of June at Organ Pipe Cactus aiding in a cattle count there and becoming acquainted with the area, and then will visit the Santa Rita Range Reserve, Tumacacori, Chiricahua, White Sands, and return to Santa Fe on June 22. The remainder of the month he will spend on routine activities as well as re-arranging and cataloging the pamphlet and reprint files of the library.

Arches

NATIONAL MONUMENT

Moab, Utah

May 27,

1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of May, 1947:

GENERAL: The Board of Director's of the Denver and Rio Grande Western Railroad are planning a trip through the scenic areas of Southeastern Utah, which will include Arches National Monument. The trip was originally planned for May 30th to June 1st but has been postponed until probably the middle of June. It is being sponsored by Mr. Charles Redd of LaSal, Utah, who will be assisted by the various civic organizations in the vicinity.

TRAVEL: Out travel for the month was more than double that for May, 1946 with a total of 117 cars and 397 people. This brings our travel year to date to 1589 visitors and the fiscal year to 2564. We had representatives from 24 states, as well as Italy, British Columbia and the Canal Zone.

INTERPRETIVE SERVICES: Thirty eight parties containing 90 people were contacted at headquarters, 25 parties of 78 people were contacted in the Windows section, four guided trips were taken with 17 people and consisted of trips to the Devil's Garden, Delicate Arch and Windows sections. Two of these trips were community educational trips for Moab business people, one to the Devil's Garden and one to the Windows. The response was small but those who attended enjoyed the trips and it will help considerably in getting accurate information for visitors in Moab. Three illustrated talks were given by Ranger Walker during the month, one to a group of Boy Scouts, and the other two to interested visitors. Fifteen persons were in attendance.

ROADS: The Utah highway department installed regulation junction and directional signs at the Windows road junction during the month. No extensive maintenance work was performed on the approach road, which is still in good condition.

MAINTENANCE AND CONSTRUCTION: Mileage and directional ^{signs} at headquarters and the Windows road junction were repainted. Picnic tables were repainted and garbage cans installed at the picnic area and parking area in the Windows section.

May 27, 1947

MEMORANDUM FOR THE NATIONAL MONUMENT, Jackson, Wyoming

The following is a narrative report for the month of May, 1947.

GENERAL: The month of May was a very busy one for the monument. The weather was generally good, with some rain in the latter part of the month. The monument was visited by a large number of people, and the staff was very busy in attending to the needs of the visitors. The monument was also visited by a number of school groups, and the staff was very busy in attending to the needs of the students.

TRIP: One trip was made for the month, and it was a very successful one. The trip was made by a group of people, and they were very happy to see the monument. The trip was made by a group of people, and they were very happy to see the monument.

INTERESTING EVENTS: There were a number of interesting events during the month. One of the most interesting events was the visit of a group of people to the monument. They were very interested in the monument, and they were very happy to see it. Another interesting event was the visit of a group of people to the monument. They were very interested in the monument, and they were very happy to see it.

ROAD: The road to the monument was in good condition, and it was very easy to drive. The road was in good condition, and it was very easy to drive. The road was in good condition, and it was very easy to drive.

WILDLIFE AND VEGETATION: The wildlife and vegetation in the monument were in good condition. The wildlife was in good condition, and the vegetation was in good condition. The wildlife was in good condition, and the vegetation was in good condition.

Page 2, Arches May Marr. Rpt.

On May 15th, with the help of Ranger Redd of Natural Bridges, the 500 gallon water storage tank was put in place at the Windows parking area. During my absence at Mesa Verde, Ranger Walker made the distribution line installation and now that we have the stake truck back from Chaco Canyon, we should be able to complete the installation and haul water for same. We hope that our visitors will have water available there within the next week.

A spur telephone line was strung from the quarters to the office, by Ranger Walker, and we now have a phone there, thanks to the Midland Telephone Company who kindly loaned us an army field set until we can get proper equipment for a permanent installation.

RESEARCH AND OBSERVATION: The group of Brigham Young University professors and students making a plant and animal survey of the monument returned to headquarters on April 27th after what was stated by them, to be an enjoyable three days. Word recently received from Dr. D. Eldon Beck, a member of the party and collaborator with the Service, states that spiders and birds collected have all been identified and that the identification on mammal and insect collections is going forward rapidly. Plant collection has been sent to the National Museum for determination.

WEATHER: Rain fell on April 27th and May 9th, 10th, 14th and 15th. Heavy winds have blown intermittently all month and the thermometer registered close to 90 degrees on several occasions.

MISCELLANEOUS: Estimates were submitted for Arches and Natural Bridges National Monuments for the fiscal year of 1949.

RANGER SERVICE: Billy Walker of Moab, Utah entered on duty as temporary park ranger on May 1st at 8 a. m. Arches will now be a two man monument for the balance of the season.

NATIONAL PARK SERVICE VISITORS: Superintendent Rose of Mesa Verde National Park and Messrs Cornell, Bennett, Lassiter and Thomas of Regional Office visited the area on May 7th.

Howard Young and Phillip Kearney of Regional Office stopped by during my absence at Mesa Verde and then again on May 26th on their way back to Santa Fe.

Assistant Regional Director Davis and family stopped by on the 23rd of May, enroute to Washington on annual leave. I was at Mesa Verde at the time and was certainly sorry to have missed them.

Custodian Brent Finch of Colorado National Monument and his wife stopped on May 19th and 23rd and I missed them on both trips.

SPECIAL ACTIVITIES: A trip was made to Chaco Canyon National Monument on

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Page 3, Arches May Narr. Rpt.

May 9th to pick up war surplus equipment assigned to Arches and Natural Bridges National Monuments. Heavy rain occurred on the night of May 9th and I slipped and slid into Chaco at 2 p. m. on the 10th. It took me 4 hours to drive the 25 miles from Blanco Trading Post to headquarters. Equipment was loaded and I left Chaco at 8 p. m. accompanied by Custodian McNeil and Ranger Guillett in the Chaco pickup. After covering 12 miles in 2 hours we gave up the ship and returned to headquarters in the pickup. It looked like it would be three or four days before we could move the truck so I returned to Arches in the Chaco pickup, thanks to "Bearhide" McNeil, on May 11th. Ranger Guillett drove the truck load of equipment to Mesa Verde for the fire training conference and we exchanged trucks there. I had heard many stories about the Chaco mud but had to experience same in order to appreciate their authenticity.

The custodian was absent from the monument from May 19th to 23rd inc. in attendance at the Fire Training Conference at Mesa Verde National Park. The meeting was a great success and I returned sadder but wiser, I hope, as I found that the participants have no use for a Sergeant-at-arms or his assistant.

May 2nd to 4th of 1947 was a period of intense activity in the New York office of the United States Customs and Border Protection. During this period, the office was engaged in a series of investigations and operations which were of great importance to the Government. The following is a summary of the activities of the office during this period:

On May 2nd, the office received information from the New York office of the Federal Bureau of Investigation (FBI) regarding a series of suspicious activities in the New York area. This information was immediately forwarded to the appropriate authorities for their consideration.

On May 3rd, the office conducted a series of interviews with individuals who had been identified as being involved in the activities mentioned above. These interviews were conducted in a confidential manner and were of great value to the investigation.

On May 4th, the office conducted a series of operations which were designed to identify and locate the individuals mentioned above. These operations were conducted in a coordinated manner and were of great success.

The results of these activities are being reported to the appropriate authorities for their consideration and action.

The following is a list of the individuals who were identified as being involved in the activities mentioned above:

- John Doe
- Jane Smith
- Robert Johnson
- William Brown
- Charles White
- Thomas Green
- James Black
- Richard Gray
- Joseph King
- Benjamin Lee
- Samuel Miller
- David Wilson
- Michael Young

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 May 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for May 1947.

WEATHER: Our April showers failing to appear during that month have certainly come during May when we have had 8 days of recorded rainfall with a total precipitation of 1.97 inches. Generally speaking we have had ideal tourist weather and altho our travel is slightly under that of a year ago we have not had the large attendance of school children which we had during May 1946.

MAINTENANCE. The drainage ditch has been functioning quite well with little attention beyond flushing, required.

The adobe-cement wall at the residence is undergoing repair by placing a new coat of cement-sand mixture over its entire surface. With no maintenance during the war years the wall was in quite poor condition.

Monument entrance signs were stained and varnished.

SPECIAL ACTIVITIES. The 8 May Engineer Diehl and Architect Barnett surveyed the "Hubbard Mound" area for acquisition by the Southwest Monuments Association to be added to the Monument. The 17 May we transported the model "Casa Rinconada" from Farmington to Chaco.

VISITORS. Foresters, Walker, Carlson and James visited the 18th. Chief Ranger Brown, Grand Canyon and Mrs Brown were in the 24th.

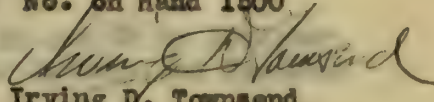

Interpretive Services. There were 499 visitors in 121 trips shown the ruins and 855 were visitors to the museum in 198 trips.

Increase in travel. We have had 855 people in 262 cars from 37 states, Wash. D.C., Norway, Switzerland, Japan, Germany, Holland, Africa. These visitors from foreign countries are boni fide residents, not returned "GI's". Travel during May a year ago was greater by 136 visitors, but for the current year travel increases regularly.

BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

May 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of May, 1947.

Weather and Roads

Precipitation for the month of May was slightly above the 13 year average of 1.35 inches with a total of 1.80 inches being recorded this May to date. The maximum temperature was 93° on May 3 and the minimum was 33° on May 12. Thunderstorms were experienced on 7 days. Generally warmer weather was experienced during the first week than during the rest of the month.

Road conditions have improved as a result of the precipitation. Maintenance-man Wendland graded the entire approach road following the showers of May 4 and 5 and again after May 11. The roads and trails crew continued repair work on the oiled surface section leading into the Canyon.

Travel

Travel was light during the first two weeks as a result of the weekend storms and cool weather but increased the latter part of the month to total 2534 visitors. This figure is 398 less than that for May, 1946. 573 motor vehicles, two bicycles, and six horses were used as transportation by visitors. 151 visitor days were reported by Frijoles Canyon Lodge.

Interpretation

105 conducted ruins trips averaging 61.8 minutes each were attended by 1090 people. Visitation to the Stone Lions, Painted Cave, and Ceremonial Cave is beginning to increase. Preparations for the training of three seasonal rangers for interpretative work have been completed in anticipation of their arrival by May 30.

Fire School

The Bandelier fire school was conducted May 14 and 15 by Forester Walker of the Director's Office, Regional Forester Carlson and Forester

Memorandum for the Regional Director, Santa Fe, New Mexico

Transmits a report of the activities of the Banuelier National Monument for the month of May, 1934.

General Information

Investigation for the month of May was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows:

Bandelier National Monument was visited on May 12, 1934. The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows:

General

There was a visit to the monument on May 12, 1934. The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows:

Investigation

The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows:

Visit

The Banuelier National Monument was visited on May 12, 1934. The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows: The investigation was completed on May 12, 1934. The investigation was conducted by the Regional Director, Santa Fe, New Mexico, and the results are as follows:

James of the Region Three Office. Custodian Ted Sowers of Great Sand Dunes, Custodian Everett Bright of Gran Quivira, and the entire Bandelier staff attended the school. The general consensus was that the new plan of conducting fire schools produced more complete training of the monument staff than did the centralized schools attended by key personnel.

Forest Fire Protection

The fire control crew reported for duty May 1. Nine days of high fire danger marked the period April 28 to May 27, with the fire danger meter zooming close to the explosive zone on April 28 and May 3 to start the fire season off with a bang. Showers during mid-May reduced the danger for a time, but drying winds have nullified the benefits of the moisture and the danger is again rising.

Radio equipment to be used for communication during fire season to supplement the dependable telephone system has arrived. Technicians from Los Alamos are making the installation.

Personnel

Fire Control Aids Samuel A. Oren, Ollie A. Wendland, Cresencio Teribio, and Katherine M. Keefe entered on duty May 1. Mrs. Keefe resigned May 20 so that she might devote full time to the care of Joseph Clarence, newly adopted son of Ranger and Mrs. Joe Keefe. Mrs. Margaret F. Onstott was appointed to fill the position.

Rubel Duran and Jose Reuben Quintana began work May 14 as per diem laborers on roads and trails. Ed Wendland, foreman, was appointed to the recently approved position of maintenance-man, roads and trails on May 26.

Visitors

Naturalist Sullivan of the Region Three Office visited us on May 18. Charles H. Gould, former Regional Geologist, spent May 28 at Bandelier. C. B. Talbott, Travel Editor for the Cleveland News, spent May 28 at Frijoles Canyon Lodge.

School groups visiting Bandelier during May included two groups from St. Michael's in Santa Fe, two bus loads from St. Catherine's Orphanage in Santa Fe, two groups from Pojoaque, and the Indian Life Class from Adams State College in Alamosa, Colorado.

Visitors from the following foreign countries registered at Bandelier during May: Catun, Canal Zone; Nassau, Bahama Islands; Lima, Peru; Basel, Switzerland; Paris, France; England; Puerto Rico; Holland; and Los Alamos.

Frijoles Canyon Lodge

The Lodge opened all facilities for public use, except the saddle horse concession, on May 1. Mr. Hob Anderson came on May 15 to operate the saddle and pack horse concession for Mrs. Frye. Only 151 visitor days have been reported by the Lodge to date, but reservations for almost all available space have been made for the Memorial Day weekend.

Construction of the walk-in refrigerator room has been completed and we are now awaiting the installation of the compressor and cooling system by Alfords of Albuquerque.

Electrical System and Power House

Approval of an allotment of \$6000 has been made by the Director's Office for an addition to the power house to house the additional equipment we now have to furnish the necessary electrical current for the Lodge and monument facilities. Plans have already been drawn.

The shop has been rewired for 3 phase motors and the power drill, grinder, planer, circular saw and band saw obtained from surplus have been installed. Meters have been installed in the power house and collection from the Lodge for current used by the concessioner will be made effective May 1. Overhead fluorescent units have been installed in the offices and plans made to install fluorescent lights in the museum should funds become available.

Buildings and Grounds

Four tents have been erected in the campground for use by per diem laborers, fire crew members, and seasonal rangers. Installation of a "Stop" sign by the portal by the office is being made for protection of pedestrians visiting the comfort stations. Weeds in the ruins area have been treated with "Ammate" weed killer.

CANYON DE CHELLY NATIONAL MONUMENT

CHINLE ARIZONA

May 29, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of May, 1947

Weather

The early part of the month was dry and hot with a Maximum temperature of 98 degrees. The canyons stopped flowing much earlier than usual and travel was possible May first. On May 7 we had the first of much needed rainfall which continued thru May 8 for a total of .81 inches. Another nice shower came on May 23 which filled most of the tanks and raised the spirits of everyone. Nights have been cool with a Minimum of 37 degrees.

Administration

Office work connected with the approach of the end of the fiscal year has consumed some time. One trip was made to Gallup New Mexico to pick up equipment transferred to this area. The Custodian was absent from the area while attending Forest fire training conference at Mesa Verde National Park from May 19 to 27. Two days of annual leave were taken in order help open the Fishing season.

Maintenance

New signs were constructed for the Spider Rock area and for the new approach road which by-passes the Chinle School. A rod went out of the Dodge Army 2nd while in the canyon on Ruins stabilization work. By the use of our Dump truck and equipment and able help of Mechanic Art Freeman of the Indian Service we were able to Tow it thru seven miles of the Canyon. A new motor was installed at the Consolidated Indian garage with both the custodian and Ranger Benson assisting when time permitted. Roads have been graded to White House, And some work was done making a passable route as far as Mummy Cave. The curve north of the Headquarters was widened and the material used to surface other sections of the ruins road. Maintenance of roads and buildings has been carried out as time permitted thruout the month.

Changes were made in the Sewer line in the custodians residence and they may now be cleaned and unplugged with a great deal less effort.

Ruins Stabilization work was done at Mummy Cave with the building of a trail bypassing the talus slope, and the stabilization of weakend walls caused by undermining of squirrels and rats.

UNITED STATES DEPARTMENT OF JUSTICE

CRIMINAL DIVISION

May 22, 1937

Memorandum for the Regional Director, Boston Office.

The following is a report of activities of known or likely subjects of the Boston Office during the month of May, 1937.

Subject:

The early part of the month was very quiet with a minimum of activity. The only person known to be active in the Boston area was a person known as "Red". He was a member of the Boston office and was active in the Boston area. He was a member of the Boston office and was active in the Boston area. He was a member of the Boston office and was active in the Boston area.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Visitors

Dr. Thomas B. Noble Jr. and Mrs. Noble arrived during the early part of the month to accompany and assist the custodian in making a reconnaissance and ruins survey. It was necessary for him to return to Indianapolis sooner than he expected but he will return in the Fall. Dr. Noble is a photographer of note and has done some very fine work in photographing the Canyons. He has graciously offered us the use of any of his pictures for publication.

Mrs. Mary C. Wheelwright also visited the area in search of more ethnological and Navajo folklore information.

N.P.S. Visitors

Charles Carter, Landscape Architect from the regional office arrived on May 27, and was shown over the area by Ranger Benson.

Travel

A continued increase is shown over last years travel with 268 visitors this month as compared with 181 last year. Both travel and fiscal years continue to show sizeable increases.

Of the 268 visitors, a total of 168 persons comprising 16 parties were guided to the ruins or in the canyons. 36 were given interpretational talks at headquarters. A total of 57 hours was spent in contact work.

General

While the Custodian was at Fire school, A Mrs. W.R. Berger of Fort Worth Texas was nipped by a Navajo Dog belonging to Billy Jake. A more detailed report will be made when I have more fully investigated the Accident. Mrs. Berger was taken to the Indian Service Doctor for treatment where it was found that the skin had not been broken.

Two trips were made into the canyons to bring out sick Children. One was dead by the time Ranger Benson reached the Hogan. The other was brought to the Indian Service Hospital and is still seriously ill.

DRESS REPLY TO
SUPERINTENDENT

May 25, 1947

Memorandum for the Regional Director,
Region Three, National Park Service,
Santa Fe New Mexico,

There follows a report of the activities
in and around Capulin Mountain National Monument,

Visitors are estimated to be fifteen hundred for this
month.

Bringing total travel year to date six thousand
nine hundred sixty, and total travel, fiscal year to
date twenty one thousand nine hundred sixty,

Many schools have visited the Monument this
month, the largest of which was from Claude Texas,
This was the Claude Texas high school which had
thirty seven pupils, several chaperons and bus operator
this group all came in one bus and as far as I know
was the largest bus ever to drive up to the top
The operator told me it was a thirty thousand pound
rig and forty four passenger, He had no difficulty
at all in making the trip,

Special Visitor,

Mr Sullivan was a welcome visitor
to the Monument for a few days during the latter part
of the month, was making some pictures for the Service,
This was Mr Sullivan's first trip here and if I don't
miss my guess He's a good Egg, welcome back,

Pamphlets on hand for free distribution
Eleven thousand,

Weather,

Has been some cooler than average
possibly account of the many rains during the period
Six good rains totaling one and three fourths inches
making extra lush vegetation and Ranchers tell me
that we now have the finest grass for this time of
year that we have ever had,

Roads on the Monument have been kept in first class
condition all during the month,

All the five markers with their inserted
descriptions glassed in and puttied are now complete
and some are in place, This in the past has proved to be
very interesting to tourists and many have told me

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

May 25, 1947.

MEMORANDUM for the Regional Director
Region Three.

There follows the narrative report for Casa Grande National Monument for May, 1947.

General: Water, or rather the lack of it is the main topic of conversation amongst the people of the valley. The water table is still dropping gradually, although it has had some relief because of the shortage of electricity causing fourty pumps to stop pumping. .06 inches of rain on the 21st. was the only moisture we have received since January.

Weather: The really hot weather is upon us, and it has been noted in the decline of our visitors to the area. The first days of the month brought us record temperatures. 113 degrees temperature on May 3, made this a degree hotter than our maximum temperature of last year. The Weather Bureau says this is the hottest weather experienced in May in the last 52 years. A low minimum of 43 was recorded on the 25th. of April. All our maximums have been over 83 degrees.

Administration: The Bids for the refilshing of the utility area buildings were opened in the Regional Office on May 8th. The one bid was too high for the amount of money alloted for the work. Therefor architect Saunders visited the area on May 24th., and he along with the Custodian, inspected the roofs. The Cant Board was found to be in place and we believe now that we may be able to re-submit bids which will be within reason, and thus use the money alloted for the job.

Maintenance-Man, James L. Beehr retired on May 1, and shortly thereafter left for St. Louis. Thus with this retirement, position No. 4 was terminated, and maintenance position No. 6 was established and filled by Carroll Dale Barnett. Mr. Barnett is a veteran who was captured by the Japanese on the third day of the war and was a prisoner of war until the occupation of Japan. He and his wife are occupying quarters No. 2-4.

Chief Clerk Louis Castellum spent four days here with the Custodian and Ranger Schuft straightening out the Casa Grande inventory. In this connection, Ranger Schuft worked on the inventory here until May 20, and departed the following day for the other Monuments and eventually for the Regional Office where he will be on duty for approximately two months.

RECEIVED

These figures are available upon request from the author.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a legitimate organization or a subversive one.

1. The first of the three is the fact that the Government has been unable to obtain the necessary information to enable it to make a proper assessment of the situation in the country. This is due to the fact that the Government has been unable to obtain the necessary information to enable it to make a proper assessment of the situation in the country.

[illegible][illegible]

Visitors: May 1947 - 2043; May 1946 - 2062; Travel year to date - 1947- 27,828; 1946 - 20,894. This is a slight decrease over May 1946. This is also a decrease from April 1947, but is to be expected when the hot weather sets in. Also, it is to be noted, that the visitors are unwilling to spend as much time out at the ruins due to the heat.

Interpretive Services: Of the 2,043 visitors to the area, 979 made the Ruins trip in 136 parties averaging 41.6 minutes per trip. 778 made the Museum trip in 127 parties staying an average of 24.6 minutes. 1,064 people came into the area to picnic, look through the museum, or bring friends, but did not visit the ruins. 4 members of the armed forces are included in the total of visitors who went through the ruins.

Maintenance: The outdoor doors and window shutters and the main gate were oiled, and the various large trees were pruned of dead branches. The coolers in the administration building were put in condition for the summer season.

Trips Taken: Mechanic Stonehocker made a two day trip on the 6th. and 7th. to Organ Pipe Cactus Nat. Mon., and back, delivering the grader; and another trip to Phoenix on May 21, to distribute bid forms for the dump trucks.

N.P.S. Visitors and Visitors of Note: May 4, Supt. and Mrs. Bryant, Asst. Supert. Garrison of Grand Canyon, and Mr. and Mrs. Metggar were in for a brief visit. May 5th., Archeologist Steen was in to pickup the balance of the Surplus Equipment for Tonto Nat. Mon. May 10, Custodian Egermeyer of Saguaro Nat. Mon. dropped in on his way to Organ Pipe Cactus Nat. Mon. May 12, Mrs. Ella Whitmore Gamble and party visited the ruins. Mrs. Gamble is the daughter of the first Custodian here at Casa Grande from 1889 to 1899. May 12-15, Chief Clerk Castellum was in the area, to set up the new equipment accounting record and inventory our non expendable equipment. May 14, Custodian Baubien of Walnut Canyon delivered Mr. Castellum's car. May 22, former Directors and Mrs. Horace Albright visited the Monument for a few hours. It was our first visit with them since they left Yellowstone some 18 years ago. May 24, Architect and Mrs. Saunders were here. He was here in order to check over the roofing job in the utility area.

Leave Taken: Archologist Schumacher took sick leave for one day, on May 9.

Nature Notes: The tall Saguaro on the trail to the ruins had two large flowers on May 7, and it is still full of buds. All the other

cacti have stopped blooming, but there are a few blooms still on the
Cecillo. A large Barn Owl was chased into the middle room of the
Casa Grande on the morning of the 24th., by several hawks.. Several
young of the latter have been noticed around the ruins this month.
Due to the cool nights, the bats have been rather scarce during the
past two weeks. Archeologist Schumacher has brought the archeological
fact file, and the fauna and flora files up to date, and slightly
revised them. When Mrs. Ella Whittemore Gamble was here, Mr. Schumacher
interviewed her, and copied the pamphlet in her possession concerning
the ruins and her father.

May 26,

19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of May, 1947.

There were a total of sixty-four visitors to Chaco Canyon this past month. The number of visitors is less than those for March of this year, and only about one third the number for April. The people came in 30 automobiles from the states of California - 3 cars, 11 visitors; Colorado - 3 cars, 7 visitors; Michigan - 1 car, 2 visitors; Minnesota - 1 car, 2 visitors; New Mexico - 11 cars, 27 visitors; New York - 3 cars, 4 visitors; Oregon - 2 cars, 4 visitors; Texas - 1 car, 1 visitor; Utah - 1 car, 1 visitor; Washington - 1 car, 2 visitors; and Wisconsin - 1 car, 3 visitors.

Of these visitors, all sixty-four took a trip through the ruins, and formed a total of twenty-seven trips. Forty-one visitors listened to the museum lecture, and formed a total of eighteen parties. Total time, 38 hours and 15 minutes, Custodian - 23 hours and 45 minutes, Ranger - 14 hours and 30 minutes. Fifty-nine admissions were sold, and no complimentary tickets issued.

One written request was answered.

The coldest during the month was 30 degrees on the 30th of April, and the warmest was 92 degrees Fahrenheit on the 4th of May. An unusual amount of moisture fell during the month. The Navajos state that the grass is the best tht they have seen in years. There was .32 of an inch of rain fell on the 9th, .99 of an inch on the 10th, .44 of an inch on the 11th, and .49 of an inch on the 23rd of the month. Altogether, nearly a fourth of an usual year's rain fell during the month. As a result, the roads were a quagmire on more than one occasion. Custodian Mahan of A'ches National Monument started out with a loaded truck on the evening of the 10th, but bogged down about 10 miles from Chaco. He borrowed the Chaco pickup and went home. It was save al days before the loaded truck could be recovered. The trucks

REPORT FOR THE NATIONAL MONUMENT, COLORADO, NEW MEXICO
National Park Service

There follows the report of activities in the National Monument for the month of May, 1914.

There were a total of thirty-five visitors to the monument during the month of May. The number of visitors is less than during any other month of this year, and this is due to the fact that the weather was not so favorable as in the previous months. The number of visitors from the States of California - 5 cars, 11 visitors; Colorado - 3 cars, 7 visitors; Illinois - 1 car, 3 visitors; Minnesota - 1 car, 2 visitors; New Mexico - 11 cars, 23 visitors; New York - 2 cars, 4 visitors; Oregon - 2 cars, 4 visitors; Texas - 1 car, 1 visitor; Utah - 1 car, 1 visitor; Washington - 1 car, 2 visitors; and Wisconsin - 1 car, 2 visitors.

Of these visitors, all thirty-five are from the States of California, Colorado, Illinois, Minnesota, New Mexico, New York, Oregon, Texas, Utah, Washington, and Wisconsin. The number of visitors from the States of California, Colorado, Illinois, Minnesota, New Mexico, New York, Oregon, Texas, Utah, Washington, and Wisconsin is 5 cars, 11 visitors; 3 cars, 7 visitors; 1 car, 3 visitors; 1 car, 2 visitors; 11 cars, 23 visitors; 2 cars, 4 visitors; 2 cars, 4 visitors; 1 car, 1 visitor; 1 car, 1 visitor; 1 car, 2 visitors; and 1 car, 2 visitors.

The visitors reported are as follows:

The following table shows the number of visitors to the monument during the month of May, 1914. The number of visitors is less than during any other month of this year, and this is due to the fact that the weather was not so favorable as in the previous months. The number of visitors from the States of California - 5 cars, 11 visitors; Colorado - 3 cars, 7 visitors; Illinois - 1 car, 3 visitors; Minnesota - 1 car, 2 visitors; New Mexico - 11 cars, 23 visitors; New York - 2 cars, 4 visitors; Oregon - 2 cars, 4 visitors; Texas - 1 car, 1 visitor; Utah - 1 car, 1 visitor; Washington - 1 car, 2 visitors; and Wisconsin - 1 car, 2 visitors.

UNITED STATES
DEPARTMENT OF THE INTERIOR

were exchanged at fire school. The bad roads have discouraged visitors. They have been seen nearing the turn-off on the oiled roads, but one look at our approach roads, and on they go down the oiled roads. One car of visitors arrived just as the rain started on the evening of the 9th, and were not able to get out until the morning of the 13th. (He plans to carry chains after this!)

Usual routine jobs were done during the month, plus some others. The light plant has been installed in the power house, and is functioning perfectly. The roads have been graded and the two large signs were painted. A new roof was placed on the wire room. It had blown completely off during a strong wind storm.

Ranger Guillet attended the Fire School at Mesa Verde National Park, and reported a fine conference. Trips were also made to Aztec, Farmington and Gallup.

Custodian Townsend, from Aztec Ruins National Monument, arrived one evening with a model of Casa Manconada which is a gift for our museum from the Museum of New Mexico. Archaeologist Vivian, at Chaco, made the model, several years ago.

The fence crew struck more solid rock than was anticipated on the east side of section 25 which delayed them considerably. They now have the east and south side of section 25 complete, and have taken down part of the south side of section 20, and have again struck tough going, more rock than was expected, on the west side of section 29.

The Trader proudly reports that the Navajos are finding it profitable to trade at his post and are coming in to do business from further and further away. The wool season is about over. Most of it he sold, but some of it he kept so that the Navajos will not be out of wool while making rugs later in the year. Though he did get a few, due to the wool season rugs came in slowly this past month.

Projects for the ensuing months:- install the water pump when it arrives, paint the office and out buildings, get the roads in good shape after the rains, try to push the fence job to completion.

A, the end of the month, there were on hand:-

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

May 26 19 47

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities
in your area during the month of May, 1947.

GENERAL:

Work has been somewhat expanded with the hiring of
additional men. Good ones are hard to find now; one left us
for a job herding sheep, eight man days were lost to shearing
and one and a half work days were lost to rain.

Three jobs are now going: Chetro Ketl, Pueblo Bonito
and Pueblo Alto. Lack of transportation is hampering us
somewhat; Al Lancaster is spending most of his time at Pueblo
Alto, I'm looking after the work at Chetro Ketl and Bonito
and the days we haul sand from Bloomfield everybody is on
foot.

Some additional work has been done on the ceiling mats
and one broken jar found on the surface at Pueblo Alto has
been restored. We are ably assisted here by Sylvia McNeill.

Better service is being given by the photographic
contractor and prints have been assembled for the record sheets.

CHETRO KETL:

The biggest single job here has been repair of the back
wall at balcony level for a distance of 180 feet. The wall
is offset at this point and from one to three feet of it have
been rebuilt. Minor repairs have been made to the rest of the
wall surface, doorways and beam sockets. One additional room
to the east remains to be done.

UNITED STATES
DEPARTMENT OF THE INTERIOR

CHACO CANYON NATIONAL MONUMENT

Albuquerque, New Mexico

May 20 1937

MEMORANDUM FOR THE DIRECTOR
CHACO CANYON NATIONAL MONUMENT

There follows the report of the activities
in your area during the month of May, 1937.

SUMMARY:

Work has been somewhat extended with the hiring of
additional men. Good ones are hard to find; one left for
a job farther away, eight men have been lost to other
and one and a half work days were lost to rain.

Three jobs are now being: photo lab, Pueblo Bonito
and Pueblo Alto. Lack of transportation is hampering us
somewhat; Al Lancaster is spending most of his time at Pueblo
Alto, I'm looking after the work at Chetro Keli and Montezuma
and the days we need and then Almontezado everybody is on
foot.

Some additional work has been done on the ceiling work
and one broken jar found on the surface at Pueblo Alto has
been refitted. It was only sealed here by Sylvia Howell.

Letter service is being given by the photographic
contractor and prints have been assembled for the record charts.

UNITED STATES:

The highest single job has been repair of the wall
at highest level for a distance of 100 feet. The wall
is offset at this point and from one to three feet of it have
been refitted. Minor repairs have been made to the rest of the
wall surface, however, and have made. One additional repair
to the east remains to be done.

UNITED STATES
DEPARTMENT OF THE INTERIOR
Fall patching, repairing of beam sockets, replacement of lintels and capping was completed on the three story rooms numbers 53, 54, 59 and 46.

North walls of the two story rooms, 49 and 50, have been repaired and capped and the east wall of 63 where the ceiling mats were recovered has been repaired and the room partially backfilled to prevent ponding of surface water.

PUEBLO BONITO:

Six man days were spent in clean-up the first part of the month. Weeds were cut from all rooms and the visitor trail.

Work was started May 1st on the extensive repair job to the back wall. This is an area of two unnumbered rooms north of 87.

PUEBLO ALTO:

Despite the transportation difficulties it was deemed advisable to make emergency repairs here at this time. No capping or minor patching is being done, all work being confined to large breaks at ground level.

Two large breaks in the west wall where beams appear to have been dug out are now repaired. In the interior three overhanging sections have been supported.

Two large wall breaks have been repaired with reinforced integral members so that the walls will retain their original broken appearance. A third break, large enough to walk through upright, is now being stabilized in this same manner.

In the coming month it is planned to complete the work at Pueblo Alto, possibly in the first two weeks, finish the back walls of Chetro Ketl and Bonito and get to room 70 in Chetro Ketl which we missed this month. We also hope to start on emergency repairs at Del Arroyo.

The fifth tract is located in the State of California, and contains 500 acres of land.

The sixth tract is located in the State of California, and contains 600 acres of land.

Very truly yours,

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chiricahua

NATIONAL MONUMENT

Dos Cabezos, Arizona

May 26, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is the Narrative Report of activities at Chiricahua National Monument for May, 1947.

Weather Conditions. Three very light rains have fallen during the month, but the weather can still be considered very dry. The first five months of 1947 have been much the driest of the seven ~~months~~ ^{years} last recorded here.

Approaches to Monument Area. Approach roads are all rough and dusty but are in fair shape otherwise.

Interpretive Services. 951 visitors were contacted in the museum in 222 parties.

Increase in Travel. 1076 visitors arrived at Chiricahua this month. While this is a drop from last month, it compares favorably with May of 1946 when only 635 visitors were recorded. Travel continues to run far ahead of any previous records, being 64% ahead of travel last year.

General. A small group of Girl Scouts from Tombstone, under leadership of Mrs. Clifford Flew, is making a short stay in the campground. Due to the water shortage, this small group is the only one scheduled for the season so far.

Special activities. Custodian Cooke made a trip to the Heart of Rocks with Stan Davis, photographer for Lolleagard specialty company, who does a lot of photographic work in the Parks and Monuments. Ranger Sharp made a trip to Tucson and Bisbee to get small butane tanks which could be packed up to the lookout via burro, and to get other materials & supplies.

Police Protection. Much of the afternoon of April 27, Sunday, was spent by the Custodian and Ranger in getting a pick-up load of Drunks off the mountain and off the Monument, where they were endangering the considerable number of Sunday visitors. Since there was little likelihood of their being prosecuted by the US court in Tucson, they were turned loose with a sober person to drive, and told to leave the Monument.

While in Bisbee, Ranger Sharp discussed cooperation in law enforcement by local authorities, with Sheriff Pruitt of Cochise County. The Sheriff was cooperative and apparently will help out with our traffic violations at least. "Just tie 'em to a tree and call us up" was his comment.

Maintenance. Another painful trip was made over the telephone line to Portal (18 miles, on foot), by Renzer Sharp and Operator Marble, early in May, to get the line in shape for fire season. It worked perfectly for one night, was out the next morning. Investigation showed that a pack rat had gnawed through the insulation of the wires beside the lookout, and these were repaired. The line has worked so far.

----- El Morro ----- NATIONAL MONUMENT

----- Ramah, New Mexico -----

----- May 25, -----, 1947

MEMORANDUM FOR the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of May, 1947.

WEATHER: The long dry spell in this vicinity was broken by four days of rain on May 6th. 9th. 10th. and 11th. with a total precipitation of 1.25 inches. Maximum temperature reached 88 degrees on May 3rd. and the minimum dropped to 25 degrees on April 28th.

TRAVEL: 229 Visitors, in 71 cars, from 19 states and one foreign country visited the monument. A 2% decrease is noted in the number of visitors as compared with the same report period of 1946, but a 2% increase appears in the number of cars. A total of 221 visitors made the tour of the inscriptions and the guide time amounted to 51 hours and 45 minutes. Seven people arrived for information only.

APPROACH ROADS: Both roads from Gallup and Grants are dry, but very rough, due to the lack of maintenance after the recent rains. A letter from Senator Sidney Gottlieb states that the survey for the re-alignment of Highway #53 will be started this fall.

SPECIAL ACTIVITIES: After a great deal of uncertainty concerning the exact date of their filming, The Harry Sherman Pictures Inc. finally arrived on May 25th. and spent two days shooting a great many action scenes using the Rock as a background for all their shots. Joel McCrea and Frances Dee were the feature actors, being supported by Charles Bickford and Joe Calleia. The company, 130 strong, were especially careful in observing all regulations of the area, but this lone Custodian had many a headache in herding the hordes of spectators. Never again without enough personnel to cover the whole area.

GENERAL: One trip to Albuquerque was made to interview my seasonal Ranger. Two trips to Gallup were made for supplies and repair of the pickup. Several attempts were made to contact Chaco Canyon by radio and on one occasion Chaco was received, but apparently Chaco was not receiving El Morro, so it was definitely a one sided conversation. More difficulty has been encountered with the old battery charger and consequently contact will not be made until I can charge the batteries.

NATIONAL MONUMENTS SERVICE
GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

MAY 26, 1947.

The following is a summary of activities for the month of May, 1947.

Visitors this month totaled 223

Travel year to date 1177

General. Temporary duty assignment of three days, May 5, 6 and 7, were spent in the Region Three Office discussing various problems relating to this monument. Also attended the annual fire control training meeting at Bandelier National Monument on May 14 and 15. Both assignments were highly beneficial to the custodian and much needed information and training was received.

Weather. Strong winds and frequent dust storms again prevailed throughout the month. Only one light shower of .25 of an inch fell on May 23. The remainder of the month has been very dry. High temperature was 92 and low 36.

Roads. Both approach roads are in very poor condition. Sands have drifted so deep in some sections that travelers find it necessary to use the open fields to reach the monument. Very little maintenance work is now being done by the State Highway Department.

Travel. Visitor travel remained about the same as for the previous month of April. Instate visitors numbered 182 and outstate visitors 41. There were a total of 66 cars with instate numbering 53 and outstate 13. 5 people walked out to the monument. From all available information many travelers are discouraged from making the trip to Gran Quivira due to poor roads.

Guide and Contact Service. A total of 223 visitors were conducted through the ruins on 66 guided tours. The average time spent by each party was 55 minutes. Total contact time of 60 hrs, 55 mins.

Maintenance and Administration. USDI 1-13850 was taken to Mountainair for a general overhauling and it is now in good running condition. Received and answered several inquiries regarding the monument. In spite of a very dry season a bumper crop of weeds is in full sway and constant dweeding of the ruins rooms is necessary to keep them in a presentable condition.

Publications Report. 1050 two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

May 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for May, 1947.

WEATHER: Usual spring weather has occurred with considerable moisture falling. Snow fell on April 27, May 11 and 15. We have had twelve days of rain, several lasting all day. Winds have been moderate. Warmest days have been around 75 degrees. Snow still covers the tops of the Sangre de Cristo range and the San Luis Valley is now flooded with water from canals and the artesian wells. It would appear to be a good season for the farmers and ranchers. Grass in sheltered places is about five inches high. With the Medano Creek having a heavy flow which extends to the edge of the south section of the Sand Dunes, all cottonwood trees are leafed out and many wildflowers along this creek are in bloom.

TRAVEL: One thousand and sixty-five visitors in one hundred ninety-nine cars visited the Sand Dunes during this report period. Fourteen states and Mexico were represented. One member of the armed force was counted. Five hundred fifty-two persons took advantage of the camp and picnic grounds and of these fifty-five camped overnight. Five written requests were answered.

INCREASE IN TRAVEL: For May, 1946, the record shows 84 cars and 338 visitors.

ROADS: Roads continue rough and dry. The county has done no grading during this moist spell. A drag has not yet been obtained from surplus material at Chaco Canyon National Monument, and the monument roads are in poor condition.

COMPLAINTS: Verbal complaints are still pouring in because of the unfinished rest-rooms at the headquarter area. Its unnecessary to remark that its extremely lucky for headquarter area to be located in a wooded section. No further action in regards to these rest-rooms has been received from Region Three Office.

UNITED STATES

DEPARTMENT OF THE INTERIOR

GRANT WARD NATIONAL MONUMENT
ROCKY MOUNTAIN, COLORADO

May 10, 1947

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Grant
Ward National Monument for May, 1947.

Weather: Local spring weather has continued with con-
siderable variation. Snow fell on April 27,
May 11 and 12. We have had twelve days of rain, however,
during all day. There have been showers. There have been
some heavy showers to the west. Snow still covers
the tops of the peaks in White Range and the north
Valley is now flooded with water from canyons and the
creeks below. It would appear to be a good season
for the farmers and ranchers. There is sheltered place
is about five miles high. The bottom trees having
a heavy five foot growth to the edge of the south
section of the land. All cottonwood trees are
leaved out and many willows along the creek are
in bloom.

Visitors: One thousand and sixty-five visitors in one
hundred ninety-five cars visited the land during
this report period. Twenty states and Mexico were
represented. One member of the armed force was counted.
Five hundred fifty-five persons took advantage of the
camp and picnic grounds and of their fifty-five camp
overnight. Five visitor requests were answered.

Inventory in Travel: For May, 1947, the record shows
86 cars and 328 visitors.

Roads: Roads continue good and dry. The county has done
no grading during this report period. A new road has not yet
been opened from surprise opened at Chase Canyon
National Monument, and the monument roads are in good
condition.

Complaints: Verbal complaints are still coming in be-
cause of the unlimited feed-pens at the feed-pens
area. It is unnecessary to remark that the extremely
heavy for feed-pens area to be located in a wooded
section. No further action in regards to these feed-
pens has been received from local authorities.

Many complaints have been received concerning both county and monument roads. Most embarrassing situation has developed in the camp-ground where many cars become stuck in the sand. It is hoped that a drag may be found and with a great deal of manual labor, this section may be made safe.

ARCHAEOLOGY: The Alamosa State College found their first Folsom point at the blow-out site they are excavating on the Zapata (Linger) Ranch. This announcement appeared in the Alamosa paper.

NATIONAL PARK SERVICE VISITORS: Messrs. Cornell, Bennett, Lassiter and Thomas visited this area on May 12. The entire day was spent in going over various sites for Master Plan studies.

NEWSWORTHY VISITORS: The Cheyenne Mountain School of Colorado Springs with a group of forty students, who camped overnight; a Boy Scout Troop from Pueblo of fifteen, who also camped for one night; the Geology Class from Western State Teachers College, Gunnison; the Fort Garland School with two hundred pupils and ten teachers, who held their annual school picnic at the Sand Dunes; and Mr. and Mrs. Clem Collins of Denver.

SPECIAL ACTIVITIES: A trip was made to Bandelier National Monument on April 29. The Sand Dune pickup I-13834 was delivered to Bandelier for further transfer to the Montezuma Well addition of Montezuma Castle National Monument. One day was spent in loading surplus equipment on the Bandelier stake truck. This surplus equipment consisted of two desks, filing cases, book case, chairs, one 3 KW light plant, blitz cans, tool boxes and a bench vise. Returned to Great Sand Dunes in the stake truck with Clerk Bean, who helped in the unloading.

On May 5 a talk was given to the Mosca, Hooper and Moffat Service League at Mosca, Colorado. Fifty slides on "Monuments of New Mexico" were shown to fifty people after a banquet. Great interest was evident and request for a repeat performance was made for a later date at the town of Blanca, Colorado.

The Bandelier National Monument Fire Control Training Conference was attended from May 13 to 16. This meeting was a success and a great deal was learned and accomplished.

Many complaints have been received concerning both county and community work. Most interesting situation has developed in the camp-ground where many have become restless in the night. It is hoped that a fire may be found and with a great deal of manual labor, this section may be made safe.

REMARKS: The Alaska State College found their first class of the first class they are interested in the Alaska paper. This development appeared in the Alaska paper.

UNITED STATES
DEPARTMENT OF THE INTERIOR
ACTIVITIES: Little has been accomplished this report period because of trips and the tremendous increase in number of visitors.

Routine jobs and duties were performed around headquarters and the two camp-grounds.

The repaired dump truck and air compressor were obtained from the Heide Garage. The compressor was set up and is functioning in A-1 condition. The new rings and valve grinding job have put the dump truck in excellent shape.

The Dodge 4x2 was taken to the Heide Garage and it was necessary to tow it part of the way as it refused to function. Necessary repairs are being made.

The monument typewriter was taken to Bandelier National Monument and from there it is to be sent to Santa Fe for cleaning and repairing.

A rough floor was laid in the outside storage shed and a new roof now makes the shed usable. Tar paper was nailed to the four sides and then shelves and racks were built to house all fire tools for the monument.

The garage was cleaned for storage space of surplus equipment, until office is painted and all material can be properly located.

The camp-ground was posted with fire warning signs, and one was placed on the bulletin board at headquarters.

A start was made on filling up the exposed water line.

The light plant room was cleaned and cleared for the alternate 3 KW light plant. It is hoped that time can be found to install this plant in the near future.

The ceiling and walls of the office received their first coat of paint. As weather, wind and sand allows, the floor will receive its first coat of paint, and the office equipment can be moved in.

The Globe-Wernicke folders which were ordered in February for the filing system have at last arrived.

Proof-read and checked an article on Chaco Canyon National Monument, from the National Parks Association in Washington, D.C.

PUBLICATIONS REPORT: There are on hand, 80 informational mimeographed leaflets. Leaflets were mailed to the Rocky Mountain Motorists, Inc., at Denver, Colorado Springs, Greeley and Pueblo, Colorado, upon request. At the request of Region Three Office, leaflets were sent to Salt Lake City, for the Utah Centennial Exposition.

Ted C. Sowers,
Custodian.

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

May 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of May 1947.

Visitors this month - 1516; travel year to date - 9956.
Visitors May, 1941 - 847; travel year 1941 - 4211.

General May has been another busy month with brisk travel and several unusual activities. Travel for this month is below that for April which is typical of the trends at this monument. However, the total for this month is 669 ahead of the 847 counted in May, 1941.

Weather Storms in the week of May 10th - 17th brought our first moisture since November. Total rainfall for the month was .59 of an inch. The maximum temperature was 106° and the minimum 37°.

Approach Roads A considerable portion of the road from Roosevelt Dam via Pine and Payson is under construction and very rough. The road from Flagstaff via Mormon and Stoneman Lakes is reported to be in good condition. Approaches via Alternate Highway 89 from Flagstaff or Prescott are in excellent condition.

Signs A sign stating "Montezuma Castle via oiled road - 32miles" was erected at Sedona. Another sign stating "Open 8:00 - 5:00 daily" was added to one of our signs where the Cornville cut-off leaves Highway 89. These signs were furnished by the Arizona Highway Dept.

Administration A Ford pick-up, I-13821, was received from Walnut Canyon for use at Montezuma Well. We also received an office desk, a chair, and a transfer case for use at that area. Two fire buckets, two pike poles, and an electric grinder intended for industrial use came from Walnut Canyon.

Our supply of two-fold informational leaflets is reduced to less than 100 and since April 28 they have been given to those who write or ask for them.

Two trips to Prescott and one to Flagstaff have been made in behalf of Montezuma Well.

A separate file to be kept at this monument but covering matters pertaining to Montezuma Well has been established.

William L. Howenstine reported for one month's assignment beginning May 5. Mr. Howenstine had just finished an assignment at Saguaro

National Monument and he quickly adjusted himself to our routine.

Ranger Schroeder made an over night trip to Seligman to confer with W. B. Back on numerous matters pertaining to Montezuma Well.

Park Ranger Pete Schuft was here May 22 to check our inventory and apply "Decal" numbers to all accountable equipment.

Publication sales for the Southwest Monuments Association totaled \$95.53 for the month with a loss of \$1.61. The loss was derived from shortages in the change box used by the visitors for making their own change.

Protection A stray horse was rounded up and driven out with the help of the Indian laborers on May 13.

Montezuma Well Cloth warning signs were posted on five buildings at Montezuma Well and cloth boundary signs at two different points.

Someone has recently done some digging in the back of the upper room in the cave bordering the Well. About a handful of coarse grass stems and dry brown leaves resembling corn leaves and two corn cobs were removed and left at the cave mouth.

A contract to drill a well to a maximum depth of 200 feet near the residence has been awarded to Riley Lee of Cottonwood and operations are expected to begin in a few days.

Bids have been circulated for a project to rehabilitate and modernize the quarters.

A new wire gate was constructed and a sign reading "Please Close Gate" was posted.

The semi-annual Pioneer's Picnic was held at Montezuma Well May 4. The Jerome High School Band was present and it is estimated that 70 people attended including the band. There were speeches commending the "old timers" and encouraging activities in the Verde Valley.

Patrol trips were made to Montezuma Well on April 27 and May 3, 4, 9, 11, 17, 18, 21, 22, and 23. As soon as our seasonal ranger has reported for duty it is planned that Archaeologist Schroeder will devote his attention mainly to Montezuma Well.

Ruins Protection The Castle Dwellers had earth floors in their rooms and for many years the grind of visitor traffic has been reducing them to dust. This finally had accumulated to a depth of an inch or two and this was carried out on the clothing of both visitors and guides on every trip.

With the aid of four Apache Indians the dust was removed and lowered in buckets down the cliff where it was carried to the truck. The dust was replaced with a three inch layer of soil and bitumuls mixture.

After this was dry it was coated with undiluted bitumens and a liberal application of sand. This treatment was given to eight rooms and the area on the fifth story balcony where visitors walk. The project was completed except for two man-days of work on May 16. We still have to sweep up excess sand on the floors and remove it from the building.

Newsorthy Visitors Mr. A. E. Buchenberg and party were here. Mr. Buchenberg was interested in checking the samples of experimental soil mortars supplied this monument several months ago.

Mr. Smith of the Desert Museum, Palm Springs, California was here. On the same day we had two representatives of the Burton Holmes travelogue.

Mr. Charles E. Fisk, pioneer in Grand Canyon and Zion Canyon paid this monument a visit.

National Park Service Visitors Chief Clerk Gastellum was here May 10 to check our records and give instructions on clerical matters. When he departed we followed him nearly fifteen miles to make sure he could get back to Tusigoot in their "Wheesy" truck.

Foresters Walker, Carlson, and James were early morning visitors on Sunday May 11. They took a routine trip through the Castle and spent considerable time at Montezuma Well.

Ranger Pete Schuft was here on May 22.

Service To The Public Travel dropped slightly this month to give us 1516 visitors who came in 466 cars. Tickets were sold to 496 people, complimentary admission tickets were issued to 39 people, 33 children climbed without charge, and 4 members of the armed forces were admitted free.

Contact Time Total contact hours, 188.00. Hastings, 38.50; Leding, 49.50; Schroeder, 42.00; Howenstine, 58.00. Guided trips were made 143 times for 572 people and 862 visitors were contacted in the museum in 225 groups. Information service outside ruins or museum was given to 287 people. There were 8 picnic parties for 66 people.

MEMORANDUM for the Regional Director, Region Three.

Attached is Archaeologist Schroeder's report of activities at Montezuma Well for the month of May, 1947.

Homer P. Hastings,
Custodian.

Boundary and protection signs were placed at various points and on buildings on the property.

A wooden sign was placed over the door to the house to indicate that it should be used for storage purposes.

A well was dug in the area for collecting water from the irrigation ditch into the tank. It is the purpose of construction. After the installation, it will eliminate the necessity of going a mile or more to pump the water whenever water is required for the tank.

Mr. Merrill, a contractor from Phoenix, surveyed the property to the property in order to clear up his bill for the construction.

Excavation. I buried the gate and will be willing to let the gate and also gate on the entrance road and a temporary "Please Close Gate" sign was posted. Considerable work has been done on the property through the old gate which often was left open by the public when the property was unattended. It is hoped that the new gate and sign will be a step toward eliminating this trouble.

THE NATIONAL BUREAU OF INVESTIGATION

MEMORANDUM FOR THE REGIONAL DIRECTOR, REGION THREE.

Attached is information regarding the report of activities in
Knoxville, Tenn. for the month of May, 1947.

Very truly yours,
Special Agent in Charge

Montezuma Well
Rimrock, Ariz.

May 24, 1947

MEMORANDUM for the Custodian, Montezuma Castle.

There follows the monthly report of activities at Montezuma Well for the month of May, 1947.

General Six trips were made to Montezuma Well during the month, one by Custodian Hastings and five by the undersigned. Visitor contact records were started May 4.

Visitors this month - 333.

Administration Considerable time has been devoted to clean-up and miscellaneous repair.

Boundary and protection signs were placed at various points and on buildings on the property.

A wooden shed was cleaned out and a lock put on the door so that it could be used for storage purposes.

A wood gate, to be used for diverting water from the irrigation ditch onto the lawn, is in the process of construction. After its installation, it will eliminate the necessity of going $\frac{1}{2}$ mile up ditch to open the headgate whenever water is required for the lawn.

Mr. Hummel, a contractor from Prescott, surveyed the quarters on the property in order to draw up his bid for its renovation.

Protection A barbed wire gate was made to replace the old pole and wire gate on the entrance road and a temporary "Please Close Gate" sign was posted. Considerable cattle have been wandering onto the property through the old gate which often was left open by the public when the property was unattended. It is hoped that the new gate and sign will be a step toward eliminating this trouble.

W. J. Bennett, a contractor from Portland, Oregon, advised the officers of the property in order to issue of his bid for the renovation.

that the new case and also will be a step toward eliminating this trouble.

Vandalism Custodian Hastings reported April 27 that signs of recent digging were evident in the large cave in the Well near the outlet. It appears that it was restricted to a small area near the doorway of one room and was barely below surface in its disturbance.

Research A trip was made to Seligman, Arizona May 19 and 20 to interview Mr. William Baek, one of the heirs to the Montezuma Well property. Considerable information was obtained in regard to the history of the property as well as archaeological and geological data that he collected during his residence here.

Research was also conducted in the county records on this trip to obtain information concerning the water rights of Montezuma Well.

Service to the Public On May 4, the Verde Valley Pioneer Association held its semi-annual picnic at the picnic grounds a report of which was submitted on that date. An estimated 300 attended.

Contact Time Total actual contact hours, 8 hours during 5 days. Schroeder, 8 hours. We had 333 visitors who came in 81 cars, trucks and buses.

Award of Bid Notification was received that the contract for drilling the household well at the residence was awarded to Mr. Lee of Cottonwood, Ariz.

National Park Service Visitors Foresters Carlson, Walker and James visited the Well May 11.

Newsworthy Visitor Mr. Harold Weight, associate editor of the Desert Magazine, was here for a short visit May 11.

Accessions Mr. William Baek of Seligman donated a book "Three Happy Vagabonds" by C. H. Shole to Montezuma Well. A chapter is devoted to Montezuma Castle and Montezuma Well. Though not a book reviewer, Mr. Baek remarked that it was "A fairy tale of considerable misinformation. After reading the above chapter, the undersigned can find no better way to express it."

Publications on Hand None have been assigned to this area.

May 30, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges
National Monument for the month of May, 1947:

GENERAL: Ranger Redd was absent from the monument from May 19th to 23rd, in attendance at the Fire Training Conference at Mesa Verde National Park.

TRAVEL: Travel for the month lists 18 cars and 50 people. A total of 74 people had signed the register during the period October 24, 1946 to May 16, 1947. Estimated travel for the same period on Form 10-157 was 60 people. Travel from May 16th to May 24th totalled 36 people.

ACCIDENTS: On May 8th I received a telephone call from Mrs. John Wiley Redd of Blanding advising me that a visitor had died while on the trail in the monument. Upon investigation it was found that Mr. Dale S. Deane of Denver, Colorado, member of a party of four, had passed away at the spring near Owachone Bridge. The doctor's report listed cerebral hemorrhage as the cause of death. Mr. Redd assisted members of the party in the removal and shipment of the body.

WEATHER: Heavy rains occurred on May 10th and 11th. The balance of the month was clear and warm.

ROADS: The state maintenance crew graded the road from Blanding to the base of the Maverick Point hill during the first part of the month. The heavy rains on the 10th and 11th caused some damage and they again made a trip over the road with the grader. At this writing it is again in good condition.

RANGER SERVICE: John Wiley Redd of Blanding, Utah entered on duty as temporary Park Ranger on May 15th, at which time he made a trip to Arches for truck and equipment for the area.

INTERPRETIVE SERVICES: Personnel was on duty only four days during the month. Four parties containing 36 people were contacted at headquarters and two parties consisting of 7 people were accompanied on trips to the bridges. Fourteen people visited the area unattended.

MEMORANDUM FOR THE REGIONAL DIRECTOR, REGION THREE:

The following is a narrative report for National Monument for the month of May, 1947:

GENERAL: Hayden Road was closed from May 1st to May 15th in accordance with the National Monument for the month of May, 1947.

TRAFFIC: Travel for the month of May was 30 people. A total of 14 people had signed the register during the period October 24, 1946 to May 15, 1947. Estimated travel for the month of May was 80 people. Travel from May 1st to May 15th totaled 34 people.

ACCIDENTS: On May 1st a telephone call from Mr. John Wiley Head of Montezuma advised that a visitor had died while on the trail in the monument. Upon investigation it was found that Mr. John F. Head of Montezuma, Arizona, a party of four, had passed away at the spring near Montezuma. The doctor's report listed several possible causes of death. Mr. Head's relatives members of the party in the removal and shipment of his body.

WATER: Heavy rains caused on May 10th and 11th. The balance of the month was clear and warm.

ROADS: The state highway crew worked the road from Montezuma to the case of the Montezuma trail during the first part of the month. The heavy rains on the 10th and 11th caused some damage and they again made a trip over the road with the grader. As this writing is in progress, good condition.

RAILS: John Wiley Head of Montezuma, Utah entered on duty as temporary Park Ranger on May 15th, at which time he made a trip to French for brush and equipment for the area.

INVESTIGATIVE: Personnel was on duty only four days during the month. Four parties consisting of people were contacted at Montezuma and two parties consisting of people were accompanied on trips to the bridges. Fourteen people visited the area.

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of May.

WEATHER: Fair and warm. 0.84 precipitation, including 0.32 snow on the 11th. High temperature was 90 degrees on the 3rd--low 32 degrees on the 10th and 11th.

VISITORS: 60 visitors arriving in 25 cars registered at the Headquarters area. 24 hiked to Betatakin in 10 parties, 21 in 7 parties viewed Betatakin via Sandal Trail, and 3 trips took 7 visitors to Keet Seel. Campground usage totalled 65 visitor days.

NATIONAL PARK SERVICE VISITORS: The following National Park Service visitors appeared here in this order: Irv. and Virginia Townsend on the 3rd--Bill and Trudie Bowen on the 10th--Fullers four on the 16th--Lon and three Garrisons on the 17th-- and C.D.Carter of Region Three Office on the 23rd to 27th.

FIRE CONTROL SCHOOL: The Custodian attended the Fire Control Conference at Grand Canyon National Park on May 6-7-8.

IMPROVEMENTS: Following the Fire Control School at Grand Canyon National Park Bill Bowen volunteered his days off to drive the Wupatki stake truck to Betatakin delivering the 950 gallon water tank to be installed here as an underground gas tank.

The power line from the tool house to Residence #1 is being elevated.

The entrance road was dragged between Shonto and Contact Station twice.

Two directional signs were repainted.

The pump required more attention.

PROJECTS FOR NEXT MONTH: Contacting visitors.

ORGAN PIPE CACTUS NATIONAL MONUMENT

AJO, ARIZONA

May 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of May 1947.

WEATHER:

The first week of the month broke all existing records for heat in Arizona. The first six days of May were over 100 degrees with a high of 108 on the 2nd and 3rd. It has now returned to normal with our average day about 90 to 95. Low for the period was 45 on the 12th and 13th. Although showers fell around us none was reported anywhere on the monument.

TRAVEL:

May brought a distinct drop in travel here which is normal though at this time of year with visitors starting to seek the cooler climates. A few visitors continue to come and camping is popular at this time of year. Total travel for the month was 6257 bringing the travel year to 55575.

General:

Some much needed equipment was received this month, including a power grader. While this is in need of repairs it is usable and has been put into operation getting some of our roads ready for the summer rains.

We received word of approval of the full time maintenance man position and we are now looking for a suitable man to fill it. Perry P. Bowden has been hired temporarily to catch up some of our much needed work..

A quonset hut was received and is hoped to soon get it erected so that housing for all may be had at headquarters.

The soil and moisture control fencing is getting along well, with a very good crew this year. About three and a half miles of fence has been built so far through very hard going. Word of \$1500.00 additional allotment was welcomed as this will allow us to complete through the Agua Dulce Mts.

New cloth boundary signs have been placed along the most needed sections and more will be put up as time will allow. Several signs were repaired and painted.

Our horses were transferred to Saguaro for the fire season being picked up by Custodian Hensley and Ranger Fulton.

~~May 26~~, 19~~47~~.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT of activities at Saguaro National Monument for the month of May, 1947.

WEATHER. Midsummer temperatures arrived on May 3, when 105 degrees was recorded at Monument Headquarters. This day was followed by a week of hot, windy, weather, which ended a cooler period, with a light rain on May 15 (snow, sleet, and hail at Manning Camp R.S.). Since that time we have had almost daily cloudiness, with frequent late afternoon or evening thunderstorms, accompanied by light precipitation, usually only a trace. Precipitation on 11 days since our weather station was put into operation at Mica Mountain Lookout on May 5 has totaled .30 inch. This type of weather is most unusual before the first week in July.

SPECIAL ACTIVITIES. On May 10 the Custodian made a trip to Casa Grande and Organ Pipe Cactus National Monuments, bringing back one of the O.P.C. horses for use during the fire season. On the 12th, Ranger Fulton made a trip to O.P.C. to bring up the other horse. Considerable time, and several hundred miles of driving made necessary by the telephone strikes, was expended in attempts to obtain a qualified man to employ as Packer; most of the men who were able to do this work were unwilling to work for us as they expected another moving picture company in this vicinity during May. Considerable time and travel also were needed to later find a man willing to take a Trail Laborer job.

INSPECTIONS. Chief Clerk Gastelum, of the Region Three Office, was here on May 16. His trip cleared up many of our problems, but we wish that he could have remained another day, to assist in several other matters pertaining to the mounting volume of paper work.

STATUS OF PRIVATE LANDS. Mrs. Marjorie L. Ellison, owner of Section 29, immediately north of the Monument Headquarters and within our boundaries, was in on May 2, to inquire as to the possibility of the National Park Service purchasing her holdings. She stated that it was her intention to list the property with real estate agents in the near future, as she most urgently desires to sell. In the Custodian's absence, Mrs. Eggermayer referred her to the Regional Director's Office.

MAINTENANCE. Work this month has been concentrated within the forested section of the monument. The telephone lines to Manhead and Mica Mt. Lookouts, and to Spud Rock and Manning Camp Ranger Stations were cleared of trees which fell during the winter, radio sets installed at Manning Camp and in the Mica Mt. Tower, antennas strung, and new leads for both telephone and radios run up the legs of the tower. Telephones were changed at Manhead and Manning Camp, but still the communications are very poor, failing after every rain. The Patrol Loop Trail on top of Mica Mt. was cleared of windfalls, and some work done on the trail to Spud Rock Secondary Lookout. All fire tools were overhauled, and the summer tool caches set up. All pack and saddle stock were gathered and shod, also are in the process of being shot for distemper, which seems to be prevalent in the valley this spring. The Fire-weather station was moved from Manning Camp up to Mica Mt. Tower, and put into operation May 6. One of the Winchargers was packed up the mountain, and installed inside the tower frame, at a point 45 feet above ground; this is now operating well, which renders it unnecessary to pack storage batteries from the tower to Manning Camp for charging. The evaporative cooler was brought from storage and installed on the roof of the Headquarters building. Cut-off switches for the light plant at Madrona Canyon were installed in the Ranger's residence and bunkhouse.

TRAVEL AND INTERPRETIVE SERVICES. Visitation to the area took a sharp drop after the hot weather set in. Only 1131 visitors, from 27 states, the District of Columbia, and England, arriving in 372 automobiles and one motorcycle, came out to see the Saguaros in bloom. Of these, only 220 persons, in 75 parties, were provided informational services at the Monument Headquarters. Due to termination of our temporary Ranger, and the work necessary to the beginning of the fire season, we have been unable to provide contact service on ten of the past thirty days, and only part-time contact on several other days, which would partially account for the drop in percentage of visitors contacted.

RANGER SERVICE AND OTHER PERSONNEL ACTIONS. Temporary Ranger William Howenstine was terminated on April 31, with sincere regret on the part of the Custodian. Bill had been a very fine contact man, well-trained in local botany, and extremely competent in handling visitors. He is presently filling in for a month at Montezuma Castle.

George W. Hilliard entered on duty as Packer May 8, and is doing very well on what, to him, is a new type of work. Experienced packers are just not obtainable, at least by us, this year, and George is learning the packing the hard way. He is well qualified to handle stock, and is rapidly picking up the rudiments of slinging packs, and says that he enjoys what, to him, is the easiest job he has had since his discharge from the Army. Andrew J. Rushing, who prefers to be known as Tex, was employed as Trail Laborer on May 22, and received a rude introduction to fire-fighting the following day. Richard R. Barney, who was terminated as Laborer on April 16, returned to duty as the SP-4 Fire Control Aid on May 1.

(

UNITED STATES
DEPARTMENT OF THE INTERIOR

FOREST FIRE PROTECTION. The Custodian, Ranger Fulton, and Maintenanceman Ollie Barney packed up to Manning Camp on May 2, meeting Richard Barney, who had ridden up from their ranch the previous day. The following three days were spent in opening up the station, packing tools to the caches, installing radios and checking telephone lines and installations. Richard Barney began regular patrols on the 4th. Bi-weekly pack trips have been made since the 9th, principally to deliver hay and grain supplies to the storage shed at Manning Camp.

Daily lightning storms commencing on the 15th, finally resulted in a Class "A" fire which started the evening of May 22nd, discovered at 9:15 A.M. on the 23rd, and out by 2:50 P.M. of the same day. Total area burned was reported as .05 acre. With only one Aid on detection duty, and two other men available for suppression work, it was thought advisable to supplement detection coverage and at the same time determine if additional help would be needed to suppress the fire, so the Custodian and Ranger Fulton rented a plane and flew over the entire area, assuring the fact that only the one fire had started, and that it was apparently under control when observed from the plane. We have had no other fires since, but last night's storm resulted in four fires on the Coronado Forest's Catalina District north of us, one of these still not being under control 24 hours later. Fire danger readings have averaged in the lower portion of Class 3, with one day getting into Class 4; this is due largely to the small amounts of precipitation, which have kept the humidity up fairly well, and to light winds except on two days of the month.

ACCIDENTS. On May 16, while returning to Headquarters from Madrona Canyon, the Custodian, driving Regional Office Lincoln No. 13839 and accompanied by Chief Clerk Castellum, collided with a private car owned and driven by K. F. Hayden, of Tucson. No one was hurt, and damage to both cars was slight, consisting of one ripped fender on each. Cause of the accident was a blind hilltop, and the fact that the Chevrolet station-wagon was in the middle of a narrow road.

NEW EQUIPMENT. An 8 cubic foot Servel Electrolux was received and installed in the Madrona Ranger Station quarters, the old Perfor kerosene refrigerator being moved up to the bunkhouse. Two 4-pound CO-2 type fire extinguishers were received for building-fire protection.

PUBLICATIONS.

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

May 28, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of May, 1947:

Visitors this month: 995

Travel Year to date: 4187

Travel: A substantial increase in visitor travel for the month of May is shown with 13% more visitation than for the same month a year ago. Total travel for the year is also ahead. It shows an increase of 17% over the previous travel year. The method of estimating travel remains the same. It is noted however that a large proportion of the visitors do not register. A great deal of this may be due to the absence of a 'Register' sign. The previous one was removed by vandals last winter.

Roads: With the lack of maintenance, the entrance road has become very rough and "washboardy". If it could be worked once with a blade the road could be kept in fair condition with an occasional dragging. The back road to Wupatki is still closed to the visitor. Recent showers have helped the cinder some but the road bed is still soft and unsafe to travel. Visitation at both Sunset and Wupatki will be noticeable increased when the "back door" can be reopened.

General: Progress on the construction of the tent houses has been slow. Shortage of building materials, the necessity for other hauling and required road work at Wupatki have caused delay. But it is moving along in good time now and the first dwelling at Sunset Crater will within a few days be a reality.

The week end trips have been continued this month. Interpretive information has been offered the visitor on Sundays.

Information has just been received regarding materials for the signs that are planned for the area. The proper material has been located and construction should get under way shortly.

Ranger Upton attended the fire school at Grand Canyon the second week in May. Mrs. Upton accompanied him and made the most of the few days for an enjoyable vacation. A most cordial reception was given to all visiting personnel throughout the entire time they were there.

Bob brought back the Sunset Crater Thunderbird four mile marker that has been roaming around the country. It had been missing since last winter and

Memorandum for the Regional Director, Region Three.

Re: Report of activities at Mount St. Helens National Monument for the year 1917.

Visitors this year: 1000

Summary: Mount St. Helens National Monument is situated about 10 miles from the city of Portland, Oregon. It is one of the most beautiful and most interesting of the Cascade Range. The mountain is 14,177 feet high. It is a very active volcano. The last eruption was in 1800. The mountain is a very popular place for tourists. The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range. The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range.

Details: The monument is a very beautiful place and it is a very important part of the Cascade Range. The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range. The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range.

Recommendations: The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range. The National Park Service has been working to improve the monument since it was established in 1902. The monument is a very beautiful place and it is a very important part of the Cascade Range.

The report and other data have been submitted to the Regional Director for his consideration.

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

May 25, 1947

Memorandum for the Regional Director.

Following is the monthly Narrative Report for Tonto National Monument for the month of May, 1947.

TRAVEL 743 visitors arrived at Tonto during the month of May, coming from 32 states, Hawaii, and Austria. Of this number 385 visited the Lower Ruin and 2 the Upper Ruin.

PERSONNEL Early Sunday morning, May 11, Charlie Steen and Family left for Santa Fe. At the present Joe Bean and Self are holding the Fort.

N.P.S. Officials. Engineer Carter stopped for a short visit on his way to Phoenix last Sunday. *Ranger Pete Shuff of Casa Grande Spent Tue Evening and Wed. Morning, May 20-21, checking property on way to Santa Fe*

WEATHER. May started out with record heat wave; but, after a .61 inch rain the 9th and 10th, cooled off and the entire month has been very pleasant. Showers also fell on the 21st and 22nd.

GENERAL. With the coming of hot weather the travel has slowed to a near standstill. This is giving time for the work on the trailer and as there is no carpenter available, much time goes into it. The remaining time is spent in trying to accustom myself with the routine of office work and rearrange the files.

FLORA. The arrival of May brought with it great masses of Saguaro Blossoms on every large plant. A number of the plants have yet to bloom.

PROJECTS FOR JUNE. We hope to have the trailer liveable, change the propane system, and install the wiring for the power plant.

TUMACACORI NATIONAL MONUMENT

Box 2225, Tucson, Arizona
~~XXXXXXXXXXXXXXXXXXXX~~
Tumacacori, Arizona

May 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of May, 1948:

WEATHER CONDITIONS: Precipitation - .89. Maximum temperature - 104, on May 3. Minimum temperature - 38, on April 25. Three days of very high winds. Considerable cloudy weather. Precipitation far higher than usual for this month.

MAINTENANCE: Mostly of a routine nature this month. Soil on the fish pond plants was changed. Gravel was placed on a low spot of the driveway from the parking area to the residences. More floor sections in the museum building have been treated with Duocrex preservative. Some small signs were re-painted. Considerable time has been spent by our maintenance laborer and some time by the custodian on doing stabilizing work on the mission church. This work consists of using cement stabilized soil to seal broken places in the original plaster, so that water cannot get behind the plaster and cause its collapse, and filling up old vandal holes in the walls. So far this work, which is done between other pressing jobs as time allows, has been mostly in the cemetery and on the north end of the church.

INTERPRETIVE SERVICE: 889 visitors went on 159 guided trips through the mission church and grounds, receiving an average of 35.9 minutes per trip. 1448 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1426 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: May travel of 1496 visitors has been exceeded once, by the figure of 1551 for May of 1937.

VISITORS: April 25 - 88 pupils and teachers from Nogales Junior High history classes were intensely interested mission visitors.

April 27 - Fernando Pesqueira, professor of history in the University of Sonora, Hermosillo, was a very interested visitor.

May 1 - A group of eight from the Arivaca school.

GENERAL PUBLICITY: May 4 - Photographers Ray Manley and Clifton Abbott, of Western Ways, Tucson, Arizona, taking photos.

April 29 - Thayer Soule and Grant Wolfkill, taking colored movies for Burton Holmes' "Travelogues."

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Box 250, Tucson, Arizona
Tucson, Arizona

May 22, 1948

Enclosed for the National Museum,
Washington, D.C.

Follows the monthly narrative report for Tumacacori National Monument
for the month of May, 1948:

Weather Summary: Precipitation - .88. Maximum temperature - 84,
on May 2. Minimum temperature - 56, on April 27. There have been
high winds. Conditions generally cloudy. Precipitation on the ground
then about for this month.

Buildings: Repair of a routine nature this month. All of the
fire wood plants are changed. There are placed on a lot west of the
driveway from the parking area to the east. The fire wood
in the museum building have been treated with insecticide.
Some small signs were re-painted. The building has been
by our maintenance laborer and some time by the architect on building
establishment work on the museum building. This work consists of
general electrical work in the kitchen place in the original building,
and that work could not be done the kitchen and some for the
and filling in all small holes in the walls. In the this work, which
is done between the building and the main building, has been made
in the cemetery and on the lawn and in the church.

Interpretive Service: Boy visitors sent on 148 guided tour of the
the museum building and grounds, received an average of 25.7 minutes
per tour. 148 visitors received combined information and interpretation
service in the museum lobby, public garden, and also in the
visited the museum.

Income of Museum: The travel of 148 visitors has been
exceeded over, by the amount of 148 for May of 1948.

Visitors: April 22 - 25 people and teachers from Tucson Junior High
history classes were interested in museum visitors.
April 23 - 25 people from University of Arizona in
the University of Arizona, Tempe, was a very interested visitor.
May 1 - A group of about 100 from the Arizona school.

Special Activities: May 4 - Photographers Ray Smith and Milton Abbott
of Tucson, Arizona, taking photos.
April 22 - 25 people from Tucson Junior High, Tucson
colored movies for Tucson Junior High, Tucson.

INSPECTIONS: May 17 - Chief Clerk Castellum arrived in P.M. and spent a day going over many matters, and conducting an inventory of non-expendable property.

May 22 - Architect Kenneth M. Saunders arrived, and departed the afternoon of the following day. He inspected the status of construction work being done here by contract, and went over in detail with the contractor and custodian other work seriously needed.

NEW CONSTRUCTION: On May 8 the Tucson Roofing and Supply Company, of Tucson, Arizona, commenced contract work here to embrace replacement of the nave roof of the mission and plastering and roofing on the residences. At this writing the nave roof is ready for completion within a couple of days, as the base felting and water drains are now in.

STORM DAMAGE: On May 10 high winds literally ripped two sections of original plaster from historic buildings here. Weathered spots allowed wind to get behind edges of plaster, and some fell from the arched entry of the mortuary chapel and from the top of old court walls east of that point.

WATER SUPPLY: On May 2, while we were doing considerable irrigating, the water pump began sucking air instead of water for a short period. ~~Since~~ We are now drawing water from 64 feet down in our 77 foot well. Such an occurrence is a pretty good hint that within a year or two we will have to pull the system and run our pipe deeper.

NATURE OBSERVATIONS: The other day neighbors captured a small Gila Monster in the alfalfa field east of the monument, and gave it to us. The little fellow was about seven inches long (evidently a last year's model). Promptly a wooden-walled pen was made, and water and shade provided, so the lizard could be studied in captivity for a while. But the first night of captivity found the ungrateful varmint unappreciative of our housing efforts in its behalf, and "dug under the wall to freedom."

A few days ago some folks over Patagonia way told Ranger Brewer they thought an old basement in the hillside back of their house was a rattlesnake den, and that they were afraid to go inside it. She said she thought "Bring 'em back alive Jackson" might help. So on a day off the Jackson family went over. I removed one nice Black-tailed Rattlesnake from the basement (there were no others in it), and brought it back to Tumacacori to keep for a few hours in a screened snake box. On Sunday, while with a party of visitors, I was suddenly electrified when my oldest boy ran to me and said that Bruce, the youngest, had just got rattlesnake poison in his eye! I beat my shadow getting to the house, and found this was quite true. But Betty, being an HCWP of long standing, and therefore versed in desert first aid principles, had already washed out the boy's eyes under a tap, and all was under control, with no harm done except to our nervous systems.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATURAL PARK SERVICE

The accident occurred as Bruce leaned over to look at the snake. The upper, wooden lid of the snake box was open, but the screen of the inner door was safely closed. However the snake, being somewhat irritable, struck upward as the boy leaned downward to look, and its head hit the screen with mouth wide open. Venom sprayed upward, and one drop got into the boy's eye.

GENERAL: The first Boy Scout troop in the history of this vicinity has recently been organized. The custodian is secretary of the troop committee, and is active in private time helping the other committee members push the movement to what we hope will be a strong and permanent basis. We have one patrol, the "Pioneer Patrol", and have just started a "Cub" pack.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

----- NATIONAL MONUMENT
Tusigoot

Clarkdale, Arizona

----- May 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

Following is the monthly narrative report for Tusigoot National Monument for May, 1947.

Weather Conditions: The earlier part of the month was characterized by unusually hot days with a maximum recording of 102 degrees. This was broken when a refreshing rain of approximately .4 inches fell on May 6, and was the first measurable precipitation in six months. During the latter part of the month the weather moderated considerably with the daytime temperatures prevailing in the lower 90's which is normal for this time of the year.

Visitor Totals and Trends: Travel during May dropped to 822 which is a 50% decrease from last month's total. However, the number of visitors is 40% higher for the current Fiscal Year as compared with 1946. Indications still point to an accelerated 1947 Summer Travel inasmuch as the trend to date has been that of transcontinental tourists representing travel-starved Americans, and the close of school should mark the onset of the rush. Owing to a number of reasons, thousands of Americans are now keenly aware of Arizona's 16 superlative National Parks and Monuments, and are taking the time and money to see them.

Guide and Contact Service: Custodian Cotter is on annual leave five days per week and on duty status during Richert's two days off. With a smaller number of visitors this month, it was possible to raise the average time spent with each group both in the museum and ruins trips. An average of 21.5 minutes each was devoted to 203 ruins trips, and 22 minutes for 252 museum parties.

Personnel Time: Museum: 92 hours, 25 minutes. Ruins: 70 hours, 55 minutes. Total time for Custodian Cotter, 52 hours, 35 minutes; for Richert, 110 hours, 45 minutes.

Vital Statistics: The many friends both in and outside the Service of Custodian and Mrs. J. L. Cotter will be interested to learn of the birth of a son, Lawrence Tomlin, on May 2, at the Cottonwood, Arizona, Memorial Hospital. This is their second child, and many people are already acquainted with their four year old daughter, Jean, a precocious and charming little lady indeed. Congratulations and Best Wishes to Jack and Virginia Cotter on the event of the new arrival!

Special Groups: Boy Scout Troop 13 of Prescott, Arizona, under the leadership

THE NATIONAL MONUMENT

Special Agent Roy E. Jones is at present, in the custody of the FBI.

of Scoutmaster A. J. Devine. The boys had earned their trip by selling refreshments at a concessions stand during a recent civic affair at Prescott, and were enroute to Grand Canyon.

Dr. Allen with 34 students comprising a Geology Class from the Arizona State Teacher's College, Flagstaff. Following an orientation talk by the Acting Custodian on archeology of the region, the class was conducted to the ruins where Dr. Allen utilized the excellent vantage point afforded by the hilltop to discuss and indicate various geological features of the Verde Valley.

Noteworthy Visitors: Mr. Jack Breed, widely-known photographer specializing in Southwestern scenes, was shown the Monument on May 24. Recent issues of National Geographic and Arizona Highways magazines display his latest work. Mr. Breed apparently enjoyed his tour of the ruins, and he stayed to take many pictures.

Mr. G. R. Wickham, a former Assistant Commissioner of Lands, Department of the Interior, accompanied by Mrs. Wickham were interested as well as interesting visitors on May 20.

Inspections: Foresters Walker, Carlson, and James visited Tuzigoot on May 10. They opined that comparatively little fire hazard exists insofar as Monument lands are concerned, but that constant vigilance is necessary with regard to the Administration Building.

Chief Clerk Luis Castellum arrived May 11 to inspect and advise relative to inventory matters. The Government vehicle Luis was driving broke down at Flagstaff. In order to maintain his itinerary, he was brought to Clarkdale by Custodian Beaubien in the Walnut Canyon truck.

Ranger Schuft of Casa Grande followed the Chief Clerk's visit a few days later to make a reconciliation between Headquarter's Inventory records and those of this office. Pete worked amazingly fast and was here only a matter of five hours.

Cooperating Government Agencies: Forest Ranger Linn, in charge of the Yaeger Canyon Ranger Station in the Prescott National Forest, paid Tuzigoot a courtesy call this month. He stated that an increasing number of people are visiting his station to inquire regarding the location of prehistoric Indian ruins on Forest Service lands with the avowed purpose of visiting them on foot or horseback. Mr. Linn believes it advisable to send as many of these people as possible to such archeological monuments as Tuzigoot and Montezuma Castle where guide and information service are provided, and there is no opportunity of unauthorized digging. It is regrettable that our supply of National Park Service literature is exhausted, otherwise it would have been possible to provide Mr. Linn with booklets to which he could refer his visitors for information and guidance.

Forest Fires: Indicative of the present high fire danger in the Northern Arizona Plateau is the fact that Ranger Linn reported a grass and brush fire of a few acres in extent on the Prescott National Forest near Jerome. This was put out by the Lookout Man stationed between Clarkdale and Jerome who first saw it. Investigation revealed the fire to have been man-caused.

Projects: New screens are being placed on all window frames and doors of the museum and residence. Concurrently with this re-screening job, the outside woodwork such as window casements, doors, and projecting vigas or beams are being given an application of linseed oil. This work is now 50% complete.

Stabilization: Approximately 70 rooms have been stabilized and/or repaired. Custodian Cotter, though on annual leave, has contributed many hours of his time to annotating photographs of the project and compiling the stabilization report. Two very capable, mature, and conscientious workers are now employed from Stabilization Funds. They are Yavapai Indians from Clarkdale, James Hood and Arthur Harris. Mr. Harris worked on the original excavation and repair of Tuzigoot in 1933-34. Moreover, he has had considerable experience as a stone mason gained as an employee of the Bureau of Reclamation. Mr. Hood has worked for the Indian Service.

Ethnology: On May 21, Ned Nayatewa, Chief of the Walpi Hopi Village, spent some time at Tuzigoot. He was conducting a number of his clansmen to Parker Dam for relocation. During an interview with Mr. Nayatewa, Custodian Cotter obtained three interesting legends concerning: 1) Hopi Origins, 2) Hopi pottery designs, and 3) Montezuma Well. These were incorporated into the Tuzigoot Fact File. They will be circularized to any Personnel desiring to read them.

Publications Report: None on hand.

Flagstaff, Arizona.

May 26, 1947

MEMORANDUM for the Regional Director, Region Three. 19.

There follows a report of activities in Walnut Canyon National Monument for May, 1947:

Weather. Several stormy days with light precipitation lessened fire danger temporarily.

Visitors. Of the 1,648 total, 1,034 made the ruins trip unattended. There were 44 picnic parties with 263 people.

NPS Visitors. Kenneth Saunders, Clark Carrel, Raymond Lovelady and Carl Alleman spent some time here discussing projects or gathering data for future work. Foresters Carlson, James and Walker stopped for a brief inspection. Chief Clark Castellum paid a welcome visit as he can answer the questions which bother us most. Pete Schuft was in to inventory and put "decals" on the non-expendable property.

Personnel. Two laborers were hired but they only worked eight days each before laying off to plant crops. Three others have been hired to begin work this week.

Activities. A trench for 1,930 feet of underground power cable has been excavated, with damaged tile placed under the road and trail crossings. Five prefabricated fire places for the picnic area have been installed. A trench for a water line to picnic area has been dug. Some of our other projects are being neglected until supplies arrive. Our routine activities are somewhat behind schedule.

The Custodian made a quick trip to Casa Grande Nat'l Monument to take a car to Chief Clerk Castellum.

Publications Report. Only 500 2-fold leaflets, 100 Location Maps No. 6 and 4 Glimpses of the National Parks.

~~Box 231, Alamogordo, New Mexico~~

~~May 22,~~ 19 47

MEMORANDUM for the Regional Director, Region Three.

Following is our monthly narrative report for the month of May, 1947;

VISITATION	This Month	Travel Year To Date	Fiscal Year To Date
Total Visitors	6,194	47,121	80,637

Peculiar weather conditions have continued throughout the month. In the early part of the month a hot spell was experienced which exceeded any like period since weather records have been kept. This has been followed by winds and cold spells, especially at night. Maximum for the month was 100° on May 5th and the low of 38° was recorded May 16.

Visitors for the month totaled 6,194 in 1,399 cars. This is a slight drop under the corresponding period last year.

An official trip was made to Albuquerque May 16 to inspect a diesel auto-patrol. This machine was found to be small for our use but of much greater advantage than the present Wehr. It is hoped we may soon acquire this machine and get it in operation.

Considerable anxiety was created when a V-2 Rocket strayed from its proposed course and landed only four miles from Alamogordo.

No complaints have been received in the office from any source.

Our Operator-General has been off most of the month with his teeth and, I guess, finally had to have them all extracted. Our roads have suffered some as a result although Harold can handle the old Wehr if it becomes necessary. Our hope to get all the picnic tables cleaned up and repaired before the season is still only a hope. This applies as well to our picnic area shades and grills. It does look like we may get to do some badly needed repairs on our buildings. A contract has been let for such work.

The concession continues to do a good business and more room is certainly needed for its operation.

General

1942

Memorandum for the Regional Director, Region Three.

Following is our monthly narrative report for the month of May, 1942:

VIETNAM
This month, General John H. Mears, Jr.
to the
to the
to the

General Mears, who has been assigned to the
month. In the early part of the month a few small
which occurred and the general situation was
left. This was followed by a series of small
of which. General Mears was in the area for
of 200, was reported May 15.

Visitors for the month totaled 6,100 in 1942. This is
a slight drop from the corresponding period last year.

An official trip was made to the area on May 12 to inspect
local conditions. This mission was found to be well
and no major problems were reported. The general
level was very good and the situation was very
satisfactory.

General Mears' health was reported as good. He
from the general area and has been very active in his
work.

The situation here has been very good for some time.

Our investigation has been very good at the moment and is
good and, in fact, the situation is very good. The
level has improved and is a very good situation. The
the old way it is becoming necessary. Our hope for the
which has been up and running before the general
only a few. This applies as well to the general
which. It has been very good and the situation is
very good. A contract has been for the last year.

The situation continues to be a good situation and we
is certainly making the situation.

White Sands Monthly Narrative Report

May 22, 1947

The Grazing Service seems to be curtailing much of its activity in this section and plans to turn a lot of their equipment over to War Assets, among which is the carryall and power unit now on loan to us. Attempts are being made to transfer this equipment to our Service.

A visitor was in a few days ago and asked if we desired a piece of pottery for our museum. I declined, thanked him very kindly, and explained our policy in this regard; he informed me the pottery was taken some years ago from a mound now within the Monument area. I immediately reversed my decision and he promised to bring it over to us on his next trip to White Sands. This is the first complete pot I have ever heard of coming from this area, while it is broken he advises it is all there. It is apparently one of the Black on White types.

Our museum seems to be working better all the time. A U. S. Gypsum Co. official was in and wrote us a very nice letter regarding his visit. It is hoped we can work out a way to allow that company to prepare for us an exhibit of the by-products of gypsum.

Water continues to be a problem in our vicinity. Alamogordo has on several occasions been forced to place drastic restrictions on the use of water. So far it has had no effect on us but we use as little as possible when hauling it all.

Reports on our publications will soon be simpler, before long we will be entirely out of the White Sands leaflet.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Wupatki----- NATIONAL MONUMENT

-----Flagstaff, Arizona-----

-----26 May 1947, 19-----

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of May, 1947:

Visitors this month: 339 Travel Year to date: 1686

Weather: The highest temperatures yet recorded for early May occurred during the first week, reaching a maximum of 97 degrees. May is also the second driest month of the year here, but we received a total of .99 inches of precipitation. This exceeds any previous precipitation record for the month of May; .06 inches more than that in the wet year of 1941. This moisture, however, seems to have been rather spotty over this general area. At least it reduced a serious fire hazard and probably helped our water supply.

Roads: Considerable road improvement was accomplished during the month. During the two week ends when the rains came we dropped everything else to make fills and to drag and blade the road. One of the local cattlemen loaned us a small pull grader and we are quite proud of our job in those sections where there was little danger of breaking the blade on boulders. On neither occasion did we have our road man and the first time we had to hire a truck to pull the drag, as ours was at Navajo National Monument.

Expecting the arrival of Mr. Ralph Fowler to fill the road maintenance position, we promised jobs to several Navajos. It was necessary to do some urgent road repairs and the only way we could do it was by delaying the stabilization program. When Mr. Fowler did arrive, he stayed only 1½ days and then returned to Colorado because of a previously incurred disability. This is the second time within a year that we have had personnel forced to resign because of a disability which was not fully explained prior to their employment. One of these days we shall learn to profit from experience.

Travel: Visitor travel shows a slight increase over that of previous years and this is an indication of what we could expect if the Sunset approach were open. There was quite a decrease during the first week when the "heat wave" took place, and a very sharp increase after we had improved our road. A number of visitors mentioned being sent here by local business men- see publicity below.

The number of reports received for the month of May 1913 is as follows: 17. The number of reports received for the month of May 1913 is as follows: 17.

During this month the following reports were received from the different departments and sections: 1. The number of reports received for the month of May 1913 is as follows: 17. The number of reports received for the month of May 1913 is as follows: 17. The number of reports received for the month of May 1913 is as follows: 17.

Publicity: Flagstaff is launching a drive through its Chamber of Commerce to interest more of the passing tourists in the attractions of this general area. Evening meetings of business men and their employees are being held, only three to date, and local National Park Service men have been requested to address the groups. Both Custodian Jones and Ranger Aubusson have participated to date, but tentative plans will include all men who wish to do so.

Considerable comment has been received on the newspaper articles prepared by Mrs. Jones regarding the introduction of electricity at Wupatki and the unusual discovery of Sunset Crater signs at Petrified Forest. Apparently both items were used on news broadcasts over KTAR in Phoenix.

An article on Wupatki prepared by Devereaux Butcher of National Parks Magazine was received for correction. It is one of the short articles for the July issue.

Personnel: Approval was received of the establishment of a Road Maintenance man for Wupatki-Sunset-Walnut. Mr. Ralph Fowler was selected for the job, but as stated above remained on duty only a short time.

A local veteran, Dan Hogan, was hired on a temporary basis to do ruin stabilization work, but to date has had to spend most of his time on roads with a Navajo crew.

No selection has been made of a temporary ranger, although several applicants have been contacted. To date it has been impossible to fill this position because of housing, inadequate pay, or because the person wished to continue schooling.

NPS Visitors: In preparation for a revision of the Wupatki Master Plan Landscape Architect Alleman spent part of two days studying the area. What impressed us was the improvement in the methods of approach and analysis used by the Branch of Development compared to pre-war times.

Forester Walker of the Director's Office and Regional Foresters Carlson and James paid a brief visit to Wupatki on the 10th. The custodian was delayed in town by applicants for jobs and did not meet them, but Ranger Upton handled the situation very well.

Newsworthy Visitors: One party of visitors ignored our "Road Closed" sign coming down from Sunset Crater and can claim the distinction of being the first visitors in the past ten years to knock a hole in their crankcase. It is not entirely clear just where this happened but they drove slowly on down towards Wupatki and got stuck in the cinders just beyond Heiser. They were towed to Flagstaff after dark.

THE HISTORY OF THE UNITED STATES
OF AMERICA
FROM 1789 TO 1861

Jefferson's first act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's second act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's third act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's fourth act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's fifth act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's sixth act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's seventh act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's eighth act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Jefferson's ninth act in becoming a member of the House of Representatives was to introduce a bill for the abolition of the slave trade. This bill was passed by the House on September 18, 1806, and it was the first time that the House had ever passed a bill for the abolition of the slave trade.

Spring Flow: Both springs continued to decrease in their flow compared to last month. Wupatki is flowing 226 g.p.day or 241 gallons less than last month. This is a normal decrease for this time of the year, but we cannot stand too many of these 100% cuts. Heiser Springs continues to decrease: 1630 g.p.d. compared to 1763 last month.

General: All in all this has been a fairly hectic month consisting of constructing tenthouses, hauling five tons of Quonset hut from Flagstaff, planning the erection of this hut, trying to keep the paper work current, the roads in shape and guiding visitors along with all the usual and unusual interruptions. We do not look for it to be much different during the summer months.

Overlooked under the NPS Visitors was the fact that we had a visit from Ranger Pete Shuft of Casa Grande. Pete checked over our non-expendable property and provided identification numbers. We enjoyed his visit in both a business and social sense.

Publications on Hand: The few remaining pamphlets on Wupatki are being reserved for answering inquiries:

Wupatki Informational Leaflet: 30 copies.

Region Three Office--Mr. King			

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Region Three

Santa Fe, New Mexico

July 13, 1947.

MEMORANDUM for Associate Regional Director E. F. Sengren.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of June, 1947.

Staff Activities - General

Naturalist Dale C. King was in the office until July 23 when he accompanied Assistant Regional Director John A. Davis and Dr. E. F. Sengren, of Santa Fe on a field trip to Chaco Canyon, Aztec Ruins, Mesa Verde, and Arches. He was also to visit Great Sand Dunes and Capulin Mountains.

Archaeologist Charlie B. Steen was in the field during the first week in June. He visited Chaco Canyon, Montezuma Castle, Tuzigoot, Supai, and Walnut Canyon National Monuments, and the Hishiahu Ruin in the Fort Apache Reservation. He was accompanied by photographer George Brant. On June 27, Steen went to Chaco Canyon again to take Archaeologist Mike Lancaster to Pecos National Monument; he was still in the field at the end of the month.

Naturalist Maurice Sullivan returned from an extended field trip on June 29. He had spent sometime in Organ Pipe Cactus National Monument aiding in a cattle count there and becoming familiar with the monument. He also visited Saguaro, Pecos, Montezuma Castle, Walnut Canyon, Chiricahua, and White Sands National Monument. He left again on the 30th of June with Regional Naturalist Kate W. Dodge to make public extension talks at Silver City State Teachers College. He was in the field at the end of the month.

Administration - Interpretation

The usual reports and 48 letters were written.

Approximately seven 2-fold leaflets were prepared on mimeographed stencils and run off for temporary use by the field until new supplies of the literature can be obtained.

Progress of Exhibit Plans and Projects

Word was received from the Custodian, White Sands, that the Billy the Kid Exhibit which was during the war removed from the Museum at White Sands has been loaned indefinitely to the Lincoln County Museum, Lincoln, New Mexico.

[Text block containing several lines of mirrored text, likely bleed-through from the reverse side of the page.]

During his field trip, Naturalist King discussed possible interpretive improvements at Archaic Ruins and Archaic National Monument. With our present lack of any facilities for preparation of museum exhibits it is going to be difficult to maintain, much less improve, the rather shoddy exhibits and interpretive devices throughout the whole Southwestern National Monument system.

Research and Observations

Archaeologist Gordon Vivian at Chaco Canyon National Monument is resuming work on preparation of a research report on excavations performed in advance of CCC construction at Chaco Canyon before the war.

Further correspondence ensued with the branch of history in an attempt to obtain certain historical information concerning Tumacacori and the status of affairs of southern Arizona about the time of the abandonment of the church in the 1820's.

Cooperative Activities

Steen prepared suggestions for the Superintendent, Fort Apache Indian Reservation, as to possible stabilization methods and projects at Chinle Ruin, which is to be administered and protected by the United States Indian Service.

Headquarters Loan Library

Accessions for the month totalled 92,-- 8 books, 42 pamphlets, and 42 periodicals.

In answer to a request, Steen prepared a selected bibliography for El Morro National Monument.

Southwestern Monuments Association

Treasurer Alan C. Vedder worked fourteen days during the month, made out 47 purchase orders, one deposit turnin for the treasurer, and one disbursement list, and mailed 129 covers. A total of 89 letters were written. During the period he took care of almost all the incoming mail, particularly when the Executive Secretary was away for ten days. He put the purchase order files in order, out stenoids, sent memoranda to custodians, filed mailing list cards, and made out 13 checks for the month of June. On June 2 former treasurer Dan Peterson resigned and turned the books over to Vedder. On July 2 Vedder officially became treasurer, much more time is now spent on the bank book, Journal, letters, and working on turnins.

During the month the Association was fortunate in obtaining 100 reprints of the National Park Service article in Fortune Magazine kindly donated by the editor of Fortune Magazine. A total of 30 of these were mailed to the Director for his distribution.

During the past few years, the Government has been making considerable progress in the development of the country. It has been able to secure the necessary funds for the various projects and has been able to carry out the work in a most efficient manner. The results have been most satisfactory and it is hoped that the work will continue to progress in the future.

The Government has also been able to secure the necessary funds for the various projects and has been able to carry out the work in a most efficient manner. The results have been most satisfactory and it is hoped that the work will continue to progress in the future.

The Government has also been able to secure the necessary funds for the various projects and has been able to carry out the work in a most efficient manner. The results have been most satisfactory and it is hoped that the work will continue to progress in the future.

The Government has also been able to secure the necessary funds for the various projects and has been able to carry out the work in a most efficient manner. The results have been most satisfactory and it is hoped that the work will continue to progress in the future.

The Government has also been able to secure the necessary funds for the various projects and has been able to carry out the work in a most efficient manner. The results have been most satisfactory and it is hoped that the work will continue to progress in the future.

The Collector of Internal Revenue was queried concerning the possibility that the Association might have to pay a Federal membership tax. He replied in the negative, which is fortunate in that it will save the Association considerable outlay.

The completed manuscript and illustrations of "Poisonous Jewellers of the Desert" by Matt A. Lodge were forwarded to the successful bidder, Sugar Pine Press of Westwood, Lassen County, California. It is hoped that this booklet, which will find ready sale in the Southwest, will be issued sometime early in August.

Unusual Activities - Conferences

King attended a staff meeting concerning the allocation of a small fund which was allotted by the Director late in June. He was pleased to learn that purchase of a dump truck for the ruins stabilization mobile unit was authorized from these funds.

King also attended two sessions of the annual meeting of the Western Association of State Game and Fish Commissioners held in Santa Fe.

Ruins Stabilization

Steen transported Archaeologist Aldo Lancaster to Tumacacori for a month's duty supervising stabilization work there three days a week, and doing relief guide duty the other two days. King, because his report on stabilization activities in Tumacacori last June has never been finished, furnished the Guardian with a letter detailing methods used in lime mortar stabilization.

Steen performed further tests of stone hardeners at Pinalier National Monument and also at Santa Fe on materials from Casa Grande and Tumacacori National Monuments.

King was greatly impressed by the excellent stabilization work performed at these canyon on the ruins of New Pechi Alto and Chetro Settle. If the mobile unit can proceed at present pace it is possible that Chetro Settle will be completed so that only routine maintenance will be necessary from now on. This will allow the unit to concentrate its attention on Pueblo del Arroyo and others of the great ruins which urgently need attention.

It was also a pleasure to see the drainage pipe at Aztec Ruins functioning perfectly. The ground water in the underground lava in the ruin plaza has dropped two feet, and unless increased rainfall changes the situation, the area problem at Aztec has been lessened considerably.

Projects for Incoming Month

King and Steen will be in the office for almost the entire month, although probably both will attend the Paleo Field Conference of Archaeologists July 28, 29 and 30. Routine affairs will occupy their attention.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator will then gather information about the problem and the people involved. This information will be used to develop a plan of action.

Arches NATIONAL MONUMENT

Moab, Utah

June 27, 1946

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of June, 1946:

GENERAL: Travel has been excellent during the past month and many of our visitors have stated that the April issue of "Arizona Highways" was responsible for their visit.

Utah Wonderland Tours (Colorado River Scenic Tours), who will run scenic trips on a circle tour from Salt Lake City, Utah to Capitol Reef, Natural Bridges and Arches National Monuments, started their first trip on Friday, June 20th with a Life photographer to record the scenic features and Miss Maurine Whipple, who wrote "Giant Joshua" to do an article on the trip. They rode Capitol Reef OK but heavy rains held them at Fruita, Utah for two days. When they arrived at Hite, Utah to ferry across the Colorado River, the ferry was not in operation due to high water so they travelled via Hanksville and Greenriver to Moab and then on to Monument Valley and Natural Bridges. They intend to return on June 27th or 28th to take in Arches and the surrounding country.

WEATHER: Light rains fell on June 3rd, 10th and 11th with heavy rains on June 20th and 21st. For most of the month the weather was unusually cool and heavy winds occurred intermittently.

TRAVEL: Our travel for the month was 171 cars containing 516 people as against 397 visitors for May and 328 for June, 1946. We had representation from twenty seven states and the District of Columbia.

INTERPRETIVE SERVICES: Eighteen parties consisting of 58 people were contacted in the Windows section and 48 parties of 149 people were contacted at headquarters. Two guided trips were taken into the Windows section with 3 people. Several parties made the hike into the Courthouse Towers section and were very enthusiastic over the scenery found in that area.

RANGER SERVICE: Ranger Walker made a trip to Natural Bridges on June 10th and 11th to make installation of a power unit at that area and to take a service man for the overhaul of the kerosene refrigerator at that area, which has not been functioning properly.

[illegible]

To you, the dream was "it would be if we had no fear". The "if" was "never". I have never been able to get it out of my mind. It was "never" because I was afraid.

Sincerely,
John F. Kennedy

[illegible]

on June 20th and 21st. For most of the month the weather was generally good and heavy winds occurred infrequently.

as alleged. The witnesses also said that they did not know the person who was traveling for the World War II Veterans' Administration and that they did not know the person who was traveling for the Veterans' Administration.

IV. WITNESS STATEMENT: Fifteen parties consisting of 58 people were contacted in the Windsor section and 4 parties of 12 people were contacted at Newmarket. Two guided trips were taken into the Windsor section and 3 parties of 14 hikers into the Carleton Place section. Several parties were very enthusiastic over the scenery found in the area.

RAMBER SERVICE: Ranger Walker made a trip to Natural Bridges on June 1958 and took as his installation of a pump with at least one and to take a service for the removal of the propane refrigerator at that time, which has not been functional properly.

Page 2, Arches Narr. Rpt, June, 1947

COOPERATING GOVERNMENTAL AGENCIES: Mr. Aaron W. Tracy, chairman of the Utah State Department of Publicity and Industrial Development, visited the monument on May 28th. In a conference with Grand County Commissioner Taylor he stated that his department would probably make available to Grand County the sum of \$15,000 for improvement of roads in Arches National Monument. We are keeping our fingers crossed and hope that this appropriation materializes for we can certainly make some much needed improvement with this amount of money.

MAINTENANCE AND CONSTRUCTION: Installation of the water system at the Windows parking area was completed on May 29th and water is now available for visitors. We have had several compliments by visitors who certainly appreciate finding a drink of water after making the hike to the features in the area during the hot weather. The water up to this time has been quite cool due to the fact that the entire installation is underground.

The 1½ KW power unit received from surplus was uncrated, serviced and prepared for installation at Natural Bridges.

NATIONAL PARK SERVICE VISITORS: Howard Young stopped by for a short visit on June 1st on his way back to Santa Fe from Ogden, Utah.

ROADS: The State highway maintenance crew graded the Windows road on June 4th and 5th and it was in good condition until our heavy storms of June 20th and 21st. It was posted "Closed" from June 21st to 23rd due to quicksand in Courthouse Wash. Ranger Walker and I spent most of Sunday, June 22nd on repairing same, putting it in passable condition. The State's motor grader is in use on the Colorado River road but hope it will be available for this repair job in the next few days.

Grand County started improvement of the Salt Valley road yesterday and it should be in good shape for use by visitors in visiting the Devil's Garden and Delicate Arch sections.

SPECIAL ACTIVITIES: From June 12th to June 17th inc. the custodian was on duty at the National Park Service exhibit at the Utah State Centennial Exposition at Salt Lake City, Utah.

As chairman of the publicity committee for the Grand County Centennial commission, I was in charge of the installation of a scenic exhibit at the exposition at Salt Lake City. This job was completed on June 18th. The display consists of 13 enlarged pictures of the scenic features of Grand County with Arches, Deadhorse Point, Fisher Towers, LaSal Mountains and Moab Valley being represented, and a relief map with the various sections designated by numbers with corresponding numbers on the pictures. An excellent collection of high grade uranium ore is also included in the exhibit.

COOPERATING GOVERNMENT AGENCIES: Mr. Aaron B. French, Director of the Utah State Department of Publicity and Industries, visited the monument on May 28th. In a conference with Grand County Commissioners Taylor he stated that the department would probably make available to Grand County the sum of \$15,000 for improvement of roads in Arches National Monument. We are keeping our fingers crossed and hope that this appropriation materializes for we certainly need some much needed improvement with this amount of money.

MAINTENANCE AND CONSERVATION: Installation of the water system at the Windows parking area was completed on May 28th and water is now available for visitors. We have had several complaints by visitors who were finding a strip of water along the side of the road in the area during the hot weather. The water in this area was being left and not to the fact that the entire installation is underground.

The 1st of June with several from Arches Nat. Mon. arrived and prepared for installation at natural bridges.

RECORDS OF THE MONUMENT: Grand County records for a short visit on June 1st in the way back to the town of Hatch, Utah.

PLANT: The State Highway Department was visiting the monument on June 1st and it was in the way back to the town of Hatch, Utah. It was found that the monument was in good condition and the water was in good condition. The State Highway Department was visiting the monument on June 1st and it was in the way back to the town of Hatch, Utah.

On the 1st of June, several of the State Highway Department and the State Highway Department were visiting the monument and the State Highway Department was in the way back to the town of Hatch, Utah.

RECORDS OF THE MONUMENT: From June 1st to June 1st, the monument was in the way back to the town of Hatch, Utah.

In addition to the publicity campaign for the Grand County Highway Department, I was in charge of the installation of a water system at the monument on May 28th. The State Highway Department was visiting the monument on June 1st and it was in the way back to the town of Hatch, Utah.

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 June 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for June 1947.

WEATHER. Ideal weather has prevailed the entire month and with the closing of public schools travel has soared.

MAINTENANCE. The job of repairing the adobe-cement wall at the residence was completed and the museum roof was repaired and swaged with a new coat of tar.

Visitors. Ranger Shuft, Casa Grande, visited this area on special assignment from the Region Three Office. Mr. B. C. Johnson, District Engineer, Geological Survey; Mr. and Mrs. R. L. Lingle, President State New Mexico Reclamation Association; Mr. and Mrs. S. W. Beeman, artist, Burlingame, California; Dr. and Mrs. Paul H. Fluck, Lambertville, N.J.; Mr. and Mrs. Walter M. Gilbert, Executive Officer Carnegie Institution of Washington, D.C.; Leland C. Bacus, US Fish and Wild Life Service with Fred Dasch from Saguarchi, Colorado visited during the month.

SPECIAL ACTIVITIES. Ranger Bill Reed was married in the early part of June.

The Custodian visited Mr. Richard Evans, owner of a trading post at Shiprock, New Mexico regarding the collection of excellent pottery that his family has acquired during the past 50 years from early Pueblo Indian sites. Mr. Evans had asked our opinion regarding the donation of a very fine Pueblo mummy for the museum at Aztec Ruins. We hope in the not too distant future to add this specimen to the display at Aztec.

INTERPRETIVE SERVICES. There were 209 conducted trips thru the ruins in which were 1186 visitors and 322 trips thru the museum with 1587 visitors.

INCREASE IN TRAVEL. Visitation has increased about 63% over that of last year with 1887 people in 513 cars from 40 states, Washington, D.C., Newfoundland, India and the Bahama Islands.

PUBLICATION REPORT.

16 page pamphlet, on hand ----- 153
Free, 2-fold informational leaflet, on hand ----- 500

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT

SANTA FE, NEW MEXICO

June 27, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of June, 1947.

Weather and Roads

Weather has been dry and windy interspersed with cold periods. Only traces of rain fell during the report period. High temperature recorded was 94° but several times the mercury fell to within a degree of the freezing point at Headquarters with heavy frosts at a slightly higher elevation. High fire danger has prevailed during most of the month. A record was set this year when the danger shot into the "Extreme" bracket on two successive days. Only two other "Extreme" days have been recorded since the establishment of the weather danger station here in 1939. One day of extreme danger was recorded in June of 1939 and one in June of 1946, but this year is the first time we have had two extreme days in one year and two on successive days.

Another milestone was reached in Bandelier history with the opening to traffic on June 18 of the Pojoaque short cut to Santa Fe. The newly constructed and surfaced "Atomic Highway" completes a link in the road from Santa Fe to Bandelier. It shortens the distance to Santa Fe from 60 miles via Espanola to 43.5 via Pojoaque and leaves only 13 miles of our approach road that is not surfaced. Work has commenced on the new highway bridge across the Rio Grande at Otowi but the structure probably will not be completed for many months. The approach road across the Ramon Vigil Grant has been dry and dusty, but since we have the authority and the money to maintain it we have kept it in much better shape than in previous years. Complaints as to its condition have been few this year. We are still handicapped by lack of a heavy grader. Our "puddle jumper" tricycle is not heavy enough to pull ditches or move much dirt.

Notice of award of the work of seal coating the 2.52 miles of oil surfaced road leading into Frijoles Canyon has been given to Mr.

1941, and the other was in 1942.

Abstract: This paper discusses the impact of the 1997 Asian financial crisis on the economies of the Asian Pacific region. It examines the causes of the crisis, the impact on the region, and the role of the International Monetary Fund (IMF) in the crisis. The paper also discusses the impact of the crisis on the economies of the Asian Pacific region and the role of the IMF in the crisis.

10. The following is a list of the names of the persons who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation.

Haake of Santa Fe. The work will begin as soon as approval of the Director is received and should be finished by the end of July.

Administrative

The Custodian made a pack trip to the Capulin Canyon, Turkey Springs, Stone Lions, and Painted Cave to inspect trails and general conditions in this area. Several routine business trips were made to Santa Fe and Region Three Office. Clerk Bean spent the last half of the month on special detail in the Regional Office.

Maintenance

The road crew spent most of the month patching breaks in the surface of the oiled road in preparation for the seal coat job to be performed under contract. They also put in a new culvert on the Otowi Section, cleaned all other culverts and graded the approach road, repaired some washouts, etc. The Fire Control Aides have put the telephone system into first class shape and have worked the trails over the monument. During the periods of high fire danger the Aides have been held at Capulin Base Camp where they are engaged in making extensive improvements. High winds have kept throwing trees across the trails in critical spots so that constant vigilance has had to be maintained to keep them open.

Maintenance man Valencia constructed a new watering trough at the temporary corral. He also erected tent houses for three employees, installed propane gas in them, and ran an electric line to the tents so that employees could have the benefit of electricity. He also has completed insulation of the walk-in refrigerator at the Lodge and kept the ruins cleaned of weeds in addition to the garbage disposal, grounds cleanup, equipment maintenance, power plant operation, campground and residence fueling, general cleanup, and the thousand other jobs connected with operation of the monument. Our rehabilitation program continued and minor painting, plastering and repair on the buildings is almost complete. Much major work remains to be done. The new compressor and cooling fan were installed in the Lodge kitchen. The radio obtained from surplus was installed and daily contacts have been made with Region Three during the week days since June 9. Considerable trouble was experienced with the Diesel power plant; the custodian and mechanic worked all night on two occasions to get it back into operation. A new 7½ KW gasoline plant was installed, but it does not have capacity enough to handle our full load and is not much good at this season as a standby plant.

Park Operator

The operator reports a general lack of business and although travel was greater this month than for the corresponding month last year revenues are off. This is unfortunate for it is believed that the concessioner is offering the best service she ever has.

1991-1992

[illegible]

1998

The undersigned hereby certifies that the above named person has been duly elected as a member of the Board of Directors of the [redacted] Corporation, and that he is qualified to exercise the powers and perform the duties of such office.

Protection

Ranger patrol of the upper Frijoles has been made on two Sundays during the month. On both patrols large numbers of fishermen were contacted, especially in the vicinity of the Upper Crossing. Licenses and creel contents were noted. The trail to the Upper Crossing is in need of some attention and will be repaired as soon as it is possible to remove men from more urgent duties. One patrol was made to the Otowi section and Taankawi ruins, where everything seemed to be in good order and the ruins unmolested.

During recent weeks there has been noticed a rather heavy infestation among the alder trees of the alder flea beetle. No large scale control program is being planned but plans are being made to spray the trees in the campground and headquarters area.

The second horseback accident of the season occurred on the morning of June 5. Mr. Jack Hamlet, an employee at the Lodge, was thrown from a horse and received minor injuries. A Personal Injury Report was made of the accident. Emphatic words of caution are being given to riders about riding along narrow trails and along steep cliffs. There is now in the process of preparation a mimeographed sheet which will be handed to each prospective rider. This sheet will urge all visitors to ride with care and definitely explains which trails are to be used as bridle paths.

The periodical tests of the drinking water are being taken once each week. Previously, test samples were collected and sent to the State Laboratory at Albuquerque once each two-weeks period. Since chlorination has started, all reports have been satisfactory.

Personnel

Jimmie Brooks entered on duty as fire control aide, SP-5, June 2. Three seasonal rangers were entered on duty the first of the month. Simon Joseph Thomas of Santa Fe is the only hold over from last year. Robert Morris and Jack Turney, both of Alamosa, are serving their first season. All personnel have had difficulty obtaining uniforms. Ranger Onstott ordered his uniform in April and it has not arrived yet. The new men have had orders in since the first of June but are told that they cannot obtain uniforms until late in the summer. It is strongly recommended that we make blue jeans the official uniform until such time as more formal attire becomes available. It is reported that regulation hats probably will not be available until next year.

Visitors

Former Regional Geologist, Dr. Charles Gould, spent a day at the area renewing acquaintances. Archeologist King and Stan Davis spent June 10 with us. Archeologist Steen spent a day going over stabili-

UNITED STATES
DEPARTMENT OF THE INTERIOR

sation problems. Regional Archeologist Reed and family brought Dr. Portia Hume of San Francisco to see the monument on June 7. Luis Castellum with family and Henry Tullar stayed overnight June 7. Other Region Three Office visitors included Mr. and Mrs. Lovelady, Carl Alleman and family, Charlie Carter and family, and the Richard Barnetts.

Travel

The number of visitors for June increased 177, but the number of automobiles entering the monument for the first time decreased 52 and the number of visitor days decreased 72, an indication, we believe, that bona-fide tourist travel is less this summer. The lodge reported only a pitiful 200 visitor days (a decrease of 182 from last June) which would seem to be a reflection of the same trend toward decrease of tourist visitors and increase of Los Alamos picnic crowds. The weekend influx of Los Alamos people creates a small "Coney Island" in Frijoles Canyon and is assuming the proportions of a serious problem.

Interpretation

One film talk was given off the monument this month to the Albuquerque Rotary Club. 100 luncheon members saw the film "New Mexico National Monuments". Five evening lectures were given during the month. However, as more people are staying overnight, the evening lecture program is organized for full operation with each seasonal ranger preparing three to four talks each to provide a quite varied program throughout the week.

The percentage of visitors taking ruins trips jumped 30% over last June despite an increase of re-entry cars and repeat visitors.

19

MEMORANDUM for the Regional Director, Region Three.

The following is a report of activities at Canyon de Chelly National Monument during the month of June, 1947.

Weather

Dry hot weather accompanied by heavy winds thruout the month made canyon conditions unfavorable for travel much earlier than usual. The maximum temperature of 85 degrees is slightly higher than usual. The heavy winds generally brought a few drops of rain and were followed by cold spells during the latter part of the month. The minimum temperature of 35 degrees is far below those registered during the last few years. One thunder shower brought a total of .27 inches of rainfall.

Administration

Ranger Shuft arrived early the morning of June 12 and all non-expendable property was inventoried and numbered with decal.s. The usual work on accounts, estimates, etc. took considerable office time. One trip was made to Gallup, New Mexico to pick up my Temporary Ranger and attend to other Government affairs.

Maintenance

The Dodge Pickup was painted by the Custodian and Government Decals placed on the doors. The Fairbanks-Morse pump engine was overhauled and given a new lease on life for a while. The Signs constructed by the Arizona State Highway department under the old N.Y.A. program and which had been stored at Petrified Forest National Monument were mounted and installed at the turn-off at Chambers, Arizona.

Travel

This month has seen the highest number of visitors for any June on record with a total of 370 visitors. This brings our travel year to date up to 1,150 visitors which is our largest number since 1940. It is an increase of 202 visitors over last travel year to date.

With these visitors a total of 106.5 hours were spent in guide time on 32 separate conducted tours. Seven hours were spent in contacting 49 visitors in 15 groups.

13

Dear Sir:

The enclosed is a report of activities at the National Monument during the month of June, 1947.

Sincerely,
[Signature]

The first section of the report is devoted to a description of the work done during the month of June. This section is divided into two parts, the first of which is devoted to a description of the work done in the field, and the second to a description of the work done in the office. The report is divided into two parts, the first of which is devoted to a description of the work done during the month of June, and the second to a description of the work done in the office.

Very truly yours,
[Signature]

The second section of the report is devoted to a description of the work done in the office during the month of June. This section is divided into two parts, the first of which is devoted to a description of the work done in the office, and the second to a description of the work done in the field. The report is divided into two parts, the first of which is devoted to a description of the work done during the month of June, and the second to a description of the work done in the office.

Very truly yours,
[Signature]

The third section of the report is devoted to a description of the work done in the field during the month of June. This section is divided into two parts, the first of which is devoted to a description of the work done in the field, and the second to a description of the work done in the office. The report is divided into two parts, the first of which is devoted to a description of the work done during the month of June, and the second to a description of the work done in the office.

Very truly yours,
[Signature]

The fourth section of the report is devoted to a description of the work done in the office during the month of June. This section is divided into two parts, the first of which is devoted to a description of the work done in the office, and the second to a description of the work done in the field. The report is divided into two parts, the first of which is devoted to a description of the work done during the month of June, and the second to a description of the work done in the office.

The fifth section of the report is devoted to a description of the work done in the field during the month of June. This section is divided into two parts, the first of which is devoted to a description of the work done in the field, and the second to a description of the work done in the office. The report is divided into two parts, the first of which is devoted to a description of the work done during the month of June, and the second to a description of the work done in the office.

Visitors

Among the visitors to Canyon de Chelly this month was Assistant to Secretary of the Interior Mr. Davis and his party of Indian Service officials who made an unannounced visit while on a tour of inspection of the Indian Service school at Chinle on June 17.

Ansel Adams and Bill Lippincott spent three days taking Photographs of the Canyons. Mr. and Mrs. Robert Hannum (Alberta) of "Spin a Silver Dollar" fame, Sally Lippincott, Dr. and Mrs. C.G. Salisbury and a party of fifty delegates from the Southern California Presbytery. Lon Megargee, artist of note and Miss Bertha Dutton and Dr. Ferdon of the Archeological staff of the New Mexico State Museum of Santa Fe.

Ranger Service

Temporary ranger Richard E. Thomas entered on duty June 17. We have been able during the greater part of the month to give our visitors more and better interpretive service.

Fire Protection

One class B fire occurred during the month at the head of Monument Canyon burning 2.6 acres. This fire was reported by Indian service lookouts. It was caused by fires built by searchers for a lost Indian child. The fires were left burning and spread thru pine needles and duff.

Public Health

Four trips have been made into the Canyon to bring out sick Navajo Children. One trip was made to the rim opposite White house and the sick girl was carried from the opposite rim down a hand and toe trail and then up the other side to the Car.

Our area lost an enthusiastic friend and one who has given much aid. Dr. Fred Stone, Physician at the Chinle hospital died suddenly at 2:00 P.M. on June 21. We'll miss his friendly visits with guests and his cheerful whistle.

NATIONAL PARK SERVICE

June 25, 1947

Memorandum for the Regional Director
Region Three, National Park Service,
Santa Fe New Mexico.

There follows a report of the activities in
and around Capulin Mountain National Monument.

Visitors are estimated to be three thousand
for the month, being total visitors, Travel year to
date nine thousand nine hundred sixty, and Fiscal
year to date to be twenty four thousand nine hundred sixty.

Special Visitors;

Dr. Nusbaum and Party from the
University at Las Vegas was making a field trip
about the middle of the month, on the thirteenth
I believe it was. While here they all visited the
Capulin Mountain National Monument and also went on
over to the Folsom Site, where Dr. Nusbaum delivered
a brief address which was indeed interesting.

Mr. Balch from the Regional Office in Santa Fe made
an all too brief call on the Custodian a few days ago.

Free publications on hand as of June 23, 1947

Capulin Mountain National Monument,
three page folders, eight thousand.

Weather has been grand all during the month, slightly
dry having only about one half inch precipitation
however we had plenty during May and this leaves us
now in splendid condition, all grasses and shrubbery
are extremely lush and all flowers are in bloom.
Too bad Mr. Sullivan came just three weeks too early
but it is mighty hard to predict the seasons in advance.

The new markers that have been placed on the
road in the Monument have been really doing their
work and have had plenty of compliments on them.

Roads have been kept in first class condition all thru
the month.

Respectfully,
Eugene J. Carr,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

June 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for June, 1947.

General: One can hardly pick up a newspaper published in this state today, but one reads in big headlines about the terrible shortage of water and electricity. The state legislature is being attacked and a water code is demanded. 50 % of the irrigation pumps in this area are rationed to pumping only four days a week, and all pumps are shut off from noon to six P.M. Several days during the past month, we have been without electricity a good part of the day due to the shortage of power furnished by the Indian Service.

Weather: The first week of the report period gave maximums in the 90's, but since the 4th. of June, the temperature has always ranged above 99 degrees, and one day it reached 110. The nights have been relatively pleasant, usually ranging in the 50's, and only occasionally reaching the 60's. The days have been clear, with only five cloudy days. Too much plowing up of the surrounding land along with the extended period of drouth, has caused some rather unpleasant dust storms. Old timers tell us that there used to never be the dust storms there are these last few years, since man has over used the land.

Administration: Architect Saunders of the Regional office was in the area the 21st. He has distributed the invitations for bids for the partial reroofing and repairs of the utility area buildings, and the bids will be opened in the Regional office. S.A. Schwenn of the Tucson Roofing Company was in on June 5th. to check over the bid on this job.

Mechanic Stonehocker obtained specifications for bids on the WAA. dump trucks for the Regional office.

Bids have been received from the Treasury Dept. for the sale of old vehicles, and one inspection has been made and two inquiries have been received and answered.

All purchases were closed on the 18th. as reported to the Chief Clerk .

Visitors: June 1947- 1,905; June 1946- 1,592; Travel year to date, 1947- 29,733; 1946- 21,886. This is an increase over June of 1946. Our total visitor travel for the 1947 fiscal year was 34,041, which is 41 more visitors than we had estimated. This is no doubt an all time high for this Monument, and is nearly 10,000 more than we had in the 1946 fiscal year.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COCHISE COUNTY, ARIZONA

April 12, 1927.

RECEIVED BY THE NATIONAL PARK SERVICE
April 12, 1927.

These findings are submitted to the National Park Service
for their consideration.

General: The Casa Grande is a massive structure of adobe masonry, and was built in the twelfth century. It is situated on a high bluff overlooking the San Pedro River. The structure is composed of a central tower and four smaller towers at the corners. The central tower is the most prominent feature of the structure. It is a square tower with a flat roof. The four smaller towers are also square and have flat roofs. The walls of the towers are made of adobe masonry. The structure is in good condition and is well preserved.

Excavations: The first work of the National Park Service in the Casa Grande was done in 1907. At that time, the structure was in poor condition and was being used as a storage house. The National Park Service decided to excavate the structure and to restore it to its original condition. The excavations were carried out by the National Park Service and by the University of Arizona. The excavations revealed that the structure was built in the twelfth century. It was found that the structure was built on a high bluff overlooking the San Pedro River. The structure is composed of a central tower and four smaller towers at the corners. The central tower is the most prominent feature of the structure. It is a square tower with a flat roof. The four smaller towers are also square and have flat roofs. The walls of the towers are made of adobe masonry. The structure is in good condition and is well preserved.

The central tower is the most prominent feature of the structure. It is a square tower with a flat roof. The four smaller towers are also square and have flat roofs. The walls of the towers are made of adobe masonry. The structure is in good condition and is well preserved.

Interpretive Services: Of the 1,905 visitors to the area, 1,056 made the Ruins trip in 134 parties averaging 48.5 minutes per trip. 876 made the Museum trip in 123 parties staying an average of 24.9 minutes. 849 people came into the area to look over the museum, bring friends, of picnic, but did not visit the ruins. 2 Armed Forces members visited the Ruins this month. It has been very noticeable the great decrease in Army and Navy personnel these last six months, which proves the fact that the United States has completely demilitarized. The slight increase of visitors and length of trips over May of this year is due to the increase in children just out of school, traveling with their parents, plus the beginning of the summer tourists passing by on their way to the cooler climates.

Maintenance: The porch roof on Quarters No. 6-5 required complete reroofing.

A complete dead ground developed in the feeder line between the Quarters and the Administration Building, which resulted in having to pull the wire. The old black iron water pipe finally gave way and we found the wires had no insulation for about three feet, making it necessary to replace the pipe with conduit and pull in new wire. Labor was accomplished by Maintenance man Barnett. We expect no more trouble or expense.

The chlorine had rusted out the larger intake as well as the exit pipes to the water storage tanks, making it necessary to replace all the pipe and fittings in the pump house. Mr. Barnett had the pipe cut and prepared before installation, therefore we were out of water for only a very short time.

The long difficulty of our getting grease into one of the bearings of the sewer pump was located by our Maintenance man Barnett, who found the bearing had not been drilled. Drilling it, the difficulty has been solved.

Trips Taken: Mechanic Stonehocker went into Phoenix on the 26th. of May for automobile parts. He also went to Flagstaff and Grand Canyon on the 30th. through the 3rd. to pick up a truck which he left at the latter area on one of his trips a month ago. Custodian Picknell made a trip to Phoenix to get conduit and wire on the 13th. June 24, Mechanic Stonehocker left on a trip to Grand Canyon to pick up tanks for Organ Pipe Cactus, Saguaro, and Tonto Nat. Mons.

National Park Service Visitors, and Visitors of Note: On May 26, Custodian Supernough was in for AAA Ford Pickup and material for his area. The following day Custodian Eggermayer was in for his water tank. Mr. A.E. Buchenberg was in to visit the area on June 9. Dr. E.K. Reed of the Regional Office, dropped in for a few minutes on June 15, to tell us his plans, and he returned on the 18th. with a group of 19 students from the Tempe State Teachers College. A full morning was spent with the group in the Museum, on Comounds A and B, and at the prehistoric ball court. The early part of the afternoon, Dr. Reed gave us pertinent archaeological information.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

On June 21, Architect Saunders stopped in to tell us how the bids for the roofing of the Utility area's Buildings were progressing.

Nature Notes: One night blooming cereus got a head start this year and had a gorgeous bloom on Memorial Day night. The following morning, the bloom had been completely eaten away by the bugs. A gila monster was seen directly east of the Administration Building on June 2. The "Jumping Cactus" or Silver Chollas bloomed around the Admin. Bldg. during the first part of the month. The acacia, though in full leaf where we irrigate it from the coolers, is in seed at the present. Some of the mesquite beans are ripening. Snakes have been on the increase, and the red phase of the racer snakes are seen nearly every day in the main ruin, and a very large one was stretched out on the back steps of quarters No. 6-3 on June 4. The bats are very active now, having had their young. Several young ground squirrels have made their appearance this past month.

Personnel: The Schumachers had a nine pound five ounces baby boy, born to them on Memorial Day. Park Ranger Schuft is still on duty at the Regional Office where he is working on the inventory of the Southwestern Nat. Mons. equipment. Mechanic Stonehocker made out application for transfer to Crater Lake Nat. Park.

Accessions: A fine quartzite metate of probable Papago origin was given to the Museum by a visitor. He had found it south of Eloy. When the Anderson property a $\frac{1}{2}$ mile south of the Monument was being prepared for cultivation this spring, the caterpillar operator found a fine egg shaped Hohokam bowl, containing a very large piece of Hematite inside. The Hohokam housewife had used the bowl to hold her red paint in, and had no doubt misplaced it. Only two pieces were broken off the bowl, but this was repaired, and cleaned. The S.L. Palmer collection which had been collected by Dr. Palmer in the 1890's in the various areas of the southwest, was distributed from Mesa Verde Nat. Park where it had been stored. Casa Grande received its share of the collection which consisted of two sets of restrung shell beads some 15 and 21 inches in length, and a picture of the Casa Grande watch tower taken in 1894.

Inventory of Publications:

Casa Grande 2-fold leaflet (1944) (Received 280 from Reg. Two)	270
Casa Grande 2-fold leaflet (1945) (Spanish)	3225

Custodian.

For the purpose of the present investigation, it is not possible to determine the exact date of the discovery of the first case of the disease.

The first case of the disease was reported in the year 1911, and since that time the number of cases has increased steadily. The disease is characterized by a high fever, headache, and a general feeling of malaise. It is usually accompanied by a rash, which is often described as being "petechial" in character. The disease is most prevalent in the tropics, and is especially common in the West Indies and Central America. It is also found in the United States, particularly in the Southern States. The disease is caused by a virus, and is transmitted by the bite of an infected mosquito. The incubation period is usually between 5 and 10 days. The disease is fatal in about 10% of the cases, and in some cases it may be accompanied by complications, such as pneumonia or meningitis.

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

June 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of June, 1947.

There were a total of 224 visitors to Chaco Canyon this month. The number of visitors is nearly three and one half times the visitors for May, but 57 less than the number a year ago this month. The visitors came in 69 automobiles from the states of:- Arizona - 1 car, 2 visitors; Arkansas - 1 car, 3 visitors; California - 7 cars, 18 visitors; Colorado - 4 cars, 16 visitors; Connecticut - 1 car, 3 visitors; Delaware - 1 car, 2 visitors; Kansas - 1 car, 2 visitors; Michigan - 3 cars, 4 visitors; Nevada - 1 car, 2 visitors; New Jersey - 1 car, 3 visitors; New Mexico - 35 cars, 121 visitors; Ohio - 3 cars, 8 visitors; Oklahoma - 2 cars, 5 visitors; Tennessee - 1 car, 3 visitors; Texas - 6 cars, 23 visitors; Utah - 1 car, 7 visitors; and Natal, Bahamas - 1 car, 2 visitors.

All 224 of these visitors took a trip through the ruins, and formed 62 parties. They were divided into 148 paid admissions, 34 tax only admissions and 42 children less than 12 years of age. 147 of these visitors formed 44 parties and listened to the museum lecture. Total time:- Ranger - 24 hours, 55 minutes, custodian - 59 hours 10 minutes.

Three written requests for information were answered. One request was from as far away as Toronto, Ontario.

The coldest during the month was 33 degrees on the 22nd of the month, and the warmest was 90 degrees Fahrenheit on the 7th, 15th and 25th of the month. The moisture consisted of 0.04 on June 17, 0.02 on June 18, 0.02 on June 21, and 0.06 on June 26, which made a total of 0.14 inch of moisture for the entire month.

The road crews were contacted, and both the San Juan County and McKinley County men agreed to bring out their blades again. This was done during the past week. Therefore, the approach roads to Chaco are in excellent shape.

NATIONAL MONUMENT

Blackfoot, Idaho

June 25, 1927

Memorandum for the National Monument, Idaho

These follow the report of activities in the National Monument for the month of June, 1927.

There were a total of 224 visitors to Blackfoot National Monument during the month of June, 1927. The number of visitors is nearly twice and one half times the number of visitors for the same month in 1926. The visitors were in 67 automobiles from the states of: Arizona - 1 car, 2 visitors; California - 1 car, 2 visitors; Colorado - 4 cars, 12 visitors; Connecticut - 1 car, 2 visitors; Delaware - 1 car, 2 visitors; Kansas - 1 car, 2 visitors; Michigan - 2 cars, 4 visitors; Minnesota - 1 car, 2 visitors; New Jersey - 1 car, 2 visitors; New York - 1 car, 2 visitors; Ohio - 2 cars, 4 visitors; Oklahoma - 2 cars, 4 visitors; Pennsylvania - 1 car, 2 visitors; Texas - 2 cars, 4 visitors; Utah - 1 car, 2 visitors; and Total, 224 visitors.

All 224 of these visitors were a trip through the route, and turned in 224 tickets. They were divided into 148 paid admissions, 84 tax only admissions and 22 children less than 12 years of age. 147 of these visitors turned in 147 tickets and returned to the monument. Total time: 24 hours, 24 minutes, 24 seconds - 24 hours.

The written requests for information were answered. The request was from the way as follows, Idaho.

The coldest during the month was 22 degrees on the 2nd of the month, and the warmest was 80 degrees on the 22nd, 23rd and 24th of the month. The visitors consisted of 0.44 on the 1st, 0.44 on the 12, 0.44 on the 21, and 0.44 on the 22, which was a total of 0.44 times of visitors for the entire month.

The road crews were contacted, and both the road crew and the National Monument were agreed to bring out their state seals. This was done during the past week. Therefore, the approach roads to Blackfoot are in excellent shape.

An advance party of students and instructors from the University of New Mexico arrived on the 6th, and began the task of placing the summer school physical plant in shape to be ready for the school to begin on the 16th, the first field session at Chaco since early in the war. The students, a good many of whom are ex-GIs, accomplished the job in the allotted time, and school began on time; so with our own crew, the Trading Post and overnight visitors, the camping ground with its overnight visitors and the University, all going strong, Chaco is like a little city!

There was a transportation problem here this month. The stake truck needed repairs to the engine, but also the fan belt broke and the fan cut a severe gash in the radiator. The truck was started to town, but it was realized in a few miles that despite the fillings the radiator leaked too much, so it was brought back. The radiator ^{was} taken off, loaded in the pickup and the pickup started to town, but on the Chaco hill, the transmission dropped out of the pickup. This necessitated several days layoff of the crew. First, the pickup was repaired, then a new radiator put on the stake truck, then the stake was taken to town, and now it is being repaired.

The fence crew has taken down fence on the north side of section 28, part of that which runs diagonally through section 28, and have placed posts on the west side of section 28 and some on the south side. Much more rock work was encountered than was expected on the west side of section 28.

Ranger Guillet turned up one morning with a terrible tooth ache. He left at noon, and was gone 7½ days having his teeth wrked over.

Radio communication between El Morro National Monument and Chaco was resumed on June 22, after a long lapse. It was decided to continue the talks semi-weekly. The reception at both stations is very clear, especially so at this time of year.

The following visitors, National Park Service and others, were at Chaco Canyon this month:- George Grant, Charlie Steen, Dr. Nustbaum, Dr. Reed, Ranger Schuft from Casa Grande, John Davis, Dale King, Mr. Buchenberg and Dr. Mera. Another visitor was Dr. Martin Withers, former ranger at Mesa Verde National Park.

The Trader reports that all souvenirs for sale this year have arrived, but that the sale of jewelry is slow. The Navajo rings are coming in at an increased rate when compared with last month, and they are being sold at about the rate that they are coming in. All kinds of supplies are being sold to the students, the school

is purchasing a large part of its groceries at the store; and, altogether, the
owner is expecting the greatest month in gross sales since he has been here.

At the end of the month, there were on hand:-

Two-fold leaflets on Chaco Canyon, approximately.....9356
Southwestern Monuments folders,....."..... 210
National Park location map, number 6,....."..... 475

There follows the report of Archaeologist Richard Gordon Vivian on Ruins
Stabilization at Chaco Canyon.

There follows the report of Richard Gordon Vivian on Ruins
Stabilization at Chaco Canyon.

CHACO

Irving McNeil, Jr.
Custodian

Working conditions have remained excellent this month and
there have been few changes during the month. The majority of the
work has been on the ruins of the Chaco Canyon and the work has been
done in the best of conditions.

Archaeologist Vivian has been working on the ruins of the Chaco Canyon
and has been working on the ruins of the Chaco Canyon.

The work has been done in the best of conditions and the work has been
done in the best of conditions. The work has been done in the best of
conditions and the work has been done in the best of conditions.

CHACO

Inventory work on the ruins of the Chaco Canyon was completed June
1941. This work was done in the best of conditions and the work has
been done in the best of conditions.

A total of 15 separate jobs were done here. These were
done in the best of conditions and the work has been done in the best
of conditions.

and, finally, the power of the military will be used against a government of the people and the people will be the victims of the military's actions.

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

June 29 1947

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of June, 1947.

GENERAL:

Working conditions have remained excellent this month and there have been few absences among the men. Emergency repairs were completed at Pueblo Alto and Pueblo Bonito and work is again in full swing at Chetro Ketl.

Archeologist Aide Al Lancaster left the 28th for a month's temporary duty at Tumacacori.

The partly washed-out pit house site discovered some 11 miles up the canyon this past winter by the Mobile Unit staff is now being excavated by the University of New Mexico. We are watching this dig with proprietary interest, hoping that some valuable data on the early Chaco will be salvaged here.

PUEBLO ALTO

Emergency work of four weeks duration was completed June 5th. This small site on the north mesa close to the proposed entrance road is not completely stabilized but enough work was done to insure the walls standing until further measures can be taken.

A total of 19 separate jobs were done here. Three were reinforced members to preserve wall breaks in their original outline and the remaining 16 jobs consisted of buttressing undercut sections and patching breaks at the ceiling or present ground level.

Chaco Canyon National Monument

Bloomfield, New Mexico

June 28, 1947

Memorandum for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of June, 1947.

GENERAL:

Working conditions have remained excellent this month and there have been few absences among the men. Emergency repairs were completed at Pueblo Alto and Pueblo Bonito and work is again in full swing at Chetro Veti.

Archaeologist Aldo M. Lancaster left the 28th for a month's temporary duty at Tuscon.

The party packed-out its house site discovered some 11 miles up the canyon this past winter by the Mobile Unit staff is now being excavated by the University of New Mexico. We are retaining this site with proprietary interest, hoping that some valuable data on the early Chaco will be salvaged here.

PUEBLO ALTO

Emergency work of four weeks duration was completed June 28th. This work on the north mesa close to the proposed entrance road is not completely stabilized but enough work was done to insure the walls standing until further measures can be taken.

A total of 19 separate jobs were done here. These were reinforced masonry to preserve wall breaks in their original outline and the remaining 16 jobs consisted of buttressing without sections and patching breaks at the ceiling or present ground level.

PUEBLO BONITO

Work on the back wall here was completed June 11th. This was a large patched area done some 20 years ago, by Zuni workmen, (according to the Navajo) which fell recently. Early photographs available indicate that the repair of 20 years back extended the wall considerably above the height at which it was found. The fallen section was rebuilt as close as possible to the condition shown in 1921.

The lower part of the rebuilt section was laid in masonry cement. A horizontal band through the center of the wall is tied together with a reinforced member and this in turn is tied in to the wall of the room adjoining on the south.

Following this large job 10 man days were spent repairing the balcony level on to the west. An additional four man days were put in cutting weeds from the plaza, rooms, and visitor trail. Weeds were bladed out in front of the ruin with the grader.

CHETRO KETL

This month saw completion of repairs to the entire back wall at balcony level. Stabilization of rooms 44, 45, 48, 49 and 50 has just about completed the northern tier of rooms which had been excavated to a depth of three stories.

In progress in this area are repairs to rooms 40, 43 and 49. Walls here are one and a half to two stories in height; it is an older section of poorer masonry and considerable patching is necessary at the ground floor level.

Also finished this month were complete repairs to kiva I, one of the two largest clan kivas in the site. The wall was patched and capped and extensive repairs were made to the bench which was not only badly weathered but had settled a lot where excavations had been carried under it in tracing earlier walls.

In the section along the central corridor left by the excavators for/runway and excavating railroad rooms 62 and 57 have had minor patching and capping and room 35 N partially undermined during the excavations has been rebuilt.

The old tar paper covering over room 106 is being removed and the walls carried up to receive a new less conspicuous roof. This is the room having designs in blue and yellow on the east wall.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

PUBLIC LANDS

Work on the bench wall here was completed June 11th. This was a large patch of wall some 20 years old, by hand workmen, (according to the Revs.) which fell recently. Early photographs available indicate that the patch of 20 years had extended the wall considerably above the height at which it was found. The Italian section was rebuilt as shown as possible to the condition shown in 1911.

The lower part of the rebuilt section was laid in masonry cement. A horizontal band through the center of the wall is tied together with a reinforced number and this in turn is tied in to the wall at the room ceiling on the north.

Following this is the job in the room where a wall was built the balcony level on the west. In addition four new walls were put in cutting across from the piano, room, and kitchen. These walls were placed out in front of the main wall with the kitchen.

EXISTING WALL

This month we completed the repairs to the existing wall at balcony level. Repairs at rooms 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

In progress in this area are repairs to rooms 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

The finished wall with very complete repairs to the I one of the two lowest and highest in the area. The wall was repaired and covered and extensive repairs were made to the bench which was not only badly weathered but had serious structural excavations had been carried out in the bench wall.

In the section along the central corridor from the excavations for many and extensive repairs were made to the bench which was not only badly weathered but had serious structural excavations had been carried out in the bench wall.

The old low bench covering over from 100 to 150 feet was removed and the wall carried up to restore a new low bench structure. This is the new bench design in the low bench on the bench wall.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Extensive repairs are in progress to the prehistoric roof of room 39. A foot to a foot and a half of soil had been left over it following the excavations and the drain provided in the center had become filled with trash. The large central viga broke and one corner of the roofing fell in.

The roofing has been jacked back into place and a new supplementary beam installed and new savinos put in place of those lost. The large original beam is now supported and will be secured with steel straps as soon as these are obtained.

One job has been started in the eastern wing of the pueblo, room 115. Here extensive repairs are being made to foundations; these will be carried up in a reinforced member to hold a large wall break in its original outline.

Extensive work has been done in progress in the present building of room 11. A lot of work has been done over it following the evacuation and the building in the center has been filled with trash. The large central area has been one corner of the building is.

The building has been taken back into place and a new supplementary been installed and new windows put in place of those lost. The large original beam is now supported and will be secured with steel struts as soon as these are obtained.

One job has been started in the eastern wing of the building, room 11. Here extensive repairs are being made to the building; there will be carried on in a reinforced manner to hold a large wall back in the central section.

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezas, Arizona

June 27, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua National Monument for June, 1947.

Weather conditions. The continued dry weather was interrupted slightly by a total of .52 inches of rain on June 18-19, which was a temporary relief. Two fires in the north end of the Chiricahuas, well off the monument, were started by lightning preceding the rain.

Inspections. Forester Ratcliff and Naturalist Sullivan arrived from Organ Pipe Cactus on Monday, June 23, to look over the grazing allotments and to acquaint Mr. Sullivan with Chiricahua. One day was spent on the monument.

Maintenance. The new roof on the gas house is being completed by Operator Marble, with some help from the rest of the force. This building had the only flat roof on the monument and it was the only one that leaked. A start has been made on enclosing a fire tool room in the garage. It is thought there will be enough lumber left from the roof job to complete this room.

Approaches to Monument Area. The gravel and dirt approach roads continue to be in fair condition, though rough and corrugated. No visitor complaint has been heard about these roads, so they must not be too bad.

Interpretive Service. Approximately 1600 visitors were contacted in the Headquarters museum, and a few more on patrol and at Massai Point. The Happiness Tours, which make Chiricahua their only stop in Arizona, got off to a slow start on June 18 with some 57 visitors who came by bus and had little time on the monument, due to a late train. Custodian Cooke took them on a guided trip of the Massai Point area. On June 1, Custodian Cooke made a tour of the Echo Canyon trail with a party of 15 newspaper men and their families, up from a convention at Douglas.

Travel Trends. This month's figures showed an increase of about 50% over last month, and 25% over this month last year, in travel. With Happiness Tours and the usual summer increase, we expect this trend to continue for the remainder of the travel year. This month completes

Chiricahua Narrative Report.

the fiscal year with a travel of 15,161. This is about 25% ahead of any other fiscal year.

Visitors. Dr. Herbert Brandt, ornithologist, who has been on a field trip in Rustler's Park in the Chiricahuas, stopped in. Mr. Schumacher (father of Paul Schumacher, Archaeologist, Casa Grande) who is making a ground water study of the San Simon area, visited a while one afternoon. Dr. Eric Reed, Regional Archaeologist, brought a group of 16 teachers and others to Chiricahua, in connection with the conservation school at Silver City, New Mexico. Among these visitors were C. W. Matteson, Chief, Section of Education, Forest Service, and Mrs. Ruth Jones, Information Specialist, with the Forest Service Region Three office in Albuquerque, New Mexico.

Ranger Service. Seasonal Ranger Lew Hoffacker entered on duty June 6. Ranger Hoffacker is a veteran and a student at George Washington University.

Public Health. Returns from a water analysis by University of Arizona Agricultural Experiment Station indicate that the Chiricahua water supply is pure, but contains an excessive concentration of flouride which may require installation of a filtration system.

Clair V. Cooke

Clair V. Cooke,
Custodian.

Copies of our water supply are now being taken at regular 15-minute intervals and sent to the lab. in Albuquerque. For the two periods in June with the report has shown the water in the middle of the pool to be considerably less pure than the water in the middle of the pool. It is necessary to have some water in the middle of the pool to be sure that the water in the middle of the pool is the same as the water in the middle of the pool. The analysis of the water is now being continued to help us find out what is going on.

GENERAL REMARKS. The heavy rain that occurred during the month

CHITINACEA (Insectivore)

The fossil year with a range of 12,161. This is about 121 ahead of any other fossil year.

Visitors. Dr. Herbert Smith, ornithologist, who has been on a field trip in January's term in the Dickinson, Dakota, and Nebraska (father of Carl Smith, an ornithologist, (see page) who is making a ground water study of the two river areas, visited a while one afternoon. Dr. Eric Lund, ornithologist, (see page) a visitor of 12 hours and others in Dickinson, (see page) with the conservation school at Silver City, New Mexico. (see page) visitors were C. W. Johnson, Chief, Bureau of Reclamation, Great Falls, and Mrs. John Jones, (see page) with the Great Falls National Game Refuge in Minneapolis, New Mexico.

Local activity. Several houses in the town of Dickinson, Dakota, are in a better way than a village of 121.

Public works. Several from a water supply in the vicinity of Dickinson, Dakota, (see page) (see page) (see page) water supply is large, but contains an excessive amount of fluorine which may require installation of a filtration system.

NATIONAL MONUMENT

El Morro

Ranch, New Mexico

June 26, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of June, 1947.

WEATHER: As was expected the weather this month has been dry and windy with a great range in temperature. Maximum reached 89 degrees on the 16th and the minimum dropped to 33 degrees on the 22nd. The total precipitation amounted to .51 inches.

TRAVEL: Travel during the 1947 fiscal year shows an increase of 27% over that of 1946. A total of 359 people arrived at the monument in 101 cars from 18 states and one foreign country. The tour of the inscriptions was made by 343 people and 20 of this number went on top to see the Ruins. Sixteen people arrived only for information. The total guide time amounted to 86 hours and 5 minutes.

APPROACH ROADS: The 20 mile stretch between Gallup and the Zuni Indian Reservation was bladed on June 15th & 16th and the Indian Service is completing repairs, started last fall, on three miles located in the Reservation. This approach road is in better shape than usual, but is still frightening to the average tourist. The road from Grants to the Ice Caves was bladed during the first two weeks in June and this stretch is still in fair condition, but the last 18 miles on to the Rock discourages many visitors.

PERSONNEL: Mr. William E. Scott entered on duty June 17th. as Seasonal Ranger. He arrived at a time when everything here was definitely SNAFU and any ordinary person would have left the same day. However Bill is certainly not an ordinary person in any respect and we are very fortunate to have him with us, and appreciate all that he has done to help us out of a tight spot.

WATER ANALYSIS: Samples of our water supply are now being taken at regular bi-weekly intervals and sent to the lab. in Albuquerque. For the two periods in this month the report has shown the water in the sandstone pool to be contaminated but safe at the Custodian's Residence. Continuous chlorination is necessary. We have been unable to decide whether we prefer the mellow taste of the algae or the stimulating fumes of the chlorine. The combination of the two we can definitely recommend to anybody who isn't very thirsty.

SPECIAL ACTIVITIES: The Harry Pictures Inc. completed their filming

SPECIAL ACTIVITIES contd: here on June 26th. but their work crew was here for two more days dismantling sets and cleaning the grounds. Three more days were spent with them on seeding and obliteration work. More planting remains to be done, but a little moisture is needed for this job. The owner of the two inscriptions put on the Rock during the motion picture activities was located in Gallup, contacted and requested to return to the monument and remove his name. His name, Bert Cresto, appeared in two places and the removal was done under my supervision. On June 22nd a would-be mountain climber was unfrozen by the assured feeling given by a stout rope around his body. He had attempted to scale a steep slope of the Rock and found himself in a position where he could not go up or down. A rope was lowered to him from the top and as soon as the ~~rope~~ loop was under his arms he completed the climb faster than we could reel in the rope.

GENERAL: Two trips to Gallup and one to Grants were made for supplies. One emergency trip to the hospital was made on June 8th. when Edie feared a premature visit from the Stork. She made the trip to Gallup without mishap stayed one week in the hospital and is now back at the Rock. I never realized how far it really was to Gallup.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

JUNE 26, 1947.

The following is a summary of activities for the month of June, 1947.

Visitors this month totaled	261.
Travel year to date	1438

Weather. This makes five consecutive years of drought in this area and the country in general is approaching rapidly in appearance the dust-bowl era of the nineteen thirties. Many people, in this section, continue to leave in an effort to find some means of livelihood in other parts of the country. High winds and great clouds of dust appear almost daily. The entire month has been very dry and dusty. High temperature for the past month was 92 and low 41.

Roads. The approach road from Mountainair is in fair condition. However, the road from Carrizozo has been blocked to traffic most of the month. Tourist coming from the South, who have not been warned of road conditions, find themselves stuck for several hours in deep sands before help can be obtained. Constant moving sands will fill the highway within a few hours after a passage-way has been made by the Highway Department. The Custodian recently borrowed a heavy road maintainer from the State Highway Department for use on the entrance road to the monument and it is now in excellent shape.

Travel. This month shows a nice increase over the previous month of May in spite of bad roads and sand storms. Instate visitors numbered 185 and outstate visitors 76. There were a total of 69 cars with instate numbering 49 and outstate 20. 6 people walked out to the monument. We had only 2 visitors from the Armed Forces.

Guide and Contact Services. 261 visitors were conducted through the ruins on 69 guided tours. The average time spent by each party was 67 minutes. Total contact time of 77 hours.

Special Activities. At 1:30 A.M. on the morning of June 9, loud knocking on the door of the custodian's residence disrupted peaceful slumber. The visitors proved to be three doctors from New Jersey who wished to be shown around, even at the unusual hour. Securing all available flashlights a guided tour was made through the ruins and one hour later (2:30 A.M.) our visitors, who said they intended to visit all the National Parks and Monuments in the United States, went merrily on their way expressing high praise for the excellent service and courteous treatment always shown by the National Park Service.

Maintenance and Administration. Dweeding of the ruins rooms continued as time permitted and loose fallen stones were placed back in the walls in their original positions. Received two badly needed 6:50-16 tires from Walnut Canyon. Delivered several urgent telephone messages-some up to 15 miles distance from the monument.

ASTVTS, 7:25

COLLEGE OF THE SACS, 1915-1916

Vol. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840,

The following is a summary of activities for the month of June, 1967.

1.134 Related known and another
 1.135 state of the level

[illegible][illegible]

Travel. This month shows a slight increase over the previous month in both the number of two weeks and annual returns. In-state visitors numbered 144 and out-of-state visitors 10. There were a total of 38 cars with license numbers 42 and 144 and 14. A possible explanation for the increase in the number of cars is that only a small number of cars were parked at the monument. In fact only a small number of cars were parked at the monument.

... of 77 hours.

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO.

June 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for June, 1947.

WEATHER. The weather for this report period should have occurred in March, as there were the most severe wind storms felt to date. The major part of the month was very cloudy and with considerable moisture falling. Rain fell on May 27, 29 and 31; June 19 and 21. Snow mixed with rain fell on May 28, June 11, 12 and 18. These snows recovered the tops of the Sangre de Cristo range and between both snows and rains, the Medano Creek is running with a steady flow. The San Luis valley is nearly afloat from all moisture and crops are correspondingly retarded. Very strong southwest winds blew on June 8, 9 and 11 which caused all cars driving up the long slope into the headquarter area to boil and have engine trouble.

The Denver Weather Bureau has written saying that when equipment is available, a cooperative weather station will be established at this area.

At 8200 feet elevation, we hope that summer will arrive and stay awhile. The oil stove in the basement was shut off on June 24, when the weather had warmed up enough for the house to remain comfortable. Most days during the month were quite cool; with the maximum temperature estimated at 75 degrees. Grass and wildflowers in the area are abundant with all the moisture they have received.

TRAVEL. One thousand, nine hundred eighty-one visitors in four hundred twenty-seven cars visited the Sand Dunes during this report period. Two girls rode horses into the area, which brings the total visitation to 1983. Thirty-five states were represented. Three members of the armed force were counted. One thousand, one hundred seventy-two people took advantage of the camp and picnic area, and of these fifty-seven camped over night. Three written requests were answered.

INCREASE IN TRAVEL. For June, 1946, the record shows 216 cars and 715 visitors.

ROADS. It is understood that the State Highway Department and Travel Bureaus in Denver, received so many complaints concerning the entrance road into this monument, that the District Supervisor made a special

[illegible]

1. The oil field is located in the northern part of the state, near the border with Mexico. It is a large field, and the oil is of high quality. The field is owned by the state, and the oil is sold to the federal government. The federal government then sells the oil to the United States. The oil is used for a variety of purposes, including for the military, for the navy, and for the merchant marine. The oil is also used for the production of electricity and for the production of other products. The oil field is a very important part of the state's economy, and it is a source of pride for the people of the state.

April. One thousand nine hundred eighty-one visitors to Fort Belknap were visited by the local news during this month. The girls were taken into the area, which was called as 1981. Thirty-five babies were born there. Three women of the town were married. One woman, one married woman, two people took advantage of the camp and clinic area, and of those fifteen babies over night. These sixteen babies were married.

RECEIVED BY FAX

Several lines of evidence point to the fact that the majority of the 1960
elections and subsequent campaigns were of the type, "let's get it over with"
rather than a more traditional political and social discussion with oral history

trip to the Sand Dunes to check on the road personally. He arrived on June 10 and during our conversation, mention was made of the effort being made to obtain four rail-road irons to enable me to drag and maintain the five miles of road in the monument. On June 13, a six rail-road iron drag was delivered, and that afternoon was devoted to road work with considerable smoothing of corrugation as a result.

Then on June 16, the Colorado State Highway grader came out to the headquarter area. He returned again on June 19 and graded and widened the road into the picnic area. The entire afternoon was spent in removing all rocks he had up-rooted.

Again on June 20, 24 and 25, the grader made its appearance to this area, and as this is being written, the road is receiving more attention.

The road from the Mosca turn-off to the San Luis Lake was under water (running-board deep) on June 22 and the Zapata Creek over flowed and washed a section out of the road a short distance from our entrance gate. This condition plus complaints has produced great results todate and the road will soon be in excellent condition.

COMPLAINTS. Verbal complaints are still being made in regards to the unfinished rest-rooms at the checking station. It is hoped that funds will be made available during the 1948 fiscal year to remedy this bad situation.

Road conditions were also complained about until the advent of the state grader working on the road. Visitors stopped complaining as soon as they saw some work being done.

ARCHAEOLOGY. No further developments have been noted in the Alamosa State College excavations. An Oregon visitor found two nicely made points on the Upper Medano.

NEWSWORTHY VISITORS. The Manassa School held its picnic at the Sand Dunes on May 27, with 300 attending. On May 30, Mr. and Mrs. Hector Beaubien and family of Durango visited this area. The Department of Geology from Yale University spent a half-day in the dunes on June 17. There were fifteen in the party. Fifteen girls from the Myron Stratton Home in Colorado Springs had a picnic on June 20.

WILDLIFE. Four baby blue-birds were successfully launched from their nest under the porch roof. Many young rabbits and chipmunks are noticed in front and back yard patios. The deer have moved into the higher mountains and no longer are seen around the springs.

ing to the fact that the road generally, is situated on
June 12 and during our investigation, attention was made of the slight
being made to obtain four rail-roads from the bridge to the river and
maintain the five miles of road in the mountain. On June 12, a six
rail-road line was delivered, and that afternoon was devoted to
road work with considerable amounting of construction as a result.

Then on June 12, the Colorado State Highway project was put in
the road project area. It returned again on June 12 and graded and
aligned the road into the river area. The entire alignment was done
in removing all water to the river.

Again on June 12, 13 and 14, the grading and the alignment was
also done, and on this is being continued, the road is now being done
alignment.

The road from the house towards to the two mile lake and water
water (mountain house) on June 12 and the house was over the
and water a section and of the road a short distance from the
gate. This condition also indicates the project area and the
and the road will soon be in excellent condition.

REMARKS. Various complaints are still being made in regard to the
unfilled road-rooms at the station. It is noted that the
will be made available during the first time year to remedy this
alignment.

Good conditions were also maintained about until the end of the
state project work on the road. The state project maintaining as soon
as they can with their work.

REMARKS. No further developments have been noted in the
state college construction. An action will now be taken to
points on the river bridge.

REMARKS. The station school held its session at the road
house on July 12, with 100 students. On July 13, and July 14, the
students and family of the school visited the area. The Department of
Geology from Yale University spent a half-day in the house on June 12.
There were fifteen in the party. Fifteen girls from the same station
home in Colorado Springs had a picnic on June 12.

REMARKS. Four baby bird-birds were successfully released from their
nest under the porch roof. Baby young insects and animals are noticed
in front and back garden. The last have moved into the light
enclosure and on June 12 are seen around the building.

ACTIVITIES. With the great increase in visitation, only routine maintenance and especially vital projects were accomplished.

The Dodge 4x2 pickup was repaired and obtained from the Heide Garage in Mosca. It was found to have a crack along the cam shaft and into the tappet bearings. With this condition, the pickup may last a year or break down at anytime, resulting in the need for an entire new block.

The office floor was given two coats of gray paint; the two desks were uncrated, washed and waxed. After a considerable struggle, they were carried in and arranged as conveniently as possible in the small room. The metal file cases were also washed and waxed; these will have to be bolted together.

During spare time and between visitors, a start has been made on putting the files into good shape. The folders are of legal size and must be cut down to fit the file cases.

The hall and dining room of the custodian's residence received its first coat of paint. One coat is not enough, but another coat will be applied in the far distant future.

Cleaning up of the two picnic areas and hauling of garbage is now a major maintenance job. Extra barrels are badly needed in both areas.

Only a half a day has been spent on filling in the water-line trench.

A barrel of gasoline for the light plant and one-half ton of nut coal were hauled.

Both 3 KW light plants were moved to a better position in the light plant room and they were placed and bolted to a platform. Wonder what it would be like to have a permanent ranger here who could lift his share of 450 pounds! The wires were run through pipe which lead to the switch. The newer plant was put into operation and both will be alternately used. A work-bench is under slow construction in this room.

Three bids were issued for an 8 cubic foot propane ice box and one copy of the bid was posted in the Alamosa post-office. Little hope is held that this size box can be obtained. We haven't eaten from cans since our Hovenweep days.

Purchase orders were issued for needed paint, lumber for signs, linseed oil, turpentine, welding, some hardware and other small items.

UNITED STATES
DEPARTMENT OF THE INTERIOR

The repaired typewriter was received and also flags, fire extinguisher fluid and visitor registration book cover. At long last, a barrel pump was obtained and will save an aching back.

As time permits, contact will be made with Mr. Howard Linger in regards to a correction deed needed to establish the water rights for Mosca and Morris Gulch Springs.

Also there is needed information to be obtained from the Alamosa County records in regards to land and boundaries.

The Memorial Day week-end is expected to be repeated on July 4 week-end. The previous week-end brought in 315 visitors, many campers and the usual hauling of water for boiling radiators and helpful shovel work in extracting cars stuck in the sand of the picnic ground.

Although gasoline is not yet rationed in Colorado, no doubt the Midwest rationing will bring about a decrease in the number of people we have been having from that section of the country.

A pat on the back goes to Custodian Hastings, who after reading of my plight with water line and small wrenches, sent and gave me his personal worn and battered 24 inch wrench to complete the job. A final twist and turn with said wrench completely tightened the union and wrench withstood the test.

PUBLICATIONS. There are on hand, 63 of the mimeographed informational leaflets. Fifteen copies were requested by the Department of Geology, at Western State Teachers College.

It is hoped that the Naturalist Division can prepare some sort of mimeographed sheet or funds can be available to publish the two-fold which is needed very badly at this area.

Ted C. Sowers,
Custodian.

The typewriter was removed and also taken, the explanation
finds and water registration book cover. At long last, a partial map
was obtained and will save an evening work.

As time permits, contact will be made with Mr. Howard Langer in
regards to a correction and needed to establish the water rights for
Bosch and Morris Olsen Springs.

Also there is needed information to be obtained from the Alamosa
County records in regards to land and boundaries.

The Memorial Day week-end is expected to be repeated on July 4
week-end. The previous week-end brought in 115 visitors, many campers
and the usual boiling of water for boiling potatoes and related matters
work in extracting some stock in the sand of the picnic ground.

Although gasoline is not yet rationed in Colorado, we doubt the
highest rationing will bring about a decrease in the number of people
we have been having from that section of the country.

A part on the back goes to Gustafson Springs, who after twelve of
my flight with water lines and small wrenches, sent and gave me his
personal wrench and bettered 34 inch wrench to complete the job. A
final test and turn with said wrench completely tightened the union
and wrench withstood the test.

There are on hand, 25 of the mimeographed informational
leaflets. Fifteen copies were requested by the Department of Wildlife,
at Western State Teachers College.

It is hoped that the Naturalist Division can prepare some sort of
mimeographed sheet or finds can be available to guide the two-fold
which is needed very badly at this time.

Ed C. Lewis,
Naturalist.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

June 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of June, 1947.

Visitors this month - 2297; travel year to date - 12253.

Visitors June, 1941 - 1139; travel year 1941 - 6254.

General Numerous visitors were attracted to the Verde Valley on June 22 when a smoke stack at the old Verde Extension Smelter at Clemenceau was blasted to the ground. The Clemenceau Airport is nearby and the four hundred foot stack had been declared a hazard to night flying. It was estimated that 5000 people had their attention focused on the stack at 3:00 P.M. when several hundred pounds of dynamite brought it tumbling straight down to the ground with a resultant cloud of dust that resembled an atomic bomb explosion.

We are again encountering numerous Triatomas, alias cone-nose bugs, assassin bugs, Chinese bed bugs, etc. However we are not sure that any-one has been bitten.

Mrs. Hastings was awakened the night of June 15 when she was being investigated in bed by a four inch centipede which was captured.

Administration About half of the Custodian's time has been spent on business pertaining to Montezuma Well and to the supervision of contracts contemplated or in progress.

A cash box was provided by Southwestern Monuments Association so that funds from book sales could be more completely segregated from revenues from ticket sales.

The receipt and posting of another sign "Open 8:00 - 5:00 daily" from the State Highway Department completes our sign program on Alternate Highway 89. Visitors approaching from either Cottonwood or Sedona can now be spared driving sixteen miles to learn the hours our monument is not open.

A supply of mimeographed information leaflets was received to take the place of our printed two-fold leaflets. A new supply of two-fold leaflets has been on order since December, 1946.

The quarterly sales report for Southwestern Monuments Association showed a turn-in of \$342.18 for the period. Sales this month totaled \$104.36 with a shortage of \$4.70 not collected on the "Self-Serve" plan.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument

Montezuma, Arizona

June 22, 1947

Memorandum for the Regional Director, Region I, Tucson

Re: The monthly report of activities at Montezuma Castle and Montezuma Well for the month of June, 1947.

Visitors this month - 1,117; travel party to date - 1,117.
Visitors June, 1947 - 1,117; travel party June - 1,117.

During the month visitors were attracted to the Wells Valley on June 12 when a large group of the old Fort Huachuca Chapter of the Boy Scouts of America visited the monument. The Chapter is now in the process of being organized and will have a camp at the monument. It was estimated that 100 people and their families were present on the day of the visit. When several hundred people of Spanish descent are present at the monument a resident of the area has been observed to make local observation.

In one of the observation towers, visitors, also some of the residents of the area, were observed to be present. However, no one was observed to be present.

The visitors who entered the area of the Wells Valley were observed to be present in the area of the Wells Valley which was observed.

During the month of June the visitors who entered the area of the Wells Valley were observed to be present in the area of the Wells Valley which was observed.

A sign was provided by the Montezuma National Monument to the visitors who entered the area of the Wells Valley which was observed.

The receipt and posting of another sign (June 22 - 1,117 daily) from the Montezuma National Monument was observed on June 22, 1947. The sign was observed to be present in the area of the Wells Valley which was observed.

A supply of information was received from the Montezuma National Monument on June 22, 1947. A new supply of information was received from the Montezuma National Monument on June 22, 1947.

The monthly report for Montezuma National Monument is being prepared for the month of June. The report is being prepared for the month of June. The report is being prepared for the month of June.

Totals for the fiscal year show that we have sold 6510 tickets and have collected \$1627.50 in fees and \$363.35 in taxes. Total travel for the fiscal year is 18,147. We have 42 more visitors this month than the peak month of September last year when 2,256 were counted.

On June 20 Mrs. G. G. Stocking, Richland, Michigan fainted completely in the fourth story of the Castle. Ranger Leding rendered first aid and left her there with her husband while other visitors completed their tour and by that time she could climb down by herself.

Publicity The Prescott Courier for June 2 carried a news article on this monument and Montezuma Well.

Personnel The services of William L. Howenstine were terminated May 31 as pre-arranged so that he could enter other work.

Charles B. Frost, ex-Marine, reported for duty June 1. Frost had one summer's previous experience as a Fire Guard at Saguaro and is adjusting himself to our routine.

Protection On June 14 three boys, Walter, Richard, and Floyd Friess were apprehended after they had excavated several corn cobs, bits of squash rind, fragments of arrow shafts, etc. from a cave near the Lower Ruin.

Museum Exhibits In 1896 the mummy of a two year old boy was found buried on the ledge just outside Montezuma Castle. The discovery was made by S. L. Palmer, Jr. who in 1936 loaned his collection of artifacts to Mesa Verde National Park with the stipulation that it be kept intact. After several years of intermittent negotiations it was agreed that the mummy could be returned to the Montezuma Castle museum where it was delivered June 7 by Messrs. Steen and Grant.

National Park Service Visitors Architect Kenneth W. Saunders was here May 26 and on June 23 to confer on matters pertaining to Montezuma Well and the preparation of PCP sheets.

Forester Ratcliff and Naturalist Sullivan were here May 31 and visited Montezuma Well.

Archaeologist Steen and Photographer George Grant were here June 7. Mr. Grant took some pictures including 5 x 7 Kodachromes of the Castle. A fine set of black and white prints of these pictures was received June 23.

News-worthy Visitors W. C. Harper, Albuquerque and A. C. Anderson, Prescott, both from the Bureau of Plant Industry, Division of Soil Survey were here. They were accompanied by Prof. H. V. Smith of the University of Arizona.

Mrs. William Colter, staunch friend of the Park Service, was here June 22.

Montezuma Castle

Service To The Public Travel this month was a little more than twice what it was for the same month in 1941. There were 2297 visitors who came in 713 cars. Tickets were sold to 829 people, Complimentary Admission Tickets were issued to 102 people, 159 children were admitted free and there^{were} 4 Indians admitted upon payment of tax only.

Contact Time Total contact hours, 243.75. Hastings, 52; Leding, 70.75; Schroeder, 16.25 at Montezuma Castle; Howenstine, 22.75; Frost, 82. There were 190 guided trips through the Castle for 1093 visitors and 237 groups in the museum including 1111 visitors. There were 495 visitors who received information outside the museum or ruins. Picnic parties were 26 for 103 people and five camping parties including ten people stayed over night.

Free Publications On Hand

Glimpses Of Our National Parks	220
2-fold leaflets, Montezuma Castle	145 (A small supply was received from another area since last report)
The National Park System and Other Areas Administered by the Park Service	18.

Montezuma Well On a patrol trip on May 29 a shovel and signs of fresh digging were discovered. Only a few shovels full had been moved in the big pueblo on the rim and perhaps the pot hunters left in a hurry.

The former owners of the Montezuma Well property are contemplating sale of the fence that was constructed under permit on Forest Service land and now in possession of the Park Service. If this fence is sold and removed it will remove more than a half mile of necessary fence.

The following report of activities at Montezuma Well has been received from Archaeologist Schroeder.

General Twenty-three days were spent at the Well; 19 by Schroeder, 3 by Hastings, and 1 by Leding. Schroeder began full daily duty at the Well June 6. 381 visitors in 110 cars, trucks, buses, and on 3 horses were contacted.

Administration Considerable time was devoted to cleaning and miscellaneous repair. Refuse that had been gathered was dumped into the old household well and the collapsed cesspool.

Thanks to the loan of a wood carving set by Charlie Steen who piloted the Pic Wagon to the Well, a considerable number of signs for the trail and property have been completed.

Mr. Lee began drilling the new household well May 24 and completed the well June 12. It is 103 feet in depth and discharges 1500 gallons per hour based on the estimate of a bailing test.

in a hurry.

The former owner of the building will property and equipment
be sold to the bank that was constructed under contract of the
bank and will now be operated by the bank. It will be
sold and removed if it cannot be sold or if it is not
needed.

THE FOLLOWING IS A SUMMARY OF THE RESULTS OF THE SURVEY OF THE
CIVILIAN POPULATION OF THE UNITED STATES, 1950.

[illegible]

Some results. It was found that the average age of the
household head was 41.1 years and the average number of
children was 2.1.

[illegible]

our best based on the evidence of a falling river.

91780. 2022.4.10.

The first crop of hay was mowed on June 10, baled June 12, and picked up (our share of 71 bales being placed in the barn) on June 14. Mr. Lightfoot who was awarded the contract for harvesting the second crop, irrigated June 20 through June 22.

The Webb Contracting Company of Prescott was awarded the contract for the renovation of the quarters on the property.

Truck I-13834 was driven from Santa Fe by Mr. Ratcliff and delivered to Montezuma Castle May 31 for use at Montezuma Well. It has since been found that the left front spring is $2\frac{1}{4}$ " longer than the right front spring which impairs turning to the right but we have been unable to get a replacement.

George Grant came in June 8 with Charlie Steen and photographed the physical structures on the property.

Half a day was spent tearing down old signs along the boundary as well as within the area.

Act of God A heavy windstorm blew down the roof of the shed on the south side of the barn about 5:30 P.M. June 20. It also bent up a portion of the tin roof on the northeast corner of the barn.

A brief rain of about five minutes duration caused two big leaks in the ceiling of the museum. A check on the outside revealed there was a greater flow pouring into the museum than out of the canals.

Research A continued effort was made to locate the old Wales Arnold Irrigation ditch on the ground. This information is needed to support claims to water rights.

Some of the sites in the area were photographed and also our two "big trees", mesquite and cottonwood. Well drilling operations were also photographed for our files.

Interpretation The mimeographed pamphlets for the visitor trail around the Well were received and stapling has begun. It is planned to make them available to the public this coming month when the trail stakes are up.

Sherds from four sites were sent to the Museum of Northern Arizona for identification and have been received. They further substantiate the post 1100 A.D. date for this area.

Roads The county road running by the Well was graded this month eliminating a great majority of the chuck holes and washboarding. The operator drove into the Well area to obtain water for his equipment from the irrigation ditch. Being unfamiliar with the operation of such equipment, the natural question was raised. The operator's demonstration resulted in the grading of our entrance WYE.

Homer F. Hastings,
Custodian.

Natural Bridges NATIONAL MONUMENT

Blanding, Utah

June 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of June, 1947:

GENERAL: Travel to the area has held up very well despite stormy weather which had an adverse effect on the approach road from Blanding, Utah. Practically all visitors visited the three bridges, making the trip to the Kachina Bridge by a short walk from the White Canyon road.

WEATHER: Cool weather has been the rule during the month. Rain fell intermittently with a heavy storm on June 22nd. The days for the most part have been clear and comfortable.

TRAVEL: This month's travel totalled 31 cars and 120 people bringing the total travel for the fiscal year to 260 cars and 959 people, which is excellent travel for this area.

ROADS: Storms during the month made the road from Blanding very slick during portions of the month. The Maverick Point hill bore the brunt of these storms and washed badly. At this writing it is rough but passable.

The White Canyon road is still passable but the ferry at Hite has not been operating due to mechanical trouble and high water on the Colorado River. Visitors have advised me that the road in the North Wash, between Hite and Hanksville, is in very poor condition.

INTERPRETIVE SERVICES: Seventeen parties consisting of 72 people were contacted at headquarters and one guided trip was made to the three bridges with one person. Forty seven people visited the area during the absence of the ranger, on his day's off. Two parties of 6 people used the campground for an overnight stay and two parties of 8 people were contacted in Blanding.

ACQUISITIONS: A 1½ KW power unit was received during the month from surplus and was installed at the area on June 11th.

TRAILS: The trails are gradually being put in good shape. The ladders near

NATIONAL PARK SERVICE

Organ Pipe Cactus NATIONAL MONUMENT

Ajo, Arizona

June 25, 1947.

19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of June, 1947.

WEATHER:

June has been very nice as a whole with only three days reaching above 100 degrees. High for the month was 105 on both the 15th and 16th. Nights remained cool with a low of 53 reached on the 1st and again on the 22nd. High winds on the 20th caused a peculiar situation which we had never experienced here before. Although little dust was raised in our general area the air was completely filled with a dust haze which remained for two days following. No precipitation fell and only one day during the period was partly cloudy.

SPECIAL ACTIVITIES:

The greater part of the month was taken up with the trapping and counting of cattle on the monument. With the assistance of Forester Ratcliff, Naturalist Sullivan, and Ranger Steele, all cattle were trapped and counted at the water holes with a final count of 806 being determined as on the monument. Work on this project was started on June 1 and completed on June 17, with work being carried on 24 hours per day.

TRAVEL:

Out of state travel has about stopped for the summer; however, some local travel is still coming in as are those stopping on their way through to the gulf for fishing. Total travel through the area for the month was 7292, bringing the travel year to 62867. 54 persons stopped at headquarters and received interpretation service.

GENERAL:

With the cattle count taking up most of the month, little else was accomplished other than to keep office routine current and the S. & M. project going. At the end of the fiscal year five miles of fence will have been completed along the west boundary on the S. & M. program. Some unexpectedly rocky terrain has slowed the project some as holes have had to be punched before posts could be driven.

Mr. Barnett and Mr. Roberson of the Bureau of Animal Industry, called at the office to work out cooperative fence projects along the International Boundary. The section along Organ Pipe is probably the most critical of all border areas as far as the drift of Mexican cattle across the border is concerned. It is hoped that something may be worked out for the benefit of both

Mr. Bennett and Mr. Johnson of the Bureau of Animal Industry, called on the office to meet and conference before leaving for Washington. The question about which they are working is probably the most critical of all. Further work on the bill of livestock will follow the meeting. The meeting is expected. It is hoped that something will be settled and the bill will be passed.

agencies.

Work on the new building of the Luke scenic easement strip is nearly completed and additional improvements are being started on the private property. Requests for access roads were presented for consideration to carry out a subdivision plan on this land.

It is announced through the Bureau of Land Management that 360 acres in 2 $\frac{1}{2}$ and 5 acre business and homesites will be opened up on the public lands at the junction of the monument highway and the Tucson road. All of this will be along our approach roads and will undoubtedly have some effect on the monument.

ACCIDENTS:

A deer was struck and killed on the highway the night of June 7. There was no evidence of carelessness on the part of the driver so no action was taken.

WILDLIFE:

Outbreaks of rabies in coyotes, bobcats, and fox have been reported numerous in the vicinity. The Fish and Wildlife Service is carrying on a poison program in the area around Ajo to eliminate the danger there.

Custodian.

Enclosure.

Work on the new building of the Iowa State Penitentiary is nearly completed and additional improvements are being started on the existing property. The new building will be completed by September 1st, 1934, and a completion plan on this date.

It is anticipated that the system of food management that has been in effect since the opening of the institution will be turned up on the inside of the building at the present stage and the system used. All of the building is being completed and will undoubtedly have been completed by the summer.

REMARKS: A plan was drawn and filed on 12-1-33, the plan of the building was an outline of the building and the plan of the building was an outline of the building.

REMARKS: The plan of the building is an outline of the building and the plan of the building is an outline of the building.

REMARKS: The plan of the building is an outline of the building and the plan of the building is an outline of the building.

William H. Hargrave,
Commissioner.

Saguaro National Monument
Tucson, Arizona
June 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT of activities at Saguaro National Monument for the month of June, 1947.

WEATHER. Days were generally clear, cloudless, and warm, with daily maximums ranging from 91 to 99 degrees. A heavy lightning storm occurred on the afternoon of the 17th, followed by a not-so-dry storm the following day, when .48 inch of precipitation in the form of rain and hail was recorded at the Mica Mountain Tower weather station; only a trace of moisture fell at Headquarters. Nights have been cooler than usual for this time of the year. The Tucson weather station has recorded less than one inch of rain since January 1, and almost daily radio news items and newspaper articles are stressing the critical ground water conditions throughout the state.

INSPECTIONS. Forester Ratcliff and Naturalist Sullivan of the Regional Office were in for the afternoon of June 20, and paid a further visit to the Madrona Canyon area on the morning of the 22nd. Grazing and wildlife problems, including "pigs", were discussed. Other, unofficial, NPS visitors were Clair and Mrs. Cook, of Chiricahua, who arrived on the 10th.

MAINTENANCE. Maintenceman Ollie Barney, and his one-man trail crew spent the entire month clearing windfalls from the Cow-head Saddle trail, and brushing out this and other trail which can be reached from their headquarters at Manning Camp R.S. In all, sixteen miles of trail were re-brushed, and fairly heavy maintenance applied to the so-called Fire trail which leads under Spud Rock, on the north side. Trails which can only be reached by establishment of camps elsewhere will have to be neglected this year, since the only spring on the mountain which has not been dry since early May is the one at Manning Camp. Five man-days was spent on telephone maintenance; the line works satisfactorily to the lookouts, but we are unable to hear town after 8 or 9 A.M. each day. Ranger Fulton spent several days overhauling building fire protection installations at Madrona R.S., and, with the assistance of the Packer, George Hilliard, replaced two of the mangers at the Madrona Barn. Fulton also spent three days overhauling the engine, pump, and water system at Madrona Canyon, and is now beginning work on a temporary shelter for our two new 3-KW generators there.

NO ADDITIONS TO THIS

• 2002, 2003, 2004

was first seen on 14 Jan. 1960

APPROACH AND MONUMENT ROADS. The Broadway approach road has been in an even rougher, more washboarded, condition - if possible - than has been usual all winter. Very few visitors arrive here without adverse comment on its condition, although those who come in from the east, via Vail, are even more outspoken in their complaints. The county road crew is now making the second maintenance trip of the month over both these roads, but their work seldom lasts more than two or three days. By contrast, the Loop Road within the cactus area of the monument, is somewhat smoother, although it too, is finally beginning to roughen up as the prolonged drought continues.

TRAVEL AND INTERPRETIVE SERVICES. Our seasonal decrease in visitors continued this month, with only 772 persons, in 229 cars, counted into the monument. Registrations included 31 states, with California and Illinois tied for second in greatest number of visitors, after Arizona. Contact service was available only 20 days of the period, due to days off duty and necessity for the Custodian to be absent from Headquarters on other duties. On these days, 213 persons, in 55 parties, were provided with information at the Headquarters contact station.

PERSONNEL. Roderick J. MacKenzie, Jr., entered on duty in the W.A.E. Fire Control Aid position recently established on May 31; this work is four days weekly, with the fifth day's work being with the trail crew. Rex E. McPhaul entered on duty as Fire Control Aid, SP-3, on June 1.

FOREST FIRE PROTECTION. No fires occurred during the month. Fire-danger weather readings have averaged in high moderate class, with two days when conditions warranted putting an extra Aid on emergency detection duty; on one of these days wind velocity reached 44 mph, and felled numerous trees along the trails within the 1943 burn. The Coronado National Forest has had three Class "C" fires in the past week, and radio reports of an 8000 acre fire on the Tonto National Forest were picked up by our lookouts. Current fire-weather broadcasts predict the early beginning of our summer rains and lightning storms, probably by the end of this week.

PUBLIC HEALTH. Water for drinking purposes has been hauled to the Madrona R.E. throughout the month, as the last of the creek water was too populated with wildlife to use internally. Present storage capacity of 6000 gallons was last filled two weeks ago, and in another two weeks we shall have to haul water for the pack animals. Water samples from the creek have been analyzed as unpotable for the past five months.

PUBLICATIONS. Free publications of the Service on hand at end of the report period were as follows:

Saguaro two-fold informational leaflets, English	-----	3561
Saguaro two-fold informational leaflets, Spanish	-----	1100
Location Map No. 6, Southwestern States	-----	607
(Two dozen were found in Tucson office files)		
Southwestern National Monuments Folders	-----	721

, 19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of June, 1947:

Visitors this month: 1727

Travel Year to date: 5914

Travel: Visitation continues on the increase in keeping with the steady influx of visitors to other points of interest in the Flagstaff area. 304 more visitors came to the area this month than were recorded for June of 1946, an increase of 17.6 % for the month over last year.

Roads: Continued dry weather, heavy travel use and lack of maintenance have taken their toll on the entrance road. It has become very rough and in many places large chuck holes have made the going most disagreeable. Several cars have gotten stuck and have been pulled out of these holes, but in spite of this road condition the visitors still come.

The last week of the month we were able to do some road work, hauling between thirty and forty loads of clay and filling the worst spots so that at least we no longer will have to maintain a towing service. It is hoped the local weather prophets, that expect rain over the 4th of July, will find their predictions coming true. Maybe some of that moisture will come our way so that some definite road maintenance can be accomplished. The Wupatki back road remains closed to the visitor because of the dryness of the deep cinder.

General: At long last residence has been established at Sunset Crater. The Uptons moved into tent quarters on the 19th and things are beginning to take some semblance of order.

Regular interpretive service will now be offered. That together with the many other necessary tasks with the planning and development of the area will not allow time to hang idly on the hands.

NPS Visitors: Ranger Paul Schumaker of Casa Grande was at the Crater on the 17th. He reported the climb and descent were made in 50 minutes without ill effects. A number of local monument visitors have stopped in to wish the Uptons well in their new home. Davy, Corky and Buchy have been up several times to assist in getting settled. Custodian and Mrs. Beaubien of Walnut Canyon were over to inspect the new set up. Ranger and Mrs. John Aubuchon and daughter Boots, with guests, were up on the 27th to

UNITED STATES

NATIONAL PARK SERVICE

NATIONAL MONUMENT

WYOMING

OFFICE OF THE CUSTODIAN

REPORT FOR THE YEAR ENDING DECEMBER 31, 1917

There follows a report of activities of the National Monument for the month of June, 1917:

Visitors this month: 1217

Travel: Visitation continued on the increase in proportion with the nearly fall of visitors to other points of interest in the State. The most visitors came to the area this month, there were recorded for June of 1917, an increase of 17.3% for the month over last year.

Weather: Continued dry weather, heavy travel and the fact of maintenance have taken their toll on the highway road. It has become very rough and in many places heavy stones have made the road very dangerous. Several cars have been stuck and have been pulled out of these places, but in spite of this condition the visitors still come.

The last week of the month we were able to have road work, paving between camp and camp, and the fact of the road being so rough as to be used as a road will have to be remedied. It is hoped the local road workmen will be able to do this. It is hoped that their work will be done in time. In the case of the road, will have our way as they are in the road and the road will be completed. The road work men are being called to the attention of the district.

General: As long last residence had been established at Indian Village. The system moved into their quarters on the 15th and things are beginning to take some semblance of order.

Indian: Indian activities continue with the same old story. The new order necessary with the change and movement of the camp will not allow them to stay in the hands.

WV Visitors: Former last summer of this month was at the State on the 15th. The camp and the camp were made in 1917. A number of local residents have stayed in to which the camp well in their new home. Heavy, heavy and heavy have been up several times as assist in carrying material. Coal and fuel. Several of Indian people were over to inspect the new camp. Several and Mr. John Anderson and daughter, with family, were up on the 15th. to

Special AGO-4 removed to that office and is available
JAN 10 1964

[Handwritten signature]
Special AGO-4

The following information was received from the Bureau of Land Management, Department of the Interior, Washington, D.C., on January 10, 1964, regarding the removal of Special AGO-4 to the office of the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C.

Special AGO-4 was removed to the office of the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C., on January 10, 1964, for the purpose of conducting a study of the land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C.

The study is being conducted in accordance with the instructions of the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C., and the results of the study will be reported to the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C., on or before the end of the fiscal year 1964.

The study will cover the following areas:

- 1. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C.
- 2. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the public lands of the United States.
- 3. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the private lands of the United States.
- 4. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Forest System.
- 5. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Park System.
- 6. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Monument System.
- 7. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Preserve System.
- 8. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Antiquities System.
- 9. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Historic System.
- 10. The land management policies and procedures of the Bureau of Land Management, Department of the Interior, Washington, D.C., in relation to the National Wildlife System.

The study will be conducted in accordance with the instructions of the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C., and the results of the study will be reported to the Assistant Secretary for Land Management, Bureau of Land Management, Department of the Interior, Washington, D.C., on or before the end of the fiscal year 1964.

Very truly yours,
Special AGO-4

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

-----Tonto----- NATIONAL MONUMENT

-----Roosevelt, Arizona-----

-----June 25,-----, 1947

Memorandum for the Regional Director.

Following is the monthly Narrative Report for Tonto National Monument for the month of June 1947.

TRAVEL - 733 persons visited the monument during the month; of these 342 visited the Lower Ruin. 27 states were represented with Arizona leading.

WEATHER - The weather this month is truly Arizona with hot clear days and cool nights. No rain fell and a record temperature of 109 was reached.

GENERAL - Conditions for the Salt River Valley are not too good at the present time. Roosevelt Lake will be dry the 27th. and no rain is expected for some time. This will no doubt cause a sharp decline in travel to the Monument as we contact many sportsmen.

On Tuesday afternoon, June 17, an electrical storm swept through the Four Peaks region of Tonto National Forest starting a very small fire. High shifting winds took the fire out of control and is still burning. At present over 8,000 acres have been cleared of brush. (Bull was nervous until notified that 100 soldiers from Phoenix would arrive and he was not needed.)

NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT

Box 2225, Tucson, Arizona
~~Box 2225, Tucson, Arizona~~
Tumacacori, Arizona

June 25, 1947.

MEMORANDUM for the Regional Director,
Region Threes.

Follows the monthly narrative report for Tumacacori National Monument for the month of June, 1947:

WEATHER CONDITIONS: No rain. Hottest day 104 on June 16. Coldest day 47 on May 28.

MAINTENANCE: Other than routine, a large drainage ditch was dug to connect the drains under the two sides of our approach area. Repairs to linoleum flooring were made in the living room of the ranger house.

MUSEUM AND EDUCATION: Plant labels have been installed for most of the plant species in our patio garden. Sticks are made from old orange crates, with one planed side, then linseeded, and the lettering applied with our Leroy lettering set. They are very nice looking, and elicit favorable comment.

Two of the old molinas (grist mill upper and nether stones) were fixed up to give a more graphic idea of how they operated. Stakes have been driven into the peripheral holes of the upper stone, and the nether stone has been set up on a stone foundation about a foot above ground, with a lime mortar trough around it, and a slab and lime spout. This illustrates how the meal working out from the center would fall into the trough, and could then be swept around to the spout into a basket. The set-up is based on a photo of molinas in place at Quitovaquito, on the Mexican border west of Nogales.

Timbers of a life size model of an arrastra (the old type ore mill) which was built on the grounds ten years ago by former Custodian Caywood, were so rotten they were taken down, and the circular trough of the base has been covered with dirt. The arrastra is better shown by a miniature in the museum, anyway, and I feel that an arrastra on the grounds places undue emphasis on the very theoretical mining activities of the mission priests.

INTERPRETIVE SERVICE: 830 visitors went on 160 guided trips through the mission church and grounds, receiving an average of 37.15 minutes per trip. 1361 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1296 persons visited the museum.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
DOUGLAS, ARIZONA

June 22, 1949.

Memorandum for the National Director,
June 22, 1949.

Follows the monthly narrative report for Tumacacori National Monument
for the month of June, 1949:

GENERAL COMMENTS: No rain. Highest day 104 on June 18. Coldest day
67 on June 22.

PLANTING: Other than routine, a large drainage ditch was dug to
connect the fields under the two sides of our approach road. This
to improve drainage was made in the living room of the visitor house.

REPAIRS AND MAINTENANCE: Three labels have been installed for part of the
plant species in our little garden. Labels are made from old empty crates,
with one placed side, then inserted, and the lettering painted with one
layer of white paint. They are very nice looking, and slightly favorable
comment.

One of the old rollers (1914) was removed and another (1915) was
fixed up to give a more complete idea of how they operated. The roller
was driven into the top of the roller of the upper story, and the roller
above has been set up on a frame foundation about a foot above ground,
with a line roller (1914) and a roller (1915) and line roller. This
illustrates how the roller worked and how the roller would roll into
the trough, and would then be ready to roll to the next roller.
The roller is placed in a line of rollers in place of rollers, on
the rollers (1914) and rollers.

There is a little side model of an entrance (the old type) which
was built on the grounds two years ago by James Graham O'Connell,
and no longer they were taken down, and the roller (1914) of the roller
has been covered with dirt. The roller is better shown by a miniature
in the museum, and I feel that an entrance of the roller placed
under especially on the very important roller (1914) of the roller
roller.

INTERESTING EVENTS: Mr. Williams went on 100 miles from Tucson to
visit Mr. Williams and family, receiving an answer of 20.15 miles per hour.
1911 visitors received excellent information and interpretation service
in the museum lobby, public garden, and visitor room. 1915 presents visited
the museum.

UNITED STATES
DEPARTMENT OF THE INTERIOR

INCREASE OR DECREASE IN TRAVEL: June travel of 1373 visitors has been exceeded once, by the figure of 1429 for June, 1937.

VISITORS: June 10 - The Patagonia Home and Garden Club (12 women).
June 13 - Carl A. Miller, N.P.S., from Petrified Forest.
June 15 - Parents and kids, totalling about 90 people, picknicked here. They were celebrating First Communion, which had been held elsewhere earlier in the day.
June 21 - 29 University of Arizona students, under direction of R. A. Sencer, U. of A. Dramatics Department.

INSPECTIONS: May 28 - Architect Kenneth M. Saunders, to check on repair and rehabilitation work being done here.
June 8 - Collaborator A. E. Buchenberg, to discuss stabilization problems.
June 15 - Archaeologist E. K. Reed, of the Regional Office.
June 20 - Architect Saunders.
June 21 - Architect Saunders, Forester Katcliff, and Naturalist Sullivan.

DONATIONS AND ACCESSIONS: An old 16 gauge shotgun was donated to the museum by Thomas D. Casanega. The gun had belonged to his father, an early day peace officer in Southern Arizona, and a friend of Pete Kitchen.

PERSONNEL: Two days of annual leave taken by Ranger Brewer during month.

MAJOR REPAIR AND REHABILITATION: Restoration of the nave roof is complete. New roofs over ranger residence, custodian residence, and comfort station, await only hot asphalt and gravel. Scratch coat of plaster has been applied to ranger residence and garage.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tuzigoot National Monument
Clarksdale, Arizona
June 22, 1947

MEMORANDUM FOR the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for June, 1947.

Visitor Total: Travel for the month seemed to 1220 . The trend was normal for June--the folks were taking the kids with them on a vacation.

Guide and Contact Service: An average of 20 minutes each for 264 ruins parties and 21 minutes each for 318 ~~344~~ museum parties kept the ball rolling all month. All parties arriving during visiting hours were given orientation talks and at least one NPS man was stationed at the museum as long as it was open. Temporary Ranger Lee E. Denke entered duty June 22.

Personnel Time: Museum: 112 hours 10 minutes. Ruins: 80 hours 45 minutes. Total time for Custodian Cotter: 56 hours; for Ranger Richert, 130 hours, 55 min. for Temporary Ranger Denke: 4 hours, 50 minutes.

Park Service Visitors: Tuzigoot welcomed last month Supt. and Mrs. Harold C. Bryant of Grand Canyon National Park, Administrative Assistant and Mrs. Jim Eden of Grand Canyon, Ranger Paul Schumacher of Casa Grande, Naturalist Charlie Steen and Photographer George Grant of Region Three and the combined entire staffs of Montezuma Well and Montezuma Castle, respectively.

Special Exhibit: A new exhibit was permanently installed at the museum designed to point up to the visitor the difference between pot hunting and archeology. A case was divided diagonally into two halves. The left half reproduced in a setting of earth a litter actually left at the site of a small pueblo two miles south of Tuzigoot by a typical "pot hunter"--a broken shovel, a human femur, well-weathered, a broken metate a couple of pot sherds and a broken beer bottle. A couple of weeds over the wreckage completed the picture. The right half of the case shows in a setting of sand a human skull, a small pot and assorted items of jewelry being whisked and brushed out of the earth with archeologist' tools, a complement of which are displayed. At the side is a notebook used by Ned Spicer during the excavation of Tuzigoot, a photo taken of a burial in the field, and a copy of the published Tuzigoot report by Caywood and Spicer. Typed labels--later to be printed--explain the story of the exhibit. The considerable interest shown by the visitors in this case has been quite encouraging.

Stabilization: Mr. James Hood joined Mr. Arthur Harris in the stabilization project and the work continued in full swing this month. About 2/3 of the rooms needing stabilization have been completed thus far. All work has been photographed before and after completion.

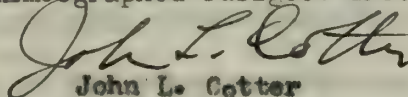

Valedictory Note: After seven years of service at Tuzigoot interrupted only by a hitch in the Army, John L. Cotter and his H.C.W.P. left for a new assignment as Staff Archeologist (will it be H.S.A.W.P?) at Natchez Trace Parkway, Tupelo, Mississippi. Cotter arrived in April, 1940, solo, in a sedan packed with his entire earthly possessions--and room to spare. He is leaving (in the same car) after having shipped 6000 lb. of household goods by freight, with his car packed with Mrs. C., Jean Cotter, age 4 and Larry Cotter, age 7 weeks--and no room to spare. Tuzigoot certainly does things to people.

We are taking with also a load of nostalgia which is not really measurable and a keen feeling of regret at leaving so many fine friends in the Park Service throughout Region Three. We feel that the Southwestern Monuments spirit is too much a part of us ever to be replaced. Our good fortune in having been associated with this fine group will always be with us. Adios, and the best to all the "outfit".

Welcoming Note: The whole Verde Valley joins Tuzigoot in a hearty welcome to Everett and Eleanor Bright who return as Custodian and H.C. W.P. after a stint at Gran Quivira. We have found the memory of their popularity in this community entirely undiminished. In the interim between Custodians, Ranger Richert will be assisted by a newcomer to the Park Service, Temporary Ranger Lee E. Denke, former ensign in the U.S. Navy who entered on duty June 22. Tuzigoot is doing O.K.

Publications Report: 571 mimeographed Tuzigoot Information Sheets; 62 two-fold leaflets.

John L. Cotter
Custodian

Flagstaff, Arizona.

June 26, 1947.

MEMORANDUM for the Regional Director, Region Three.

19

There follows a report of activities in Walnut Canyon National Monument for June, 1947:

Weather. Dry and windy. Several trees were blown down, some damaging telephone line. One that went down between the comfort station and the parking area left quite a gap in the vegetation.

There are numerous complaints about the bad corrugations in the entrance roads. They are so dry that blading is almost useless.

Visitors. Of the 2,691 total, 1,872 made the ruins trip unattended. Seventy one parties, 323 people, used the picnic area. Members of a class in Conservation from the Arizona State Teachers College, and a geology class from Princeton, were both here on June 23.

Personnel. Fifty man-days of per diem labor have been expended on various projects. Two electricians were hired several days to complete wiring of buildings and make connections with the underground cable.

Projects. Most of the telephone line has been overhauled, and is in better condition than for several years. 83.95 tons of cinders have been hauled and spread on parking lot, trails and around fireboxes in picnic area. Two badly needed water hydrants have been installed, one in picnic area and one just outside the administration building. Materials needed for repairing the water trunk line never arrived, so little was accomplished on that project. The project of installing the underground power cable is as complete as can be done until the power line poles are in place. We have electricity from a 3 KW plant in the administration building and comfort station as well as in the residences. Three wires were laid to the houses, should we ever need to use an electric stove.

Publications Report. We have on hand, 50 2-fold leaflets and 40 Location Maps No. 6. We are only giving one per party when we think they really want one.

Memorandum for the Regional Director, Region Three.

There follows a report of activities in Wahatche National Monument for June, 1937:

Weather. Dry and windy. Several times a day there was a light breeze from the west. The temperature was in the 70's and 80's. The ground was very dry.

There are numerous complaints about the lack of water in the entrance roads. They are no longer usable in many places.

Visitors. Of the 2,431 total, 1,872 were the main attraction. Several one-day parties, 241 people, were in the area. Several of a class in Conservation from the National Park Service College, and a party of 15 from Washington, were also in the area.

Personnel. Fifty men-days of part-time labor have been expended on various projects. Two electricians were hired several days to complete wiring of buildings and make connections with the underground cable.

Projects. Work at the telephone line has been completed, and is in better condition than for several years. 22.15 miles of electric line have been installed and wired on public lot, trails and around the monument. The newly wired area extends from the entrance building to the picnic area and was just outside the administration building. Electric lines were installed in the water tower area, as it is now needed for replacing the water tower. The project of installing the underground power cable is as complete as can be done until the power line is laid in place. We have started to lay a 3 1/2 inch line in the administration building and connect it to the entrance. These wires were laid to the house, which is ever used to use an electric stove.

Proposed Project. We have on hand, 50 2-foot sections and 47 sections of 2 1/2 inch line. We are only waiting one day to start work on them. They really are one.

MEMORANDUM for the Regional Director, Region Three.

Following is our monthly narrative report for the month of June;

VISITATION	This Month	Travel Year to date	Fiscal Year
Visitor Total	8856	55977	89493
Armed Forces	403	5158	8953

June, not to be outdone by previous months, has broken all records for travel since actual count has been made. 8856 visitors in 2077 cars is the mark set this June. The fiscal year total of 89,493 is a figure to be very proud of with only three permanent men to handle them. I believe I would be very conservative in estimating we have missed some four or five thousand visitors who have entered before the checking station opens or after it closes. Next month we hope to catch a part of this number by staggering shifts but we will always miss a lot of people. An interesting sidelight on the fiscal year travel figure is that Armed Forces Use is just barely one percent of total visitation.

Mr. and Mrs. Harvey Cornell accompanied by friends stopped in on a "postman's holiday". Rennie and Elsie Saunders were in on our repair work and were accompanied by Mrs. Tillotson on one trip. We are always glad to have these folks in and wish they could come more often. With continuing Army rocket tests we have had several Army and Navy officials in including Major General Homer of Fort Bliss and Lieutenant General Gerow of Fort Leavenworth Command School. Any number of photographers were in hoping to beat the new Standard Oil picture by Ansel Adams. The month gave us 25 school groups from New Mexico, Texas, Colorado, Kansas, Oklahoma and Arizona with 542 pupils and sponsors. We were glad to welcome these students and hope their trips lead to an increase in this type visitor next year.

We are happy to report a big improvement in the looks of our residential area and Administration Building. A contract was let for replastering and reroofing several of our buildings preventing further deterioration however much remains to be done and we are hoping to get it all in shape before too long.

The White Sands Service Company reports one of the heaviest June sales months in its history.

72 72 67.27

...for the

Following is our summary narrative report for the results of tests:

[illegible]

one is that foreign and domestic of total liberation.

in this case visitor next year.

It is a pleasure to report a big improvement in the quality of our work. A comparison of the results of our first and second attempts shows that we have been able to do more and to do it in less time.

The White House denies reports that the President is in the hospital.

**June Narrative Report
June 27, 1947**

Ranger Service was lacking this month in many instances due to our personnel shortage, Ranger Steel being away a portion of the month and unforeseen events such as plugged sewer lines, septic tanks, etc. We are in hopes that some day we can report giving ranger service of the duration and quality the visitor deserves but maintenance duties are running so heavy we simply can not give the time we would like to each visitor.

Our first fatality occurred Sunday at White Sands. A Reverend H. Fred Cole suffered a slight heart attack while playing in the sands. He was brought to Headquarters and was seemingly much better when a second and fatal attack struck him. He was taken to Alamogordo and then to El Paso where he lived.

All of the leaflets on White Sands are gone and many requests are turned down daily. Publications on hand are as follows;

WHITE SANDS NATIONAL MONUMENT FOLDER	0
SOUTHWESTERN NATIONAL MONUMENTS FOLDER (OLD)	2970
GLIMPSES OF OUR NATIONAL PARKS (100 received during month)	118

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument for the month of June, 1947:

Visitors this month: 505 Travel Year to date: 2189

Weather: Unusual weather conditions prevailed during the month. The days, for the most part, were cooler than usual; clouds appeared in the sky almost every day, except when Photographer George Grant was here. There were even several traces of precipitation.

Roads: The roads were dusty and "washboarded" and the source of considerable complaint. No work was performed, except at Sunset Crater. The approach from Sunset Crater is safe enough for experienced drivers and will probably be in fair shape for the average visitor shortly after the rains begin.

Travel: Visitor use shows an increase of 25% over last year in spite of the fact that the Sunset Crater approach is closed. More of our visitors are families definitely on a vacation than at any time since the beginning of the war. The influx of teachers seems especially heavy. Average contact time is down simply because we cannot ignore other aspects of the job to spend the desired amount of time with visitors.

Public Relations: A lecture on the history and organization of the National Park Service was given in the course on Conservation of Natural Resources at Arizona State College in Flagstaff. This was part of a cooperative program by personnel from Grand Canyon National Park and Walnut Canyon National Monument.

The series of lectures sponsored by the Flagstaff Chamber of Commerce mentioned last month have been discontinued indefinitely. An interest in promoting travel to local points of interest is widespread, but to date it has not been organized effectively.

Personnel: Mr. Ralph Fish has been selected to fill the road maintenance position and will enter on duty shortly after July 1. He is a valuable addition because of his previous experience in this vicinity.

As yet we do not have a temporary ranger, but again we hope to have one on duty next month.

The weather was very good during the month. The days were warm and the nights were cool. The water was very good and the food was very good. The people were very happy and the animals were very healthy.

Stabilization: The ruin stabilization project continued with efforts concentrated primarily on the amphitheatre at Wupatki Ruin. Due to various "sings", stock branding and so forth the turn over in personnel was considerable. To facilitate hauling of water a small used water tank mounted on a trailer was purchased at a reasonable price.

NPS Visitors: Photographer George Grant and Archeologist Steen spent a portion of June 10 at Wupatki regarding stabilization and taking photographs. As usual George did an excellent job.

Activities of Outside Agencies: The Bureau of Reclamation crew completing plans for Coconino Dam, 8 miles west of Cameron, spent several days in the vicinity of Black Falls on a topog map. At its maximum height the water level will supposedly be one foot above the present Black Falls diversion weir. This will mean that some of the Monument land will be inundated, but the extent cannot be determined until completion of the survey project.

General: An undue amount of time and money was spent on keeping the trucks in operational order or having them repaired. The thirteen year old dump truck assigned to Wupatki-Walnut ate up another \$130.00 for repairs, bringing the total for this fiscal year to more than \$260 on repairs only for this piece of equipment. The same condition prevails with the pick-up truck.

Visitors encountering difficulty on the road and requiring a tow to Flagstaff totaled two this month. Thanks to Custodian Brewer we only had to tow one halfway and then Jimmy came along on his way to town and took over for us.

Publications Inventory: Through cooperation of the Region Two Office our meager supply of Wupatki leaflets was supplemented, and copies of "Glimpses of Our National Parks" were received from Washington.

Wupatki Informational Leaflets: 75 copies
Glimpses of National Parks: 50 "

[illegible]

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The majority of the population of the United States is now living in urban areas, and this is a result of the process of urbanization, which has been going on since the beginning of the 20th century.

"The purpose of this study was to determine if there were any differences in the behavior of the subjects who had been exposed to the atomic bomb compared to those who had not." The study was conducted by Dr. Robert J. Serfaty and his colleagues at the University of California, Los Angeles.

NAME Russell L. Mahan
TITLE Custodian

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Heredith M. Guillet

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as:
"museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Homer F. Hastings
TITLE Custodian

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Malcolm T. Bull

TITLE Acting Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.)

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.)

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

A small logo in the bottom left corner, featuring a stylized outline of the state of Arizona. The text is contained within a rectangular box that overlaps the state outline.
